

DRAFT

The staff recommends that the Review Board adopt the following motion:

*That*, when all of the material redacted in an assassination record duplicates material that was already the subject of final determinations by the Review Board in another assassination record, such material is to be released or postponed under the same terms and conditions as provided by the Review Board in its prior final determinations regarding the duplicated material; *however*, when the duplicate material appears in a materially different context from that in which the prior final determinations were made (*e.g.*, a different file location that would identify a sensitive source or method), the Review Board shall consider the redaction separately. Documents released to the public pursuant to this motion shall be separately identified in notices in the *Federal Register*.
