Re: BRILAB Tapes

Dear Chief Judge Sear:

On behalf of the Review Board, I wish to thank you for all of the cooperation you have shown our staff this month. By allowing us access to the fruits of the electronic surveillance in the New Orleans aspect of the "BRILAB" investigation, and then sharing your recollections with us, you have greatly helped us in our task: to locate and identify any material related to the assassination of President Kennedy -- *or* to document for the public that a thorough and conscientious review located no such material. In either case, we hope to put the public in the best possible position to judge for itself the merits of conspiracy allegations involving Carlos Marcello.

On June 12, you gave to Phil Golrick of our staff four audio cassettes containing excerpts from BRILAB-related recordings. As you suggested, these cassettes do not contain anything related to the assassination of President Kennedy and accordingly are enclosed herewith.

Once again, thank you for time and assistance.

Sincerely yours,

David G. Marwell  
Executive Director

OR  
The Honorable John R. Tunheim  
Chair
