

MEMORANDUM

To: Tim Wray, Jeremy Gunn
cc: Manuel Legaspi, Kevin Tiernan, Doug Horne
From: Christopher Barger
Subj: Military MONGOOSE files at NARA
File No: 4.23.2.6

A cursory review of the military MONGOOSE material recently located at NARA reveals that there are *absolutely* records contained within that are worthy of ARRB attention. I have only reviewed about a dozen folders, and I have seen a healthy number of documents which I would tend to think are assassination records.

For demonstrative purposes, I transcribed the titles of each folder contained in the boxes, and have created this working index. This index is not official. While it is not classified, it should be considered sensitive, and used on an "eyes only" basis by ARRB staff. Outside dissemination of this index is **not** recommended.

There are six cartons (not Hollinger boxes or NARA boxes) of material; one is classified "Top Secret", and the other five classified "Secret." The index is as follows.
