

Mildred Stegall Name Files

It appears that neither the LBJ Library nor the Assassination Records Review Board has reviewed the following name files from the Mildred Stegall FBI index to determine whether they contain assassination-related information. In compliance with the JFK Act, the Review Board requests that the LBJ Library make an assessment of these files for assassination material before September 30, 1998, inform the Review Board of those names that do contain assassination material, and coordinate the processing of these records with the FBI.
