Dear Mr. Kepley:

The efforts you and your staff have taken to assist our work are most appreciated. The inventory of audio/visual material you compiled was very thorough and helpful in the identification of record locations. Les Waffin's efforts to transfer film material onto video tape has been very useful in our work and will be an important tool for researchers in the future.

Please contact me at Ext. 258 if you encounter any other records or information which might be of interest to us. Thank you again for your assistance and cooperation in helping the Review Board fulfill its mandate.

Sincerely,

David R. Montague
