Jeremy regrets that the draft on non-relevant (NAR) documents will not be done in time to fax to you. He will put it on your e-mail so you will have it on your return and you can call him.

I have given SSNs and dates of birth to Barbara (Pereira's office) for the trip to CIA. I told her you would be driving the Volvo; so, if you change cars, it will create a problem. Let me know if I should call her back to give plate number for some other vehicle.

State Department said all was in order in the packet Eric took over for the visas. No further cable info. I called Nerissa yesterday; will call them again later today re Moscow.
