

For Dave Powers - 11/14/96

As you know we found the film at the Library

Copy is now at the Archives

Board designated it an assassination record at a public meeting

There has been some media interest

Wanted to let you know that there was interest in doing a news story on it

You had told me before that your concern was that you did not want the film used in a conspiracy documentary, so ...

If someone wanted to use it for a news story, we would let them know in writing that they could use it for a news broadcast, but that the film is copyrighted and for any other use they would have to get your permission
