

MEMORANDUM

August 5, 1998

To: Laura Denk

From: Sarah Ahmed

Subject: Secret Service Request 17, Logbook for Protective Intelligence Files

The Secret Service recently provided a logbook with respect to CO2 files. The logbook contains individuals who were considered a potential threat to the President. Each individual had a file opened up. The exact dates of the book are unclear, but it does cover the early 1960's. The logbook reflects anyone the Secret Service was interested in regarding the safety of the President. It is significant because of the names it includes and how the Secret Service tracks people.
