Subject: Project--Ballistic Material Analysis

Phil and Jeremy have asked that I help direct you with regard to identifying and cataloging the information concerning any and all ballistics tests conducted pursuant to the investigation of the assassination. I realize you have done some work on this already. I have received from Phil the documents which you have already copied. I also spoke with Dennis about some information he has from tests done by the Army. I will review this information and I would like to speak with you about the project on Tuesday. I understand that you are currently working on a project. Please let me know if Tuesday is a good day to meet and suggest a time range, i.e. morning or afternoon. Thank you.
