AFFIDAVIT

I, (b)(6) ACC swear under oath, administered by Major General Douglas L. Raaberg, the Investigating Officer, the following facts are true to the best of my knowledge:

The hand-written document (1 page) attached to this AFFIDAVIT reflects my notes taken during the production meeting on Thursday, 23 August 2007. I have no additional information pertaining to pylon GZ203 other than it was briefed at said production meeting as being scheduled for a TAC FERRY on Wednesday, 29 August 2007.

Signed this day, the 13th of September, 2007.

(b)(6) ACC

DOUGLAS L. RAABERG, Maj Gen USAF

2 OG Ferry Sortie Electronic Checklist

Ferry Dates: 28-30 August

NLT Three weeks prior to Ferry Sortie

1) At Pre-165, 2 OG/ 2 MXG determines:

- 96 BS will coordinate aircrew for Ferry Sorties, provide the sortie from the MOP, the MP facilities, the step brief, and inputs the data into PEX

IP: (b)(6) ACC

Copilot: (b)(6) ACC

IR: (b)(6) ACC

SILVER AMU will launch for 2BW's Tuesday sortie to Minot

GOLD AMU will recover the 5BW Tuesday sortie from Minot

- 11 BS will provide a POC for the 5BW crew from Minot, recover the 5BW's sortie, provide Thursday's sortie from the MOP, the MP facilities, the step brief, input the data into PEX, and provide a POC to support the crews.

POC:

POC should contact (b)(6) ACC 23 BS/DOS 453-3307 to coordinate

GOLD AMU will launch the 5BW sortie to Minot on Thursday

SILVER AMU will be recover the 2BW's Thursday sortie from Minot

NLT Two weeks prior to Ferry Sortie

1) Ferry Aircrew will:

- a) Forward crew names and SSNs on TDY worksheet to 2 OG/RA

(b)(6) ACC 5589). Orders should be ready on mission planning day

NLT One week prior to Ferry Sortie

1) Ferry Aircrew will:

- a) Make billeting arrangements at Minot (DSN: 453-6161, Press 0)

- b) Make transportation arrangements at Minot (DSN: 453-3121)

1 Fill out U Drive It worksheet on Ferry Flight Webpage

2. Email worksheet to 5 LRS/LGRO

- c) Report to 2 OG/OGV to retrieve Mission Package for review

2) Escort for Minot Aircrews will:

- a) Make arrangements for Minot aircrew to store life support at DOL

- b) Make arrangements for Minot aircrew to store secrets

1 of 7

UNCLASSIFIED

UNCLASSIFIED

Monday (Mission Planning Day)

- 1) Ferry Aircrew will:
 - a) Review PTOB slides
 - b) Review Jettison procedures
 - c) Review Ballast Fuel procedures
 - d) Review Fuel Considerations
 - e) Review Landing Considerations
 - f) Develop Contingency Plans
 - g) Brief OG/CC or representative (as required)
 - h) Ensure proper fuel load is inputted into PEX and all data is inputted correctly. If incorrect contact squadron short range scheduling, have them update PEX and contact MOC.
 - i) Contact AMU launching your jet to ensure the proper fuel load (give them fuel a copy of the fuel loading sheet)
 - k) Print out Orders from DTS
 - l) Pick up signed flight orders for your return trip (if different than original flight orders)
 - m) Contact MX to confirm debrief location when you return (should be at the AMU which is recovering the jet)
- 2) 2 OG/OGV will brief scheduled SOFs and DIPs for both Ferry Days on Ferry Flight Specific Information.
- 3) Escort for Minot Aircrews will:
 - a) Contact 23 BS (DSN 453-2660) to confirm 5 BW aircraft planned departure time on the first ferry day
 - b) Contact 2BW MOC (x 4041) to confirm where debrief will occur (typically the AMU which is recovering the jet)

Tuesday (1st Ferry Day)

- 1) Ferry aircrew will:
 - a) Show at _____ L
 - b) Notify 2 OG/CC or representative at crew step. Relay Minot and Barksdale weather forecasts to the OG/CC for arrival times.
 - c) Notify 2 OG/CC or representative when ready to taxi
 - d) Check destination weather just prior to EDP via HF or phone patch with a command post
Minot WX DSN: 453-6385
 - e) Accomplish Ground Weapons check at final parking at Minot
 - f) After landing, contact launching ops desk with mission effectiveness information
- 2) Escort for Minot Aircrew will:
 - a) Meet crew at parking with U-Drive it vehicle that they reserved

2 of 7

UNCLASSIFIED

UNCLASSIFIED

- *If they are getting a rental car, meet crew at jet in crew bus
- b) Deposit Minot aircrew's secrets at squadron
- c) Deposit Minot aircrew's life support at life support
- d) Escort Minot aircrew to Mx debrief
- e) Ensure Minot aircrew has all necessary contact numbers.
- f) Ensure Minot aircrew know where to brief on Wednesday and coordinate support (if required)

Wednesday

- 1) 5 BW Aircrew will:
 - a) Meet Escort at the appropriate squadron to mission plan
 - b) Ensure proper fuel load is inputted into PEX and all data is inputted correctly. If incorrect contact squadron short range scheduling, have them update PEX and contact MOC.
 - c) Contact AMU launching your jet to ensure the proper fuel load (give them fuel a copy of the fuel loading sheet)
- 2) 2 BW Aircrew (while at Minot) will:
 - a) Call MOC (x4041) to confirm where they will debrief their return trip

Thursday (2nd Ferry Day)

- 1) 2 BW Ferry aircrew (at Minot) will
 - a) Show at _____ L
 - b) Notify 5 OG/CC or representative at crew step
 - c) Notify 5 OG/CC or representative when ready to taxi
 - d) Check destination weather just prior to EDP via HF or phone patch with a command post.
Barksdale WX DSN: 781-3136
 - e) Accomplish Ground Weapons Check in Hammerhead
- 2) Escort for Minot Aircrew will:
 - a) Arrange for transportation for the aircrew (Crew Bus/U-Drive it)
 - b) Meet crew at Life Support at show time
 - c) Accompany Minot crew to step brief, and retrieve secrets
 - d) Drive Minot aircrew to jet
 - e) After aircraft launches, return U-Drive it to 2 Trans

UNCLASSIFIED PRP REVIEWED

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS 5TH MUNITIONS SQUADRON (ACC)
MINOT AIR FORCE BASE, NORTH DAKOTA

4 April 2007

MEMORANDUM FOR

(b)(6) ACC

FROM: 5 MUNS/CC

SUBJECT: Letter of Reprimand

1. On 7 March 2007 you failed to use or enforce the use of proper technical order, specifically the 5 MXG Massive Modular Block (MMB) operations checklist, during MMB operations in the Weapons Storage Area.

2. You are hereby reprimanded! As a Non-Commissioned Officer of the United States Air Force, you are expected to maintain the highest standards of professional conduct, integrity, and responsibility. Failure to use a technical order or demand others to use them in your presence puts both yourself and others at risk. You chose to ignore your responsibilities to enforce technical order usage, risking your safety and the safety of others. Your actions in this case, combined with the loss of situational awareness jeopardized not only equipment, but personnel under your supervision. AFI 36-2618 paragraph 4.1.6 states about NCOs "Exceed the standards and expectations levied upon their Airman. Epitomize excellence, serving as a role model for Airman to emulate." On that account, you have failed. In fact, I consider your failure an act of dereliction of duty. NCOs set the tone for a team or work center. I cannot tolerate even a tone of ambivalence toward the enforcement of Tech Order use.

3. I have issued only one standing order...that of Tech Data usage. In that order all members of 5 MUNS are required to "the technicians performing the task must have the appropriate technical data on-hand, and open to the page and step of the procedure he or she is performing." You may not have had knowledge of that order, but you because of your experience as an NCO, and a former Quality Assurance Inspector, know what is required for properly discharging your duties while performing tasks. I absolutely will not tolerate your complacency and failure to do your duty. If you fail to use or enforce technical data use again, I will take the most severe action allowable against you. As a Staff Sergeant in the United States armed forces, I expect you to live up to the standards of one. You are expected to set, enforce, and exemplify standards of conduct; you have failed to do so. Your conduct has diminished your otherwise positive reputation, and brought discredit upon the squadron. You must take positive steps to turn around your recent trend of poor attention to detail and mishaps or security incidents that were your responsibility to ensure are done according to standards...your status as an NCO depends upon it.

3. AUTHORITY: 10 U.S.C. 8013. PURPOSE: To obtain any comments or documents you desire to submit (on a voluntary basis) for consideration concerning this action. ROUTINE USES: Provides you an opportunity to submit comments or documents for consideration. If provided, the comments and documents you submit become a part of the action. DISCLOSURE:

MEMORANDUM FOR: 5 MUNS/MXWS/CC

FROM: (b)(6) ACC

SUBJECT: Letter of Reprimand Response

1. The incident on 07March 2007 of not enforcing the use of tech data, is a matter of grave seriousness, and I acknowledge and accept the fact that no one was using tech data is unacceptable. It was a brief moment of error not complementary to my dependability or integrity. As a NCO, I accept responsibility for my actions, and I can assure you there will be no repeat occurrences. I'm looking forward for the chance to rebuild my reputation and record on the job in the days to come.

23 Feb 07

MEMORANDUM FOR (b)(6) ACC

FROM: 5 MUNS/MXWS

SUBJECT: Letter of Reprimand

1. On 08 Feb 07, Quality Assurance discovered the "B" lock drawer of the key safe unsecured. As the key issuing authority and "A" lock for the Weapons Handling Section key team, it was your responsibility to ensure the security container was properly closed. This incident would not have occurred if you had performed your duties and verified (b)(6) ACC secured the "B" lock drawer as prescribed in applicable regulations. As a supervisor, it is your responsibility to adhere to all measures of security that apply to your duties. You should have maintained situational awareness to ensure all security actions and written guidance were properly followed.

2. You are hereby reprimanded. As a Non-Commissioned Officer of the United States Air Force, you are expected to maintain the highest standards of personal conduct, integrity, and responsibility. Your actions in this case demonstrate a loss of situational awareness, which jeopardized weapons and information security. Additionally, your failure led to undue cost and wasted manpower committed to rectify this incident. Any future violations will be dealt with at higher levels of your chain of command and will be more severe. This reprimand is not to be taken lightly. You will be closely observed in the future to ensure you maintain the standards.

3. AUTHORITY: 10 U.S.C. 8013. PURPOSE: To obtain any comments or documents you desire to submit (on a voluntary basis) for consideration concerning this action. ROUTINE USES: Provides you an opportunity to submit comments or documents for consideration. If provided, the comments and documents you submit become a part of the action. DISCLOSURE: Your written acknowledgement of receipt and signature is mandatory. Any other comments or documents you provide are voluntary.

4. You will acknowledge receipt and understanding. You have three workdays to provide a response and any documents you provide will be filed with this LOR. Any comments or documents you wish to be considered concerning this LOR will be included with your response.

UNCLASSIFIED

1 SAFETY

Class: 1

Type: Major

(b)(6) ACC the SVA allowed a MHU-196/M trailer to operate in the structure without ensuring that all of the missiles were safe and without fuel leaks. At approximately 1100 QA arrived at Structure 1849C to watch a wrap operation of a MHU-196/M trailer to a pylon. Once the operation was over QA looked at the Structure Opening/Closing Checklist to ensure it was being used, and looked to make sure they had the correct T.O.'s to perform Missile Safe Status Checks. The T.O. for performing ALCM Missile Safe Status Checks was not checked off. So, I asked (b)(6) ACC if they check the ALCM's, and they both stated that they only do Missile Safes on the package that they are were working on.

The safety problem is by not ensuring all the missiles were safe, they introduced an electric trailer and motor into a possible combustible environment.

T.O 11N-W80.83-2, (ALCM)

Para 5.2.1.b - "Inspect missiles for possible fuel leaks (visual leaks or presence of fuel vapors or odors) and obvious damage. If a fuel leak, or presence of fuel vapors, or odors are detected, cease all operations, immediately ventilate the area, and notify the proper authority."

TO 11N-W80.85-2, (ACM)

Para 4.2.a - "Inspect missiles for possible fuel leaks (visual leaks or presence of fuel vapors or odors) and obvious damage. If a fuel leak, or presence of fuel vapors, or odors are detected, cease all operations, immediately ventilate the area, and notify the proper authority. Keep ignition sources such as sparks, flames, excessive heat, and operating electronic equipment or motors away from missiles."

LCL-5MXG-Structure Opening/Closing
Step 3 - "Perform Missile Safe Status Checks."

Tasking

UNCLASSIFIED

- COMACC directed repositioning of Air Launched Cruise Missiles (ALCM) and Advanced Cruise Missiles (ACM) between 2 BW Barksdale AFB and 5 BW Minot AFB

FOUO Integrity, Service, Excellence

Security

UNCLASSIFIED

- Details relating to this tasking is NOT FOR PUBLIC RELEASE
- Any public inquiries regarding this operation must be vetted through PA channels
 - If in doubt, do not release the information
- The following information is **AF (b)(3)**
 - The number of missiles at each base
 - ACM/Excess ALCM retirement
 - Remaining ALCM consolidation at Minot AFB
 - Overall program costs

FOUO Integrity, Service, Excellence

Security

UNCLASSIFIED

- Treat the following information as classified IAW existing guidance
 - AF (b)(3)**
 - Augmentation timelines
 - Configuration of the consolidated ALCM force at Minot AFB
 - Post consolidation nuclear-related operations (surge and augmentation timelines and activities)
 - Vulnerability, weaknesses and countermeasures
 - Operational performance and test data
 - System survivability
 - Readiness rates

Weapon Check

- Ensure
 - STRIKE mode enabled
 - TF Mission is loaded
- Engines 3 & 4 at 80% for at least 5 minutes
- Push all overhead air outlet knobs in to allow max cooling airflow
- Turn on one MIU at a time (60 second time limit)
 - FRMT 7
 - ALCM: 1A—OFF/SAFE
 - ACM: 1C—OFF/SAFE
 - FRMT 7 information should match aircraft weapons load exactly. If not, call qualified personnel.
 - If a NUCLEAR CAUTION or MASTER FAULT indication is present on the ground, turn MIU power OFF. Call qualified personnel. DO NOT REAPPLY MIU POWER.

Ground Ops

U.S. AIR FORCE

- Check Comm equipment
 - VSAT Check with CP (UL: 295 725/DL: 262.125) w/1019 fill
 - KBAD will use these same frequencies
 - UHF Common Frequency: 300 325
 - Ensure ground personnel are clear of aircraft for HF check
- Check AR doors (normal & alt) in chocks, and immediately after T/O
- Check applicable fuel tanks will take fuel

UNCLASSIFIED Integrity - Service - Excellence

UNCLASSIFIED

Mission Execution

U.S. AIR FORCE

- OG/CCs must specifically execute the TF Sortie
 - 2 OG → 5 OG telecon prior to takeoff to crosscheck
 - Weather
 - Airfield Status
 - Priority Landing Window
 - Will be "executed" prior to taxi
- TF Sortie is the number one priority on the airfield until airborne
- 5 OSS/A-5N will relay all pertinent details of the sortie as they happen to OG/CCs
 - KMIB/KBAD WX
 - Aircraft status
 - Airfield status
 - Divert status

UNCLASSIFIED Integrity - Service - Excellence

UNCLASSIFIED

Mission Go / No-Go

U.S. AIR FORCE

- Weather Considerations
 - Wet Runway
- CG/Ballast configuration preventing safe mission accomplishment
- Any gear hanging
 - Evaluate increased fuel degradation
 - RTB at EDP, if required
- 2 engines shutdown or 1 engine shutdown for fire/fire indication (AFI 11-8-52V3)
- Loss of pressurization
- Any aircraft malfunctions precluding safe recovery of the aircraft

UNCLASSIFIED Integrity - Service - Excellence

UNCLASSIFIED

Enroute Decision Point

U.S. AIR FORCE

- EDP
 - Hill City (HLC) VORTAC
 - Useable fuel remaining
 - KMIB - KBAD: 88K
 - KBAD - KMIB: 97K
 - Contact the intended landing base's Command Post (or home station, if no contact) to obtain:
 - Actual and forecast weather for the landing window
 - Runway status/condition (Wet/Dry)
 - If conditions are questionable, contact home station OG/CC for guidance
 - No CG/ballast fuel issues
 - No aircraft malfunctions precluding safe recovery of the aircraft

UNCLASSIFIED Integrity - Service - Excellence

UNCLASSIFIED

Aircraft Commander Responsibilities

U.S. AIR FORCE

- Ensure crew thoroughly understands the operational mission requirements and procedures governing hazardous cargo to be airlifted
- Comply with applicable in-flight and emergency notification procedures
- Plan route of flight to avoid over flight of populated or other critical areas
- Refuse to accept any ATC clearance would interfere with operational necessity or flight safety
- NO TRAINING ACCOMPLISHMENT (AS PER REPORT)

UNCLASSIFIED Integrity - Service - Excellence

UNCLASSIFIED

In-Flight Notification Procedures

U.S. AIR FORCE

- Contact Command Post 30 minutes out
 - KMIB: 321.0
 - KBAD: 311.0
 - Announce carrying "Inert / Hazardous Devices"
 - Verify they are in receipt of arrival notification
 - If not in receipt:
 - Announce: "CHILL 21, ETA 1615Z, Hazardous Cargo Class 3J, 12 x External inert devices; Estimate landing 1645Z"

UNCLASSIFIED Integrity - Service - Excellence

UNCLASSIFIED

~~FOR OFFICIAL USE ONLY~~

Emergency Notification Procedures

- If landing with an IFE
 - Advise ATC as to the nature of the Emergency
 - Hazardous Cargo aboard
 - State intentions
- If landing at a civil airport
 - Specify isolated taxi and parking is required
 - Location of cargo
 - Withdrawal of non-essential personnel
- Hazard Class 3J
 - Request emergency / firefighting equipment in place upon landing
- "Chill 11, No 1 engine out, inert/hazardous devices under both wings, 5 personnel onboard, planned landing _____, Z, fuel remaining _____, K; Hazard Class 3J; no transmissions within 50 feet of the aircraft (cell phones, pagers, bricks, PDAs, etc); immediate withdrawal of non-essential personnel requested"

UNCLASSIFIED Integrity - Service - Excellence

Landing

- Priority Landing Window: 1600-1845Z
 - You are the Priority Lander—SOF has the Hammer
 - If late TAO, 5 0531/ASW / 23 85 FCOO / SOF will coordinate with OGICC to ensure landing window is stopped accordingly to ensure no other aircraft activity is in progress during TF sorda recovery
- Planned at IAF with 330GW—Get status update
 - Runway should be dry—Crosscheck landing data!
 - Suitable landing WX
 - Ensure proper ballast fuel / CG configuration
 - If conditions good, continue
- Commence the approach with enough fuel for 2 additional approaches
 - If not in safe position to land, go around
- If runway is wet
 - No Chase—Use the "glare ice" landing procedures (shut down outboard engines)
- If weather / airfield conditions prevent landing
 - Get gas from the tanker, if scheduled
 - RTB or attempt landing as directed by OGICC post AR

UNCLASSIFIED Integrity - Service - Excellence

Tanker Support

- Dedicated "on-call" tanker airborne (scheduled) with Chill XX on AR313N IP @ 1600 - 1615Z
 - If you need extra fuel, you have "tanker priority" over the training sortie
- AR313N ARIP EIC147/030
 - Direct MCU Direct ARIP
 - If fuel situation critical, receive fuel from Shreveport
 - Approach from the pattern
- Take enough fuel to reattempt landing / RTB / Divert
 - 60K Onload by the ARCP
 - AR313N AREX direct KMIB with 51.7K useable fuel @ FL250
 - AR313N AREX direct KBAD with 76.7K useable fuel @ FL250

Jettison

- Missile / Pylon Jettison is an Emergency Procedure!
- OGICC must grant explicit permission prior to jettison of any external stores
- Jettison areas are IAW MAFB/BAFBI 11-250

UNCLASSIFIED Integrity - Service - Excellence

Jettison Considerations

U.S. AIR FORCE

- Review jettison procedures in T.O. 1B-52H-30-1/4
 - Must have OAS and MIU power ON
 - Comply with T.O. 1B-52H-30-1-1/30-4-1 missile jettison airspeed envelope limits (with and without adjacent missile present)
 - Selective missile jettison via WCP or CF E preferred vice total missile jettison with Pilots Jettison switch
 - Jettison of aft inboard missiles (LP6, RP4) is inhibited if OAS does not indicate bomb bay doors closed and latched
- Partial missile jettison preferred for CG considerations
- Jettison Pylons as a last resort
 - At least one MIU must be ON
 - in the event only one external MIU is operable, jettison that pylon last
 - Unless safety of the aircraft is in jeopardy, DO NOT jettison pylons any time there are missiles loaded

UNCLASSIFIED Integrity · Service · Excellence

UNCLASSIFIED

Barksdale Jettison Area

U.S. AIR FORCE

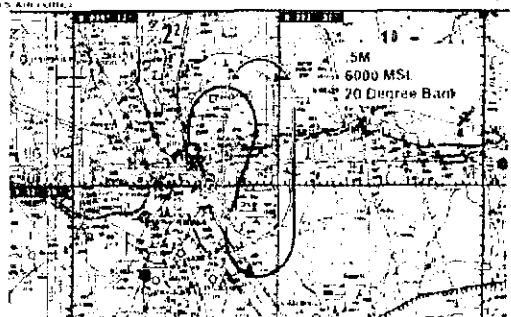

- IFR/VFR External Stores/Weapon Jettison Area: BAD116/2 4 DME
- 1.6 NM east of RWY 33 approach end
- Do NOT overfly the Barksdale WSA while approaching or leaving the jettison area
- Airfield Management will activate the Secondary Crash Net and notify 2d Security Forces of estimated time of intended jettison
 - Time and conditions permitting, SFS will attempt to evacuate and secure the area in order to prevent injury or loss of life
