CERTIFIED MAIL – RETURN RECEIPT REQUESTED

Mr. John Greenewald
[REDACTED]

Dear Mr. Greenewald:

This letter is the final response to your August 4, 2009 Freedom of Information Act (FOIA) request for a copy of:

Accession Number: ADB199753
Title: Nuclear Accident Response Capability Listing
Date: March 1995
Pagination: 144
Report Numbers: DNA-5100.52.1L, XD-DNA

Your request was transferred to our office by the Defense Threat Reduction Agency (DTRA) to review portions of the document that are under the jurisdiction of the National Nuclear Security Administration. The request was received in our office on December 21, 2009.

We reviewed the enclosed document "Nuclear Accident Response Capability Listing" and identified two items that reference DOE/NNSA equities: Page 4, number 9, "Accident Response Group (ARG)," and Page 4, item 10, "DOE Nuclear Emergency Support Team (NEST)." We determined that these items are fully releasable as written.

However, portions of the document were withheld by the Defense Threat Reduction Agency prior to our review. DTRA determined that the document contains information exempt from disclosure under 5 USC §§ 552(b)(2) and (b)(6), FOIA Exemptions 2 and 6. The telephone numbers of the government personnel have been withheld under Exemption 2, which allows the withholding of information, which, if release would allow the circumvention of an agency rule, policy, or statute thereby impeding the agency in the conduct of its mission. Contact information is for internal use only and may have a negative impact on Agency operations if released.

The names of government personnel and their email addresses have been withheld under Exemption 6 in accordance with current Department of Defense policy. Exemption 6 applies to

information of a personal nature, such as medical, personnel, or other records, which if disclosed would result in a clearly unwarranted invasion of personal privacy of the individual.

The Acting Chief of DTRA Public Affairs is the initial denial authority for the information withheld by DTRA. The information withheld by DTRA may be appealed to the Deputy Director, DTRA, DIR-PA-F (FOIA), 8725 John J. Kingman Road, MSC 6201, Fort Belvoir, VA 22060-6201, within 60 days of the date of the final response. The appeal should reference Case Number 09-196. Both the envelope and the requester's letter should clearly identify that a Freedom of Information Act Appeal is being made.

There are no fees chargeable to you for processing this request.

If you have questions, please contact Ms. Karen Laney by telephone at (505) 845-5310 or email klaney@doeal.gov and reference Control Number FOIA 10-00066-K.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Carolyn A. Becknell', written in dark ink.

Carolyn A. Becknell
Freedom of Information Act Officer

DTRA Case No. 09-196

Nuclear Accident Response Capability Listing.

DEFENSE NUCLEAR AGENCY WASHINGTON DC

MAR 1995

**Distribution authorized to U.S. Govt. agencies and their
contractors; Critical Technology; 19 Jun 95. Other requests
shall be referred to Defense Nuclear Agency, 6801 Telegraph
Road, Alexandria, VA 22310-3398.**

Redistribution Of DTIC-Supplied Information Notice

All information received from DTIC, not clearly marked "for public release" may be used only to bid on or to perform work under a U.S. Government contract or grant for purposes specifically authorized by the U.S. Government agency that is sponsoring access OR by U.S. Government employees in the performance of their duties.

Information not clearly marked "for public release" may not be distributed on the public/open Internet in any form, published for profit or offered for sale in any manner.

Non-compliance could result in termination of access.

Reproduction Quality Notice

DTIC's Technical Reports collection spans documents from 1900 to the present. We employ 100 percent quality control at each stage of the scanning and reproduction process to ensure that our document reproduction is as true to the original as current scanning and reproduction technology allows. However, occasionally the original quality does not allow a better copy.

If you are dissatisfied with the reproduction quality of any document that we provide, please free to contact our Directorate of User Services at (703) 767-9066/9068 or DSN 427-9066/9068 for refund or replacement.

DISTRIBUTION LIST UPDATE

This mailer is provided to enable DNA to maintain current distribution lists for reports. (We would appreciate your providing the requested information.)

- ☐ Add the individual listed to your distribution list.
- ☐ Delete the cited organization/individual.
- ☐ Change of address.

NOTE:

Please return the mailing label from the document so that any additions, changes, corrections or deletions can be made easily. For distribution cancellation or more information call DNA/IMAS (b)(2)

PART A:

OVERVIEW

1. REFERENCES:

a. DoD Instruction 5100.52, "DoD Response to an Accident or Significant Incident Involving Radioactive Materials," 21 Dec 89.

b. Joint Department of Defense, Department of Energy, and Federal Emergency Management Agency Agreement for Response to Nuclear Weapon Accidents and Nuclear Weapon Significant Incidents, 8 Jan 81.

c. Interagency Agreement Between the Department of Energy (DOE) and the Department of Defense for Temporary Storage of DOE Shipments at Military Installations, 10 Apr 87.

d. JCS Pub 1-03.6, Joint Reporting Structure, "Event/Incident Reports," 7 Nov 80.

e. HQDNA(AR)-124 3M, "List of Military and Civil Defense Radiac Devices," 1 Dec 1992.

2. PURPOSE:

The Nuclear Accident Response Capability Listing (NARCL) provides a comprehensive listing of DoD and DoE installations and facilities with nuclear accident/incident response and radiation detection capabilities. This listing is compiled and published by the Defense Nuclear Agency under the auspices of the DoD Joint Nuclear Accident Coordinating Center, to assist response force personnel in responding to a nuclear weapon accident/incident.

3. DEFINITIONS:

a. **Joint:** Military and civilian agencies interacting to accomplish designated tasks.

b. **Broken Arrow:** A term used in the Department of Defense (DoD) to identify and

report an **accident** involving a nuclear weapon/warhead or nuclear component. In the Navy this includes a "significant incident" as defined in DoD Directive 5100.52. **See nuclear weapon accident.**

c. **Bent Spear:** A term used in the DoD to identify and report a nuclear **incident** involving a nuclear weapon/warhead or nuclear components. In the Army and Air Force, this term also includes a "significant incident" as defined in DoD Directive 5100.52. **See nuclear weapon significant incident.**

d. **Dull Sword:** (Nuclear Safety Deficiency) Any mishap which could cause damage to a weapon that field units are authorized to correct (bent fins, dents in ballistic case, etc.). Includes any deliberate unauthorized act which degrades weapon reliability or safety such as damage or malfunction of the suspension and release systems, or the failure of handling, loading, storage, maintenance, transportation, or test equipment involving a nuclear weapon.

e. **Faded Giant:** A DoD term used to identify a nuclear reactor accident or an accident involving nuclear material.

f. **Improvised Nuclear Device (IND) Incident:** Any event, resulting from a deliberate act, involving nuclear weapons or nuclear materials, which includes any of the following:

(1) Sabotage, seizure, theft or loss of a nuclear weapon or radiological nuclear weapon component.

(2) Fabrication and employment of an IND.

(3) A credible threat of "1" or "2" above

(b)(6)

DNA 6-19-95

Avail and/or

Dist

Special

C-2

g. **Nuclear Reactor Accident:** An uncontrolled reactor criticality resulting in damage to the reactor core or an event such as loss of coolant that results in significant release of fission products from the reactor core.

h. **Nuclear Weapon Accident:** An unexpected event involving nuclear weapons or nuclear components that results in any of the following:

(1) Accidental or unauthorized launching, firing, or use by U.S. forces or U.S. supported Allied forces, of a nuclear-capable weapon system.

(2) An accidental, unauthorized, and/or unexplained nuclear detonation.

(3) Non-nuclear detonation or burning of a nuclear weapon or nuclear component.

(4) Radioactive contamination.

(5) Jettison of a nuclear weapon or nuclear component.

(6) Public hazard, actual or perceived.

i. **Nuclear Weapon Significant Incident:** An unexpected event involving nuclear weapons, nuclear components, or a nuclear weapon transport or launch vehicle when a nuclear weapon is mated, loaded, or on board, that does not fall into the nuclear weapon accident category but:

(1) Results in evident damage to a nuclear weapon or nuclear component to the extent that major rework, complete replacement, or examination or recertification by the DOE is required.

(2) Requires immediate action in the interest of safety or nuclear weapons security.

(3) May result in adverse public reaction (national or international) or inadvertent release of classified information.

(4) Could lead to a nuclear weapon accident and warrants that senior national officials

or agencies be informed or take action.

j. **Radiological Accident:** A loss of control over radiation or radioactive material that presents a hazard to life, health, or property or that may result in any member of the general population exceeding exposure limits for ionizing radiation.

4. **JOINT NUCLEAR ACCIDENT COORDINATING CENTER (JNACC):**

The JNACC's mission is to provide a centralized agency for maintaining and exchanging information with those agencies that possess radiological assistance capabilities and to coordinate that assistance in response to an accident or incident involving radioactive materials.

a. **AUTHORITY:** In compliance with reference (a) and in support of reference (b), the DoD element of the JNACC was established at Field Command, Defense Nuclear Agency (DNA), Kirtland AFB, New Mexico, on 22 Jan 82. However, with the consolidation of emergency actions functions within DNA, the DoD element of the JNACC was transferred to Headquarters, Defense Nuclear Agency, Alexandria VA, on 1 Apr 87.

b. **JNACC FUNCTIONS:**

(1) Operate a JNACC in conjunction with DOE for the purpose of providing assistance in the handling of radiological accidents/incidents.

(2) Maintain current information on the location and capabilities of specialized DoD/DOE teams, organizations and individuals capable of responding to accidents or incidents involving radioactive materials. Publish the NARCL annually.

(3) Upon notification of a nuclear weapon accident/incident, inform the National Military Command Center (NMCC), alert specialized teams, Military Services, and DOE operations centers of action taken, and when requested by the Military Services, coordinate deployment of specialized teams.

(4) Receive notification of accidents and/or incidents and requests for assistance.

(5) Request assistance, as necessary, from DoD/DOE organizations.

(6) Provide available accident/incident information to appropriate commands and agencies.

(7) Obtain all available information regarding any radioactive material involved for relay to the accident and/or incident site.

(8) Refer public queries to the Joint Information Center (JIC) established by the Service or agency having primary command responsibility at the accident scene. Queries on any nuclear accident or incident involving radioactive material and DoD personnel, equipment or facilities will be referred by the responsible DoD service or agency to the Assistant Secretary of Defense/Public Affairs for response.

c. JNACC SUPPORT:

The Military Services support the JNACC in accordance with reference (a) by furnishing information on team and equipment capabilities existing within their organizations that could respond in the event of an accident or incident involving radioactive materials.

d. INFORMATION:

Nuclear related assistance or information is available from the DoD JNACC on a 24 hour basis (DSN (b)(2) or Commercial (b)(2) (b)(2) This assistance includes but is not limited to the following areas:

- (1) Identity of the hazards involved.
- (2) Liaison with weapon development and weapons effects personnel.
- (3) Funding responsibility for emergency response efforts.
- (4) Information on emergency response procedures.

(5) Requests for DOE assistance.

(6) Historical information.

(7) Location of specialized radiological assistance equipment and personnel.

(8) Logistical assistance for transportation.

(9) Licensee of radioactive material.

(10) Civilian radiological response agencies availability.

5. REIMBURSEMENT FOR EMERGENCY ASSISTANCE EXPENSE:

If assistance is provided, the Military Service or Agency providing the necessary assistance will fund such cost initially within existing fund availability. The Military Service or Agency having physical possession of the nuclear weapon or nuclear weapon component at the time of the accident or significant incident will be responsible for reimbursing, upon request, the Military Service or Agency providing the necessary assistance for those costs which are directly chargeable to, and caused by, the accident/incident.

6. SERVICE CAPABILITIES REPORTS:

a. The Military Services and DOE elements advise the JNACC on their respective team and organizational capabilities which are available to respond to requests for assistance in the event of an accident or incident involving radioactive materials. Radiological Response Capability Reports (DD Forms 2325), submitted by the Military Services and DOE elements, are compiled and maintained by the JNACC as part of an automated information system of worldwide accident response capabilities which may be called upon to assist an on-scene commander.

b. Instructions and guidelines for submission of the DD Form 2325 reports are provided at Part B. Updated reports, with information current as of 1 Sep, are due to the JNACC no later than 1 Oct of each year. Interim reports will be submitted within 30 days whenever a capability is substantially changed.

c. The consolidated database product will be published annually, no later than 1 Jan. All reporting units will receive and maintain a copy of the most current NARCL. Any discrepancies in the published document should be addressed to the JNACC.

7. DNA ADVISORY TEAM:

The DNA Advisory Team (DNAAT) was formed to provide a core of specially qualified personnel to assist in the handling of a nuclear weapon accident/incidents. Members of the team are on continuous alert and include personnel from functional areas such as Public Affairs, Health Physics, Legal, and other specialties as may be required by the situation. The team will be alerted by the JNACC in the event of a nuclear weapon accident/incidents.

8. MEDICAL RADIOBIOLOGY ADVISORY TEAM (MRAT):

The Armed Forces Radiobiology Research Institute (AFRRI) maintains a Medical Radiobiology Advisory Team (MRAT) to provide state-of-the-art medical radiobiology advice in support of a nuclear accident response. This team consists of physicians and Ph.D. scientists who are actively working in radiobiology research.

a. The team's mission is to provide medical groups responding to radiobiology emergencies with the most current medical guidance regarding the treatment of radiation casualties. This advice is derived from validated, military-relevant radiobiology research and is within reasonably accepted standards of care.

b. Subject areas of expertise include, for example, radioprotectants, hematology, biological response modifiers, immunomodulators, therapeutic regimens, infectious disease, dosimetry and behavioral analyses. If needed, liaison with other medical centers and laboratories specializing in radiobiology can be facilitated.

c. Through means of telephone communications (available 24 hours a day) the

MRAT provides radiobiology advice to requesting medical staffs and on-scene commanders within a response time of 4 hours. In addition, within 24 hours, the team is prepared to deploy as an individual entity and provide advice at a non-weapon accident site or medical treatment facility. For a weapon related accident, the physician members of the MRAT deploy as integral members of the DNA Advisory Team and are available to supplement the designated primary medical treatment teams in the treatment of radiation injuries.

d. Additional information about the MRAT may be obtained by contacting the Director, Armed Forces Radiobiology Research Institute (AFRRI), Bethesda, Maryland 20889-5603. MRAT assistance may be requested by calling phone number: commercial (b)(2) [REDACTED]. Routine correspondence about this team may be directed to: AFRRI, Attn: OIC, MRAT, 8901 Wisconsin Ave., Bethesda, MD 20889-5603.

9. DOE ACCIDENT RESPONSE GROUP (ARG):

The ARG is composed of technical specialists on continuous alert, with specially designed equipment, that can be dispatched to an accident site by the DOE JNACC within hours after notification. At an accident site, the ARG is under the control and public information policy of the on-scene commander. It can provide technical advice for determining the radioactive hazards, assist in the collection, identification and disposition of contaminated materials, determine what design information should be protected and advise what additional response capabilities may be required. Reference (a) tasks the Service or Defense Agency having responsibility with providing the DOE ARG with administrative, medical and logistic support services, including communications and transportation. The USAF Air Mobility Command has assigned Special Assignment Airlift Missions to provide transportation for the ARG from pre-designated locations to the scene of a nuclear accident.

10. DOE NUCLEAR EMERGENCY SEARCH TEAM (NEST):

The NEST was established in January 1975

under the management of the DOE Nevada Operations Office to enhance DOE's ability to search for and identify lost or stolen weapons and special nuclear materials, and to respond to nuclear bomb threats or radiation dispersal threats. It employs sophisticated radiation detection systems developed and operated by scientific personnel from Lawrence Livermore National Laboratory, Los Alamos National Laboratory, and EG&G Incorporated, a civilian contractor. Depending on the situation, NEST resources can be made available to the DoD or to other Federal agencies.

11. "SAFEHAVEN" AGREEMENTS:

Reference (c), commonly referred to as the "Safehaven Agreement", delineates the responsibilities of DoD and DOE when temporary storage of DOE shipments at DoD facilities is necessary to assure the safety and security of nuclear materials or non-nuclear classified materials. Under the agreement, DOE is authorized to utilize available DoD facilities for safety and security of authorized DOE couriers and vehicles when a shipment is jeopardized. In the event that the agreement must be implemented, DOE will notify the appropriate DoD authorities through the DoD JNACC. The installation will be responsible for providing a temporary holding area for the shipment, security of the area, firefighting, communications and logistics support as necessary. Specific queries regarding this agreement may be addressed to the DoD JNACC.

12. NUCLEAR EMERGENCY RESPONSE TRAINING:

a. The Interservice Nuclear Weapons School (INWS) at Kirtland AFB, New Mexico, conducts courses on nuclear emergency response training involving actual monitoring of alpha and gamma radiation on controlled, simulated accident sites.

(1) Nuclear Weapons Orientation Advanced (NWOA) - This course is designed to provide training on the scope of the national nuclear weapons program, with briefings on operational and physical characteristics of stockpile nuclear weapons, effects and employment, organizational involvement, methods

of delivery, nuclear safety programs, intelligence estimates, test program, and future trends. A mobile training team version of this course exists. Special requirements: **SECRET/RD** security clearance. Course Number (#): G30ZP4054-000.

(2) Flag Officers Nuclear Accident Course (FONAC) - This course is designed to provide training for prospective Service Response Force (SRF) on-scene commanders (OSC) with the problems and responsibilities involved in nuclear accidents, characteristics and operation of radiation detection instruments; hazards of radioactive, toxic and explosive materials; Nuclear Emergency Team operations, organizations, and response systems; public information, explosive ordnance disposal, security, legal, and medical aspects; and on-scene commander responsibilities. A field exercise familiarization is included. Special requirements: **SECRET/RD** security clearance. Course #: G30ZP1916-000.

(3) Senior Officers Nuclear Accident Course (SONAC) - This course is designed to provide training for selected interservice officers (grades O-4 through O-6) and federal civilian employees (GS-12 and above) in the problems and responsibilities involved in nuclear accident response; with the capabilities, organization, and operation of a Nuclear Emergency Team; and with the techniques involved in monitoring contaminated areas. The scope of training includes problems associated with a nuclear accident or incident, including a review of actual accidents; hazards of radioactive, toxic and explosive materials; characteristics and operation of radiation detection instruments, including new instruments, Nuclear Emergency Team operations, organizations, alert and response systems; public information, security, legal, and medical aspects; on-scene commander responsibilities, including coordination of requirements with local, state, and federal officials; field exercises; techniques of monitoring for radioactive material, including air sampling, protective equipment, and control of personnel in contaminated areas. Special requirements: **SECRET/RD** security clearance. Course #: G30ZP1916-001.

(4) Nuclear Hazards Training Course

(NHTC) - This course is designed to provide training for officers and enlisted of the medical services in the organization and functions of Nuclear Emergency Teams and in techniques involved in monitoring contaminated areas. The scope of training includes principles of nuclear devices; related hazards when involved in an accident or incident; characteristics and operation of radiation detection equipment; hazards of explosive materials and Nuclear Emergency Team operations. Special requirements: **SECRET/RD** security clearance. Course #: G30ZP9124-000.

(5) Nuclear Emergency Team Operations (NETOPS) - This course is designed to provide training for selected interservice officer and enlisted personnel and federal civilian employees, who are members or potential members of Nuclear Emergency Teams and Disaster Preparedness Response Forces, in the techniques and skills necessary to cope with nuclear emergency situations. The scope of training includes concepts of nuclear physics and basic weapon theory with emphasis on nuclear components and related materials which present special problems in accident and incident situations; characteristics, operation, functions, and construction of selected radiac equipment utilized for the detection of radiation under a variety of conditions; characteristics and hazards of radioactive materials on the human body; characteristics and hazards of explosive materials; problems associated with a nuclear accident or incidents; Nuclear Emergency Team operations, including coordination requirements with local, state and federal officials, survey and analysis procedures, recovery and disposition of materials, and decontamination techniques. Special requirements: **SECRET/RD** security clearance. Course #: G30ZP1944-000.

b. The above courses are available to members of all Services, as well as civilians. Point of contact for further information, schedules, and quotas is the INWS Registrar, DSN (b)(2) or Commercial (b)(2)

c. A medical effects course offered by the Armed Forces Radiobiology Research Institute (AFRRI), titled The Medical Effects of Nuclear Weapons (MENW), is designed to provide the

military medical care provider with training on the diagnosis and treatment of radiation and combined radiation/traumatic injury. The course includes the concepts of basic weapon theory, radiation interactions with materials, acute radiation syndromes and their treatment, combined injuries, the psychological effects of radiation, internal radiation contamination, fallout and radiological defense. Materials are also presented to acquaint the student with the concepts of electromagnetic pulse (EMP), radiation pathology, nuclear weapons accident organization, and the global consequences of a general nuclear release. There are **NO** security requirements for this course. Continuing Medical Education (CME) and Continuing Education Units (CEU's) are available for physicians, physician's assistants, nurses, health physicists, and industrial hygienists. Quotas can be obtained directly from AFRRI or by contacting the appropriate service medical training office. Point of contact for further information is the MENW Coordinator, AFRRI, Bethesda, MD 20889-5603, DSN (b)(2) or Commercial (b)(2). There is a mobile training team version available on request.

PART B:

NARCL REPORTING INSTRUCTIONS

1. In accordance with DoD Instruction 5100.52, "DoD Response to an Accident or Significant Incident Involving Radioactive Materials", 21 Dec 89, the Military Services will identify what organizations/units are required to report their response capabilities.

2. Reporting units will submit **DD Form 2325, Radiological Response Capability Report**, dated Aug 94, directly to: Director, Defense Nuclear Agency, ATTN: Operations Center Branch (CCOP), 6801 Telegraph Road, Alexandria, VA 22310-3398, or telefaxed (front and back of **DD Form 2325**) to DSN (b)(2) Commercial (b)(2). A letter of transmittal or endorsement is not required.

3. Reporting units will submit an updated annual report (DD Form 2325) to the JNACC no later than 1 Oct of each year. Information will be current as of 1 Sep. Reporting units will submit interim reports whenever a capability is **substantially** changed (deletion, transfer, new capability, etc). Minor changes in quantities may be deferred until the annual update.

4. Reporting Units will complete the DD Form 2325 as follows: Refer to Figure 1. (Local reproduction of this form is authorized.)

a. General Instructions/guidance:

(1) Inherent with reporting a response capability, is the requirement to make that capability available for movement to an accident site, even if the accident occurs off-installation. An installation would be asked to provide assistance only in the event of an emergency, in which case, supporting the on-scene commander should take precedence over routine operations.

(2) Where multiple organizations with

response capabilities are located on a single installation, a consolidated report with a single Point of Contact should be submitted on behalf of the entire installation (whenever feasible).

b. Instructions on how to fill out DD Form 2325: Examples are not all inclusive; other personnel or equipment may qualify.

(1) Items 1-8: Self-explanatory.

Examples of 9-16 can be found in reference E.

(2) Item 9: PAC-15, AN/PDR-60, AN/PDR-56. (Include approximate number)

(3) Item 10: AN/PDR-27, AN/PDR-43. (Include approximate number.)

(4) Item 11: AN/PDR-27, AN/PDR-43, AN/VDR-2. (Include approximate number.)

(5) Item 12: AN/PDR-27, AN/PDR-43, IM-174. (Include approximate number).

(6) Item 13: ADM-300, PCS-1. (Include approximate number).

(7) Item 14: AN/PDR-64, AN/PDR-70. (Include approximate number).

(8) Item 15: IM-231/PD. (Include approximate number).

(9) Item 16: Any portable air sampler capable of detecting the radioactive gas tritium. (include approximate number.)

(10) Item 17: Self Explanatory.

(11) Item 18: Self explanatory.

- (12) Item 19: Self-explanatory.
- (13) Item 20: Field operable, mobile unit capable of decontaminating personnel, vehicles, and equipment.
- (14) Item 21: Self-explanatory.
- (15) Item 22: Self-explanatory.
- (16) Item 23: Capability to measure radioactive material from contamination or scatter by aerial platform. Differentiate capability to detect Alpha contamination caused by dispersed special nuclear weapons material from other sources in item 39. Battlefield detectors are normally not considered adequate for low level weapon accident material detection.
- (17) Item 24: Self explanatory.
- (18) Item 25: Self explanatory.
- (19) Item 26: Self explanatory.
- (20) Item 27: Personnel certified to be armed and trained in the use of deadly force, crowd control, and securing a National Defense Area.
- (21) Item 28: Personnel trained in working with news media and authorized by regulation or policy to speak for the commander.
- (22) Items 29: Personnel professionally trained and certified to practice law, especially claims litigation.
- (23) Item 30: Medical personnel trained in the care and treatment of contaminated/irradiated patients.
- (24) Item 31: Personnel professionally trained in the protection of people and environment from the effects of radiation. Health Physics Technicians should be included.
- (25) Item 32: Personnel specifically trained, licensed or recognized as reactor operators by the Nuclear Regulatory Commission (NRC) or DOE.
- (26) Item 33: Personnel involved in the design or modification of a specific weapon warhead.
- (27) Item 34: Self Explanatory.
- (28) Item 35: Self Explanatory.
- (29) Item 36, 37, and 38: List duty hours telephone number(s) and emergency telephone number(s). Non-duty/emergency telephone numbers should be that of local organizations having a 24 hour mission. Home numbers should not be provided. The prefix for each capability (DSN, commercial, FTS, etc.) should also be listed.
- (30) Item 39: Utilize reverse side of the form to explain other items or unique capabilities not addressed on the front. Be sure to include complete mailing address, including office symbols (if any), nine digit ZIP codes, AUTODIN Message Plain Language Address (PLA) and AUTODIN Routing Indicator. All items on REVERSE must be filled out.
5. The JNACC will maintain a current database of all reported response capabilities. This database will be published and distributed annually. Reporting units will maintain the latest NARCL for local use. Any discrepancies will be addressed to the JNACC.
6. Units/installations who desire a copy of the NARCL on disk should send a memo to the HQ Defense Nuclear Agency, Operations Center(CCOP).

PART C:

COMPUTERIZED CAPABILITY LISTING

1. This listing is arranged by major geographical category, alphabetically by 2 letter state abbreviation or country code, then alphabetically by unit. For example, March AFB, is a CONUS location found by looking under the 2 letter abbreviation CA, then looking under UNIT, March AFB. This example is found on page 10.

2. Team locations are identified by two digit abbreviation.

A. CONUS: Two letter state abbreviation.

ALABAMA	AL	MONTANA	MT
ALASKA	AK	NEBRASKA	NE
ARIZONA	AZ	NEVADA	NV
ARKANSAS	AR	NEW HAMPSHIRE	NH
CALIFORNIA	CA	NEW JERSEY	NJ
COLORADO	CO	NEW MEXICO	NM
CONNECTICUT	CT	NEW YORK	NY
DELAWARE	DE	NORTH CAROLINA	NC
DIST. OF COLUMBIA	DC	NORTH DAKOTA	ND
FLORIDA	FL	OHIO	OH
GEORGIA	GA	OKLAHOMA	OK
HAWAII	HI	OREGON	OR
IDAHO	ID	PENNSYLVANIA	PA
ILLINOIS	IL	RHODE ISLAND	RI
INDIANA	IN	SOUTH CAROLINA	SC
IOWA	IA	SOUTH DAKOTA	SD
KANSAS	KS	TENNESSEE	TN
KENTUCKY	KY	TEXAS	TX
LOUISIANA	LA	UTAH	UT
MAINE	ME	VERMONT	VT
MARYLAND	MD	VIRGINIA	VA
MASSACHUSETTS	MA	WASHINGTON	WA
MICHIGAN	MI	WEST VIRGINIA	WV
MINNESOTA	MN	WISCONSIN	WI
MISSISSIPPI	MS	WYOMING	WY
MISSOURI	MO		

B. OCONUS listed by two letter country abbreviation.

AZ - AZORES	GU - GUAM	PC - PANAMA CANAL
BE - BELGIUM	IC - ICELAND	PR - PUERTO RICO
BH - BAHAMAS	IT - ITALY	SP - SPAIN
CU - CUBA	JA - JAPAN	TU - TURKEY
GE - GERMANY	KO - KOREA	UK - UNITED KINGDOM
GR - GREECE	NL - NETHERLANDS
