! IN MEMORY OF WILLIE MCCOOL!

Dear the children of Willie McCool,

2-5-03

Hi, my name is [REDACTED] I attend school on Eastern Long Island. I was so sorry to watch the Columbia Space Shuttle go down last Saturday, but you should be proud of what your father accomplished for our country. Your father has inspired me to one day go up in space, work for NASA and hopefully fulfill his dreams. Your father is a hero to me! I will always keep him in my prayers.

GOD BLESS YOU! UNITED WE STAND!

SH-1

Dear Laura,

I can't possibly imagine what you are going through. My greatest sympathy goes out to you and your family. We learned how your father was such a great man. He also known as one of the greatest astronauts of all time. His mission was a sign of heroism and bravery. He was a true hero, and someone anyone could look up to. Everyone in my school recognizes your father for representing our country with courage. We will remember his heroic act forever.

Sincerely,

[Redacted signature]

Dear Lauran

I'm sorry to hear about your father's death. It pains me greatly that the Columbia blew up. I can't imagine your sorrow. I lost two family members 9-11. I hope you feel better. Your father was a hero to me.

Yours, truly,

Dear Laura Husband,

I'm in the 6th Grade. I'm sorry that your father was in the Shuttle Columbia. I was really sad when I heard about the Shuttle. I know it is sad because I have had a few family members die.

From:

To the families of the space shuttle victims,

I, [REDACTED], have to say that your parents are very brave. Not many people would have put their life on the line to go into outer space to do experiments. I think that your parents should have a ceremony in their honor. Or maybe we should put up a memorial for them in the park. I am very sorry for your loss. If you want to say anything, just write back.

Sincerely,

[REDACTED]

Dear children,

I am an eleven year old student that attends the East Hampton Middle School. When I found out the tragedy accident with the Space Shuttle Columbia I was in awe. I was deeply hurt and I thought about all of the children that would be without a parent.

I will be praying for you and all of your family members. It is very hard whenever you lose someone you really love.

Your mother/father was a great person. I know you will always miss them but, you have something to be proud of.

Sincerely,

SH-6

Dear Laura Husband,

Hi my name is [REDACTED] I'm a 6th grader at East Hampton Middle School. I enjoy playing football, hockey and Baseball. I also like skateboarding, snowboarding, surfing and Play Station 2. Someday I would like to know some neat stuff about you. I'm very sorry about your father. I know how it feels. However look at the bright side now you can think about becoming an astronaut your self.

From, [REDACTED]

2/8/02
Science

Josh Valcich
Mr. Smith

Dear Laura Husband

I wrote this letter to you just to tell you I'm sorry for your loss. I know how it feels to lose a family member that was close to you because my granma recently past away.

I read about your father he sounded like a great person. I always wanted to be an astronaut. I looks so cool when you see astronauts floating in space and everything. I just want to let you know me and my classmates have deepest appreciation for you and we are sorry for your loss.

Sincerely: 

SH-8

Dear, the Husband family

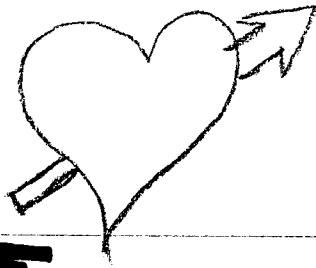

I am extremely upset about what happened to your dad and that space ship. Your dad was a very very very important and special man. You may not have known this but he was probably over 50,000 peoples heroes and inspirations, he was an inspiration to me because he taught me to never give up and to stick with my dreams. When I grow up I want to be the chef of my restaurant and your father just might of helped me do that because that is my real dream in life and he definitely accomplished his dream.

I hope you will think about your dad every day because he was one of the most important people in your life and still is.

Just to tell you my teacher respected him alot. I hope you live a good life from now on.

from

SH-9

Dear the Clark Family,

I am sorry to hear about Ms. Clark. I am so sorry. I am sorry that she died but my grandfather died a couple years ago. I think that if she would even go on a space shuttle than she is very brave. I would never go on a space shuttle. Would you?

I hope you write back. Thank you

Sincerely,

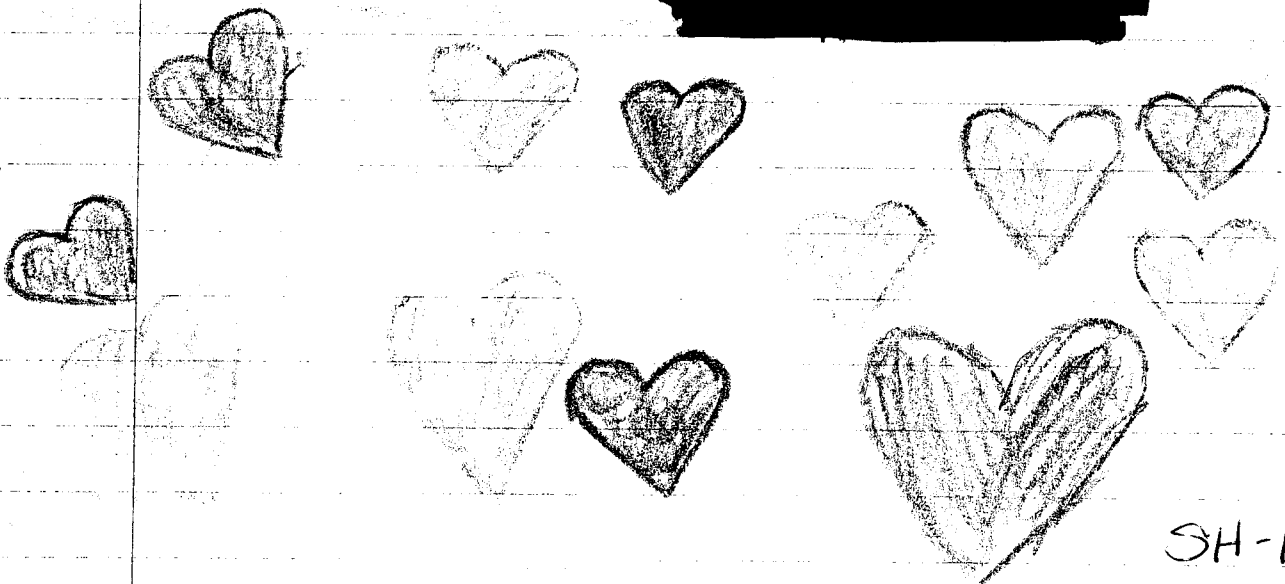

I am sorry about your loss.

Dear Laura Husband,

I feel sorry for you. I think it is terrible that you lost your father. A lot of people in my grade feel sorry that you lost your father. I will always remember how you lost your father. Your father will always be remember by everyone in the world. I care for you and your family in everyway I can. Just because your father died you shouldn't give up on what you love. You should always remember your father no matter what. Your father and all of the other people that was in the spaceship will always be remember. I promise you that I will think of them every day of my life. Your father will always be watching you.

Sincerely,

[Redacted Signature]

SH-11

2/3/03

To the wife and children of Rick Husband.

Bear Mrs. Husband and children,
I have heard about this terrible tragedy that has happened and affected your family in many ways. I just wanted to say that I am truly sorry for one and yours. It must be very hard. Laura, I have heard about you. That you are in sixth grade. I am also. Well maybe I will talk to you. I hope you write me back. Again, I am so sorry and I wish you all, all the luck in the world.

Sincerely,

[REDACTED]

P.S. I am an 11 year old girl from New York.

SH-12

2/3/03

To: The wife of William McCool and children.

Dear Mrs. McCool and children,
I have heard about this terrible tragedy that has affected your family in many ways. I just wanted to say that I am truly sorry for one and yours. I must be very hard. Also just to tell you I am an 11 year old girl from New York. Again I am so so sorry and I wish you all the luck in the world. I hope you will write back

Sincerely,

SH-13

Hi my name is [REDACTED]

I just wanted to say Hi and how are you guys? I'm really sorry about your father I heard he was a nice guy and very warm hearted. The accident was a tragedy, but your father will always remain in your heart and dignity. I am 12 years old and in 6th grade. My grandpa died in 1998 I was in shock for the longest time. But, he still remains in my heart so I hope that you do the same. I hope you write back to me.

Sincerely

To Our NASA Colleagues

Over the last several months, to include our most recent and overwhelmingly successful event in Martinsburg, WV, my Team and I have enjoyed working with each of you as representatives of NASA's Department of Education. The positive effect we collectively have had with the children we have touched has been a joy to us all. To deliver, in some

cases, once in a lifetime experiences to students throughout our country has been, and will continue to be, our milestone!

Because of the relationships we have developed with each of you we have come to feel like we have become a small part of "your team" which makes the pain from Saturday's loss all the more difficult. Please accept, on behalf of my entire team, our heartfelt sympathies over the loss of Space Shuttle Columbia and its heroic crew of 7. They, and their families, will be in our prayers.

When the time is appropriate we very much look forward to advancing our relationship with NASA to continue delivering the Educational Presentations that are so meaningful to the youth of America.

Very respectfully,

Maureen T. Lischke
Chief Information Officer
National Guard Bureau

Hello Thom,

First, as a member of the NASA family, I send my condolences to you. It is heartbreaking for all Americans, but I know it is extra difficult for everyone at NASA. My mother and I couldn't even talk about it yesterday without starting to cry. It takes a tragedy like the Columbia to remind us how much some people give for the advancement of humanity. My thoughts are with you and your colleagues during this difficult time.

I've scheduled a call with Kim Tholen on Tuesday. By next week when we regroup I'll be better prepared to work with you on this.

On behalf of the Society of Aeronautics & Aerospace Engineering - UNAM (SIAA - UNAM (SIAA-UNAM) I want to express that we are deeply saddened by the happening of today. The lost of shuttle Columbia in its STS-107 mision is a tragedy for all mankind, specially for those of us that have an indescribable passion towards the exploration of Outer Space.

Our thoughts are with the families of the astronauts and the whole space family for this terrible lose.

We hope that this event, does not mean a reduction of space exploration activities by the United States of America, nor by any other county participating in the space age. On the contrary this should make us think over and continue on with our path with more determination, something that hasn't happened in a while. So, starting today efforts and resourses should be doubled so the exploration of space stays as yesterdays dream and becomes a reality.

Ed,
Knew you would like this effort at expressing sympathy at this time. It was written by one of the NEW facilitators.

Bill

Two Educator Facilitators, Bonnie Hilory and Ellen Holmes from the NASA Educational Workshops, sent me the following. Ellen wrote the message to her workshop participants, and Bonnie found this poem on the internet. They both express how I feel as well. Take care, my friends.

Hello friends,

It is my belief that we need to honor the victims of this disaster by carrying on with our lives and helping to move NASA's education mission forward. To that end I plan to discuss with my students this tragedy in that light. Now is not the time to give up and give in and point fingers at what should have been done. If the momentum of the space program is lost now, then the only perspective of this earth we have is from here on the ground. All who have traveled to space and had that perspective of the earth have remarked at its apparent tranquility and fragility. Don't we owe it to our students to inspire them to seek that perspective?

Flying High and in Search of a Truth.

For how can you mourn the ones that are brave,

Who grab hold of life and who live it.

While we sit on earth living life as it comes

SH-21

Never giving it all we can give it.

For a life that is filled with excitement and fun

And of challenges both big and small,

That is faced without fear, with a realized dream,

Is one I would wish for us all.

No I will not mourn those who have lived

Their lives as they wanted to do.

No, those that I mourn are those left behind

I'll save mourning for me and for you.

For it's we who have lost the seven brave souls

Who soared through the heavens above

And in dying, their dreams have been passed on to us

To be lived and remembered with love.

So let's reach for the stars and set our goals high

And remember their dreams as we do.

'Til we meet once again in the land of the stars

Where now lives the Columbia's crew

Hello all,
Just a reminder that the world cares, best-selling crime novelist and "new" friend of mine, Patricia Cornwell, just called and left me a really nice voicemail wishing us (NASA) well during this difficult time and wanted to let me know that she is thinking of all of us. Her message also stated that we should keep moving forward and "hang in there" as she put it. It was very nice of her to call. ;) I saved the message, of course, if anyone would like to hear it.

Warmest regards,
~ Kimberly

Ed, Thanks for the kind words. Thom

Thom-

The package arrived with a NASA jacket and card. Both are great - thank you very much.

This is a tough week for NASA. Our hearts are with you and the families of the Columbia crew.

Best wishes,

Ed
