PHOTOCOPY

On 15th October 1965, at 9.10 p.m., between the 68 and 69 mile posts on the main highway between Bass and Anderson, my wife and I saw an object which appeared on our left hand or east side, or more accurately, as we were travelling due south the object appeared to the south east.

We were travelling at approximately 50 m.p.h. when I first sighted the object and my wife at that time was asleep. At first I thought the object was a rocket but I soon realized that it left no trail, and was far too large as it appeared to be between one and two miles distant and had a length somewhat greater than the apparent diameter of the moon, so that it must have been approximately 100 ft. long. It was travelling almost horizontally but losing altitude slowly as it disappeared below some low hills about seven seconds after I first sighted it. These hills appear to be about 400 ft. high and about two miles from the highway, as we checked the following afternoon. I have not yet checked a detailed map of the district.

If the object was 100 ft. long, then its diameter appeared to be about 15 ft., that is, it was cigar shaped but seemed as if it may have had one or more dark bands around it. It was of a brilliant pale green or phosphorescent green colour and apparently self-luminous.

When I realized I could not identify the object, I said, "I wonder what that is?" My wife awoke and immediately spotted the object and said, "What is that, is it a helicopter?" She said she thought she saw some structural work on or around the object but as she was able to examine it for only about two seconds before it disappeared she can't be sure. Soon after that she saw the 69 mile post and at that time we realized there seemed to be no normal explanation for the object.

 Tecoma.
 Vict.

Dear Sir,

I rather to the questionnaire you have asked me to fill in, I would also like to comment.

As well as myself seeing the object, the Manager of the Engineering Firm for which I work & his wife were also present & both clearly saw the object. We were all sitting at the wateredge of Lake Glenmaggie trying to catch trout & all saw the light suddenly appear at full strength in midair, & moving.

Personally, I was a member of the R./I.A.F from 1952 to 1958 as an L.A.C Aero-Engine Fitter & spent most of my 6 years at Maint. Sqdn. Point Cook. so consequently was engaged in much night-flying duties.

This object was similiar to an aircraft switching on its landing

lights on the down-wind leg, but going slightly away from the river then turning it coming toward the river, with the 2 yellow landing lights visible.

But many things seem not to tie in with this theory.

Object illuminated if the clouds as it passed behind them or between them. Do aircraft prepare to land from 6,000 or maybe 5,000 ft? I dare say the cloud ceiling could be checked for about this period. Aircraft lights are not yellow, at least not even the Whinaway did in 1958 or I can't imagine 1965 aircraft having them. And what was the light patch of green in the centre of the white. Was it a normal landing ident. light. But then isn't the green light only on the standard mainplanes & since aircraft were going away from river, how could it be seen.

On top of all this on Monday Morning when we returned

3.

to work, one of our workmates had been fishing also that same evening, in the surf at Waratah Bay, (65 or 70 miles away) & he gave an identical description of the light except that his object disappeared ~~into~~ from his view behind cloud shrouding the mountains of Wilsons Promontory.

Hoping that these comments maybe of some help to you in your research on this matter, personally I would like to think that R.A.A.F. East Sale was conducting a normal & very routine night flying exercise with perhaps visiting American aircraft U2's etc. but I do read Science Fiction
I remain

Yours faithfully
John Bentley.

REPORT ON AERIAL OBJECT OBSERVED

- 1 Name of Observer John Bentley.
- 2 Address of Observer 15 Brooklyn Ave. Tecoma Vic.
- 3 Occupation of Observer Filter-Welder.
- 4 Date and Time of Observation October 15 1965 approx. 2130 Hrs.
(Time given in 24-hour clock zonal time)
- 5 Period of Observation(s) 10-12 Seconds.
- 6 Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks and describe any equipment used in the observation)
Approx. 1 1/2 mls. South of Glenmaccie Township, & on Watersedge
of LAKE Glenmaccie with uninterrupted view
right across the LAKE. Very Clear to NAKED Eye.
- 7 Where was Object First Observed: (eg - Overhead, coming from Behind a Hill, over the Horizon, etc)
about 15° above the horizon.
- 8 What First Attracted Observer's Attention
(eg - Light or noise)
Instant Intense Light.
- 9 Did Object Appear as a Light or as a Definite Object
Light only.
- 10 How Many Objects Were There, and What Was Their Formation
only one Light.
- 11 What was the Colour of the Light or Object WHITE with small GREEN
GLOW in Centre
- 12 What was its Apparent Shape
A Fluorescent-Tube-like
WHITE LIGHT  A GREEN COLOUR SIMILAR TO
copper wire being burnt.
- 13 Was any Detail of Structure Observable
NO
- 14 Was any Method of Propulsion Obvious NO

*IN 6/2/2*UNIDENTIFIED AIRCRAFT SIGHTING

The Administrator has asked me to advise you of the following signal received on 8th September, 1965 from the District Commissioner, Wewak, based on a report from a local New Guinean:

"AIRCRAFT SIGHTED IN GENERAL AREA OF IMONDA ON
31ST AUGUST AT 1400 HOURS STOP TRAVELLING 190
THROUGH 250 DEGREES HEIGHT APPROXIMATELY 5000 FEET
STRAIGHT WING SINGLE BOOM FUSELAGE SUSPECTED PISTON
ENGINE CONVENTIONAL TWIN ENGINE CIVIL OWNERSHIP NO
MARKING IDENTIFIED TYPE SIMILAR TO D.C.3"

2. The Administrator advises that the Department of Civil Aviation has no record of any aircraft operating in the stated area at the time indicated and that in view of the delay in the receipt of the report it was considered unnecessary to forward the information by signal through the usual channels.

Dear Sir —

I am curious about a peculiar happening last Sunday evening at 8:07½ PM and am hopeful you can give an answer or pass the letter on to a suitable authority.

As my wife and I and 17 year old son drove away from the houses at the above time we all clearly saw, directly ahead in a northerly direction, and on a perfectly clear night, an object hurtle across the sky in level flight.

The object appeared to be a greenish disc with a reddish tail . We first noticed it a little north of north-west, and it sped across the sky to the North-east in about six seconds. It just disappeared before reaching anywhere near the

horizon, but there didn't appear to be any cloud to obscure it.

During the time the object was visible it travelled on a flat trajectory about 30° up from the ground.

All three of us are in perfect agreement about the details. We stopped the car and checked the time, and I wrote a detailed description immediately. I returned home that night.

I have seen Mirage jets over Dublin. This thing would have left the Mirages for dead many times over.

Yours faithfully
Andrew G. Twomey

Patrol Post,
Sehvlea,
MILNE BAY DISTRICT.

27th July, 1965.

The Assistant District Commissioner,
ESA'ALA.

UNIDENTIFIED FLYING OBJECT SIGHTING

I returned from patrol on the 14th of July, 1965. On the 29th of July, 1965 Bwaruada Mission reported to me that they had seen what appeared to be a flying object showing a bright light on the 12th of July and that one of their teachers had seen a similar object on the 13th of July.

The following is a summary of particulars from these two sightings.

12TH OF JULY SIGHTING

Informant - Mr. T. Fisi'ihei, Missionary in Charge, Bwaruada.

Time - 1910

Direction from Bwaruada - westerly - in vicinity of Keroregea Bay between Mwadega and Sewataitai villages.

Appearance - An extremely bright light changing from red to blue and moving from side to side (a mile each way) at approximately 10 MPH

Height - Approximately 5,000 ft.

Duration of Sighting - Approximately 10 minutes

Description of Disappearance - Appeared to grow dim and then disappeared in N.W. direction.

Noise - Nil

Other Information.

First sighted by children who reported that it fell like a heavy weight for approximately 1,000ft before missionary informed.

13TH OF JULY SIGHTING

Informant - Penedi/Sisina, a female teacher at Bwaruada Mission.

Direction from Bwaruada - Easterly - over sea.

Appearance - Very bright light "like a primus" spinning in a large circle at a fairly high and constant speed.

Height - "Lower than nearby mountain". My estimation - 1500ft.

Speed - "A lot faster than a bird".

Duration of Sighting - Approximately 5 minutes.

Description of Disappearance - Disappeared in easterly direction at considerable speed.

Noise - Nil.

Other Information.

The teacher watched object for 2-3 minutes and then reported to the Missionary in charge. When he arrived the object had disappeared.

The Mwadega people reportedly sighted a similar object at the same time and in the same direction.

Bwaruada Mission informed me that recently they had been speaking to Mrs. D. Miller of Nivani Plantation and that she had said that she saw such an object at Nivani as described overleaf for the 12th of July sighting and that it made a definite noise.

I have checked all possible sources and I have not located anybody who saw one of these objects on the 17th, 18th and 19th of this month.

The information overleaf was not transmitted by radio upon receipt of information due to the time lapse between sighting and receipt of information.

Please ask the District Commissioner if he requires such information to be transmitted by radio even though considerable time may have passed between sighting and my receipt of information.

.....
(E. BECKR)
Assistant District Officer.

ESA'ALA.
11th August, 1965.

Minute to:

District Commissioner,
SAMARAI.

My coded Telegram 33 of 27th July 1965 refers. Sightings of these objects are now so common that most people no longer bother to report them immediately. I have instructed my officers to forward all fresh reports by telegram, but your advice is requested please concerning the reporting of stale sightings.

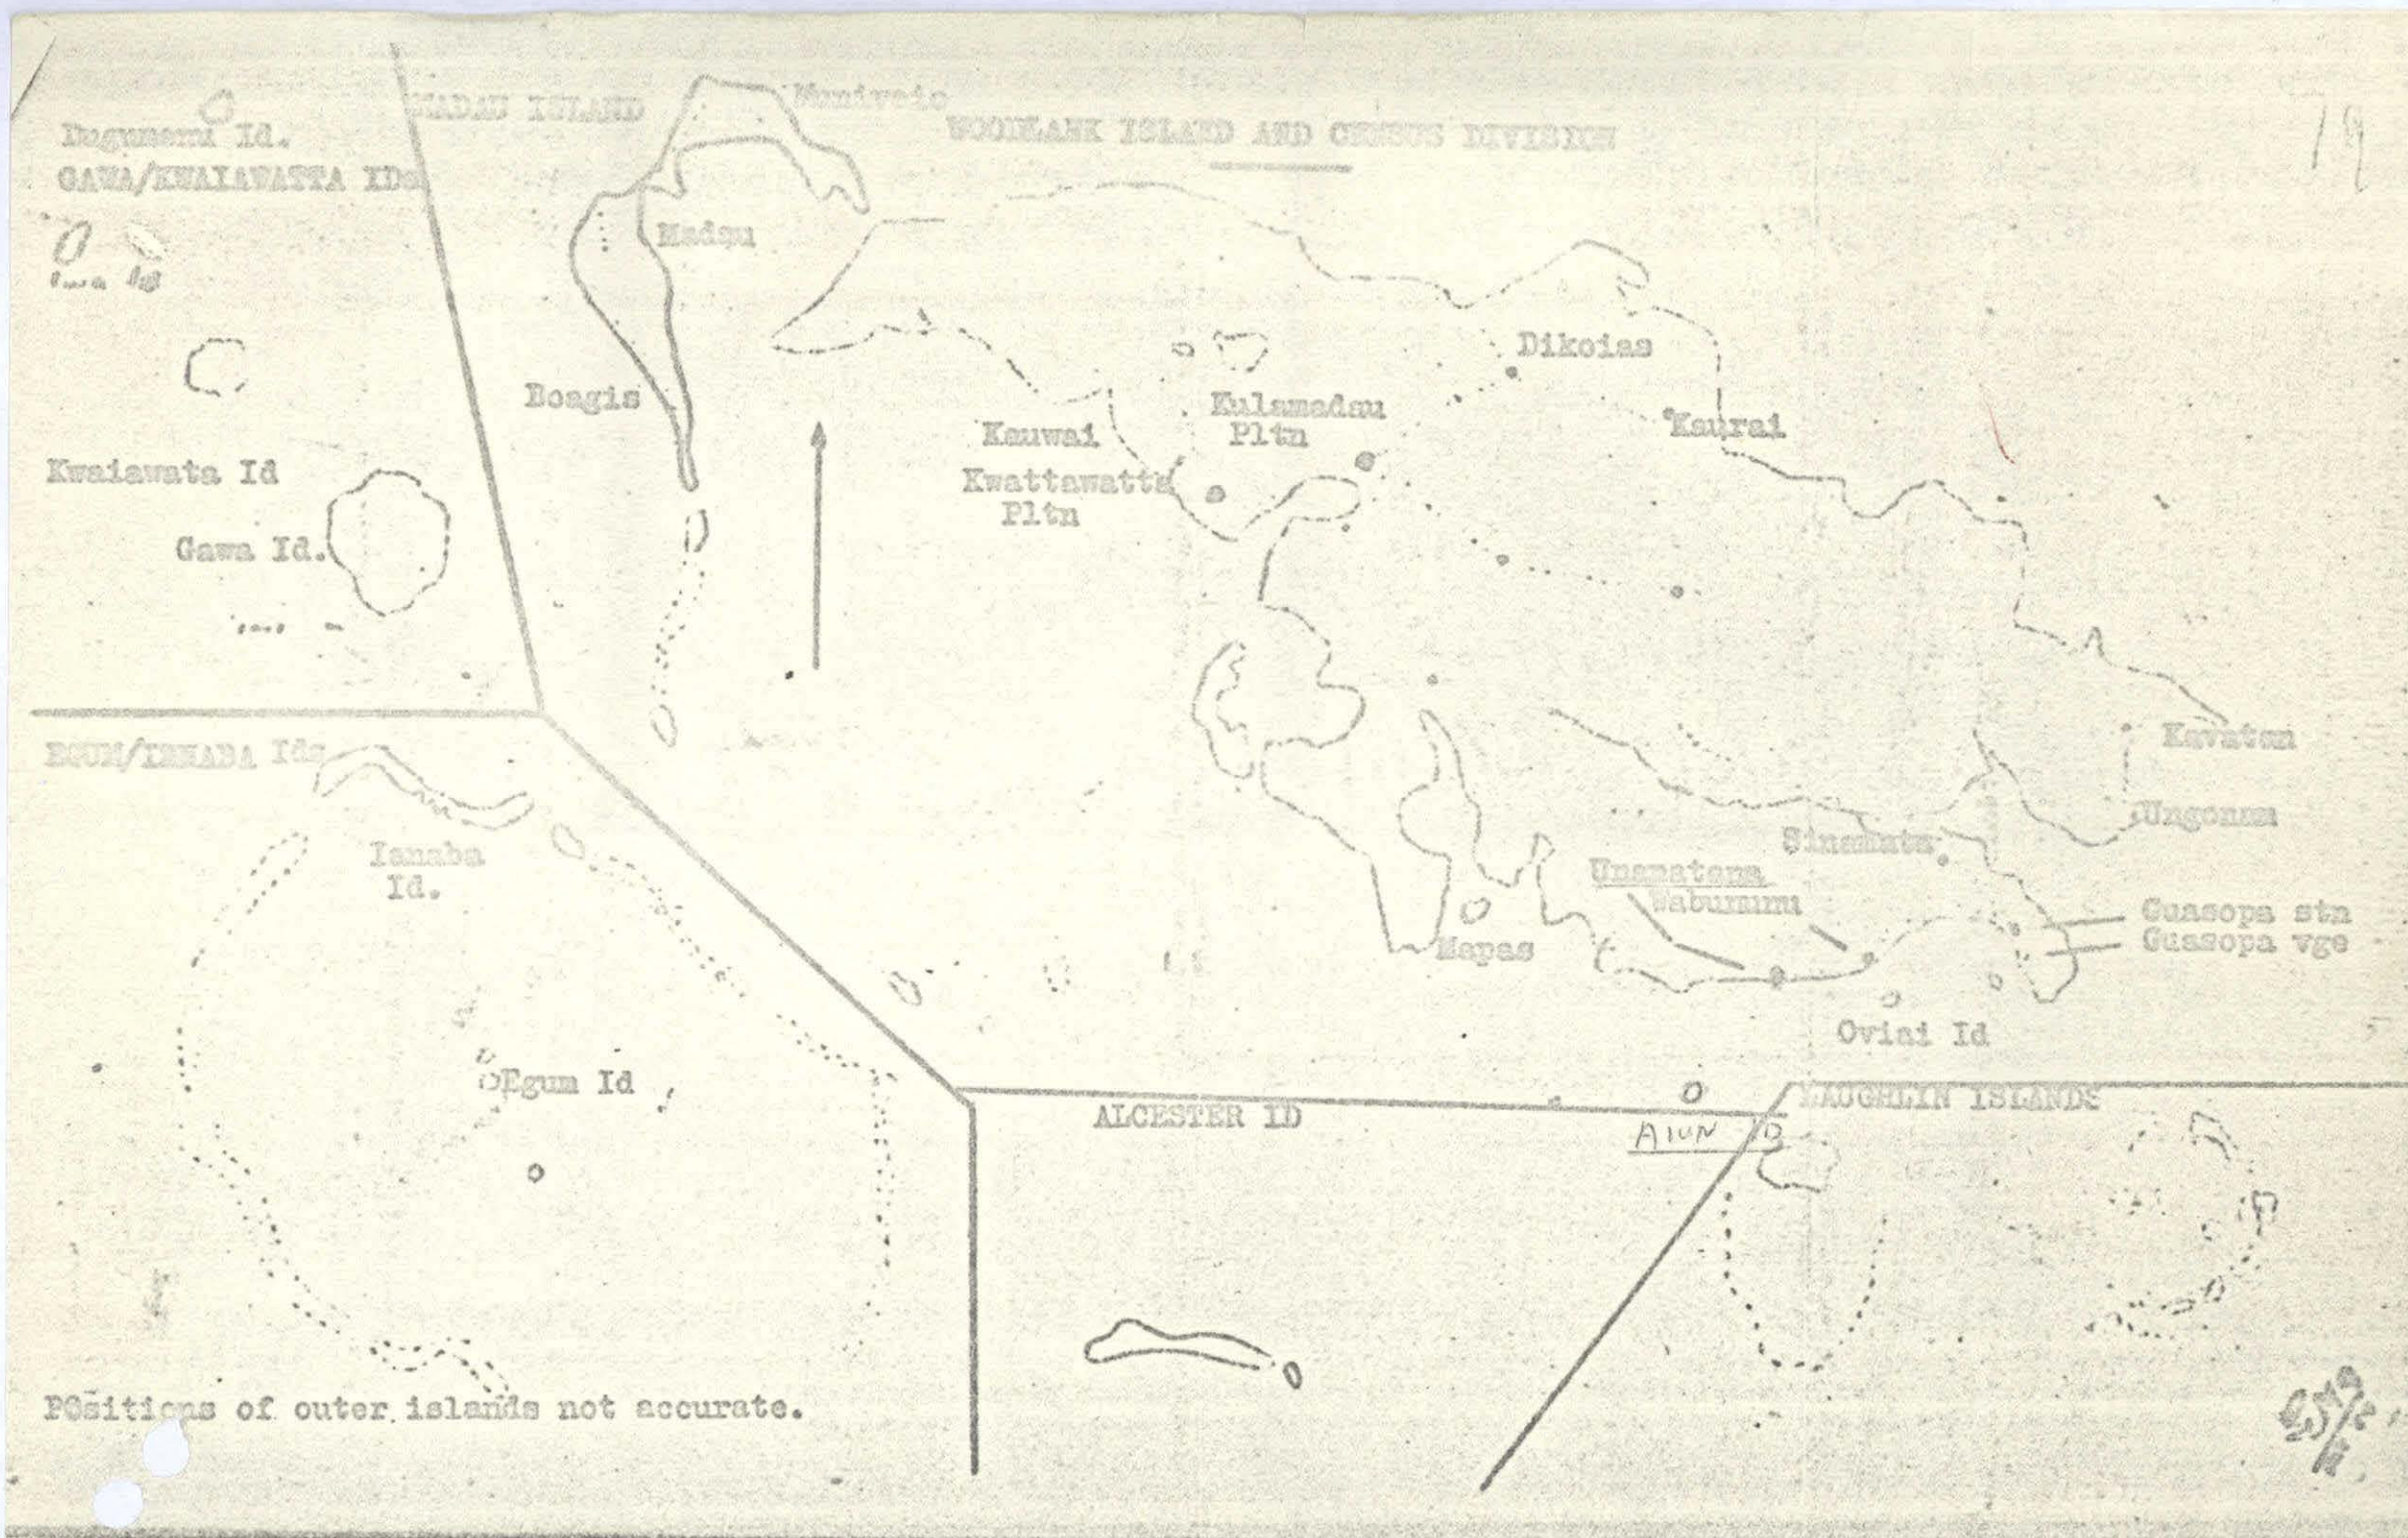

(M.L. Mackellar)
a/Assistant District Commissioner.

UNIDENTIFIED FLYING OBJECTS - AN EVALUATION BASED ON
AUSTRALIAN, AMERICAN AND BRITISH AIR FORCE REPORTS

A summary of an address given by Mr B.G. Roberts of the Operational
Research Office, Department of Air, CANBERRA
to the Ballarat Astronomical Society at BALLARAT,
February, 1965

The Term UFO and Some Objections to it

Uninformed Fanciful Observations?

1. Unfortunately the term "unidentified flying object", or UFO for short, because of its widespread and indiscriminate use is generally regarded as just another word for "flying saucer". This is a rather ironic situation since the term was originally introduced to combat just such an eventuality, and so overcome the tendency automatically and haphazardly to relegate all unidentified sightings to the category of "flying saucers".
2. Even the term "unidentified flying object" is somewhat of a misnomer, and this probably is the underlying reason for its indiscriminate use. We believe it to be a misnomer on a number of counts. Firstly many sightings are not of material objects but of what the observer, in all good faith, believes to be material objects. Freak weather conditions, electrical storms and unusual light conditions can give rise to misleading impressions, especially when the observer is unused to them and the time of viewing is short. The eye is not alone in this respect. For instance Radar is far from infallible. Radar echoes from dense clouds and pockets of air are quite common and can give the erroneous impression that some material object has been detected.
3. Secondly it is our experience that, except in sightings of aircraft, the process of flying is rarely involved. Many sightings are of the planets or of meteors entering the earth's atmosphere, and, in one case, we received an excellent report from some 17 separate observers in the Central NORTHERN TERRITORY of the re-entry of the Russian Satellite Cosmos II into the earth's atmosphere.
4. One might even go a stage further and challenge the word "unidentified" on the grounds that the classification is a purely tentative one, since information not available to the observer generally provides an adequate identification of the sighting subsequently. It is our experience that more than 90% of all well reported sightings can be identified satisfactorily. The rest cannot be identified specifically, mainly because the observer's report of the sighting does not contain sufficient information to provide an identification, or in cases where it is considered that further investigation is unwarranted. An example of the latter is illustrated by the case of a woman who wrote in 1964, after reading a newspaper report of a UFO sighting, to tell us of sounds she had heard one night more than twelve months previously; she did not know what date it was she had heard the noises and, as she was too frightened to get out of bed, she did not see what was making the noise. Could the "object" be identified? Naturally it could not be.
5. Although it is difficult to conjure up a name which adequately describes these sightings I think a more appropriate term than "unidentified flying objects" would be "unidentified aerial sightings" - the sightings being "unidentified" only insofar as the observer is concerned. It could be defined as an observation which remains unexplained to the viewer at least long enough for him to report it. Although the term may still be inadequate in some respects I think it removes some of the misleading inferences which were apparent previously when using the term "unidentified flying object".

Assessment of Aerial Sightings

6. The assessment of reports of unidentified aerial sightings in AUSTRALIA and the TERRITORIES is the responsibility of the Department of Air at CANBERRA. There is no hidden implication in this allocation of responsibility. The Department is simply the most appropriate authority for the task, which is performed to determine whether or not a threat to the security of the nation is involved.

7. Much effort and time is devoted each year to the assessment of aerial sightings. Reports have been received from as far south as TASMANIA and as far north as NEW GUINEA. Immediately following a report the observer is usually contacted and requested to complete a detailed pro-forma covering all aspects of the sighting. If there is no immediate and obvious explanation for the sighting the observer may then be interviewed by a member of the RAAF so that his creditability may be assessed and in order to obtain useful additional information. The Department of Civil Aviation may then be contacted concerning civil aircraft movements in the area, while military aircraft movements and weather balloon flights are also checked, in case they may have been responsible for the sighting. Satellites are also responsible for a number of reports, basically because of public interest in satellites and the increasing number put into our skies. The movements of satellites and satellite debris are checked through the Department of Supply, which tabulates data on all satellites, regardless of country of origin. Because of the steadily increasing amount of traffic in our skies, and in space for that matter, (more than 500 pieces of satellite hardware are orbiting the earth at this minute), the task of identifying aerial sightings is assuming substantial proportions. The Department of Air cannot be expected to issue an immediate explanation for sightings publicised in the press until all the information has been obtained and assessed. Consequently, some days will have elapsed before its publication could be expected and, then, only if it is deemed necessary.

8. Reporting Procedure. The procedure to be adopted when reporting an unidentified aerial sighting is to write a letter to the nearest RAAF base or, alternatively, to the nearest police station giving your name and address and as much of the following information as you may be able to recall :-

- (a) Date and time of the sighting;
- (b) Length of time sighting under observation;
- (c) Where the sighting took place;
- (d) Position of the sighting when first observed (e.g., overhead, coming from behind a hill, over the horizon etc.);
- (e) What was it that attracted your attention; (e.g. light, noise);
- (f) Did the sighting appear to be a light or a solid object;
- (g) What was its colour;
- (h) What was its apparent shape;
- (j) If more than one sighting was concurrently observed, how many were there and what was their formation;
- (k) Was any detail of the structure of the sighting observed;
- (l) Was any method of propulsion obvious;
- (m) Was there any sound (description, if any); and,
- (n) Your estimate of the object's height, speed and direction of flight.

9. Now this last item is very important and I would venture to say that unless you have some experience in estimating height and speed your impression of any object's height, speed and direction of flight could be completely erroneous. Why this is so becomes clear when one realises that any estimation of speed requires that we have some idea of an object's height and this, in turn, requires that we have some idea of the true size of the object.

10. If a sighting appears as a light or is so far away that we cannot discern any detail about it other than that it appears to be an object, then we have nothing against which to compare its size. Consequently our estimation of its size and our impression of its height and speed are likely to be in error. For example, an aircraft flying overhead at 300 mph at a height of 5,000 ft.

could easily give an observer the erroneous impression that he had sighted an object flying at 3,000 m.p.h., if he thought that the height was about 50,000 ft. Thistledown, less than one inch in diameter, which are blown up to 100 ft or so by the wind during our summer months, can appear as objects flying very high at fantastic speeds and capable of the most amazing manoeuvres, simply because their size is a matter of conjecture at the time. Similarly an aircraft flying directly away from the observer, particularly at night, could appear as a slowly descending or hovering object.

11. Since the size of the sighting, the direction of its flight and its distance from us is normally impossible to estimate accurately, it is better to make an estimate of the sighting's initial angle of elevations above the horizon, the angle through which it subsequently may appear to move and the time taken to do so.

The Identification of Aerial Sightings

12. Identified Sightings. With the information available from the aerial sighting report, an attempt is made to identify the sighting. In 9 out of 10 well reported cases this is usually possible. By far the greatest number of sightings have been attributed to astronomical phenomena, such as falling meteors or the view of a particular planet (such as Venus, Jupiter or Mars) which may have appeared unusual to the observer. Aircraft are responsible for the next highest percentage of sightings, while a variety of other causes, such as rockets of the firecrackers variety, weather balloons, satellite material and so on, combine to form the remainder. It is significant to note that our records show, both in 1963 and again in 1964, that the months during which the greatest number of aerial sightings were reported were also the months of greatest meteor activity. The months of July and August consistently bring in more sightings than any other month of the year.

13. Unidentified Sightings. The number of sightings which the Department is unable to identify from the information available has remained fairly consistently at around about two a year. Indeed, given sufficient time and effort, the number of unidentified sightings probably could be reduced further. One has to assess, however, whether the required additional time and effort is warranted. The Department of Air believes that there is, and always will be, a small number of sightings (due to high altitude phenomena, which are strange to the untrained eye) for which the available information will never be sufficient to enable an identification to be made. In other words it is just not possible to achieve a 100% record of successful identification. The ideal can be approached but not achieved, simply because the inaccuracies inherent in this type of work militate against its achievement. So much for experience in AUSTRALIA; what of the experience of overseas Air Forces such as for instance the USAF.

14. Experience in USA. Experience in the UNITED STATES runs parallel to our own. The Americans however handle many more reported sightings than we do, averaging from 400 to 600 each year. The analysis of all reported sightings in the USA has been the responsibility of the USAF Air Technical Intelligence Centre since investigations started in 1947. Since that time they have investigated some 9,000 reports.

15. In their effort to identify reported aerial sightings the Americans use automatic sorting and computing techniques, because these methods provide the best way to handle such great amounts of data. The written reports are reduced to IBM punch-card abstracts by means of logically developed forms and standardised evaluation procedures. The evaluation of the reports, a crucial step in the preparation of the data for statistical treatment, consists of an appraisal of the reports, the subsequent classification of the sighting, with the emphasis on complete consistency and objectivity. This consistency and objectivity can be maintained right through the analysis since the computer is a machine and not a man.

16. A typical breakdown of American identification, before improved reporting and investigating procedures were introduced, would have been as follows:-

Astronomical phenomena:	25%	of total sightings
Aircraft:	20%	"
Balloons:	16%	"
Other causes (lights, birds, hoaxes):	13%	"
Reports with insufficient information:	17%	"
Unidentified reports:	9%	"

17. Reports classified under the heading of "insufficient information" are those for which an essential piece of information is missing. For example the omission of sighting time or location.

18. After the new procedure had been in operation for some 6 months, the percentage of sightings remaining unidentified was reduced to one third of the previous figures. The figures for this period then became:-

Astronomical phenomena:	23%	of total sightings
Aircraft:	21%	"
Balloons:	26%	"
Other causes:	20%	"
Reports with insufficient information	7%	"
Unidentified reports:	3%	"

19. The effect of the new reporting and investigating procedures has continued to be marked, reducing the percentage of those unidentified to 1.6% and, on one occasion, to as low as 0.7%. The Americans, in fact, believe the percentage can be reduced even further.

20. Experience in UK. In the UNITED KINGDOM a somewhat similar picture presents itself. There, all reports of unidentified aerial sightings are processed through Defence Ministry Air Intelligence, and an average of 9 out of 10 sightings have been identified. Astronomical phenomena and aircraft are once again the main reasons for sightings. The Defence Ministry is confident that with more reliable information and improved reporting procedures, the number unidentified could be substantially reduced. The Ministry shares the opinion with the Americans that the impossibility of devoting ~~core~~ time and money is the main factor preventing the achievement of a rational identification for every report.

Conclusions

21. I would like to repeat the main points I have made as I think they are important. Reports of unidentified aerial sightings have been assessed by the Department of Air for the past ten years or so. Nearly all of these sightings have been identified as either astronomical phenomena, aircraft, fireworks, balloons or satellite material re-entering the earth's atmosphere. Astronomical phenomena is responsible for the greatest number of sightings and it is significant that there is a noticeable relationship between the time of year when the greatest number of sightings are reported and the time when the greatest meteor activity is experienced. There tends to be an increase of reported sightings each year around about the main meteor stream dates, which it is hard to believe is purely coincidental, and conversely there are few reports during the principal gaps between dates of meteor activity.

22. Both in the UK and USA, analyses of reported sightings have resulted in similar conclusions to our own. In the UNITED STATES, where some 9,000 sightings have been investigated over the past 18 years, scientific methods of data reduction have consistently demonstrated that there are no significant similarities between sightings which have not been identified. In fact improved reporting and evaluating procedures have markedly reduced the number of sightings falling into the "unidentified" category. Only the impossibility of providing an intensive effort and immense expense prohibits the expectation of a complete reduction of sightings, which currently remain unidentified and which now stands at around 2-3%.

23. The number of unidentified sightings each year in AUSTRALIA does not warrant such great effort or expense. Only where there is evidence that a threat to the security of the nation is involved (e.g. the possibility of foreign aircraft infringing our air space) would this attitude be reversed. The Department of Air believes that there always will be aerial sightings of high altitude phenomena which are strange to the untrained eye and that of these some will not be identified.

24. Finally, I would like to make it clear that the Department of Air never has denied the possibility that some form of life may exist on other planets in the universe. Just as we on earth are at the brink of our entry into space, it is not impossible that somewhere else in the universe (if intelligent life does exist out there), others have or are about to do the same. However, the Department has, so far, neither received nor discovered in AUSTRALIA any evidence to support the belief that the earth is being observed, visited or threatened by machines from other planets. Furthermore, there are no documents, files or dossiers held by the Department which prove the existence of "flying saucers".

25. For reasons already given, the Department will continue to assess all unidentified aerial sightings reported in AUSTRALIA and the TERRITORIES, and will continue to liaise with the UNITED STATES and UNITED KINGDOM on this matter.

26. Meanwhile and in conclusion, I have been asked to take this opportunity of expressing appreciation, on behalf of the Department of Air, to all those people who have taken the trouble to send reports to us. We believe they illustrate, quite conclusively, the alert and watchful attitude of the Australian public and that they demonstrate the high sense of civic responsibility which exists in our country.

25th August, 1965

FRIDAY 30th JULY, 1965

STATEMENT BY THE HONOURABLE PETER HOWSON, MP, MINISTER FOR AIRRAAF REPORT ON SIGHTING OF FLYING OBJECT

The RAAF today released the following information on the reported sighting of a flying object in the Canberra area on 15th July last.

The sighting was made by a number of people, including Department of Civil Aviation officials, who were on duty at RAAF Base, Fairbairn.

The RAAF said that while the sighting could not positively be identified, its investigators believed there were several possible explanations.

Firstly, the sighting could have been caused by the non-persistent condensation trail of a high-flying jet aircraft.

Alternatively, the sighting could have been caused by the planet Venus which is clearly visible during the day under some conditions and whose position approximated the direction of the sighting at the time.

A third possible explanation offered was that the sighting could have been caused by a high altitude radar reflecting meteorological balloon used in wind forecasting and prediction.

These balloons which are hydrogen filled, are sent to a high altitude and are clearly visible from long distances, due to the reflecting sunlight.

Furthermore, due to the varying moisture content in the air close to the ground, they often appear very furry, or have a "halo-like" appearance giving a very distorted effect. They may also change colour. These balloons are in use by the meteorological authorities in the general area and a number are periodically released from Wagga NSW. On occasions under the influence of strong winds, they have been known to travel considerable distances.

The visibility at the time of the reported sighting was extremely clear, with no cloud and the fact that the phenomena suddenly disappeared, could be explained by the fact that these meteorological balloons normally burst at varying altitudes.

The RAAF said that as announced previously the service receives a considerable number of reports of unidentified objects from all sections of the community and all these reports are investigated.

On many occasions they have turned out to be weather balloons high-flying aircraft, satellites, stars and meteors to mention a few, and over the last few years, only three or four per-cent of sightings could not be satisfactorily explained.

NEWSPAPER PHOTOGRAPHER MISTAKES NEPTUNE FOR FLYING SEMI-TRAILER:

There are many things for which one could mistake a NEPTUNE but a semi-trailer is not one of them nor is a VULCAN!

Yet this is what a staff photographer of one of the SYDNEY Sunday Newspapers claimed to see in the sky off MANLY at 7 p.m. one night about a month ago. Not only did he see it but he claimed to have photographed a mysterious flying object with a dazzling light surrounded by lots of red lights, giving the appearance of a semi-trailer at night. Two photographs of the report, was a dark shape, like that of a VULCAN V-Bomber; which made a noise which was neither like a jet nor a piston engine; he said the object appeared stationary for a minute or two then appeared to accelerate and rapidly disappeared. His statement of what he saw off MANLY was corroborated by a neighbour.

Your editor decided to conduct his own investigation and here are the results.

At 5.30 pm on the night concerned a NEPTUNE from No 11 Squadron, captained by Squadron Leader Jack Ingate, took off on a five hour night flying exercise off the coast from Sydney, during the exercise he dropped powerful parachute flares and also operated the aircraft searchlight briefly while off MANLY. He returned to RICHMOND after an uneventful exercise. This information had been communicated to Headquarters Operational Command before the flight to forestall reports of "mysterious light at sea" "distress signals off coast" "ship on fire at sea", such as have occurred in the past.

After the newspaper report of the mysterious lights in the sky, the above information was given to the newspaper through a RAAF Public Relations Officer. Not only did the newspaper not mention the obvious connection between the two events in its next issue - it printed two letters from readers who claimed to have seen the same lights.

It would appear that newspapers love their sensations particularly those involving UFO's and they are not particularly interested in mundane explanations. Flying semi-trailer indeed!

22nd September 1965

Dear Sir,

I understand that your Department has received information concerning the sighting of an unidentified flying object at Nebo, North Queensland, on the 24th June last by a grazier named Roberts.

Are you able to confirm the sighting, and advise particulars of your evaluation?

Yours faithfully,

PETER E. NORRIS
President.

Mysterious city light

A professional photographer took these strange pictures of a brilliant white moving light over Manly this week.

The photographer, Mr Frank Burke, of "The Sun-Herald" staff said: "It looked for all the world like a semi-trailer lit up.

"This effect came from a cluster of four to five small red lights which appeared to outline the white light."

The light, which appeared for about three minutes at seven o'clock on Monday night, hung motionless for almost a minute and Mr Burke was able to run inside for his camera and make two exposures.

The light then moved slowly northwards accompanied by a loud engine noise unlike either a jet or helicopter engine.

The light, shown in relationship to a cloud bank, has moved northwards in the second picture on the right.

At first Mr Burke thought the light was a low-flying aircraft, a helicopter or a flare.

But the light was much too bright to be the navigation lights—as the pictures show:

● 'DARK SHAPE'

If the light had been a flare it would have dropped slowly, Mr Burke said.

Instead the light appeared to have kept a constant altitude before it disappeared from sight.

An R.A.A.F. spokesman told "The Sun-Herald" he had not checked definite flight schedules for Monday night but it was "extremely unlikely" that the light had been an Air Force plane.

Describing the "pool of light," Mr Burke said: "What I couldn't understand was the red lights which seemed to surround the centre white light.

"At first I thought it must have been a Vulcan bomber because I thought I could pick out a dark V shape behind the light.

"But if it was a plane it must have been the slowest aircraft in the world."

Mr Burke's son, Kimbal, 12, said: "I was sitting looking out of the

"Din like thunder"

window when I saw the light in the sky.

"I watched it for three minutes altogether.

● 'LOW, SLOW'

"It just moved across the sky — like a slow plane. As it went above our house there were lights on all parts of it.

"There were red ones and a few white ones too."

"It made a noise like a plane—a very thundering noise.

"Personally, I think it could have been a plane, but because it was so low and slow it could have been a U.F.O., too."

FOOTNOTE: Mr Burke took his photographs on 35mm. Tri-X film with an f1.4 50 mm. lens wide open at half a second. The camera was hand held, causing slight blurring of lights in the photograph. The photograph shows the lights of Manly and the lights of the Eastern Suburbs above them to the right.

CH^W BASIL A. LINDROTH
c/o CLANCY MOTORS,
FOOMALLING.

Dear Sir,

Earlier tonight while attempting to sight the "Gemini 5" space craft a strange object was sighted by myself on the approx course as shown on the enclosed map; time 6-52 - 6-53 PM 26th Aug 65.

When first sighted the object was immediately overhead at a great height and within a minute or so was out of sight on the horizon; this object made no noise at all, but was a brilliant light which went on and off all the time of the sighting (as on a commercial aircraft), but for this to be an aircraft travelling so fast it would have to be fairly low and as there was no noise, I myself would rule this out.

I am sending this to the D.C.R. as I would like to know if a logical explanation is available for this; without being thought of as a crank.

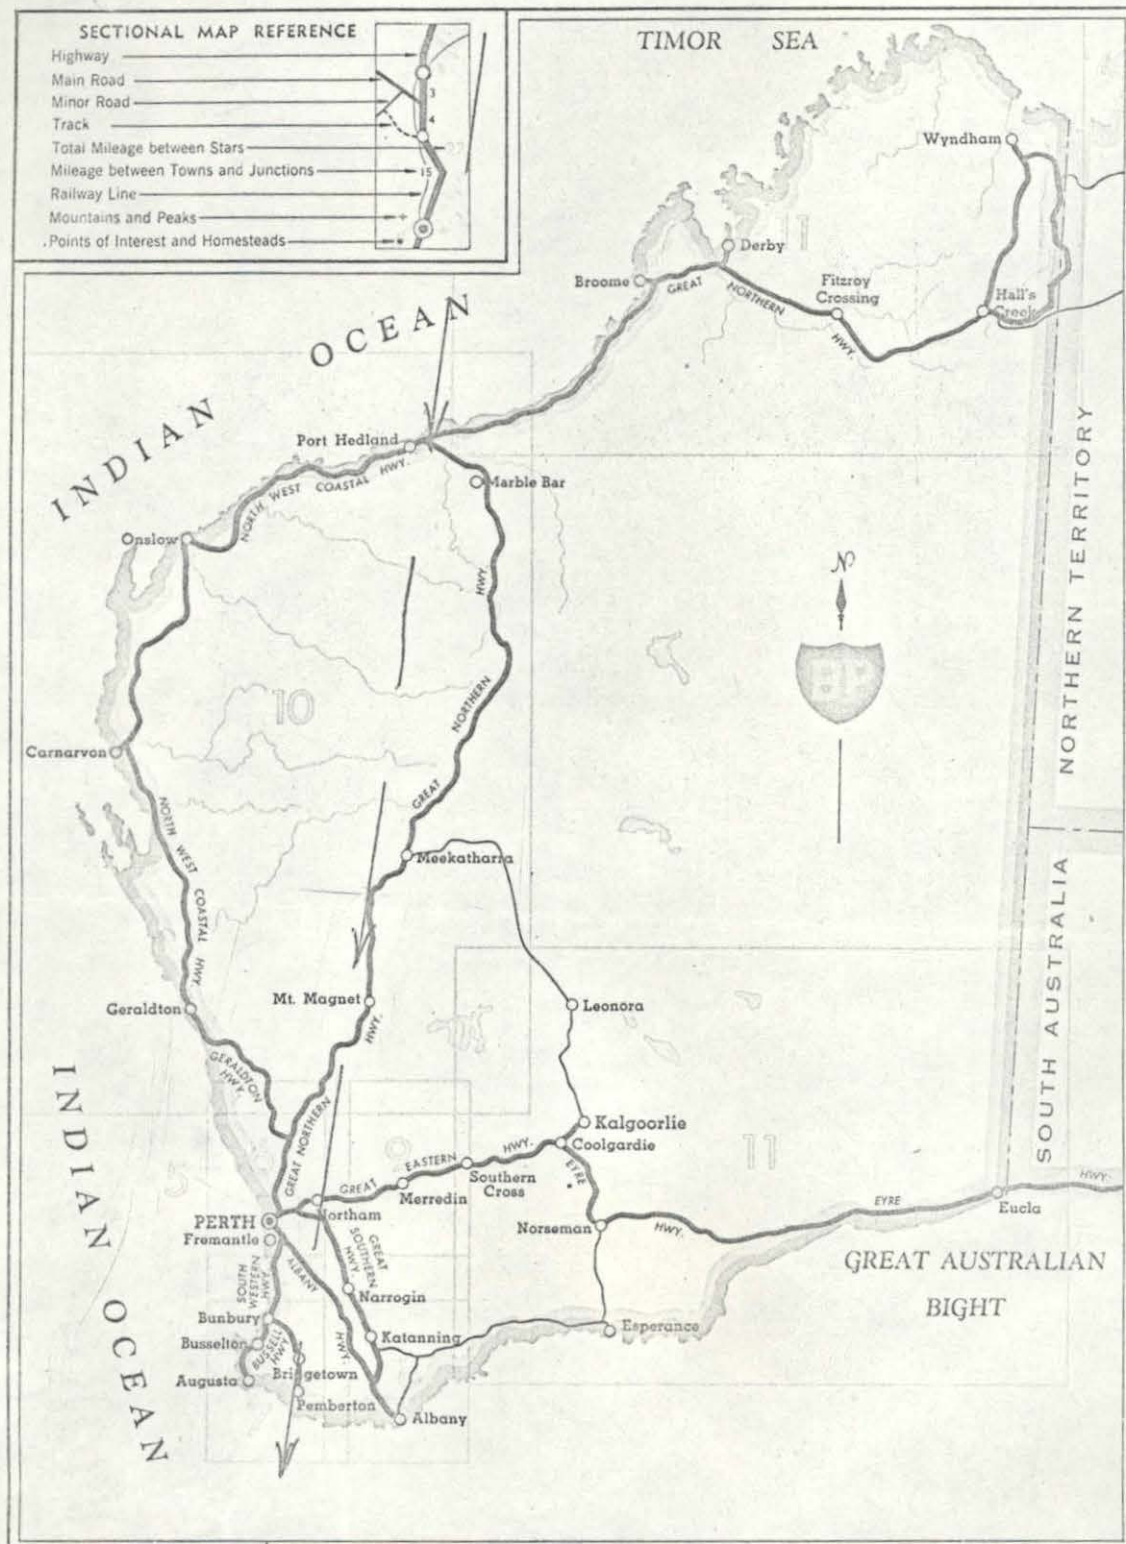

Yours Truly
Basil A Lindroth

THE THING

Strange story
of the goings-on
above an English town

ARTHUR SHUTTLEWOOD is editor of the Warminster Journal, a weekly newspaper published in a small country town in south-west England. This is his story. It appeared in the mass-circulation British newspaper, the Daily Mirror.

With 30 years as a journalist behind me, I am chief reporter and editor of the Warminster Journal, selling about 4000 copies each Friday, yet avidly read by more than the town's population of 11,000.

Frankly, I'm a very tired editor at present after eight of the most hectic months imaginable in a country town. Used to a working week of 60 hours, this has soared to an average of over 85 during the past month alone.

Why? Because of the Incredible, Sensational, Stupendous and fantastic **THING!**

And I use these glowing terms deliberately . . . I've been itching to do so ever since the first Thing story broke on Christmas Day.

Weird

Look at this picture. It was taken by Warminster factory worker Gordon Faulkner last Sunday week (August 28). I think it is the only photograph of The Thing.

But the story really began months ago . . .

Weird crackling noises in the early morning sky turned a normal and pleasant mother into a frightened human.

They came overhead, a peculiar droning accompanying them, then seemed to descend on her savagely, pushing her back against a wall, leaving her jelly-legged.

The same morning Warminster's head postmaster, level-headed Mr Roger Rump, heard the same noises.

"Just as though our rooftop was being roughly battered — as if the 5000 tiles were being ripped off and loudly slammed back into place again," was how he described it.

Pace

Among the dozens of

quently worked long into the night, some reports pouring into my phone receiver at between 2.30 and 5 a.m.

A village vicar and his family, plus a hospital physiotherapist, reported "a glowing cigar-shaped thing having a black circular patch or aperture at the bottom."

A retired factory security man and his wife saw "twin red hot pokers hanging downwards, a black space between."

A good 70 per cent of all visual reports since then have particularly stressed "huge eyes in the sky" or "car headlights glaring down."

Having seen Mr Faulkner's remarkable, almost awe-inspiring photo upside-down, I now see what these people meant.

Altogether I've dealt with 190 pieces of evidence in less than nine months.

Soared

Surprise visitors came from America, Italy, Germany, France and Britain.

The town's population of 11,000 soared overnight to over 18,000, hundreds of cars parked in the country lay-bys for miles around, hotels, restaurants, pubs and clubs chock-a-block with

guests or callers in search of The Thing or new knowledge.

Warminster is near Salisbury Plain, with its Army training centres. And there are several airfields — as well as the aero-research station at Boscombe Down.

But all the military authorities deny any responsibility for the strange phenomena.

A random spot-check of public opinion I carried out among 100 people told me that 15 per cent think it feasible we are under aerial survey from another planet.

Most of the others feel this "absolute rot."

Truth

Often battered, bothered and bewildered by the longest, most baffling, most persistent and bizarre news story ever to hit Warminster headlines, I can only now record that some sections of the populace are frightened, very worried over The Thing's visits.

And they want to know the truth about it.

Open minded at the start, completely unbiased one way or the other in "flying saucer" contentions and denials, writing objectively throughout as a reporter is trained to do to inform his public correctly, what do I think about The Thing?

So far as I'm concerned, it really is **OUT OF THIS WORLD!**

It's an effort to admit that, too.

Last (expert) words

ARTHUR SMITH, the Daily Mirror Science Reporter, writes: "It is one of the best photographs of a saucer ever taken, but the lack of any knowledge of the size or distance reduces its scientific value to nil. Many pictures like it have appeared in the United States — most of them faked."

And the Daily Mirror Air Reporter Peter Harris comments: "Sorry, but this picture is just too good to be true. I don't say flying saucers—or 'things'—CAN'T exist. Just that this picture does not convince me."

The man who took it

YOUNG Gordon Faulkner stepped out of the back door of his home. It was the evening of Sunday, August 29. He was going to see his mother. And he was taking his camera because his sister had asked to borrow it.

He shut the door behind him . . . and suddenly he saw "The Thing." This is how 23-year-old Gordon, a factory worker, described what happened:

"As it flew fast and low over the south of the town I could just make out the unusual shape. It made no noise. Hurriedly I got my camera free and aimed. The line of flight was too fast to follow.

So I held the camera well in front of it and pressed the trigger as it entered the view-finder. I didn't dream I'd get anything on film at all. It shook me rigid when I saw what came out of it

don sent the picture to the Warminster . . . He thought the editor would scoff. But . . . n't scoff. **THIS WAS A SCOOP.**

The camera? It's a Halina 35 mm., which . . . on infinity at

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer **R. GROVES**
2. Address of Observer **24 Claremont Street, Launceston.**
3. Occupation of Observer
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... **26 0845 Z**
5. Period of Observation(s) **15 minutes**
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
From residence at Claremont Street, Launceston.
.....
.....
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
one NW direction - travelling to SE - 2nd object travelling in opposite direction
.....
8. What first attracted observer's attention, e.g. light or noise.
..... **Light**
9. Did object appear as a light or as a definite object.
..... **moving stars**
10. If there was more than one object, how many were there, and what was their formation.
..... **two moving in opposite direction**
11. What was the colour of the light or object **star coloured**
12. What was its apparent shape **round - size golf balls**
13. Was any detail of structure observable
..... **NO**
14. Was any method of propulsion obvious **NO**
15. Was there any sound **NO**
- 16.** Height, or angle of elevation **overhead - over LT**
- 17.** Speed, or angular velocity **Slow speed**
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... **NIL**

++ Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
approx. line NW/SE over centre LAUNCESTON
.....
20. Did the object remain on a straight path, deviate or manoeuvre at all.
straight path
.....
21. Was any trail of exhaust, vapour or light seen No
.....
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
disappeared behind a cloud
.....
23. Existence of any physical evidence such as fragments, photographs, or other
supporting evidence.
NIL
.....
24. Weather conditions experienced at time(s) or observation(s)
Broken cloud 2500' with lower patches 1200'
.....
25. Location of any air traffic in the vicinity at the time of sighting.
NIL
.....
.....
26. Location of any meteorological stations in the general area.
LAUNCESTON AIRPORT
.....
27. Any additional information Probable explanation: sighting was stars
given appearance of movement by low wind blowing over Launceston and
Airport - Launceston Tower Controller was unable to obtain sighting of
any objects.
.....

Questions 25, 26 and 27 to be answered by interrogator.

(A.K. CARRUTHERS)
Flight Lieutenant
For Officer Commanding

~~CONFIDENTIAL~~

UNCLASSIFIED

1. Name of Observer Roland Aubrey ROBERTS.....
2. Address of Observer Dania Station via Neba.....
3. Occupation of Observer Grazier.....
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 24th June, 1965. 1845 Hrs.....
5. Period of observation (s) 30 seconds.....
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... W.A.C. No. 3234. Clermont area. Position 148°16' East. 22°17' South.
..... Visual
.....
.....
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon etc.
..... Coming towards observer from .. towards S.W. approximately
.....
8. What first attracted observer's attention, e.g. light or noise.
..... Just looking at the sky to see if any clouds were building up that
may contain rain when I noticed the lights
9. Did object appear, as a light or as a definite object.
..... As a definite object with lights around the side of it brilliant
bluish white
10. If there was more than one object, how many were there, and what was their formation.
..... One object sighted.....
11. What was the colour of the light or object. Silver dome top and black under
neath. This would be caused by the brilliant lights.
12. What was its apparent shape Saucer shaped with a dome.....
.....
13. Was any detail of structure observable Yes dome top and rows of lights
along the side and across the front.....
14. Was any method of propulsion obvious It had a constant red jet tail or
slip stream at the rear the colour did not vary.
15. Was there any sound .. Could hear no sound.....
- * 16. Height, or angle of elevation About 500 feet.....
- * 17. Speed, or angular velocity .. No idea of speed but travelling at terrific
speed.
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... Was using trees in the area as a yard stick to guess the height.
has seen jets flying but never seen anything move as fast as the
object observed. More or less from when the object sighted on the
western Horizon until it vanished in a N.E. Direction and lost on
the horizon

* Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the subject, the angle through which it moved, and the time taken to do this.

Report on aerial object observed (Contd)

19. Direction of flight with reference to landmarks or points of the compass.
.....From Approx S.W. Direction turned about 1 mile from where I was standing at the homestead gate the went
20. Did the object ~~Remained on~~ straight path, deviate or manoeuvre at all.
.....Turned onto another heading N.E. when near Daunia Station.
21. Was any trail of exhaust, vapour or light seen Yes...Red tail.....
22. Where did object disappear e.g. in mid-air, behind a hill, over the horizon.
.....Over horizon.....
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
.....None.....
24. Weather conditions experienced at time(s) or observation(s)....Dry.....
Clear weather.
25. Location of any air traffic in the vicinity at the time of sighting.
None
26. Location of any meteorological stations in the general area
Mackay
27. Any additional informationThe object sighted would have been between 30 to 50 feet across. With bluish white
.....light seperated by black patches: uprights could see no legs or landing gear under the object.
.....The observer is a sober and reliable person.....

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer Mrs. Bloomfield
2. Address of Observer Kimberly Tasmania (tel Kimberly, 35)
3. Occupation of Observer Housewife (Farming family)
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 032315k July 1965
5. Period of Observation(s) 15 minutes approx.
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... Visual Observation point was at farm house situated 2 miles east
- from hill where object was seen. This hill is known as "bill goathill".
- although this is thought to be a local name only.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
..... above and behind hill
8. What first attracted observer's attention, e.g. light or noise.
..... bright lights
9. Did object appear as a light or as a definite object.
..... Actual object not seen only lights coming from it.
10. If there was more than one object, how many were there, and what was their formation.
..... one only
11. What was the colour of the light or object yellow/white
12. What was its apparent shape Unknown
-
.....
13. Was any detail of structure observable No
-
14. Was any method of propulsion obvious No
15. Was there any sound .. Yes. Observer stated that object was emitting an engine sound, like a loud humming.
- 16.++ Height, or angle of elevation Unknown
- 17.++ Speed, or angular velocity Slow descent, then stationery, then slow ascent
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... Nil

++ Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
..... south (observer was uncertain about this)
20. Did the object remain on a straight path, deviate or manoeuvre at all.
..... descended, was stationery, then ascended
21. Was any trail of exhaust, vapour or light seen No
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
..... behind hill
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
..... observer did not proceed to location of sighting, however
country is reported to be very rough
24. Weather conditions experienced at time(s) or observation(s)
..... raining and low cloud
25. Location of any air traffic in the vicinity at the time of sighting.
..... Nil
26. Location of any meteorological stations in the general area.
..... Nil
27. Any additional information Observer was quite adamant that object was...
airborne and stated she thought it was an aeroplane in distress
..... or helicopter hovering looking for a suitable landing place..
The lights mentioned appeared to be slanting down similar to
..... landing lights of an aircraft... The lights were so bright that
they clearly illuminated a herd of cattle in a nearby paddock.
.....

Questions 25, 26 and 27 to be answered by interrogator.

72A

SIGHTING OF UNIDENTIFIED AIR HAZARD

by 28413 Capt B. J. O'NEILL on 22 Jul 65.

GENERAL

1. At 220918Z, whilst flying in CESSNA A98 - 144 en route from AMBERLEY to DALBY at Flight Level 65, an unusual light was observed by myself and my student 2Lt V. T. SALMON.

DESCRIPTION

2. At the time of the first sighting, my aircraft was on a magnetic heading of 273° at FL 65 and approx 15 miles EAST of DALBY. The light was observed in a position approximately 10-15 miles NORTH of DALBY, being slightly to the right of my track at that time, and appeared to be in a stationary position slightly above the ill-defined horizon.

3. As I then believed it to be the navigation light of another aircraft, I drew SALMON's attention to the light and we both observed it to change colour from RED through WHITE then GREEN to RED again in a continuing cycle, without noticeably changing its original position. I noted the time as being 220918Z and called BRISBANE AERADIO on frequency 120.7 mcs to ask if there was any other known air traffic in the DALBY area at that time. BRISBANE replied to the negative and communication on both VHF and HF ~~was~~ lost before details of the sighting could be passed.

4. The light remained in sight for a further ten minutes as we continued on our original heading, but gradually lessened in intensity, giving me the IMPRESSION that the object displaying the light was :-

- (a) Airborne
- (b) Flying on a similar heading to our own - 273°M - (as there was no noticeable lateral or vertical displacement of the light throughout the observed period)
- (c) Travelling at a faster speed than our own aircraft (TAS approx 105 kts)

5. Contact with the light was eventually lost at approximately 220928Z, my aircraft at that stage being overhead the Broadcasting Station at DALBY and the light having faded into the distance on the Western horizon, still, on last sighting, changing colour in the sequence already noted.

6. Despite continual attempts to make radio contact with BRISBANE on 120.7 mcs in 5499 kcs and AMBERLEY on 135.9 mcs, it was not possible to pass information on this sighting until approximately 220945Z when contact was again made with BRISBANE AERADIO on 120.7 mcs.

CONCLUSION

7. Subsequent questioning of other Squadron pilots more familiar with this area than myself failed to reveal the presence of any beacons mounted on TV masts, etc., in the area. In any case such explanation of the light is unacceptable in terms of the diminishing intensity as we approached its source, and its apparent elevation when first sighted. Secondly, I am reluctant to consider the light as some phenomena associated with the "heavenly bodies" due to its initial brightness and final obscurity. Finally, it is noted that this is the first time that I have ever noted such an occurrence in nearly 1800 hrs of flying time spanning the last eight years.

.....
(B. J. O'NEILL) Capt
16 Army Lt Ac Sqn

STATEMENT BY : 19993 2Lt V. T. SALMON

OF : Unidentified object

AT : Approx. 10 miles North of DALBY

ON : 220918Z - 220928Z

Object was first sighted by my instructor Capt B. J. O'NEILL while we were flying from AMBERLEY to DALBY on the first leg of a night navigation exercise.

We were flying at flight level 65 on a heading of 273° Magnetic.

The object appeared to be a flashing red, white and green light much the same as the rotating beacon on a SIOUX helicopter. It appeared to be at about the same level as ourselves.

Capt O'NEILL contacted BRISBANE AIR RADIO and enquired as to whether there was any other traffic in the vicinity at that time. When BRISBANE AIR RADIO replied their answer was that there was no known traffic in the area.

In the meantime the light appeared to be moving away from us on approx. the same heading and finally disappeared at 220928Z.

UNIDENTIFIED FLYING OBJECTS

1. The following reports were received by the
Duty Operations Officer at this Headquarters:

- (a) From Mr J. Clayden of 16 Hunter Street,
LEWISHAM who is Private Secretary to the
Minister for Transport NSW:-

"Saw a light alternating between green,
red and white above the horizon. It
stayed in the same plane and six people
sighted it. The sighting was from a
homestead at WOODSTOCK 14 miles east
of COWRA looking south. The time was
1250 PM on the 1st August 1965".

- (b) From Mr Musgrave telephone 350477 day,
484565 night:

"While sitting in a parked car with
two friends in Kite Street ORANGE at
1015 AM on the 4th August they noticed
what appeared to be a helicopter
approaching from the South West. However,
when the object came nearer there appeared
to be no wheels and no rotor blades.
The object was silver in colour and had
what appeared to be an aerial
sticking out of the top. It moved
slowly and came within one mile of the
town at approximately 3000 feet altitude
and departed in a South Easterly direction.
It remained in sight for ten minutes."

2. No action has been taken on either sighting at this
Headquarters.

DEPARTMENT OF DEFENCE,
CANBERRA, A.C.T.

The Secretary,
Department of Civil Aviation,
"Henty House",
399 Little Collins Street,
MELBOURNE C.1. VIC.

REPORT OF U.F.O. IN MILNE BAY AREA.

Attached for your information is a report on an unidentified flying object sighted by the officer in charge of the Sehulea Patrol Post, Esa'ala Sub-district Milne Bay district of New Guinea.

2. The report was received from the Department of Territories.

(Sgd.)
(L. MacLean)
Secretary.

C O P Y.

Confidential

Patrol Post,
Sehulea.

26th May 1965.

The Assistant District Commissioner,
ESA'ALA.

UNIDENTIFIED FLYING OBJECT SIGHTED.

On Tuesday 25th May 1965 at about 8 P.M. in the evening I was relaxing after dinner when I noticed a flash of light in a South Westerly direction. The light was blue in colour and appeared unusual. I investigated to see what had caused the flash thinking it may have been the house girl in the spare room with a torch. This was not the case and put it down to lighting. However it was repeated a few moments later and I saw that it came from outside. When I went out I saw a light at what I estimated to be between 5,000 and 8,000 feet above sea level over Karogorea Bay. The light appeared to me to be yellow green in colour (I have a colour - red green - complex). My wife said when she saw it that it was changing from red to green which would explain my difficulty in identifying the true colour.

We watched the U.F.O. and it appeared to be wavering back and forth and moving up and down slightly. The appearance was one of a hovering light. We watched it for about $\frac{1}{2}$ an hour (Between 2000 and 2030 hrs.). The light given off from the U.F.O. was sufficient to light up the beach as a new or 1st quarter moon would. I attempted to take two photographs of it by time exposure and these may give some idea as to what it was.

Eventually the object dropped slightly then rose and disappeared in what we took to be a westerly direction.

The night was overcast to some extent in that area and now stars were showing - this appeared to be below the cloud layer. To the South at Karogorea village it was raining. No other people apparently saw this as I made enquiries with a negative result. The native house girl also witnessed the proceedings.

I would not like to make any suggestions as to what it was as it was nothing like I have seen before.

For your information please.

(sgd.) K.E. Hollamby
Officer in Charge.

SIGHTING OF UNUSUAL AERIAL OBJECT

1. Attached, for information, is a report by Mr G.J. Evans of Frankston Victoria concerning an un-identified flying object on 3rd August 1965.
2. Mr Evans telephoned this Headquarters on the morning of the sighting and was requested to submit the questionnaire paper in the interests of the Air Force.

REPORT ON AERIAL OBJECT OBSERVED

- 1 Name of Observer GRAHAM JOHN EVANS.
- 2 Address of Observer 44 SUMMIT ROAD, FRANKSTON
- 3 Occupation of Observer SUPERVISOR - GAS & FUEL CORP.
- 4 Date and Time of Observation 3-8-65- 6-10 AM
(Time given in 24-hour clock zonal time)
- 5 Period of Observation(s) APPROX 2-3 MINUTES.
- 6 Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks and describe any equipment used in the observation)
I WAS STANDING AT CORNER OF YVILLE
AND WILLIAM STS FRANKSTON.
- 7 Where was Object First Observed: (eg - Overhead, coming from Behind a Hill, over the Horizon, etc)
ALMOST OVERHEAD - IF ANYTHING IT WOULD BE SOUTH OF OVERHEAD.
- 8 What First Attracted Observer's Attention
(eg - Light or noise)
I WAS LOOKING AT WHAT I THOUGHT WERE 2 STARS WHEN I STARTED TO DRAW AWAY
- 9 Did Object Appear as a Light or as a Definite Object
LIGHT
- 10 How Many Objects Were There, and What Was Their Formation
ONE FIRST AND ANOTHER LATER ON A DIFFERENT PROJECTORY.
- 11 What was the Colour of the Light or Object SAME AS A STAR.
- 12 What was its Apparent Shape UNKNOWN
- 13 Was any Detail of Structure Observable No.
- 14 Was any Method of Propulsion Obvious NO
- 15 Was There any Sound NO.
- * 16 Height, or Angle of Elevation * } SEE EXPLANATION
- * 17 Speed, or Angular Velocity * } AT REAR OF SIGNED
COPY.

.../2.

* Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved and the time taken to do this.

- 18 State any Experience which Enables Observer to be Reasonably Sure about the Answers given to 16 and 17

NIL

- 19 Direction of Flight with Reference to Landmarks or Points of a Compass

SOUTH TO NORTH

- 20 Did the Object Remain on a Straight Path, Deviate or Manoeuvre at all

IT WENT ON THE SAME PROJECTORY BUT STOPPED A FEW TIMES

- 21 Was any Trail of Exhaust, Vapour or Light Seen NO.

- 22 Where did Object Disappear. (eg - in Mid-Air, Behind a Hill, Over the Horizon)

I DID NOT SEE END OF FLIGHT BECAUSE I WAS DISTRACTED BY SECOND UFO.

- 23 Existence of any Physical Evidence such as Fragments, Photographs or other Supporting Evidence

NIL

- 24 Weather Conditions Experienced at Time(s) of Observation(s)

GOOD.

- 25 Location of any Air Traffic in the Vicinity at Time of Sighting

ONE TAA ELECTRA ETÁ ESSENDON 0649K FROM PERTH -
ie WEST TO EAST.

- 26 Location of any Meteorological Stations in General Area
MET STATIONS AT LAVERTON AND ESSENDON. BOTH STATIONS RELEASE
LIGHTED WEATHER BALLOONS FOR UPPER WIND-FINDING PURPOSES AT
0315K.

- 27 Any Additional Information

THESE BALLOONS HAVE RATE OF ASCENT OF 500 FT PER MIN -
ie AT TIME OF SIGHTING OF UFOs, BALLOONS WOULD BE APPROX
90,000 FT AND NOT VISIBLE TO NAKED EYE - IF, THAT IS, THEY
WERE STILL AIRBORNE.

Signature of Observer C. H. Brown

Signature of Interrogator

I WAS WAITING FOR A LIFT IN THE MANS CAR WHO LIVES
AT CORNER OF YADUE & WILLIAMS STS WHEN MY EYES
WERE ATTRACTED TO WHAT I THOUGHT WERE 2 BRIGHT STARS.

ONE OF THE "STARS" STARTED TO DRAW AWAY FROM THE
OTHER AT A GREAT SPEED ~~AND~~ DUE NORTH BUT AFTER
A SHORT PERIOD (SECONDS) IT STOPPED AND THEN MOVED
OFF AT A SLOWER PACE, BUT STILL FAST.

I RAN IN TO GET TOM (SURNAME UNKNOWN)
AND HE JOINED ME TO WITNESS WHAT HAPPENED
FROM THIS POINT.

WE SAW THE UFO STOP AND START
A COUPLE OF TIMES BUT WHEN IT WAS TRAVELLING
IT REALLY MOVED.

THEN WHEN IT WAS ON WHAT APPEARED
TO BE CLOSE TO THE HORIZON ^{NORTH} (WE WERE ON A HILL) WE
SAW ANOTHER UFO APPEAR FROM WEST TO EAST
THIS ONE HAD 2 FLASHING WHITE LIGHTS ON IT. IT
WAS TRAVELLING VERY FAST AND VERY HIGH (BUT NEITHER
TOM OR I ARE ANY DECENT JUDGE OF HEIGHTS)

I ESTIMATE APPROX 1/2 TO 1 MINUTE FROM HORIZON TO
HORIZON. IF I KNEW A SPACECRAFT WAS THERE I WOULD SAY THIS
WAS IT.

WE DID NOT SEE END OF FLIGHT OF
FIRST UFO DUE TO BEING DISTRACTED BY
SECOND UFO. THEY WERE 2 DIFFERENT OBJECTS
ENTIRELY.

Unidentified Flying Objects.

The following is the text of a report received from Mr. C.N.K. Bell, P.O. Box 1010, Darwin regarding the sighting of an unidentified object on 13th June, 1965.

"At 2107 hours a bright yellow ball of fire was sighted 20° W of N while at Mudginberri Station. It had a trail of bright blue when sighted falling toward the sea. The yellow ball was approximately the size of threepence and the tail 3" long - then appeared a white ring around it. On disappearing into the sea (or horizon) there was a brilliant blue (whitish) flash.

Time was checked with Mr. Ken Gosfer of Mudginberri Station (Manager) who also saw the object. Time being 9/37 p.m."

We have no record of any Civil aircraft movements which would account for the sighting by Mr. Bell.

This report is referred for your information and, if warranted, further investigation.

REC'D P.A. 30 JUL

Atch.

76

Nivani Plantation,
Deboyne Plantation,
24th. July, 1965.

The District Commissioner,
SAMARAI.

Dear Sir:

Un-identified Flying Object

On the morning of Sunday 18th. July I awoke hearing a noise like a diesel vessel approaching. I looked at my bedside clock and it read 11 p.m. Then I noticed a red glare outside on the hill side and immediately thought the dry grass in the plantation was afire so I immediately went outside the house to have a look. The red glow was coming from an object in the sky which was a glowing red colour and shaped like this:

It looked from my position to be about 3 ft long and 1 ft. thick and may have been about 1,000 feet up but this is difficult to judge at sight.

It cruised forward and backward three times not turning on the return run but reversing on its own tracks, the distance it travelled forward and backwards over my house being $\frac{1}{2}$ mile. All the time it gave off a noise like a diesel vessel.

I went to the house and used the plantation phone and called my Overseer and he and several boys immediately came to my house. I went outside to meet them but the object had disappeared and also the noise. The boys say they also heard the noise and thought the vessel "Koonwarra" which was expected was coming. However, they did not see the object as they remained indoors with the shutters and door of their house closed.

I did not report this immediately as I was afraid of being ridiculed but several days later I visited Buaruanda and three or four Europeans there reported having seen the same object on Saturday night the 20th. July and again on Sunday night the 21st. at approximately the same time of the night, i. e. 11 p.m. They saw it again Monday night.

Yours faithfully,

(Mrs.) Wessy Miller.

LIGHT IN THE NIGHT SKY

On the night of Monday the 5th of July, a bright white light was seen from the Poseidon, at the time anchored at TEWATEWA. It was seen by myself, Mr. K. Furphy C.P.O., the ship's boatswain and members of the crew.

Star/plane?
The light was sighted at 1856 local time and remained visible until 1903 when it went out or disappeared. It was on a bearing of West (270 compass) from the Poseidon, and at an elevation of about 10 degrees above the horizon.

The light was much brighter than any star visible then or later, and the clear white quality of its light, and its position in relation to land, rule out bush fires as an explanation.

The boatswain reported to Captain Faiteli, who logged the report.

Subject: Unidentified Flying Object - SEHULEA.

Reference: My coded telegram 002 of 3/7/65 from Sehulea

Further to my reference telegram I respectfully advise that I conducted diligent inquiries through all villages and hamlets of SUPUPU and KEROROGEA Bay on 2/7/65 and 3/7/65 and was able to corroborate the information contained therein in that six (6) other persons of KESAGA Hamlet of WEIOKO Village saw the subject phenomenon. One reason why other witnesses were not found is that the night of sighting was so cold that most persons were indoors.

2. It is further advised that during the course of these investigations another recent sighting by village people was reported by Councillor David of MWATEBU who said that

"On 17th June an object passed over Sewataitai at about 7 pm from the direction of Sanaroa Island towards Sewa Bay. It made no sound but emitted a bright beam of red light directed towards the earth. The light fluctuated in intensity. It did not appear to be travelling very fast but did not stop or hover. This object was seen by approximately 100 people from MWATEBU who were camped in company in the open near Sewataitai after doing maintenance work on the MWATEBU - SEWATAITAI road".

This statement was taken by me from the Councillor in the presence of the other witnesses who agreed that his description was correct.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer DAVID WEBSTER (11 years of age)
2. Address of Observer 219 Derwent Avenue, Lindisfarne, Hobart.
3. Occupation of Observer Schoolboy (on paper run)
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 290640
5. Period of Observation(s) 10 secs.
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
Visual observation from Main Road, Lindisfarne. Approx. $\frac{1}{2}$ mile
from Tasman Bridge.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Coming from behind Mt. Wellington (4165 feet)
8. What first attracted observer's attention, e.g. light or noise.
Slight clicking noise
9. Did object appear as a light or as a definite object.
Light
10. If there was more than one object, how many were there, and what was their formation.
One only.
11. What was the colour of the light or object Blue to green with occasional red at rear.
12. What was its apparent shape Like the blade of a knife but sharp at both ends.
13. Was any detail of structure observable Nil.
14. Was any method of propulsion obvious Red colour at rear like jet motor.
15. Was there any sound Slight clicking noise when overhead.
- 16.** Height, or angle of elevation Took approximately 5 secs. to traverse sky from Mt. Wellington to hills (500'/1000') behind Lindisfarne.
- 17.** Speed, or angular velocity
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.

** Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
SW/NE then NE/SW
.....
20. Did the object remain on a straight path, deviate or manoeuvre at all.
Straight path
.....
21. Was any trail of exhaust, vapour or light seen Red light seen at rear.
.....
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
Behind Mt. Wellington.
.....
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
Nil
.....
24. Weather conditions experienced at time(s) or observation(s)
Calm clear cold cloudless (air temp. approx. 35°F)
.....
25. Location of any air traffic in the vicinity at the time of sighting.
Nil
.....
.....
26. Location of any meteorological stations in the general area.
Hobart Bureau (4 mls SSW) airport office (7 mls ENE)
.....
27. Any additional information (Sunrise 07.41. First Light 07.09 (Airport)).
Phenomenon traversed from Mt. Wellington to hills behind Lindisfarne
disappeared then reappeared slightly further north to traverse sky
and disappear behind Mt. Wellington.
.....

Questions 25, 26 and 27 to be answered by interrogator.

Ground distances observed to Mt. Wellington 7 mls. Observed to lower hills 1 mile.

.....

26th May 1965.

The Assistant District Commissioner,
ESA'ALA.UNIDENTIFIED FLYING OBJECT SIGHTED

On Tuesday 25th May 1965 at about 8 P.M. in the evening I was relaxing after dinner when I noticed a flash of light in a South Westerly direction. The light was blue in colour and appeared unusual. I investigated to see what had caused the flash thinking it may have been the house girl in the spare room with a torch. This was not the case and put it down to lighting. However it was repeated a few moments later and I saw that it came from outside. When I went out I saw a light at what I estimated to be between 5,000 and 8,000 feet above sea level over Karogorea Bay. The light appeared to me to be yellow green in colour (I have a colour - red green - complex). My wife said when she saw it that it was changing from red to green which would explain my difficulty in identifying the true colour.

We watched the U.F.O. and it appeared to be wavering back and forth and moving up and down slightly. The appearance was one of a hovering light. We watched it for about $\frac{1}{2}$ an hour (between 2000 and 2030 hrs.) The light given off from the U.F.O. was sufficient to light up the beach as a new or 1st quarter moon would. I attempted to take two photographs of it by time exposure and these may give some idea as to what it was.

Eventually the object dropped slightly then rose and disappeared in what we took to be a westerly direction.

The night was overcast to some extent in that area and now stars were showing - this appeared to be below the cloud layer. To the South at Karogorea village it was raining. No other people apparently saw this as I made enquiries with a negative result. The native house girl also witnessed the proceedings.

I would not like to make any suggestions as to what it was as it was nothing like I have seen before.

For your information please.

THE THING ON THE BEACH

THE SKETCH by Mr. Denis Crowe of the object he saw on Monday night on Vacluse Beach. He described the saucer shape as silvery grey on top and darker grey beneath with a bluish-green glow at the rim and what might have been three or four "legs."

GLOWING IMPRESSION

A green, glowing object that took off at high speed from a Vacluse beach on Monday night in no way resembled conventional aircraft, Mr. Denis Crowe said last night.

MR. CROWE said he watched the object in flight for 10 seconds before it disappeared in cloud over Manly.

He did not dismiss the possibility that the mystery craft could be an Air Force secret project.

"But I doubt it," he told a Daily Telegraph reporter last night at his home in Coolong Road, Vacluse.

"It took off with a noise like air forcibly released from a balloon."

"The noise was quite unlike any made by jet engines."

Mr. Crowe said that the object a giant disc, was bathed in a glow.

He saw no sign of movement within the craft or any portholes or doors.

He said he became aware about 5.30 p.m. on Monday of a glow coming from the beach.

He went to investigate and saw that the glow emanated from a huge disc resting on the beach.

He was within 50 or 60 feet of the disc when it took off.

"Its diameter appeared to be about 20 feet," he said.

"I estimate its height at nine feet, including what appeared to be legs protruding from the bottom."

"Its rim was glowing a greenish blue, while the top and bottom halves were edulish silver-grey."

Rapid flight

"A hollow in the top could have been a glass dome."

Mr. Crowe said that as the object took off, a yellow or orange glow appeared beneath.

After a take-off run of only 50 or 60 feet, the craft climbed rapidly in the direction of Manly.

"I looked around hoping to see someone else who saw what I saw, but

my only company was about a dozen or so dogs," Mr. Crowe said.

"While the object was stationary, they were all barking loudly at it."

"After it took off, the yere strangely silent."

Mr. Denis Crowe

Mr. Crowe said that when he returned home he sat down to collect his thoughts.

He had tea, then wrote down what was still vividly in his memory, and sketched the object as he recalled it.

The sketch is reproduced above.

[Mr. Crowe, an Englishman who has been in Australia for more than four years, was formerly a technical and illustrative artist with British aircraft companies.]

"At first I wondered whether I should say anything about what I had seen," he said.

"The natural reaction of most people might label me a crackpot."

"But I could not keep silent."

"I felt I had a moral obligation to speak of what I had seen."

REPORT OF SIGHTING

1. The following information was received from a Mr Neilson whose address is C/- Surf Life Saving Association, Box 1565 GPO BRISBANE QLD.
2. When travelling by car from MT ISA to DARWIN, in the vicinity of ELLIOT, on Monday 5th July 1965 he saw an object in the sky at 1930 hours. Mr Neilson described the object as a bright white light in the sky which was visible until he lost it in clouds at approximately 1958 hours. He further stated that a small red light was on top of the bright light and that the light did not appear to be moving. He was travelling North and away from the object. The light appeared to be beamed down at an angle of 45° and appeared to be at a height of 400 feet although he could not really assess. There was no noise associated with the object.
3. Mr Neilson says that he could best describe what he saw as:-
 - (a) A plane coming in to land.
 - (b) A building with lights on but no lights between object and ground level.
 - (c) A single intense car light.
4. Mr Neilson further stated that on discussing this sighting with the people in DARWIN, he was told that the daughter of a local DARWIN Taxi driver had also sighted a similar object in the ELLIOT location. The sighting was reported to Inspector Porter of the NT Police Force.
5. No RAAF or known civil aircraft movements took place in the area during the period.

A.K. Carruthers.

REPORT ON AERIAL OBJECT OBSERVED

MR. C.A. WALLACE

1. Name of observer MR. C.A. WALLACE
2. Address of Observer 418 WEST TAMAR ROAD, LAUNCESTON
3. Occupation of Observer DAIRY OFFICER, DEPT. OF AGRICULTURE
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 29th JUNE 1965 0645
5. Period of Observation(s) APPROX. 5 SECONDS
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... EYE OBSERVATION ONLY. POSITION ON PATEENA ROAD - MAP REFERENCE
..... TAS SURVEY 1: 250,000 E501 N883 - (3 MILES FROM BRIDGE OVER SOUTH
..... ESK RIVER ON LAUNCESTON SIDE)
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
..... OVERHEAD SLIGHTLY TO SOUTH
.....
8. What first attracted observer's attention, e.g. light or noise.
..... LIGHT OF OBJECT
.....
9. Did object appear as a light or as a definite object.
..... AS A LIGHT
.....
10. If there was more than one object, how many were there, and what was their formation.
..... ONLY ONE OBJECT
.....
11. What was the colour of the light or object SAME COLOUR OF STAR BUT BRIGHTER
12. What was its apparent shape STAR SHAPE BUT WITH SMALL TAIL (NOT A COMET)
.....
13. Was any detail of structure observable NO
.....
14. Was any method of propulsion obvious NO
15. Was there any sound NO
- 16.** Height, or angle of elevation APPROX. 5 DEGREES OFF VERTICAL
- 17.** Speed, or angular velocity UNKNOWN
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... WAS AN AIR GUNNER IN RAAF WORLD WAR II
.....

** Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
.....
TRAVELLING EAST TO WEST
.....
20. Did the object remain on a straight path, deviate or manoeuvre at all.
.....
STRAIGHT PATH
.....
21. Was any trail of exhaust, vapour or light seen ..SLIGHT LIGHT TRAIL.....
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
.....
BEFORE REACHING HORIZON - POSSIBLY BEHIND CLOUD
.....
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
.....
NIL
.....
24. Weather conditions experienced at time(s) or observation(s)
.....
BROKEN CLOUD BASE UNKNOWN - VIS GOOD
.....
25. Location of any air traffic in the vicinity at the time of sighting.
.....
NO AIR TRAFFIC AT TIME
.....
.....
26. Location of any meteorological stations in the general area.
.....
LAUNCESTON AIRPORT
.....
27. Any additional information ..MET OFFICE LAUNCESTON AIRPORT.....

REPORT OF AERIAL OBJECT OBSERVED

3rd JUNE 1965

AS PER PRO-FORMA

1. (a) Detective Constable 1st Class J. MESKELL
 Townsville Police Station.

 (b) Clarence Edward MESKELL
 3 Allen Street
 Speers Point
 NEWCASTLE NSW

 (c) Eric FINSCH
 3 Camera Place
 North Lampton
 NEWCASTLE NSW
2. As above.
3. (a) Detective
 (b) Not known (Father of J. MESKELL)
 (c) Proprietor, NEWCASTLE AUTO ELECTRICS.
4. 3rd June 1965 - 1st observation 031900(K)
 2nd observation 031903(K)
 3rd observation 032000(K)
5. At least a minute in each case.
6. Natural observation.
 Location of observers: Aboard a fishing boat position 20 09S 148 26E
 for the two sightings at 1900(K) and 1903(K)
 and position 20 03S 148 26E for the third
 sighting at 2000(K).
7. Object first observed descending vertically on a bearing (by guess)
 from the boat 180°(m). One member stated in the direction of
 PROSERPINE. This is approximately 170°(m).
8. First noticed as a light, similar to a star but moving contrary and
 much quicker to all the other stars.
9. The object appeared as a white light similar to a star initially,
 but grew larger in size as it descended until it was quite large and
 bright (white) with a sort of halo around it. It stopped descending
 at approximately 20,000 to 30,000 feet. approximately the same height
 as a B707 travelling north that the party saw at 032100(K). This
 observation applies to the first two sightings at 1900 and 1903.
 The object seen at 2000K carried out the same manoeuvre but was a
 brilliant white light without the halo.
10. One object only on each occasion.
11. White on each occasion, the third being a lot brighter.
12. As a spot of light growing larger as it descended.

13. No.
14. No.
15. No.
16. Approximately 45° to the horizontal on all sightings.
17. After the first two objects stopped descending, they hovered momentarily, then moved off in a south-east direction for a short distance (approximately 20° of azimuth) then both made a flat turn to the right, and disappeared before turning through 360° . The third object behaved in an identical manner except that the object disappeared behind a 1370 ft hill in a south-east direction. No turn, if any was made, was seen.
18. The first observer is a Townsville Detective used to making observations also he is well read on UFO's material, therefore made accurate notes of directions and times etc. He was able to recall most of the important sightings of flying objects that have occurred throughout the USA over the past 10 years or so, by names and locations.
19. Approximately south-east for all three sightings.
20. All three sightings were observed to descend vertically to 20,000 or 30,000 feet. All hovered momentarily then moved off in a south-east direction. The first and second sightings both made turns to the right then disappeared. The third sighting passed out of sight behind a hill.
21. No.
22. The first two in mid-air, the third behind a hill.
23. NIL.
24. Clear cloudless sky. Nil wind. Very good visibility.
25. The only air traffic after dark that evening was:-

Two north bound Viscounts, both abeam Table Mount at 1844 and 1850 respectively (It is doubtful if the boat occupants would have seen either of these aircraft as they were well inland, approximately abeam BOWEN about 50 miles), and a north bound B707 over BOWEN at 1106K. F/L 360 (All boat occupants saw this aircraft). No night flying is carried out at BOWEN and no night flying was conducted that night at PROSERPINE.
26. TOWNSVILLE and MACKAY are approximately equidistant from BOWEN.

27.

Detective Constable J. MESKELL appears quite reliable and is convinced that what they saw wasn't aircraft, shooting stars ~~on~~ meteorites or anything that he has ever seen.

He also advised that a Mr Mark GULSON of BOWEN who operates hire boats from SINCLAIR BAY, and his wife, have both seen odd lights of a similar nature on a number of previous occasions but have said nothing about them as he considers that its none of his business.

UNIDENTIFIED FLYING OBJECTS
Your 21/1/387 - 27th May, 1965

1. The report you forwarded from Mr. P. Hall-Robb of Western Australia has been investigated by this Department.
2. It is regretted that this is the only report we have received of these particular sightings and, as you appreciate, it is extremely difficult to process material of this nature after such an interval of time, and with such limited details.
3. However, our checks with RAAF Pearce reveal that Vampire night flying took place on these occasions, between the hours of 1830-2230 local, with an average of 80 movements per night. It is quite possible, therefore, that the movements of these aircraft could be the answer to Mr. Hall-Robb's observation.
4. If this is not the case then it is regretted that this Department has no plausible explanation for the reported sightings.
5. It would be very much appreciated if Mr. Hall-Robb could be informed accordingly.

27 MAY 1965

UNIDENTIFIED FLYING OBJECTS.

The following is the text of a letter received by our Western Australia Region from Mr. P. Hall Robb of 29 Marmion Street, South Cottesloe, Western Australia -

" While observing the sky at night on several occasions I have noted lights which I could not classify as natural phenomena, artificial satellites or regular aircraft.

In order to verify or eliminate the likelihood of their being from recorded flights, I would be glad to know if you have a register of movements which would correspond with any or all of the following -

23.2.65	Orange	Across South Metropolitan coastline.
"	"	9.22 p.m. W. to E. turning 90° to N.
"	"	9.45 p.m. " " " "
"	"	Across North Metropolitan coastline.
"	"	9.30 p.m. W. to E. not turning.
"	"	10.02 p.m. W. to E. " "
30.3.65	"	Across North Metropolitan coastline.
"	"	7.52 p.m. W. to E.
"	White	8.05 p.m. "
"	Orange	Across Central Metropolitan coastline.
"	"	9.03 p.m. W. to E.
1.4.65	"	Across North Metropolitan coastline.
"	"	9.09 p.m. W. to E.
"	"	9.28 p.m. "
"	"	Across Central Metropolitan coastline.
"	"	9.38 p.m. E. to W. (Seaward).

No sound, no red, green or flashing lights. I would be grateful for an early reply if possible, especially with regard to the first and second.

Thanking you,

Yours faithfully,

Sgd. (P. HALL ROBB). "

The Director General,
Civil Aviation Dept.,
499 Little Collins Street,
MELBOURNE.

Dear Sir,

UNIDENTIFIED FLYING OBJECT

I wish to report the sighting of a strange flying object on the 21st day of April at approx. 7.45 a.m.

The object was dark grey to black in colour and seemed to be a non rigid envelope - something like a cloud, a parachute about to collapse or a balloon. Assuming that the object was 8 miles away from me its size would be in the order of several hundred feet across.

Again assuming that the object was distant 8 miles its speed would have been very great - more than the speed of jet air planes.

In the short time that the object was in view it manoeuvred in a violent and erratic manner between ground level and about 500 feet altitude. Its manoeuvres gave the appearance that it was being subjected to violent air turbulence or else driven by its own power. It was a cloudy morning and the movements of the object were quite different from clouds in its vicinity.

The object was in view for approx. one minute. It was first noticed above the ground moving as described. It went down to the ground and disappeared, it rose up and again moved about and again went down to the ground and finally disappeared.

I pointed the object out to my wife and four children. My wife and two children saw it and two other children did not see it.

The object was seen from my house which is located on the high ground approx. $\frac{3}{4}$ mile north of Pakenham East Ref. 508067 on the Cranbourne 1:63360 Military Map and from here the object was seen due south in the direction of Koo-Wee-Rup at an estimated distance of 8 miles.

I would be very pleased if you can offer some explanation as to what this object may have been.

Yours faithfully,

(SGD.) S.M. Doig.

CERTIFIED COPY

UNIDENTIFIED FLYING OBJECT

Sighted at Lakes Entrance.

Date: 19th March 1965

Time: 9.10 p.m.

Size of Object: apparently spherical and about 2 diameters of Evening Star.

Color: Yellow as in the flame of a wood fire.

Brightness: About the same brightness as found for reflecting paints and tapes when caught in the headlights of a motor car.
Same type of brightness.
Brightness did not alter.

Apparent Speed: Was in view from "directly above" to almost the horizon. - for approximately 12 seconds. The speed appeared to be probably more than that of Vampire jets ex Sale.

Noise: No noise from the object could be heard.

Apparent Height: More than 7,000 feet.

Apparent Direction: S.E. (140° from North) in a straight line.

Apparent Propulsion: A tail of faint blue could be seen, not readily seen at first sight.

The blue was as in a kerosene blow lamp flame when at high pressure.

The object passed over the Eastern side of Lakes Entrance area. When pointing at the object the pointer would be at 55° + 5° from the horizontal.

(The above was noted immediately after viewing the object).

Weather Clear Sky
Conditions No Wind

(signed)

H. MCANTER
167 GREY ST
TRARALGON VIC

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer Mr. W.C. BLINKHORN
 2. Address of Observer 66 Swallow Court, Norlane, Geelong, Victoria.
 3. Occupation of Observer Pupil of Norlane High School
 4. Date and Time of Observation (Time given in 24 hour clock zonal time)
45 minutes Eastern Standard Time (24th March)
 5. Period of Observation(s) Approx. 4 minutes
 6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
Riding along on my bike up Sparkes Road in direction of Melbourne Road saw two objects in sky when I looked in direction of Even's Res. Objects stationary to the South.
~~Hurried and got telescope and stood on woodshed in back garden.~~
Observed with telescope about 1/2 min.
 7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
High in the sky and to the south
 8. What first attracted observer's attention, e.g. light or noise.
Unusual shape reflecting the light off the sun
 9. Did object appear as a light or as a definite object.
Definite objects.
 10. If there was more than one object, how many were there, and what was their formation.
Two objects one slightly higher than the other
 11. What was the colour of the light or object Silvery colour.
 12. What was its apparent shape Both objects appeared a dish like shape with a dome in the centre.
 13. Was any detail of structure observable NO.
 14. Was any method of propulsion obvious NO
 15. Was there any sound NO
 - 16.** Height, or angle of elevation Approx. 45° from eye level.
 - 17.** Speed, or angular velocity Moved away together in South Westerly direction fast.
 18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
Often observe aircraft.
- ++ Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
... In general direction of Bellpark away from me......
20. Did the object remain on a straight path, deviate or manoeuvre at all.
... Straight path.....
21. Was any trail of exhaust, vapour or light seen ... NO.....
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
... Over the horizon.....
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
... None.....
24. Weather conditions experienced at time(s) or observation(s)
... Clear, Sunny,.....
25. Location of any air traffic in the vicinity at the time of sighting.
... Saw none......
.....
26. Location of any meteorological stations in the general area.
... Don't know.....
27. Any additional information Rang Avalon Airfield......
.....
.....

Questions 25, 26 and 27 to be answered by interrogator.

.....

- * 17 Speed, or Angular Velocity

* Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved and the time taken to do this.

- 18 State any Experience which Enables Observer to be Reasonably Sure about the Answers given to 16 and 17

Wartime observation of aircraft LAC SCOTT I.D. 438875.

- 19 Direction of Flight with Reference to Landmarks or Points of a Compass

See 17/18 path on which I stood runs due north.

- 20 Did the Object Remain on a Straight Path, Deviate or Manoeuvre at all

Yes. See what I wrote under 17/18.

- 21 Was any Trail of Exhaust, Vapour or Light Seen

No.

- 22 Where did Object Disappear. (eg - in Mid-Air, Behind a Hill, Over the Horizon)

Mid-air 50° above horizon

- 23 Existence of any Physical Evidence such as Fragments, Photographs or other Supporting Evidence

My wife was standing with me at the time.

- 24 Weather Conditions Experienced at Time(s) of Observation(s)

Most of sky cloudless or clear. One small patch in SW corner.

- 25 Location of any Air Traffic in the Vicinity at Time of Sighting

- 26 Location of any Meteorological Stations in General Area

- 27 Any Additional Information

I have sent a second letter to Met Bureau with information on further sightings. A large number of people have now seen this object at one time or another over the last ten days.

Signature of Observer J. D. Scott

Signature of Interrogator

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer R.R. Treaseley and (Bernard Hay)
2. Address of Observer Brayside Blackwall West Tamar - Tasmania
3. Occupation of Observer Orchard Workers.
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 19/2105
5. Period of Observation(s) 2105/2106
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... Visual observation only.
.....
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
..... Over horizon
8. What first attracted observer's attention, e.g. light or noise.
..... Orange light.
9. Did object appear as a light or as a definite object.
..... Light
10. If there was more than one object, how many were there, and what was their formation.
..... One only
11. What was the colour of the light or object Orange
12. What was its apparent shape Circular
13. Was any detail of structure observable No
14. Was any method of propulsion obvious No
15. Was there any sound Unable to ascertain
- 16.** Height, or angle of elevation None apparent - Road traffic in vicinity
- 17.** Speed, or angular velocity Unable to ascertain. (Moving quickly).
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... Not experienced.

** Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
..... N.W. to S.E.
20. Did the object remain on a straight path, deviate or manoeuvre at all.
..... Straight path.
21. Was any trail of exhaust, vapour or light seen Fluctuating trail.
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
..... Over horizon
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
..... No
24. Weather conditions experienced at time(s) or observation(s)
..... Clear Sky
25. Location of any air traffic in the vicinity at the time of sighting.
..... 1 Viscount departed Launceston for Melbourne track 325° at 2105
..... (Local).
26. Location of any meteorological stations in the general area.
..... Launceston Airport
27. Any additional information At Launceston Airport 2100 L weather 1/8
..... Cloud 5000 weather hazy. Vis. 15 miles - no balloon flights being
..... carried out at this time.
-
- Questions 25, 26 and 27 to be answered by interrogator.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer R.W. SMITH
2. Address of Observer 28 Howson St., Armadale.
3. Occupation of Observer Cameraman - ABV.2.
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 21st March, 1965 - 1955 - 2012
5. Period of Observation(s) 20 minutes
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... Field glasses/vision
..... photographs to be developed
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
..... N.E. of Malvern station
8. What first attracted observer's attention, e.g. light or noise.
..... Unusual light reflections
9. Did object appear as a light or as a definite object.
..... Object with 3 lights or tails coming from it - definite tail
10. If there was more than one object, how many were there, and what was their formation.
..... One
11. What was the colour of the light or object
12. What was its apparent shape Sphere with red dome on top - bigger than light.
13. Was any detail of structure observable No (reflected light)
14. Was any method of propulsion obvious No
15. Was there any sound No
- 16.** Height, or angle of elevation 35° above horizontal to 48°
- 17.** Speed, or angular velocity Appear to approach and turn 90° to south
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... Student pilot (51 yrs - Mil. intelligence - war)

** Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
Appears to be trying to manoeuvre - same spot roughly estimated at Woods Point
.....
20. Did the object remain on a straight path, deviate or manoeuvre at all.
.....
21. Was any trail of exhaust, vapour or light seen Yes
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
Several times in cloud - last time at 2035E. (Phoned again 2115 to advise
..... did not reappear).
23. Existence of any physical evidence such as fragments, photographs, or other
supporting evidence.
Photographs to be developed.
.....
24. Weather conditions experienced at time(s) or observation(s)
Broken cloud (1/8 4000 - latest obs)
.....
25. Location of any air traffic in the vicinity at the time of sighting.
Not in vicinity reported - unlikely from description to be an
.....
aircraft on RPT work
.....
26. Location of any meteorological stations in the general area.
Laverton Balloon? (Not a Melbourne Airport balloon)
.....
27. Any additional information Additional observer also Margaret Hotchkiss
Nil sightings from Melbourne Airport
.....
Observer sounded reasonable.
.....
.....
- Questions 25, 26 and 27 to be answered by interrogator.

2017 Manoeuvring in one vicinity

Relationship between lights showing and direction
of manoeuvre e.g. light appeared from it pointing
north - object moved towards south.

2023 Red light on top.

2035 Position varies in relation to stars.

for (R.N. DALKIN)
Group Captain
For Air Officer Commanding

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer Mr. O'Donahue
2. Address of Observer 13 Killara Rd., Mentone. Phone: 93-1408
3. Occupation of Observer Salesman
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 171025Z
5. Period of Observation(s) 20 seconds
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
From above address appeared above the rising moon.
.....
.....
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Above cloud formation on angle above.
.....
8. What first attracted observer's attention, e.g. light or noise.
Two red lights and line of what appeared to be cabin lights.
.....
9. Did object appear as a light or as a definite object.
Definite object.
.....
10. If there was more than one object, how many were there, and what was their formation.
One
.....
11. What was the colour of the light or object above
12. What was its apparent shape Not definite
13. Was any detail of structure observable
No
14. Was any method of propulsion obvious No
15. Was there any sound No
- 16.** Height, or angle of elevation Angle of elev. of room from location at 1025Z
- 17.** Speed, or angular velocity Not moving.
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
.....

** Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
Stationary.
.....
20. Did the object remain on a straight path, deviate or manoeuvre at all.
No
.....
21. Was any trail of exhaust, vapour or light seen No
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
Appeared to fade away
.....
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
No
.....
24. Weather conditions experienced at time(s) or observation(s)
Light broken cloud good vis. Smoke haze in area which turned moon red.
.....
25. Location of any air traffic in the vicinity at the time of sighting.
RMH dep. ML 1025 on 0290 div. From description aircraft would have
.....
appeared in observers field (if at a long dist). Broken cloud in
.....
aircraft's flight path.
26. Location of any meteorological stations in the general area.
At Essendon (no balloon flights due fire risk)
.....
27. Any additional information Appeared as formation of lights, as
described above, remained stationary for time then appeared to
.....
disintegrate and faded as coals with water on them (i.e. quickly).
.....
.....
- Questions 25, 26 and 27 to be answered by interrogator.

13th July, 1965.

The Director of Air Force Intelligence,
Department of Defence,
CANBERRA. A.C.T.

REPORT OF UNIDENTIFIED FLYING OBJECT

Further to my radiogram of 5th July, 1965,
attached please find correspondence received from
District Commissioner, Samarai, attaching a report from
Assistant District Commissioner, Esa'ala, containing
corroborating information concerning the object sighted
over Kerorogea Bay on 3rd July, 1965; together with a
further report of a similar object sighted by the people
of Mwatebu Village over Sewataitai Bay on 17th June, 1965.

D.M. Cleland

Milne Bay District,
SAMARAI.

9th July, 1965.

The Secretary,
Department of the Administrator,
PORT MORESBY.

Report of Unidentified Flying Object.
Sehulea Patrol Post, Esa'ala Sub-district.

Further to my memorandum Al-1-40 dated 6th July 1965 I now append memorandum 1-1-6 dated 5th July 1965 to hand to-day from the Assistant District Commissioner, Esa'ala Sub-district elaborating his telegram of 3rd July 1965 from Sehulea Patrol Post which I conveyed to Mr. G.W. Toogood by radio telephone that day and the text of which is contained in the first paragraph of my memorandum Al-1-40 dated 6th July 1965. It will be seen from the Assistant District Commissioner's enclosure that the group following "MPH" which was distorted in the original telegram as received here is the word "BUT".

5th July, 1965.

The District Commissioner,
SAMARAI.

Subject: Unidentified Flying Object - SEHULEA.
Reference: My coded telegram 002 of 3/7/65 from
Sehulea.

Further to my reference telegram I respectfully advise that I conducted diligent inquiries through all villages and hamlets of SUPUPU and KEROROGHA Bay on 2/7/65 and 3/7/65 and was able to corroborate the information contained therein in that six (6) other persons of KESAGA Hamlet of WEIOKO Village saw the subject phenomenon. One reason why other witnesses were not found is that the night of sighting was so cold that most persons were indoors.

2. It is further advised that during the course of these investigation another recent sighting by village people was reported by Councillor David of MWATEBU who said that

"On 17th June an object passed over Sewataitai at about 7 pm from the direction of Sanaroa Island towards Sewa Bay. It made no sound but emitted a bright beam of red light directed towards the earth. The light fluctuated in intensity. It did not appear to be travelling very fast but did not stop or hover. This object was seen by approximately 100 people from MWATEBU who were camped in company in the open near Sewataitai after doing maintenance work on the MWATEBU - SEWATAITAI road".

This statement was taken by me from the Councillor in the presence of the other witnesses who agreed that his description was correct.

A handwritten signature in dark ink, appearing to read "M.L. Mackellar".

(M.L. Mackellar)
a/Assistant District Commissioner.

THREE REPORT SEEING A 'FLYING PLATFORM' LAND

MACKAY, May 26. — Police are investigating a reported sighting by three men near here of a mystery flying object with spotlights above a circular platform.

The circular-shaped object, said to have some 30 lights on it, was alleged by the three men to have landed near the Retreat Hotel on the Eton Range, about 50 miles from Mackay, on Sunday night.

It was claimed that treetops and a section of grass had been scorched, yet there was no evidence of an ordinary fire.

The three men who said they saw the object are Mr. J. W. Tilse, licensee of the hotel, Mr. John Burgess and Mr. Eric Judin, who were staying at the hotel.

Mr. Tilse is an experienced commercial pilot.

CALLED POLICE

He said tonight: "It was about midnight on Sunday and I was clearing up around the place.

"We were all sober.

"One of the blokes ran in and said, 'Come and have a look at this.'

"I went out and said, 'It's just the moon.'

"But when I saw it moving towards us, I ran inside and called the police."

Mr. Tilse added: "The policeman at Mackay nearly died laughing and said, 'I bet it's still not there.'

"I went and had another look and said, 'Yes it is, and it is coming towards the hotel.' That took the smile off his face."

Mr. Tilse said: "The object was about 300 yds. from the hotel and was moving over the treetops at one stage.

"It had a great bank of spotlights, about 20 or 30 of them, above a circular platform."

Mr. Tilse continued: "When it was coming to-

wards us somebody said, 'Get the rifle and shoot at it,' but I said 'No fear, they might shoot back'."

"FOR 40 MINUTES"

The licensee said he and the other two men watched the object for about 40 minutes.

When it took off and flew away they saw it had three legs.

"I saw it. We all saw it. It disappeared in a north-easterly direction," said Mr. Tilse.

He declared that the object was not an aircraft and he was sure of this.

Mr. Judin confirmed Mr. Tilse's story tonight.

He said: "I have never seen anything like it . . . those lights . . . and those legs."

Mr. Tilse had taken coloured photographs of marks made by the object, including a circular scorch mark about 20 ft. across, and reported the matter to the police and Civil Aviation Department.

The three men also made a sketch of the object and signed it.

"EXPERIENCED PILOT"

The Regional Director of Civil Aviation (Mr. Seymour) said in Brisbane tonight that so far he had not received a report on the sighting.

"But if Mr. Tilse says he has seen something then I believe him, as he is an experienced pilot," he said.

The sighting would probably be investigated by the Air Force as were other sightings.

State School, 3011
WELSHPOOL VIC
29th March, 1965

Regional Director
Bureau of Meteorology
Box 1289K, P.O.,
MELBOURNE, C1

Dear Sirs,

Ref. my letter of 21st March
Ref. your letter of 25th March, ref. V24

Further to remarks in these letters, I have more sightings to report for your information. These are all personally vouched for and have independent witnesses.

1. Monday 22nd. Object sighted 9.20 pm. Moved from WSW to zenith in jerky movements, paused at the zenith then moved in a NNE direction, and blacked out approx. 15 degrees from horizon.
2. Tuesday 23rd. First sighted at zenith about 75° above southern horizon, it moved in 3 minutes from there to a position in NW about 60° above horizon, then moved in an easterly direction until obscured by cloud. No cloud elsewhere, sighted at 10.05 pm.
3. Thursday 25th. 7.30 pm. Cloudless sky. Object rose about WSW, moved in a continuous straight orbital line to a position approx. 35° above the eastern horizon. There it stopped dead, and remained in that position for 6 m. 35 sec. and then resumed its journey.
4. Sunday 28th. 8.45 pm. Seen following the course described for Tuesday, except that it was first picked up in the NW position referred to, and I have no knowledge of its prior position.

In addition to the occasions mentioned above, there are three viewings I have made myself, and a large number brought to me at the school which I have not included as information is not definite enough, and too many details are lacking.

I am including an extra carbon copy of this letter if you wish to send it on to someone else. I might mention that the Wednesday was cloudy, and though tonight is clear, no report has come in to the time of writing (9 pm).

Also that Thursday's viewing was confirmed by a person (also a schoolteacher) whom I consider reliable, at Hedley, 6. m. east of Welshpool, and Sunday's sighting was confirmed from Toora $6\frac{1}{2}$ m. west of Welshpool.

I have had many requests for information which I cannot supply, so hope there is some possibility of information being available. When one considers the additional chances not included in this letter, I think you will agree that the two theories you suggest cannot fill all premises required.

Seeking your further assistance, I remain,

Yours faithfully,

signed IAN D. SCOTT H.T.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer Glen Morice
2. Address of Observer 1 Jellico St., Mowbray, Tasmania
3. Occupation of Observer High School boy.
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 5/5/1965 1930 - 2000
5. Period of Observation(s) 30 Minutes
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... Visual sighting from home at Mowbray (1-2 miles north of
..... Launceston city).
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
..... Towards N-W horizon
8. What first attracted observer's attention, e.g. light or noise.
..... Light
9. Did object appear as a light or as a definite object.
..... Light
10. If there was more than one object, how many were there, and what was their formation.
..... Split into two objects
11. What was the colour of the light or object White becoming orange
12. What was its apparent shape Banana shaped
13. Was any detail of structure observable Nil
14. Was any method of propulsion obvious Nil
15. Was there any sound Nil
- 16.** Height, or angle of elevation Low angle to horizon
- 17.** Speed, or angular velocity Difficult to determine
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... Inexperienced

** Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Observer stated that his brother followed the object by car until it appeared to be overhead approximately 600 feet above the ground.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
Towards N-W
.....
20. Did the object remain on a straight path, deviate or manoeuvre at all.
Appeared to circle
.....
21. Was any trail of exhaust, vapour or light seen Nil seen
.....
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
Low towards horizon
.....
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
Nil
.....
24. Weather conditions experienced at time(s) or observation(s)
Clear overhead at airport, visibility good - some low cloud to NW
.....
25. Location of any air traffic in the vicinity at the time of sighting.
Nil
.....
.....
26. Location of any meteorological stations in the general area.
Launceston Airport
.....
27. Any additional information Crescent moon observed by Meteorological
and Tower staff at time approximately coincidental with reported
times above. Some smoke haze expected in Launceston city area.
.....
.....
- Questions 25, 26 and 27 to be answered by interrogator.

DEPARTMENT OF AIR
MINUTE PAPER

(This side only to be written on)

Subject: SIGHTING OF U.F.O.s

Between 1820 and 1830 on Thursday 13th May 1965 I saw an U.F.O. I was parked in my car in Griffith facing South when suddenly a bright light caught my eye. It was very bright with a light greenish shade under the front portion, and was moving approx. NE to SW. The U.F.O. appeared slightly elongated and moved at a great speed. It was observed for about three to four seconds moving along a horizontal plane and appeared to break-up into about 4 to 6 bright pieces which seemed to slow-down and fade away.

This U.F.O. seemed identical to another one which I saw in about the first week of April 1965. That U.F.O. did not appear to disintegrate but to flip over or change direction and disappear.

F/Sgt DAWSON R.F.

70

DEPARTMENT OF AIR
MINUTE PAPER

(This side only to be written on)

Subject:

LIGHTING OF OBJECTS IN THE SKY

1. At about 1820K on Thursday 13th May 1965 while travelling about south on the Queanbeyan - Captains Flat Road about 12 miles from Queanbeyan I noticed a bright light to my left at about 40° elevation. The light was yellowish, similar to the colour of the moon which was in the same general direction and in its third quarter. The night was cloudless and visibility was excellent.
2. The object was moving in the same direction - South at high speed. I do not know if it was the initial light-up of the object that first attracted my attention or the fact that it came from the rear and entered my field of vision. When first sighted it was at an angle of 90° to the vehicle, and as it proceeded towards the front, changed colour to a greenish glow, similar, but not as green as a green very light. Within about 2 to 3 seconds from sighting, the object had moved from right angles to about 30° from the front of the car. At this time it appeared to emit pinpoints of light, radiating at about 15° - 20° from the rear and about $\frac{1}{2}$ second later it faded rapidly as though extinguished.
3. The light appeared like a diffused source, similar to a mercury vapour street light, at about $\frac{2}{3}$ main size. There was no bright flash of light but more of a bright glow lighting up an area in the sky. The moon was very bright at the time, and this probably diffused the light from the object.
4. The trajectory appeared flat and an inspired guess on height would be 20-30,000ft. Speed, once again a guess but based on experience, very high 2-3000 mph.
5. It was quite unlike anything that I had seen before, left no trail and was definitely not a reflection or a reflected light. It did not in any way resemble a falling meteorite.
6. Two other passengers also clearly saw the object and from a discussion which followed the sighting, their observations were similar to mine.
7. In the area where the sighting took place there are no street lights or houses.

(R.F. BRANDLI) (05853)
Squadron Leader
Technical Branch

LIGHTING OF OBJECTS IN THE SKY

1. At about 1820K on Thursday 13th May 1965 while travelling about south on the Queanbeyan - Captains Flat Road about 12 miles from Queanbeyan I noticed a bright light to my left at about 40° elevation. The light was yellowish, similar to the colour of the moon which was in the same general direction and in its third quarter. The night was cloudless and visibility was excellent.
2. The object was moving in the same direction - south at high speed. I do not know if it was the initial light-up of the object that first attracted my attention or the fact that it came from the rear and entered my field of vision. When first sighted it was at an angle of 90° to the vehicle, and as it proceeded towards the front, changed colour to a greenish glow, similar, but not as green as a green very light. Within about 2 to 3 seconds from sighting, the object had moved from right angles to about 30° from the front of the car. At this time it appeared to emit pinpoints of light, radiating at about 15° - 20° from the rear and about $\frac{1}{2}$ second later it faded rapidly as though extinguished.
3. The light appeared like a diffused source, similar to a mercury vapour street light, at about $\frac{2}{3}$ main size. There was no bright flash of light but more of a bright glow lighting up an area in the sky. The moon was very bright at the time, and this probably diffused the light from the object.
4. The trajectory appeared flat and an inspired guess on height would be 20-30,000ft. Speed, once again a guess but based on experience, very high 2-3000 mph.
5. It was quite unlike anything that I had seen before, left no trail and was definitely not a reflection or a reflected light. It did not in any way resemble a falling meteorite.
6. Two other passengers also clearly saw the object and from a discussion which followed the sighting, their observations were similar to mine.
7. In the area where the sighting took place there are no street lights or houses.

LIGHTING OF OBJECTS IN THE SKY

1. At about 1820K on Thursday 13th May 1965 while travelling about south on the Queanbeyan - Captains Flat Road about 12 miles from Queanbeyan I noticed a bright light to my left at about 40° elevation. The light was yellowish, similar to the colour of the moon which was in the same general direction and in its third quarter. The night was cloudless and visibility was excellent.
2. The object was moving in the same direction - south at high speed. I do not know if it was the initial light-up of the object that first attracted my attention or the fact that it came from the rear and entered my field of vision. When first sighted it was at an angle of 90° to the vehicle, and as it proceeded towards the front, changed colour to a greenish glow, similar, but not as green as a green very light. Within about 2 to 3 seconds from sighting, the object had moved from right angles to about 30° from the front of the car. At this time it appeared to emit pinpoints of light, radiating at about 15°-20° from the rear and about $\frac{1}{2}$ second later it faded rapidly as though extinguished.
3. The light appeared like a diffused source, similar to a mercury vapour street light, at about $\frac{2}{3}$ main size. There was no bright flash of light but more of a bright glow lighting up an area in the sky. The moon was very bright at the time, and this probably diffused the light from the object.
4. The trajectory appeared flat and an inspired guess on height would be 20-30,000ft. Speed, once again a guess but based on experience, very high 2-3000 mph.
5. It was quite unlike anything that I had seen before, left no trail and was definitely not a reflection or a reflected light. It did not in any way resemble a falling meteorite.
6. Two other passengers also clearly saw the object and from a discussion which followed the sighting, their observations were similar to mine.
7. In the area where the sighting took place there are no street lights or houses.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of Observer *Antoni UCHANSKI*
2. Address of Observer *Hut 484. ABA Compound. Wittenoom*
3. Occupation of Observer *Crane Driver*
4. Date and Time of observation (Time given in 24 hour clock zonal time) *2nd August 1964. Approximately 3 am.*
5. Period of observation(s) *Approximately 1 minute*
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
*Located outside tailing bin at ABA Mill - Wittenoom
Hamersley Ranges. West. Australia*
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
*Coming from behind hill and travelling above
Hamersley Ranges*
8. What first attracted observer's attention, e.g. light or noise
Stream of light in the sky
9. Did object appear as a light or as a definite object.
Definite object. Similar to a rocket
10. If there was more than one object, how many were there, and what was their formation.
Only one object
11. What was the colour of the light or object.
*(Light) yellow - orange
colour - blue*
12. What was its apparent shape.
Colour of object not known close to object
13. Was any detail of structure observable. *No*
14. Was any method of propulsion obvious. *Rocket propulsion*
15. Was there any sound. *No*
16. xx Height, or angle of elevation. *Hard to say. could not judge. - but at least 30 feet above Ranges*
17. xx Speed, or angular velocity. *estimated to be the same
Speed as Fokker Friendship's maximum ground speed on takeoff*
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
No previous experience prior to this incident
- xx Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and time taken to do this.

A. Uchanski

Report on aerial object observed (cont'd)

19. Direction of flight with reference to landmarks or points of the compass.

Travelling from S. West to N. East direction - from ABA mine to Cakuhwa Gorge in Hammersley Ranges

20. Did the object remain on a straight path, deviate or manoeuvre at all.

Remained on straight path

21. Was any trail of exhaust, vapour or light seen. *Trail of red flame*

22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.

Behind a hill

23. Existence of any physical evidence such as fragments, photographs or other supporting evidence.

Nil

24. Weather conditions experienced at time (s) or observation (s)

Weather good. Visibility clear.

25. Location of any air traffic in the vicinity at the time of

sighting. *Nil*

26. Location of any meteorological stations in the general area.

Nil

27. Any additional information.

Nil

- Questions 25, 26 and 27 to be answered by interrogator.

photographs or other supporting evidence.

24. Weather conditions experienced at time (s) or observation (s)

25. Location of any air traffic in the vicinity at the time of

sighting.

26. Location of any meteorological stations in the general area.

Did the object remain on a straight path, deviate or manoeuvre

Any additional information

A. Chelvan

REPORT ON AERIAL OBJECT OBSERVED

1. Name of Observer. *Gerzy JUSZCZYK*
2. Address of Observer. *36 Seventh Avenue, WITTENOOM*
3. Occupation of Observer. *Shift Boss - A.B.A. Ltd, WITTENOOM*
4. Date and Time of observation (Time given in 24 hour clock zonal time) *2nd August 1964. Approximately 3 am*
5. Period of observation(s) *Approximately 27 minutes*
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
*Located outside Mill - main door - AUSTRALIAN BLUE
ASBESTOS LIMITED - HAMMERSLEY RANGES,
WITTENOOM.*
7. where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Coming over from behind hill.
8. What first attracted observer's attention, e.g. light or noise
Light
9. Did object appear as a light or as a definite object.
Appeared to be a rocket
10. If there was more than one object, how many were there, and what was their formation.
One object only
11. What was the colour of the light or object. *Object had orange and yellow lights inside - alternate colours at each window - Object colour NOT KNOWN*
12. What was its apparent shape.
Object appeared to be a rocket
13. Was any detail of structure observable. *No*
14. Was any method of propulsion obvious. *Rocket propulsion*
15. Was there any sound. *No sound*
16. xx Height, or angle of elevation. *About 200 to 300 feet above Ranges*
17. xx Speed, or angular velocity. *Speed about 200 to 250 MPH*
18. *Travelling horizontal position*
State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
No previous experience prior to this incident
- xx Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and time taken to do this.

Jerry Juszczyk

Report on aerial object observed (cont'd)

19. Direction of flight with reference to landmarks or points of the compass.

Travelling from South to North - from ABA Mine towards Witteroom Townsite.

20. Did the object remain on a straight path, deviate or manoeuvre at all.

Remained on straight path until out of sight over Ranges.

21. Was any trail of exhaust, vapour or light seen?

Trail of red flame from rear.

22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.

Behind hill.

23. Existence of any physical evidence such as fragments, photographs or other supporting evidence.

Nil

24. Weather conditions experienced at time (s) or observation (s)

Weather conditions good - visibility clear.

25. Location of any air traffic in the vicinity at the time of

sighting. *Nil*

26. Location of any meteorological stations in the general area.

Nil

27. Any additional information.

Nil

Questions 25, 26 and 27 to be answered by interrogator.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of Observer... *Edo Rossi*
2. Address of Observer... *WITTENDOOM*
3. Occupation of Observer... *Mill Foreman*
4. Date and Time of observation (Time given in 24 hour clock zonal time)... *2nd August 1964 - Approximately 3 AM*
5. Period of observation(s)... *Approximately 1 minute*
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
Location - outside Mill Office - Australian Blue Asbestos Limited - Hamersley Ranges - West Australia.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Coming from behind a hill.
8. What first attracted observer's attention, e.g. light or noise
Light.
9. Did object appear as a light or as a definite object.
Appeared as a definite object.
10. If there was more than one object, how many were there, and what was their formation.
One object only - similar to rocket.
11. What was the colour of the light or object. *Red lights in windows also. White lights - alternate in each window. - object colour not known*
12. What was its apparent shape.
Similar to aeroplane body - but longer and wider.
13. Was any detail of structure observable. *No*
14. Was any method of propulsion obvious. *Rocket propulsion*
15. Was there any sound. *No noise.*
16. xx Height, or angle of elevation. *Not sure - about 100 feet above Ranges.*
17. xx Speed, or angular velocity. *About the same as Fokker Friendship*
Travelling horizontal position
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
No experience previous to this incident.
- xx Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and time taken to do this.

E. Rossi

Report on aerial object observed (cont'd)

19. Direction of flight with reference to landmarks or points of the compass.

Travelling South to North - from A.B.A Mine to Wittenoom Town.

20. Did the object remain on a straight path, deviate or manoeuvre at all.

Remained on straight path until out of sight over Ranges

21. Was any trail of exhaust, vapour or light seen *Trail of red flame*

22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.

Behind Hill

23. Existence of any physical evidence such as fragments, photographs or other supporting evidence.

Nil

24. Weather conditions experienced at time (s) or observation (s)

Clear night - visibility clear

25. Location of any air traffic in the vicinity at the time of sighting. *Nil*

26. Location of any meteorological stations in the general area.

Nil

27. Any additional information. *Nil*

Questions 25, 26 and 27 to be answered by interrogator.

E. Perry

REPORT ON AERIAL OBJECT OBSERVED

1. Name of Observer... *Alexander Brian Elder*
2. Address of Observer... *40 SEVENTH AVE Wittenoom.*
3. Occupation of Observer... *Electrician*
4. Date and Time of observation (Time given in 24 hour clock zonal time)... *2.8.64 3.10AM.*
5. Period of observation(s)... *TWO MINUTES*
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
On the road between second and third crossings in Wittenoom Gorge, travelling south from the Town to ABA Mine in Wittenoom Gorge, Hammonds Range
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Coming from behind a hill, on the side of Wittenoom Gorge
8. What first attracted observer's attention, e.g. light or noise
Light from the object.
9. Did object appear as a light or as a definite object.
It appeared as several objects. At first it appeared to be one light light
10. If there was more than one object, how many were there, and what was their formation. *OBJECT AS SEEN*
Approx. six or seven objects. the long object appeared as a streak of light surrounded by discs
11. What was the colour of the light or object. *of light.*
Colour was golden yellow.
12. What was its apparent shape. *As drawn above.*
(Item 10)
13. Was any detail of structure observable... *No.*
14. Was any method of propulsion obvious... *No.*
15. Was there any sound... *No*
16. xx Height, or angle of elevation... *Over 20000 feet.*
17. xx Speed, or angular velocity... *Through 90° in Two minutes*
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
(16) Comparison to local aeroplane travel.
(17) ~~Correct~~ Judgement of angles in electric line work.

xx

Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and time taken to do this.

AB Elder.

Report on aerial object observed (cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
Travelling from South to North from ABB where to Townsite.
20. Did the object remain on a straight path, deviate or manoeuvre at all.
Object remained on a straight path.
21. Was any trail of exhaust, vapour or light seen..... *No.*
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
Object disappeared behind a hill.
23. Existence of any physical evidence such as fragments, photographs or other supporting evidence.
NONE
24. Weather conditions experienced at time (s) or observation (s)
Weather Good. Visibility clear.
25. Location of any air traffic in the vicinity at the time of sighting... *Nil*
26. Location of any meteorological stations in the general area..
Nil
27. Any additional information... *Nil*
- Questions 25, 26 and 27 to be answered by interrogator.

Unidentified Sighting - Kavieng.

Forwarded herewith, for such investigation as you may consider necessary, is a report by our Officer-in-Charge, Kavieng, relating to an unidentified flying object sighting in the vicinity of Kavieng on 12th August, 1964.

The delay in reporting this occurrence is regretted but the necessary sighting details were inadvertently omitted from the initial notification provided by our Regional Office.

There was no notification, to Air Traffic Control, of an air movement which could account for this sighting.

(D.S. Graham).

for Director General of Civil Aviation.

DEPARTMENT OF CIVIL AVIATION

GOVERNMENT AERODROME

KAVIENG

13/8/64

REGIONAL DIRECTOR,
DEPT. CIVIL AVIATION,
PORT MORESBY.

UNIDENTIFIED FLYING OBJECT REPORT. KAVIENG.

An unidentified flying object was sighted in the Kavieng area at approximately 1845 EST on 12/8/64.

The manager of New Guinea Company telephoned the Officer in Charge of this station at approximately 1840 and advised of a white light moving across the sky in the vicinity of the Kavieng Harbour.

At 1843, the Officer in Charge, along with other responsible citizens observed a white light moving across the sky from 1843 until it disappeared due to distance at 1851.

The observers were facing in a Westerly direction and the object was proceeding on a South to North track, running parallel with the Kavieng foreshore.

The appearance of the object was similar to a bright star. It was a white light, but due to darkness, no visible means of support were evident. A white light was the only object sighted. Conditions at the time were a fine and clear starry night.

The height and speed of the moving object was difficult to ascertain but could be compared favourably with an aircraft of the B50 type, cruising at 15000 to 25000 feet. The apparent nearness and the angle of sighting would tend to substantiate this. The angle of sighting was approximately 50/60 degrees from the horizon.

The reference to an aircraft is only a hazarded guess as the object could have been much higher, in which case it would naturally have been travelling at a much greater speed

All that can be stated as definite fact is that a bright, white light was sighted at an angle of 50/60 degrees over the Kavieng Harbour area, travelling in a South to North direction from approximately 1840 until 1851 EST on 12/8/64.

.....
B. LAW.
Officer in Charge.

UNIDENTIFIED FLYING OBJECT

1. The following report was received by the Duty Operations Officer at this headquarters from ACC SYDNEY at 020345Z September.

2. First Officer V.S. KAYE, co-pilot of Ansett-ANA Flight 318 reported possible UFO sighting at 012227Z whilst enroute MELBOURNE to CANBERRA at Flight Level 170.

3. Two silver objects were sighted when 15 - 20 nautical miles SOUTH WEST of HOLBROOK. One appeared approximately 3000 feet above the aircraft dead ahead, the other much higher at the one o'clock position. Both appeared solid silver ovals ie, no wings.

most likely

4. The objects could possibly have been a Viscount and an Electra aircraft which were in the area at the time, but seemed too large.

5. Conditions at the time were glary and the pilot was wearing polaroid glasses. The captain who was not wearing glasses did not sight the objects.

6. SYDNEY and MELBOURNE ACC have confirmed that no military traffic was in the area at the time.

7. No further investigation has been conducted by this headquarters.

.....

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer DAVID OWEN (AGE 17)
2. Address of Observer 8 Alexandra Street, Pascoe Vale.
3. Occupation of Observer Works at motor wreckers.
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
2345. 9.5.64 (and 7 days previously between 2000-2100)
5. Period of Observation(s) Not reported.
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
Sighted from above address.
.....
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Overhead.
8. What first attracted observer's attention, e.g. light or noise.
Moving lights (two)
9. Did object appear as a light or as a definite object.
Light.
10. If there was more than one object, how many were there, and what was their formation.
One.
11. What was the colour of the light or object Yellow:
12. What was its apparent shape
Large light appeared to precede small.
13. Was any detail of structure observable No.
14. Was any method of propulsion obvious No.
15. Was there any sound No.
- 16.** Height, or angle of elevation Much higher than an aircraft.
- 17.** Speed, or angular velocity Much faster than an aircraft.
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
Nil.

** Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
E to W, NW to SE and N to S.
.....
20. Did the object remain on a straight path, deviate or manoeuvre at all.
Moving back and forth in a zig-zag between two stars.
.....
21. Was any trail of exhaust, vapour or light seen No.....
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
Not reported.
.....
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
Sighting corroborated by employer Mr. Silipec. Phone 35-4033.
.....
24. Weather conditions experienced at time(s) or observation(s)
Cloudless.
.....
25. Location of any air traffic in the vicinity at the time of sighting.
Unknown.
.....
.....
26. Location of any meteorological stations in the general area.
Melbourne.
.....
27. Any additional information
Nil.
.....
.....
.....

Questions 25, 26 and 27 to be answered by interrogator.

UNIDENTIFIED FLYING OBJECTS.

Mr. BENSON.—My question to the Minister for Air relates to the state of our radar readiness. Has the Minister seen recent reports in the Press that radar units in our northern area go out of operation during weekends? Are these reports correct? If they are, will the Minister take steps to ensure that a constant watch is kept?

Mr. HOWSON.—Yes, I have seen those reports. As a rule, the radar stations in the north are not manned continuously, but it is not correct that they are manned only in normal working hours. At the moment we do not consider that the dangers to our north are such that we need to keep a constant watch. I suppose the honorable member would want a string of radar stations all the way from Carnarvon to Cape York, and fighter squadrons located all over our northern area. We do not hold the fortress concept that is so beloved by members of the Opposition, but we have certain commitments. The chief demand on us at this time is to help our friends to our north, to meet any requests for assistance that they may make to us. At this stage we regard that as our first priority.

Dated 11/8/64

UNIDENTIFIED FLYING OBJECTS.

Mr. HARDING.—I direct a question to the Minister for Air. In view of reports of unidentified objects flying over north Queensland and northern Australia, can the Minister inform the people living in the area whether the sightings are imaginary? Has he any plans for positive identification in the event of future sightings?

Mr. HOWSON.—The honorable member may have read the statement I made on this subject only a few days ago, in which I said that we cannot state positively that these were not enemy aircraft. However, I can say that of such sightings that have been reported and investigated not more than 3 per cent. have been thought to have involved anything other than birds, showers of meteors and the other objects to which I referred in the statement. The object that was reported over Longreach was sighted at exactly the same time as a DC8 aircraft was passing over that town. Showers of meteors have also been sighted over Longreach in similar circumstances. I very much doubt whether the objects were anything other than what we believe them to be. As I stated in my reply to the question asked by the honorable member for Batman, if the honorable member for Herbert thinks that we should devote all the resources of the Royal Australian Air Force to operating radar stations around our north instead of getting on with the job of meeting what we regard as a first priority, he will have to think again.

A *Spec A* *Q14*, Have Hansard put pls
place on file.

UNIDENTIFIED FLYING OBJECTS

Your 5/9/Air(36) dated 28th July, 1964
and 5/9/Air(38) dated 5th August, 1964

1. It is considered that no further investigation of the sightings referred to in your above-mentioned letter dated 28th July, 1964, is required. This Department's views on these sightings were conveyed to your Headquarters by the Public Relations Officer, Mr. H. Rayner, in a telephone conversation on Tuesday 4th August, 1964. Attached are copies of the suggested press release forwarded to the Press Secretary, of the Minister of Defence, and additional background information, not for publication, prepared for the Minister of Defence.

2. The sightings reported in your letter, referred to above, dated 5th August, 1964, are assessed to be of meteor activity which Mount Stromlo have advised is prevalent at this time of the year in the southern hemisphere. No further investigation is deemed necessary.

UNIDENTIFIED FLYING OBJECTS
ONSLOW AREA 1st and 2nd AUGUST 1964

1. A report was received on Monday 3rd August 1964, from Mr LLOYD MARSHALL a newspaper reporter for the Daily News of PERTH, that two sightings had been reported from ONSLOW, one on Saturday evening, the second on Sunday morning the 2nd August 1964.

2. The particulars are:-

First Report 1 Aug

Several local people (un-named) who were patrons of the ONSLOW Open Air Cinema observed late during the show a flying object travelling much slower than normal at about airline altitude.

Second Report 2 Aug

(a) Submitted by Mr BOB MARSHALL one of three men who alighted from a car at WARREMBOO CREEK approximately 57 miles east of ONSLOW at 0315 hours

(b) The observed object travelled from SOUTH to NORTH and was in view for approximately 3 minutes. The flying object had a very bright head followed by an incandescent tail, when it disappeared the head went out first and the tail glowed on. The phenomena appeared to be quite low.

(c) The second object was seen by all three members of the party.

Local Aircraft in the Area

Mr D McDONALD, Operations Officer for DCA in West Australia states that there were no civil aircraft authorized to fly in the ONSLOW area on the night of Saturday/Sunday 1st and 2nd August 1964.

REPORT ON UFO
SIGHTED AT LONGREACH - 23RD JULY 1964

1. As requested by Headquarters Operational Command two Officers travelled to Longreach and Mt Isa on Friday, 24th July, 1964, to interview the party which had made the above report.
 2. Attached are reports from the following gentlemen:-
 - (a) The Reverend G.L. FORREST, Methodist Minister
 - (b) Mr R.S. IRELAND, Taxi Proprietor
 - (c) Mr C.W. Lanham, Air-charter Pilot
 - (d) Mr D.P. GOULD, Salesman
 - (e) Mr G.L. NEWMAN, Salesman
 - (f) Mr E.T. BAILEY, Salesman
- Also attached are separate reports by Flight Lieutenant C.W. Reif and Flight Lieutenant C.T. Kilian the interviewing officers.
3. For your further information Flight Lieutenant Reif is the Wing Intelligence Officer at 82 Wing and Flight Lieutenant Kilian is a pilot with No 1 OCU.
 4. One other observer, the Reverend ALCORN a Methodist Minister had already left Longreach for Brisbane and has been in transit over the last two days. No report has been obtained from this gentleman yet but arrangements will be made for him to be interviewed in Brisbane at the first opportunity.

REPORT ON THE INTERVIEW OF WITNESSES TO THE SIGHTINGS OF
U.F.O.'s OVER LONGREACH ON THE 22nd JULY, 1964.

1. A Canberra aircraft A84-225 HHE proceeded from RAAF Amberley to Longreach and Mt. Isa on the 22nd July, 1964. The crew, Flt. Lt. KILLIAN and Flt. Lt. REIF, were instructed to interview the witnesses to a sighting of unidentified flying objects over Longreach on the 22nd July, 1964.
2. The witnesses were as follows:-
 - (a) The Reverend G.L. FORREST, Methodist minister,
 - (b) Mr. R.S. IRELAND, Taxi Proprietor,
 - (c) Mr. C.W. LANHAM, Air-charter Pilot,
 - (d) Reverend ALCORN, Methodist Minister, and
 - (e) Messrs. D.P. GOULD, G.L. NEWMAN and E.T. BAILEY Salesmen.
3. The Reverend FORREST and Mr. IRELAND were interviewed at LONGREACH, the others, with the exception of Reverend ALCORN who had returned to BRISBANE, were contacted at Mt. ISA.
4. The occurrence was described as follows:-
 - (a) Mr. LANHAM in his aircraft, call sign C.W.L., landed at LONGREACH and closed down his engines at 220245Z. He had on board three passengers, Messrs. GOULD, BAILEY and NEWMAN, and was being met by the Reverends FORREST and ALCORN. Mr. IRELAND was waiting to pick up passengers and luggage.
 - (b) A KLM DC8 aircraft was expected to pass over at this time and on hearing the noise of a high flying jet, the Reverend FORREST looked up expecting to see the aircraft. He said to Mr. LANHAM as he stepped from the aircraft, "There is a jet up there." He continued to search the sky and observed an object at an elevation of seventy to eighty degrees over LONGREACH township. He drew Mr. LANHAM's attention to it.
 - (c) The object appeared as a formation of objects of whitish colour. The two objects leading the formation appeared to carry out shallow manouvres while not deviating from the general westerly direction.

~~CONFIDENTIAL~~

~~UNCLASSIFIED~~

- cont. (d) The objects were observed by Mr. LANHAM and others in the group, although Mr. IRELAND stated he took only a fleeting look before continuing the task of loading luggage.
- (e) The Reverend FORREST and others stated that they observed the objects for a couple of minutes before they disappeared out of their range of sight. Mr. LANHAM only waited to observe the objects for a comparatively short time, after deciding that they were aircraft, before going into the D.C.A. building to check with the operators concerning aircraft movements. The D.C.A. operators did not take Mr. LANHAM's story seriously at first and it was a little while before they were convinced. The objects had, in the meantime, disappeared.

5. Facts extracted from the interview were as follows:-

- (a) The witnesses were all clustered in one group on the LONUREACH tarmac.
- (b) Mr. LANHAM stated that the objects were of aircraft shape and appeared to be much higher and moving at about twice the speed of a Boeing 707 which flew over some time later.
- (c) On being shown some silhouettes of various aircraft, Mr. LANHAM stated that the objects resembled certain silhouettes which were No 2 and No 71 on the Recognition Training List (silhouettes of service aircraft) A.M.P. 3269, issued 1961.
- (d) The witnesses differed in their estimation of the number and colour of the objects but generally agreed as to being from six to ten objects of whitish colour, one said that he first thought that the group of objects was a puff of steam.
- (e) The witnesses stated that the objects were not birds but were very different of this because Mr. LANHAM's description of the objects as a formation of aircraft. Mr. LANHAM stated that he had not seen a formation of migratory birds.
- (f) The witnesses of the presence of migratory birds was available.

The witnesses also stated that the size of the objects was that of some Kite-Hawks to the interrogator as being 1,500 ft. long and 100 ft. high.

...../3

~~UNCLASSIFIED~~

5. cont. (g) The KLM DC8, call sign PH- DCF Flight KL 844 did pass over LONGREACH at 220246Z at a flight level of 330 but was not observed by the witnesses.
- (h) Mr. LANHAM's first thoughts on sighting the objects were stated to be as follows:- "I saw the objects, one seemed to peel off and I immediately thought 'He's coming back at us' thinking of enemy aircraft".
- (j) Mr. LANHAM had served for five years in the RAAF during the war.
- (k) The sightings were made with the naked eye. The sky was clear and the glare sufficient for the witnesses to shield their eyes with the hand. It was noted that Mr. IRELAND needed glasses to read although he alleges his long sight as being good.

6. Further details are given on the interrogation pro-formas which were completed during the interview.

(C.W. Reif Flt. Lt.)

REPORT BY FLT LT C.T.KILIAN

1. I assisted Flt Lt REIF interviewing observers on 24 Jul 64 and submit the following information received in the interviews.

The Observation

2. The Rev ALCORN and the Rev²² FORREST were standing on the tarmac at LONGREACH airfield on the 23rd July 1964 with Mr IRELAND who was handling Mr ALCORN'S luggage. Mr LANHAM and his three passengers taxied to the tarmac in a light aircraft at about 1245 hours and switched the engine off. All seven observers were then grouped together and the sound of a high flying jet aircraft was heard. This aircraft was a DC 8 at flight level 330 that reported overhead at 1247 hours. All members looked up and someone said "there it is, and there's another and another". Some counted six objects and more in the sky which was cloudless. The objects were uniform in size and appeared to be white or silvery. They were flying on a straight path in a Westerley direction and in loose formation and some were moving laterally within the formation, causing someone to cry "look, one's turning". Messrs LANHAM and FORREST noticed wings that may have been swept-back, but further details were not distinguishable. The formation disappeared out of sight over LONGREACH township after an elapsed time of somewhere between one and three minutes, and the change in elevation was from approx 70° to 50° i.e. 20°.

3. Mr LANHAM did not watch the objects disappear from sight but counted some and then rushed into the aeradio office to make enquiries and did not see the objects again. He may or may not have noticed lateral movement within the formation. He described the objects as moving very high and very fast, estimating the speed to be double that of a Boeing 707 and the relative size of the objects to be about half that of a 707.

The Observers

4. The Rev FORREST and Mr IRELAND were interviewed at LONGREACH airport and were able to indicate where the party had stood and the position of the objects. Mr IRELAND stated that he noticed one object only and could not supply any further details. The Rev ALCORN had departed for BRISBANE and was not interviewed. Mr FORREST recalled that two or possibly three of the objects weaved back and forth and that they had swept-back or delta wings (when shown silhouettes). He admitted that he did not have the experience to accurately assess heights and speeds but he did not doubt Mr LANHAM'S estimations.

5. Mr LANHAM and his passengers Messrs GOULD, NEWMAN and BAILEY were interviewed at MT ISA airfield. Mr LANHAM had cancelled a charter trip in order to be available for interview. He stated he had logged between 7000 and 8000 hours and had been in the RAAF for five years and had been in the air charter business since the war. He was wearing spectacles when introduced. He estimated that the height of the objects would have been at least 40,000 feet after he had been told that the DC 8 had been flying at 33,000 feet although he had not sighted that aircraft. He estimated the size of the objects in comparison with the memory of the 707s size as it frequently passes overhead. Mr NEWMAN mentioned in private that he thought Mr LANHAM had a tendency to "romanticise" but he would not doubt his report. Mr LANHAM is well known by the other six observers and as they respect his opinions on aviation matters, they all agreed the objects were aircraft flying fast and high, and could not have been birds.

REPORT OF AERIAL OBJECT OBSERVED

12C

1. Name of observer. ERROL THEODORE BAILEY
2. Address of observer 47 NORMANTON ST.
STAFFORD
3. Occupation COMPANY REP.
4. Date, time of observation. 23-7-1964 12.50PM
5. Period of observation (the time interval) APPROX. ONE MINUTE.
6. Manner of observation (give details of own position by map reference if possible or by known landmark and description of equipment used in the observation.)
OVER LONGREACH AIRPORT BY NAKED
EYE.
7. Where was object observed e.g. overhead, coming from behind a hill, cloud or over horizon etc.
OVERHEAD TRAVELLING WEST
8. What first attracted observers attention e.g. light or noise.
NOISE OF ANOTHER AIRCRAFT. (WAS CERTAIN OVERHEAD)
9. Did object appear as light or as a definite object.
WHITE OR SILVER
10. How many objects and what was their formation.
I SAW SIX OF ABOVE OBJECTS. (COUNTED SIX, BUT COULD HAVE BEEN MORE)
11. What was the colour of the light or object. DEFINITE LIGHT
12. What was its apparent shape. AIRCRAFT BUT HARD TO DEFINE
13. Was any detail of structure observed.
NO.
14. Was any method of propulsion obvious NO
15. Was there any sound NOT NOTICED BY ME
- *16. Height or angle of elevation. EXTREMELY HIGH. (ABOUT 60-70 DEGREES FROM HORIZON)
- *17. Speed or angular velocity. VERY FAST.

123

18. State any experience which enabled observer to be reasonably certain of the answers given to 16 and 17.

FLIES REGULARLY AS PASSENGER OF LIGHT AIRCRAFT.

* Since it is normally impossible to estimate the flight and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moves, and the time taken to do so.

19. Direction of flight with reference to land marks or points of compass.

WEST - (OVER LONGRACH)

20. Did object remain on straight path, deviate or manoeuvre.

GENERAL PATH WAS STRAIGHT, BUT SOME "PEELED AWAY" AND APPEARED TO TURN AWAY & BACK AGAIN.

21. Was any tail of exhaust vapor or light seen

NO

22. Where did object disappear e.g. in mid air, behind hill, over the horizon.

JUST PAST OVERHEAD

23. Existence of any physical evidence such as fragments, photographs or other supporting evidence.

NO

24. Weather conditions

BLUE SKIES

25. Location of air traffic in the vicinity at the time of sighting.

DC 8 OVERHEAD AT FL 320.

26. Location of any meteorological station in the area.

27. Any additional information.

Note: 25, 26 and 27 to be answered by the interrogator.

K. L. H. 11

5. Period of observation (the time interval)..... *1 MINUTE*
6. Manner of observation (give details of own position by map reference if possible or by known landmark and description of equipment used in the observation).
With eyes unaided by glasses.
7. Where was object observed e.g. overhead, coming from behind a hill, cloud or over horizon etc.
Longreach Aerodrome Overhead
travelling Westward.
8. What first attracted observers attention e.g. light or noise.
Attention drawn by other members of Party
9. Did object appear as light or as a definite object.
Definite object
10. How many objects and what was their formation.
Sighted approx six in loose formation.
11. What was the colour of the light or object..... *White*
12. What was its apparent shape..... *Small Blobs when Sighted some*
13. Was any detail of structure observed.
No.
14. Was any method of propulsion obvious..... *No.*
15. Was there any sound..... *No.*
- *16. Height or angle of elevation.....
- *17. Speed or angular velocity.....

D. J. Gould

18. State any experience which enabled observer to be reasonably certain of the answers given to 16 and 17.
-
-
-
- * Since it is normally impossible to estimate the flight and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moves, and the time taken to do so.
19. Direction of flight with reference to land marks or points of compass.
- East to West*
-
-
20. Did object remain on straight path, deviate or manoeuvre.
- Straight Path when Sighted*
-
21. Was any tail of exhaust vapor or light seen *No*
-
22. Where did object disappear e.g. in mid air, behind hill, over the horizon.
- Mid Air*
-
23. Existence of any physical evidence such as fragments, photographs or other supporting evidence.
24. Weather conditions *Perfect & No Cloud*
-
25. Location of air traffic in the vicinity at the time of sighting.
26. Location of any meteorological station in the area.
27. Any additional information.

Note: 25, 26 and 27 to be answered by the interrogator.

REPORT OF AERIAL OBJECT OBSERVED

1. Name of observer..... George Lavis NEWMAN
2. Address of observer..... ~~#~~ 28 Long St
TOOWOOMBA
3. Occupation..... SALESMAN
4. Date, time of observation..... 23/7/64..... 1250 P.M.
5. Period of observation (the time interval)..... 1 minute
6. Manner of observation (give details of own position by map reference if possible or by known landmark and description of equipment used in the observation.
Longreach Aerodrome - unaided by
glasses - naked eye
7. Where was object observed e.g. overhead, coming from behind a hill, cloud or over horizon etc.
First appeared overhead - travelling west
8. What first attracted observers attention e.g. light or noise.
- small objects in cloudless sky, bright sunlight
- noise of another aircraft overhead
9. Did object appear as light or as a definite object.
appeared as small puffs of cloud
10. How many objects and what was their formation.
I sighted about 4 or 5. no formation
11. What was the colour of the light or object..... white
12. What was its apparent shape..... not clear
13. Was any detail of structure observed.
NO
14. Was any method of propulsion obvious..... NO
15. Was there any sound..... NO
- *16. Height or angle of elevation..... Very high - say 30,000 ft or higher
- *17. Speed or angular velocity..... appeared to be moving very fast, out of sight to the west

18. State any experience which enabled observer to be reasonably certain of the answers given to 16 and 17.

PRIVATE PILOT - 100 hours

* Since it is normally impossible to estimate the flight and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moves, and the time taken to do so.

19. Direction of flight with reference to land marks or points of compass.

MOVED TO THE WEST (OVER LONGREACH)

20. Did object remain on straight path, deviate or manoeuvre.

PROCEEDED TOWARDS WEST & SOME MANOEUVRED

21. Was any tail of exhaust vapor or light seen

No

22. Where did object disappear e.g. in mid air, behind hill, over the horizon.

DISAPPEARED FROM VIEW IN MID AIR

23. Existence of any physical evidence such as fragments, photographs or other supporting evidence.

NIL

AERODROME AND ABOUT OVER TOP OF
LONGREACH TOWN.
8. What first attracted observers attention e.g. light or noise.
..... SOUND OF JET (DC8) FLYING OVERHEAD SIMULTANEOUS
9. Did object appear as light or as a definite object.
..... DEFINITE OBJECT. - AIRCRAFT SHAPE - SWEEP BACK WING
10. How many objects and what was their formation.
PERSONALLY OBSERVED SIX - THEN PROCEEDED TO AERADIO OFFICE
11. What was the colour of the light or object... LIGHT ALMOST WHITE
12. What was its apparent shape... SWEEP BACK WING AIRCRAFT.
13. Was any detail of structure observed.
..... AIRCRAFT SHAPE.
14. Was any method of propulsion obvious... No. - ASSUMED JETS.
15. Was there any sound... UNDETECTABLE
- *16. Height or angle of elevation... ABOUT 70° ABOVE HORIZON.
- *17. Speed or angular velocity... MY ESTIMATE ABOUT TWICE SPEED OF BOEING

Mr Lanham

.../2.

18. State any experience which enabled observer to be reasonably certain of the answers given to 16 and 17.

..... COMMERCIAL PILOT - AIR CHARTER
..... 5 YEARS IN R.A.A.F.
.....

* Since it is normally impossible to estimate the flight and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moves, and the time taken to do so.

19. Direction of flight with reference to land marks or points of compass.

..... TRAVELLING FROM EAST TO WEST.
.....

20. Did object remain on straight path, deviate or manoeuvre.

..... MOST OF THEM REMAINED ON STRAIGHT PATH. - AT LEAST TWO MANOEUVERED
..... ALMOST AS THOUGH BREAKING INTO FORMATION THEN
..... STRAIGHTENED UP.

21. Was any tail of exhaust vapor or light seen

..... NO VAPOUR TRAIL
.....

22. Where did object disappear e.g. in mid air, behind hill, over the horizon.

..... DISAPPEARED OUT OF SITE.
.....

23. Existence of any physical evidence such as fragments, photographs or other supporting evidence.

24. Weather conditions PERFECT WEATHER. CLOUDLESS & VERY BLUE SKY

25. Location of air traffic in the vicinity at the time of sighting. KONGREACH

26. Location of any meteorological station in the area.

27. Any additional information.

Note: 25, 26 and 27 to be answered by the interrogator.

REPORT OF AERIAL OBJECT OBSERVED

12 H

1. Name of observer *Mr Robert Stephen Ireland*
2. Address of observer *21 Eagle St Longreach*
3. Occupation *Taxi prop*
4. Date, time of observation *12+8 22/7/64*
5. Period of observation (the time interval) *one look after being shown*
6. Manner of observation (give details of own position by map reference if possible or by known landmark and description of equipment used in the observation.
on tarmac loading luggage... no glass
7. Where was object observed e.g. overhead, coming from behind a hill, cloud or over horizon etc.
overhead
8. What first attracted observers attention e.g. light or noise.
shown
9. Did object appear as light or as a definite object.
definite
10. How many objects and what was their formation.
just an object
11. What was the colour of the light or object *yellowy*
12. What was its apparent shape *not noticed*
13. Was any detail of structure observed.
no
14. Was any method of propulsion obvious *no*
15. Was there any sound *could*
- *16. Height or angle of elevation *approx 80°*
- *17. Speed or angular velocity *—*

Mr Ireland only had one look at the objects and could not fill in page 2.

REPORT ON AERIAL OBJECT OBSERVED

58

1. Name of Observer *CW Lanham + 6 others*
2. Address of Observer
3. Occupation of Observer
4. Date and Time of observation (Time given in 24 hour clock zonal time)
..... *22 0247Z*
5. Period of observation(S) *between 1 - 3 min*
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... *Naked eye Longread Tanager*
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
..... *overhead Longread*
8. What first attracted observer's attention, e.g. light or noise.
..... *Sound of high jet a/c*
9. Did object appear as a light or as a definite object.
..... *Definite objects of uniform size*
10. If there was more than one object, how many were there, and what was their formation.
..... *6 to 10 in loose formation*
11. What was the colour of the light or object *white*
12. What was its apparent shape *Apparent a/c shape*
13. Was any detail of structure observable *2 shadows suggest swept back wings*
14. Was any method of propulsion obvious *Not obvious*
15. Was there any sound *No apparent sound from objects*
16. xx Height, or angle of elevation *70°*
17. xx Speed, or angular velocity *Lanham assessed as approx twice high flying*
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... *Lanham experienced charter pilot*
- xx Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

CL

Report on aerial object observed (contd.)

19. Direction of flight with reference to landmarks or points of the compass.
..... *Westerly direction*
20. Did the object remain on a straight path, deviate or manoeuvre at all.
..... *Remained on straight path*
21. Was any trail of exhaust, vapour or light seen *some objects appeared to manoeuvre laterally within formation*
..... *no trails*
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
..... *disappeared out of range of vision*
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
..... *Nil supporting evidence*
24. Weather conditions experienced at time(s) or observation(s)
..... *Clear blue sky*
25. Location of any air traffic in the vicinity at the time of sighting.
..... *KML DC8 overhead Hongkai 0247 FL330 for Manila via Narmanton*
26. Location of any meteorological stations in the general area
..... *Nil met station*
27. Any additional information
..... *Observers stood in one group. Lanham assessed size to be approx half that of a light (?) Boeing 707 and probably observed for less than one minute - Full reports following*

Questions 25, 26 and 27 to be answered by interrogator.

A "thing"^{55A} leaves its mark

MACKAY.—Hotel licensee (Mr. Jim Tilse) said at his hotel on the Eton Range, about 40 miles from Mackay, last night: "If I had only seen it by myself I would keep my mouth shut."

He was talking about a mysterious "thing", circular in shape and bearing some 30 lights, which he and two other men say "landed" near the hotel on Sunday night.

Constable B. Self, of Nebo police, confirmed yesterday there was evidence of scorching the treetops and a section of grass near the Retreat Hotel.

Photographs

Mr. Tilse has taken coloured photographs of marks made by "the thing" including a circular scorch mark about 20ft. across.

He said he had reported the matter to police and the Civil Aviation Department.

The three men who said they sighted "the thing," Mr. Tilse, who is a commercial pilot with 11,500 hours' experience, and Mr. John Burgess and Mr. Eric Judin residents at the hotel, have made a sketch of it and have signed it.

"All sober"

Mr. Tilse said last night: "It was about midnight on Sunday and I was clearing up around the place. We were all sober.

"One of the blokes ran in and said come and have a look at this. I went out and said: 'It's just the moon.'

"But when I saw it moving towards us I ran inside and called the police.

"The policeman at Mackay nearly died laughing and said: 'I bet it's still not there.'

"I went and had another look and said, 'Yes it is and it's coming towards the hotel.' That must have taken the smile off his face.

Spotlights

"The object was about 300 yards from the hotel and it was moving over the treetops at one stage. It had a great bank of spotlights, about 20 or 30 of them, above a circular platform.

"When it was coming towards us somebody said 'Get the rifle and shoot at it,' but I said 'No fear they might shoot back!'

Mr. Tilse said that he and the two other men watched the object for about 40 minutes.

When it took off and

flew away they saw it had three legs.

"I saw it. We all saw it. It disappeared in a north-easterly direction," Mr. Tilse said.

"If I had seen it by myself I would have kept my mouth shut so that I would not make myself a laughing-stock," Mr. Tilse said.

"I have read about these things and scoffed," he said.

"Not a plane"

"It wasn't an aircraft—of that I am sure," he said.

Mr. Judin confirmed Mr. Tilse's story.

He said: "I have never seen anything like it . . . those lights . . . and those legs."

In Brisbane last night the Regional Director of Civil Aviation (Mr. Seymour) said that so far he had not received a report on the sighting.

"But if Mr. Tilse says he has seen something, then I believe him, as he is an experienced pilot," he said.

The sighting would probably be investigated by the Air Force, as other sightings were, Mr. Seymour said.

55

24 JUL 1964

580/1/1 (55)

Mr. Hamish Robson
26 Watson Avenue
Rose Park
ADELAIDE SA

Dear Sir,

1. I refer to your letter dated 14th July, 1964, regarding reported sightings of unidentified flying objects.
2. From time to time reports of unidentified flying objects are received and investigated by the Royal Australian Air Force, but details of individual investigations have not been made public.
3. On October 20th, 1960, the Minister for Air, the Honourable F.M. Osborne, made a statement in the Australian National Parliament at Canberra, summarizing the position, and his comments may be pertinent to your request.
4. In the course of his remarks Mr. Osborne said, "The Department of Air does obtain information about all well-reported cases of unidentified flying objects. Although reports of this sort have been investigated very carefully for some years, nearly all of them are explainable on a perfectly normal basis. Sometimes they are found to be weather balloons, high-flying aircraft, or even stars. On one occasion, it was established that a reported spaceship was the moon. Of all these reports, only three or four per cent cannot be explained on the basis of some natural phenomenon, and nothing that has arisen from that three or four per cent of unexplained cases gives any firm support for the belief that interlopers from other places in this world or outside it have been visiting us".
5. This Department has no knowledge of the report in a 1950 edition of "Readers Digest" that the United States Air Force was constructing and launching discs similar to "flying saucers" to test air flow. However, attached is an extract from "Newsweek" dated 5th August, 1963, which may be of interest to you.

Yours faithfully,

(A. B. McFarlane)

W. C. Ch.

To the Secretary,
Air Board
Canberra, A.C.T.

DIA AFF 157

Dear Sir,

PA.
21 4 64

Recently I became engaged in a long argument with a friend about the existence of unidentified flying objects and in particular so called "flying saucers". The argument reached a stalemate and while searching for additional material I was advised by several librarians to write to you.

If it would not inconvenience you could you please inform me whether any objects vaguely resembling "space-craft" have been sighted by any Australian astronomical observatories, and if so has any explanation been given for their presence? Could you also verify or enlarge upon a report in a nineteen fifty "Reader's Digest" that the United States Air Force was constructing and launching discs similar to "flying saucers" to test air flow? If these questions are not relevant to your department could you suggest an alternative department to write to?

I would be exceedingly grateful if you could comply with any of these requests or give any additional information on the matter,

Yours sincerely

Hamish Robson (16)

REPORT ON AERIAL OBJECT OBSERVED

1. Name of Observer PASSMORE, MESSRS A + J M.
2. Address of Observer BALLADONIA HOTEL EYRE HIGHWAY.
3. Occupation of Observer PUBLICAN & WEATHER OBSERVERS.
4. Date and Time of observation (Time given in 24 hour clock zonal time)
Monday 24th February 10.55 p.m. 2nd March 7.50 p.m.
7.30 p.m.
5. Period of observation(S) 20 minutes to times like 1 hour or more
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
From Balladonia Hotel looking West. Approximately
2 degrees North of West
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
as above — Between the trees in the distance
8. What first attracted observer's attention, e.g. light or noise.
The first appearance was like a burning object, tree alight
or something burning about 2 miles away but no smoke.
9. Did object appear as a light or as a definite object.
as a fire first. Other times as a light as big as the headlight
of a car in the distance.
10. If there was more than one object, how many were there, and what was their formation.
only one
11. What was the colour of the light or object fire first time, bright white
light after.
12. What was its apparent shape no shape.
13. Was any detail of structure observable no
14. Was any method of propulsion obvious no, but it rose, hung in the
air, then sank again.
15. Was there any sound no
16. xx Height, or angle of elevation 100 ft. from the distance
17. xx Speed, or angular velocity rising up & hanging.
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17. copy of report attached
- xx Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on aerial object observed (contd.).

19. Direction of flight with reference to landmarks or points of the compass.
..... *2 degrees North of West*
20. Did the object remain on a straight path, deviate or manoeuvre at all.
..... *no straight path*
21. Was any trail of exhaust, vapour or light seen *no*
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
..... *earth wise*
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
..... *no only other observers*
24. Weather conditions experienced at time(s) or observation(s)
..... *clear*
25. Location of any air traffic in the vicinity at the time of sighting.
.....
.....
26. Location of any meteorological stations in the general area
.....
27. Any additional information
.....
.....
.....

Questions 25, 26 and 27 to be answered by interrogator.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of Observer GALE Peter John
2. Address of Observer 40 Box 12 Neaseman
3. Occupation of Observer School boy
4. Date and Time of observation (Time given in 24 hour clock zonal time)
Monday 24th Feb. 6-30 pm.
5. Period of observation(S) 30 seconds
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
178 Mile Peg Eyre Highway.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Overhead Travelling N.W. to S.E.
8. What first attracted observer's attention, e.g. light or noise.
light
9. Did object appear as a light or as a definite object.
Moving Object eq. light
10. If there was more than one object, how many were there, and what was their formation.
11. What was the colour of the light or object Whitish
12. What was its apparent shape as of previous rockets sighted
13. Was any detail of structure observable Nil
14. Was any method of propulsion obvious Nil
15. Was there any sound Nil
16. xx Height, or angle of elevation As of previous rockets (approx)
17. xx Speed, or angular velocity 1800
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
Newspaper reports etc. & previous sightings.
- xx Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on aerial object observed (contd.).

19. Direction of flight with reference to landmarks or points of the compass.
..... *N.W. to S.E.*
20. Did the object remain on a straight path, deviate or manoeuvre at all.
..... *Straight Path.*
21. Was any trail of exhaust, vapour or light seen *nil*
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
..... *Mid air*
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
..... *nil*
24. Weather conditions experienced at time(s) or observation(s)
..... *Clear*
25. Location of any air traffic in the vicinity at the time of sighting.
.....
.....
.....
26. Location of any meteorological stations in the general area
.....
27. Any additional information *All questions answered are based on a vivid interest and close following of Sputniks etc. This object appeared in every aspect the identical to a Sputnik & U.S.S.R. Rocket.*

~~Questions 25, 26 and 27 to be answered by interrogator.~~

Copy as
given to Inspector
Anderson of Kalgoorlie
Police.

11 - 3 - 64

On 24th day of February 1964 at 10.55pm
Mr & Mrs Pasmore were standing outside the
Hotel when they noticed what appeared to
be a small bush fire burning about
2 miles distant in a 2 degrees North of West
angle from the front of the Hotel.

This was definitely in all appearances
in one persons opinion a bush fire, anothers
little a fire ball or some such & in the back
of my mind I felt it could be a light
air-craft down.

Mr McEachran the Barman also came
out & observed it.

Mr & Mrs Pasmore walked the 100 yards
down to the road to view this "fire" more
clearly & it still appeared to be burning
steadily but in the couple of minutes it
took to walk back to the Hotel the "fire"
had completely disappeared.

We listened to the news to hear if
there was anything about it, but there
was -

11. 3. 64

The following Monday 2nd March at 7:05 a.m. we were again outside when we saw hanging above the tree tops in exactly the same place as what had appeared as a fire the week before, a very bright light.

This light sank to the ground between the trees to the same spot as the week before, rose again hung in the sky & eventually sank again & went out.

Mr & Mrs Passmore & Mr McEachran all saw this light, but Mr McEachran who was being driven home this night observed the light through the rear ~~view~~ window of the car in which he was a passenger.

To Quote Mr McEachran - At about 8 p.m. he was a passenger in his father's car returning to Balladonia when as they descended the 74 mile hill there appeared to be a light like the headlight from another car following them. They kept watching for the car but realised it was the light ~~was~~ in the sky. This light disappeared after

3 or 4 miles, + on returning here + being told we had watched the light he told us of the strange light he had seen also in the same place.

On Sunday 8th March about 7.30 p.m. this light appeared again in exactly the same place + the staff from the Hotel all observed it too.

On Monday 9th Mrs Hillier the cook sat on the step + observed the light. To quote her "The light was like the headlight of a car in the distance, it hung in the sky at exactly the same spot, + took about three quarters of an hour to slowly sink between the trees where she could still see it between the trees + it gradually went out.

No car was in the vicinity at that time.

Every one was interested + more so when one of the rabbit trappers came in + advised us that while downing along his children who were in the back of his ute

11. 3. 64

all were very excited as they saw what appeared to them a sputnik in the sky which they described as a bright light travelling across the sky but they knew it wasn't a comet as it took too long to sink.

A man working on the road was in the hotel at this time, heard the story & said that he too had seen this light whilst travelling West to Norseman & the light had kept to the left of him right up to the 70 mile hill when it disappeared.

On Tuesday I reported the whole story to the D. C. A at Boulder.

On Tuesday night at approximately 7 p.m. the light again appeared but was not as bright altho it definitely was bigger than a star or comet & this time there was a small light next to it.

It did the same thing. Took $\frac{3}{4}$ of an hour to 50 minutes to sink, rose again, hung over

11-3. 64

the tree tops sank & then went out.

As it went out it appeared as a
cigarette does when you observe it in
a dark spot & can't see the smoke.

Wagin Man Wins Tour

Wagin dry cleaner L. P. Nelson (30) has been awarded a £1,000 scholarship to study dry cleaning management and technology in the United States.

He will leave W.A. in June for a four-week study course at Silver Springs, Maryland. When he returns he will pass on information to dry cleaners throughout W.A.

Some of the over 100 firms interested in nitrogenous fertiliser production in W.A. had approached the Government. Others had been approached by the Government after they had indicated their interest.

The Government had not been able to judge whether local companies could meet W.A.'s future demands because it had not received any firm proposal.

Mystery Light Startles Man

NORSEMAN, Wed: A Main Roads supervisor has reported sighting a strange red light last night over the Eyre-highway, about 146 miles east of Norseman.

The man's vehicle had broken down at the spot.

At 7.30 p.m. he saw the strange light almost directly above him. It appeared to touch the earth then climb at an angle of about 30 degrees several times in about 10 minutes.

The man said the object appeared quite close to him and that his dog almost went berserk.

He busied himself fixing his car to take his mind off the incident and forwarded a report to the police by wireless from Balladonia.

Mrs Passmore, proprietress of the Balladonia Motel, 120 miles east of Norseman, said that a strange light had been seen on several occasions by herself, her husband and employees at the motel and appeared to follow a similar pattern to the object sighted last night.

The object appeared in the same position almost due west from the motel each time. The Main Roads supervisor confirmed the direction.

Mrs Passmore has previously forwarded a detailed report on sightings to Inspector Anderson of the Kalgoorlie police.

Norseman police have sent a preliminary report on the incident to Inspector Anderson, of Kalgoorlie.

Department of Civil Aviation,
88 St. George's Terrace,
PERTH. W.A.

Dear Sir,

I would like to report the sighting of an object this morning of which I was unable to identify. I have listed a general description under the headings below.

<u>Sighting</u>	9.57 a.m.
<u>Height</u>	About 2,000 - 4,000 ft.
<u>Colour</u>	Brown
<u>Description</u>	It was cigar shaped and travelling sideways. It would resemble a large bird but seemed to be travelling too fast and also the direction was straight. It did not appear to be an aeroplane as there was no apparent noise associated with the object and also was not shaped like an aeroplane. I first sighted it after it had passed overhead and it was between an overhead position and the horizon before I observed it. I then proceeded to watch it for about 10 secs. or more before I rushed inside to get a pair of binoculars, however by the time I came outside again, it had disappeared.
<u>Direction</u>	N.N.W.
<u>Speed</u>	Around about 400 mph.
<u>Size</u>	About 40' long.

Yours faithfully,

Sgd. (R.V. Marsh)

017

13 William Street,
LONDON

22/3/64

Department of Civil Aviation,

London, W.1

I would like to report the sighting of an object
of which I was unable to identify. I have listed a number
of items under the heading below.

9.47 a.m.

Altitude

About 1,000 - 1,500 ft.

Height

Brown

Colour

It was often shaped and travelling sideways. It would
resemble a large bird but seemed to be travelling too
fast for that. The object was seen at 9.47 a.m. and
seemed to be in a position as there was no apparent
noise associated with the object and also was not shaped
like an aircraft. I think it might be either a bird
passed overhead and it was between an overhead position
and the horizon before I observed it. I then proceeded
to watch it for about 10 secs. or more before I wished
to take to get a pair of binoculars, however, by the time
I came outside again, it had disappeared.

Description

1. N.W.

Direction

Around about 400 mph.

Speed

About 30' long.

Size

Yours faithfully,

Sgt. (R.V. Marsh)

VICTORIA

File 48

Dear Madam,

1. I refer to your letter dated 30th March, 1964, in which you requested details of an unidentified flying object sighted by astronaut L. Gordon Cooper, Jr. over West Australia during the 15th orbit of his space flight. This sighting was not reported through RAAF channels and, therefore, it is regretted that this Department is unable to supply any details of the incident.
2. In answer to your other query, from time to time reports of unidentified flying objects are received and investigated by the Royal Australian Air Force, but details of individual investigations have not been made public.
3. On October 20th, 1960, the Minister for Air, the Honourable F.M. Osborne, made a statement in the Australian National Parliament at Canberra, summarizing the position, and his comments may be pertinent to your request.
4. In the course of his remarks Mr. Osborne said, "The Department of Air does obtain information about all well-reported cases of unidentified flying objects. Although reports of this sort have been investigated very carefully for some years, nearly all of them are explainable on a perfectly normal basis. Sometimes they are found to be weather balloons, high-flying aircraft, or even stars. On one occasion, it was established that a reported spaceship was the moon. Of all these reports, only three or four per cent cannot be explained on the basis of some natural phenomenon, and nothing that has arisen from that three or four per cent of unexplained cases gives any firm support for the belief that interlopers from other places in this world or outside it have been visiting us".

Yours faithfully,

(A. B. McFarlane)
SECRETARY

The Secretary,
Department of Air,
CANBERRA. A.C.T.

DAFI Dear Sir,

When Astronaut Gordon Cooper was in his 15th orbit over Western Australia, north of Perth, he sighted an Unidentified Flying Object 100 miles high. His sighting was confirmed by Muchea Tracking Centre and about two hundred known witnesses.

I am requesting information regarding details of the findings of this incident in particular, and what the R.A.A.F. is doing to solve the mystery of these objects in general.

Yours faithfully,

Judith M. Magee

(Mrs.) Judith M. Magee.

Note of Action

1. No copy of NASA report on this flight held and no reports of U.F.O. sighting received.
2. Major Finney US Air Attache endeavouring to obtain information
3. NASA publication received 13 Apr. "The Training of Astronaut L. Gordon Cooper Jr. and the Faith 7" — no mention of U.F.O. sighting.

UNIDENTIFYING FLYING OBJECT

.. Forwarded for your information and investigation is a copy of a memorandum received from the West Australian Divisional Office of the Bureau of Meteorology which in turn forwards a report of lights observed in the vicinity of Balladonia, W.A.

2. The covering memorandum of our Regional Director indicated that the phenomena reported could not be associated with the operation of any aircraft in the area at the time.

3. Would you please advise the proprietor of the Balladonia Motel in due course of the result of your investigation.

(M.D. Evans)

For DIRECTOR-GENERAL OF CIVIL AVIATION

Att. ✓

(COPY)

NA Divisional Office of Bureau
of Meteorology

64/69/9

12th March, 1964.

The Regional Director,
Department of Civil Aviation,
St. Georges Terrace,
PERTH. W.A.

UNIDENTIFIED OBJECT

The following has been received from my Officer in Charge at Kalgoorlie.

"Following received from Balladonia Motel today. Three weeks ago a hot night at approximately 9.30 pm a light with the appearance of a burning tree trunk was noticed at an angle of 45 degrees and southeast of the Motel. Last Monday week one large and one small light appeared at approximately same time and place appeared to sink to ground and then rose again and disappeared. Sunday night and last night same lights appeared they appeared to move in the direction of Esperance. These last sightings were confirmed by Rabbit Trappers who were 50 miles further out. The Motel Prop. would like any information possible on this phenomenon."

Advice has been furnished to Kalgoorlie that there was no information available to identify the sighting report, but it would be forwarded to the appropriate authority, who would advise Balladonia in due course.

There is no astronomical explanation for this sighting, nor would it have been a satellite.

It could possibly be a reflection of car lights on a slope being focused on a cloud, similar to a cloud search light, but in view of the fact that two sightings were made from distances fifty miles apart, it seems difficult to believe that a light spot on a cloud would be sufficiently intense to be seen at such distances. There have been bush fires in this area, but again it is unlikely that a single light would be seen, but if there was any visible effect at the distances said, it would be more likely a reflected glow from the sky.

This leaves only the possibility of Aircraft operating in the area.

(G.W. MACKEY)
DEPUTY DIRECTOR.

The Minister for Defence has received a letter from Mr. J. Cook of Kingston, South Australia, copy attached, in which the reporter raises with the Minister a question. The Minister wishes to know if there is any explanation of the matter. Cook and her son have been in the area of the mine for some time. It is noted that the reporter would be grateful if you would look into the matter and have your comments sent as soon as possible.

A copy of this memorandum has been sent to the Department of Civil Aviation for information.

Box 6,
Minlaton, S.A.

3.3.64

The Minister of Defence

Dear Sir,

I have at last decided that I should report something I heard over my home about 12 months ago. The delay in reporting it is because I have been frightened of being laughed at, but I heard it and one son later heard it and I leave it to you to decide what it could be. It was about the time the odd ball was found near Broken Hill.

On two occasions I woke to hear a frighteningly loud bell like whining noise flying over the house. The third occasion I did not hear it quite so loudly but a son and family said they heard it and it made the little children (who are not unduly nervous) cry, and their father to comfort them said "Its just a big truck" but he only said that so they wouldn't be frightened. He like myself had no idea what it could be. It appeared to be flying over head at terrific speed S.W. to N.W.

I live about $1\frac{1}{2}$ miles north of Minlaton on the Curramulka Road.

I have stayed at Elizabeth where jets of all kinds fly over head but I have never heard anything like this. What it was I don't know but I quite made up my mind that the next time I heard it even if in the middle of the night I'd do my best to get out and see it (It went over about 2.30 a.m. twice and one about 6 p.m.)

My daughter was a plane spotter during the war years, couldnt something similar be used in peace time with so many strange reports going the round.

Yours sincerely,

Sgd. Vera M. Cook

My son lives several 100 yds NW of me.

Minlaton

SIGHTING OF UNUSUAL AERIAL OBJECT

A report is forwarded concerning the sighting
of an unusual aerial object at BRIDPORT Tasmania by
Mr R. Osborne.

Encl

(J.S. GOOCH)
Wing Commander
For Air Officer Commanding

mes.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer... R. Osborne.
2. Address of Observer... Emily St: ... Bridport: ... Tasmania.
3. Occupation of Observer... Fisherman
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 0355 3/3/64
5. Period of Observation (s).... 5 Minutes.
6. Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... At Bridport: ... W of BDP elevation 75° travelling S E direction.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
..... As in 6.
8. What first attracted observer's attention e.g. light or noise.
..... Bright light (steady) like a planet.
9. Did object appear as a light or as a definite object.
..... Light
10. If there was more than one object, how many were there, and what was their formation.
..... One
11. What was the colour of the light or object... white
12. What was its apparent shape... like a planet
13. Was any detail of structure observable... No.
14. Was any method of propulsion obvious... No.
15. Was there any sound... No.
16. Height, or angle of elevation... 75°
17. Speed, or angular velocity ... Disappeared horizon 5 mins.
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.

--

Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

RESTRICTED

REPORT ON STRANGE PHENOMENA SEEN AT SEA ON THURSDAY 23rd. JANUARY 1964, BETWEEN 0145 hrs & 0245 Hrs BETWEEN CAPE GREY AND N.E. POINT OF GROOTE EYLANDT, BY J. JOHNSON C.J. WOOLER A.A. SCOTT HENRY BAK AND J.R. DAVIES.

J. Johnson was on wheel house watch, C. Wooler was on engine room watch, At 2100 hrs J. Davies reported when changing watch that he found difficulty in steering a straight course by the compass. A. Scott took the wheel and found the compass was unsteady, however, he passed it off as he being overtired and steered by the stars. At 2400 hrs, J. Johnson relieved A. Scott. At approx. 0045 hrs the compass swung 90° off course. At the time J. Johnston was steering by a star. The compass swing became greater. At approx 0140 hrs. J. Johnson sighted a light extending right across the bow on the horizon. He handed the wheel over to C. Wooler and went to Monkey Island to have a better look. He came down to the wheel house and told C. Wooler to have a look. C. Wooler turned out the compass light and saw a glow on the horizon. Both J. Johnson and C. Wooler could see under and over the light patch. C. Wooler turned on the compass light and found the vessel approx 60° off course. The compass went 'Haywire' As soon as he had corrected the vessel as best he could, he switched off the compass light and found the un-natural light was about 6Ft on the Starboard side. The light was in the water. It was described as a ghostly white light, in the centre was a shadow which rotated in a clockwise direction causing the light to pulsate. The light appeared to draw away to the stern. It is estimated that it was miles across and a few hundred yards through. J. Johnson saw another light patch coming. He immediately woke A. Scott. The light was coming straight at the barge at a considerable speed. Henry Bak was woken up. J. Johnson was steering by compass. As the light, which was pulsating, came close, the barge swung away to Starboard through 90°. J. Davies was then woken up. The light on the water passed about 100 yds to port. As the barge began to return to course, another light was seen coming at the barge at an angle of about 45° which the Bow. It came to within inches of the starboard side and appeared to rebound at 45° with the stern and moved away. It disappeared in a few seconds. The second light appeared to be about 400 yds long by 100 yds wide, and the third light slightly smaller. Three more patches appeared on our starboard side and passed in a few seconds. These patches were quite small. The light passed at approx. 0230 hrs. Faint glows were seen on the horizon until 0245 hours. At approx 030 the compass settled down and we had no further trouble.

All lights were the same colour, with this strange rotating shadow, causing the lights to pulsate. The pulsations timed at 12 for 9 seconds, then completely irregular, then settled down to 12 for 9 seconds.

The compass swung out of control, but became worse as the light approached.

All members of the crew who were off duty were sleeping on deck.

The moon had set and the sky was scattered with light clouds.

A thunderstorm was over the horizon to the North East and a squall on the horizon to the South West.

Course steered 205° true.

REPORT COMPILED BY MASTER J. JOHNSON & A.A. SCOTT

UNIDENTIFIED FLYING OBJECT
(Your BS 5/6/Air(89) dated 31st December 1963)

1. The photographs which were the subject of the above referenced letter have been studied at this department.
2. The images on the negative were caused by a static electrical discharge occurring during the unwrapping of the packaged cut film. The protective coating around the film shielded the emulsion from visible damage, but the light-sensitive emulsion, effected by the discharge, was thus unable to record the image of the building rail under the discharge marks (see photograph) because of its then reduced sensitivity at that spot.
3. The likely colour temperature of such a static electrical discharge is in the 8,000° Kelvin region.
4. This correspondence has been downgraded to RESTRICTED.

(C. F. READ)
Group Captain
For Chief of the Air Staff

DEPARTMENT OF AIR
MINUTE PAPER

40

(This side only to be written on)

Subject:

UNIDENTIFIED FLYING OBJECT

~~DDAFS (OPS)~~

1. Reference folio 39.
2. The marks appearing on the negative, and thus on the prints were caused by static electricity affecting the emulsion when the piece of cut film was originally removed from its soft paper wrapping and loaded into a dark slide prior to exposure.
3. The suggestion that it was caused by some light source in the 1800-2000° Kelvin range is close - but the source (a static electrical discharge) was much higher in the Kelvin Scale nearer the blue light end, probably above 6,000° K.
4. Such static prior to exposure will show after subsequent exposure and ~~printing~~ development as a black image on the negative and a white one on the print. Close study of the attached print shows the white mark obliterates the railing on the building, that is, the mark existed before exposure, and had reduced the emulsion there prior to the major exposure.
5. For the photographer's benefit I would like to drop him an explanatory note, which may be additional to yours. Could I downgrade my reply to Restricted?

1. Forwarded herewith are photographs and a covering letter by A219252 Cpl NYIKA A.A. Photographer Base Squadron Darwin, received at this Headquarters.

2. It has been suggested that the objects appearing on the film may be reflections from the water tower in the left hand corner of the film.

Dear Bill,
DAFI can take the one out of their unsolved mystery about this is a good example of static electricity caused during loading of the film. When the film was being removed from the box it received a slight rubbing as it was being replaced in the box. The absence of a scratch mark on the negative is explainable by the fact that the rubbing was so slight the positive was near the solution when the emulsion was still. The objects at Darwin were near 2000 ft. to say the least. The objects were caused by static electricity or after exposure. In the case of the case it happened before.

Sir,

1. Whilst taking photographs for the Inter-Unit Photographic competition on the 24th December 1963 between 1635 hours and 1650 hours, I recorded on film some strange marks which I cannot identify or explain.
2. These objects were not visible to the naked eye as I was taking the photograph.
3. The camera, a Linhoff 5 x 5 Mod was and is fully serviceable.
4. An "A" Wratten No 25 (Red) Filter was used for contrast effect of the building storm.
5. Film Cut Royal Pan Professional 6.1/2 x 4.3/4 was used at an exposure setting of f/11 at 1/100 second with focussing slightly of the infinity mark.
6. Both negative and positive were processed under ideal conditions and neither were interfered with in any way.
7. I am not in the position to identify any of the objects on the photograph, however I estimate that an object moving very fast and reflecting extremely strong light in the 1800⁰ - 2000⁰ Kelvin range would record the same type of trace on a Panchromatic Emulsion.
8. My Section Commander Flt Lt PARRISH was notified immediately the negative was exposed.

SIGHTING OF UN-IDENTIFIED AIR OBJECTS

1. Attached is a report by Mr Paul ANTON giving his impressions of an aerial object sighted in the area of Beaumaris/Sandringham, Melbourne.
2. Mr ANTON's companions who witnessed the sighting have been asked to complete a questionnaire form in the interests of the RAAF, but so far have not done so.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer .. **PAUL H. ANTON.**
2. Address of Observer .. **441 KOOLONG RD. GARDENUAH.**
3. Occupation of Observer .. **GOODS CHECKER (VICTORIAN RAILWAYS)**
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
TUESDAY 26th NOVEMBER 1963. 9.20. PM.
5. Period of Observation(s) .. **(7) SEVEN MINS. 14-20 Hours**
6. Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
OVER THE SOUTH WESTERN COAST OF MELBOURNE. EASTERN.
OVER THE BEAUMARIS, SANDRINGHAM AREA.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
OVER HEAD. 35° ABOVE HORIZON.
8. What first attracted observer's attention, e.g. light or noise.
MOVING, NON BLINKING LIGHT.
9. Did object appear as a light or as a definite object.
AS A LIGHT AT FIRST BUT GRADUALLY BECAME DEFINITE.
10. If there was more than one object, how many were there, and what was their formation.
ONLY ONE.
11. What was the colour of the light or object **PINKISH. BROWN.**
12. What was its apparent shape **NO DEFINITE SHAPE.**
LOOKED LIKE A STAR. MOVING, SEEMINGLY SWAYING.
13. Was any detail of structure observable **NONE.**
14. Was any method of propulsion obvious **NONE.**
15. Was there any sound **NONE.**
16. ~~Height~~ Height, or angle of elevation **?**
17. ~~Speed~~ Speed, or angular velocity **?**
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
NONE.

Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

SIGHTING OF UN-IDENTIFIED AIR OBJECTS

Attached is a report on an aerial object observed by Mr L.K. ARCHIBALD at Moorabbin which he was unable to identify. The object was sighted on 19 Nov 63.

ml

(J.S. GOOCH)
Wing Commander
For Air Officer Commanding

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer ARCHIBALD. L.K.
2. Address of Observer 5 Cooma Street, Moorabbin.
3. Occupation of Observer PHOTOGRAPHER.
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
..... 1911402.
5. Period of Observation(s) 3 minutes.
6. Manner of Observation : (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
..... Naked eye.
.....
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
..... From west approached to elev. 45 and then head N.W.
8. What first attracted observer's attention, e.g. light or noise.
..... Noise - jet engine noise - deep rumble.
9. Did object appear as a light or as a definite object.
..... Light - bright orange.
10. If there was more than one object, how many were there, and what was their formation.
..... One.
11. What was the colour of the light or object Bright orange.
12. What was its apparent shape
.....
13. Was any detail of structure observable No
14. Was any method of propulsion obvious No
15. Was there any sound Jet engine noise.
- 16.** Height, or angle of elevation
- 17.** Speed, or angular velocity Approx. light aircraft speed.
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
..... Nil
- ** Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Cont'd)

19. Direction of flight with reference to landmarks or points of the compass.
..... Approached from west, made turn to head N.W. at 45° elev.
20. Did the object remain on a straight path, deviate or manoeuvre at all.
..... Straight - apart from turn described above.
21. Was any trail of exhaust, vapour or light seen Nil.
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
..... In mid air (?)
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
..... Nil.
24. Weather conditions experienced at time(s) or observation(s)
..... Calm. Vis 20. Five.
25. Location of any air traffic in the vicinity at the time of sighting.
..... Local fly at Moorabbin. Military jets operating from LAV.
VH-BAB ML-LT Dep. 1130 eta including 1 ILS at Melbourne.
..... CWS. 1153.
26. Location of any meteorological stations in the general area.
..... Melbourne.
27. Any additional information Mr. Archibald appeared vague in respect
..... of flight path and elevations on sighting. Mrs. Archibald also
..... sighted light.

Questions 25, 26 and 27 to be answered by interrogator.

Mr. Paul Norman
Staff Mess
PO Box 8
YALLOURN VICTORIA

Dear Sir,

- Police 34

1. In reply to your letter dated 9th November, 1963, I confirm that the RAAF is interested in unidentified flying objects, and all well-reported sightings are investigated. However, details of individual investigations have not been made public.

2. This Department has received no reports of the sighting near Wonthaggi, Victoria, to which the newspaper cuttings, forwarded with your letter, refer. It has not been possible, therefore, to carry out an investigation in this instance, and the cause for apparent interference on TV and electrical equipment, not previously noted in our records for Australian sightings, is not known.

Yours faithfully,

(A. B. McFarlane)
SECRETARY

DAFI

Dear Sir:

There is enclosed two news accounts of an Unidentified Flying Object near Wonthaggi, Victoria. Will you be kind enough to tell me if the RAAF is interested in investigation of these objects and if so, what is the reason or theory for the interference or effect on TV and electrical equipment.

Any information on the objects in general and this incident in particular will be appreciated.

Yours faithfully,
Paul Norman

If not delivered within 7 days, return to
DEPARTMENT OF AIR,

WHEN UFO'S ARE ABOUT

Radio and T.V. are the first things affected when an U.F.O. (unidentified flying object) is about. T.V. sets failed in a mile-wide radius when a U.F.O. appeared over South Dudley last month.

Here are some other instances, provided by the Victorian Flying Saucer Research Society:

A C-46 had engine trouble near Iwo Jima, and lost altitude when three U.F.O.'s passed nearby.

Ridgeway, Ontario, Canada: Car motor quit as U.F.O. crossed highway ahead of car.

St. Jean d'Asse, France: Car motor and headlights failed when U.F.O. in sky above road.

Forli, Italy: Conventional and diesel tractors driving side by side; conventional (ignition) failed, diesel did not.

Valera, Venezuela: Commercial airliner en route from Barquisimeto: radio went dead as pilot started to report U.F.O. sighting.

Washington D.C.: Airport ceiling lights went out as U.F.O. approached. U.F.O. caught in searchlight beam. Searchlight went out.

Tokyo, Japan: T.V.

interference while U.F.O. in sky.

Joinville, Brazil: Airline cabin lights dimmed and engine spluttered during U.F.O. sighting.

Ararangua, Brazil: A.D.F. (direction finder) right generator, and transmitter - receiver burnt during U.F.O. sighting.

Toronto, Ontario, Canada: T.V. interference. Viewers called out by neighbours to see U.F.O.

Orogrande, New Mexico: Car motors of 11 cars failed as U.F.O. passed low over highway. Motors restarted after U.F.O. left.

Ottawa, Canada: Battery radio and portable short wave radio failed as U.F.O. hovered below overcast sky. Radios worked normally after U.F.O. left.

Tamaroa, Illinois: Power failed for ten minutes in a four-mile area just after a U.F.O. hovered and flashed.

Mogi Mirim, Brazil: All city lights failed, as three U.F.O.'s passed overhead.

SOUTH DUDLEY'S "SAUCER"

THEY'RE SEEING THINGS AGAIN AT SOUTH DUDLEY, NEAR WONTHAGGI.

In January a silver object turned out to be the planet Venus.

But last Thursday night it was nothing short of a flying saucer.

It was first sighted by children in a playground at 6.45. They hurried home and told their parents. Soon half of South Dudley's 140 residents were watching an orange ball the size of a beach ball a mile away in the west. It made no sound.

Tom (Sos) Lymer, 45, P.M.G. linesman, says: "It was flashing on and off like an

aeroplane light. But it was many times bigger and brighter. It was also moving much slower than a plane. Suddenly flame shot out, and it travelled at a tremendous speed. We all lost it for a few moments. Then the kids picked it up in the south. It was hovering. I ran inside to the wife, and told her there was a flying saucer outside. She laughed at me. But when she came out and had a look she changed her mind."

Tom Ruby, 48, truck driver, of South Dudley, said that after hovering, and still flashing on and off brightly, the

strange object moved over the sea and disappeared.

DURING THE 25 MINUTES IT WAS ABOUT EVERY T.V. SET IN WONTHAGGI AND SOUTH DUDLEY BEHAVED CRAZILY.

Some screens went blank, others produced a double picture, others only lines, and some were just snowy.

Members of the Victorian Flying Saucer Research Society visited South Dudley on Sunday, and obtained detailed accounts from eye witnesses.

SAUCERS: THE MYSTERY OF THE CENTURY

Unidentified flying objects are the 20th century's greatest mystery. That is what astronomers, scientists, air pilots and service chiefs say.

Dr. Clyde W. Tombaugh, the astronomer who discovered the planet Pluto: "These things, which seem to be directed, are unlike any other phenomena I ever observed."

Dr. J. J. Kalizkewski, cosmic ray scientist on Navy project who, with other scientists, sighted cigar-shaped UFO's near Minneapolis: "They were strange and terrifically fast. I think the Government should set up a 24-hour alert with radar, telescopes, sky cameras and other instruments."

Capt. Richard Case, American Airlines, who with other pilots and thousands of people in Indianapolis, sighted a large UFO speeding over that city: "It was a controlled craft of some kind, going three times faster than we were."

Capt. Richard Adickes, TWA pilot who with crew and seven passen-

gers saw a glowing UFO pacing their plane near South Bend: "Before then I wasn't convinced by the saucer reports. Now I know they exist."

Capt. James Howard, British trans-Atlantic pilot with 265 crossings who, with crew and 12 passengers, saw a huge UFO and six small ones pacing their plane: "It must have been some weird form of spaceship from another world."

Professor Hermann Oberth, co-designer of the V-2 rocket, foremost authority on space travel plans: "It is my thesis that flying saucers come from other worlds outside our solar system."

"Metallic"

Flight-Lieutenant J. R. Salandin, RAF, whose Meteor jet almost collided head-on with a disc-shaped UFO in daylight: "The main body was like two saucers pressed together. It appeared metallic. The object was travelling at tremendous speed."

Frank Halstead, professional astronomer, curator of Darling Observatory in Duluth, Minnesota: "Many professional astronomers are convinced that the saucers are interplanetary machines. I believe they come from another solar system, but they may be using Mars as a base."

Rear-Admiral Delmar S. Fahrney, U.S.N., retired, known as "The father of guided missiles": "Reliable reports indicate that there are objects coming into our atmosphere at very high speeds. The way they change position in formation indicates that their motion is directed."

"Not hostile"

Col. Frank Mjlani, Director of Civil Defence in Baltimore, who has personally sighted UFO's: "It is a calculated risk to assume that the so-called saucers do not constitute a threat to the welfare and security of our citizens. We are given to believe that they are not hostile, but information on UFO's is classified."

Capt. W. B. Nash, Pan American Airways, who, with his co-pilot, saw a formation of six huge discs manoeuvre below their airliner in Virginia: "I believe the discs were intelligently controlled machines from outer space."

UNUSUAL SIGHTING - DARWIN
Your 5/2/1/Air (35) 22nd August, 1963

1. A copy of the newspaper extract from the Northern Territory News of 10th August, 1963, together with the sighting reports of unidentified objects seen over the Northern Territory during the night of 8th August, 1963, were forwarded to the Director of Mount Stromlo Observatory, CANBERRA for comment.
2. Attached is the reply received from Mount Stromlo. The reply suggests that Mount Stromlo believes that the sightings were connected with meteor showers which occur during this time of the year.

SIGHTINGS OVER NORTHERN TERRITORY - 580/1/1(31)

1. There are two major meteor showers in the period during which these sightings have occurred. I enclose copies of pages from Meteor Astronomy, by A.C.B. Lovell, Oxford, 1954, with details of the δ -Aquarids and the Perseids. As will be seen from the graphs of hourly rate, objects from both showers may be expected on the night of August 8. Precise observations of the point of origin in the sky of the meteors, called the radiant, would be needed to distinguish members of the two different swarms, one of which, as the name indicates, comes from a point in the constellation Aquarius, and the other from a point in Perseus. In addition to the shower meteors of known orbit, random or sporadic meteors may fall at any time.
2. The descriptions given are consistent with the appearance of bright meteors.
3. The reports of "swishing" noises are not unusual in connection with meteor observations. They are often reported by untrained observers, but are believed to be entirely subjective by astronomers. As the mean height for visible meteors is some 80 kilometres, no sound could propagate to the ground during the few seconds of visibility, with the exception of the usual explosion-like shock wave from large bodies which penetrate close to the Earth's surface at hypersonic speed. In meteor terms, a "large" body is the size of a small pebble.

XIV

THE MAJOR METEOR SHOWERS—II

THE PERMANENT STREAMS OF JULY AND AUGUST

AFTER the η -Aquarid shower in early May, the night-time activity remains very low until late July, the major events being concentrated in the day-time sky (Chapter XVIII). The period of late July and August is, however, one of the richest of the whole year, and contains two major showers (the δ -Aquarids and the Perseids) and a large number of streams of a minor character, some of which—such as the α -Capricornids, Cygnids, and Lacertids—are the best known and the most active of the minor streams.

1. The δ -Aquarid shower

(a) History

The δ -Aquarids attain a maximum about July 28. The shower has a low declination and is most readily observed in the southern hemisphere—it is, in fact, perhaps the most prominent of the showers visible in the southern hemisphere. In his records of ancient showers, Newton† lists two (A.D. 784 July 14 and A.D. 714 July 19) which correspond to the epoch of the δ -Aquarids (1850 July 29 and 1850 August 2 respectively) and which Olivier‡ considers to be notable past occurrences of this shower. Apart from this, there are no records of unusual occurrences of the shower during the period of its observation by trained observers since the second half of the nineteenth century.

(b) Activity

Plots of the hourly rate of the shower according to observations made by Denning§ in the northern hemisphere between 1869 and 1898, and by McIntosh|| in New Zealand between 1926 and 1933 are shown in Fig. 133. Both sets of observations agree in showing a rather rapid rise to maximum on July 28 followed by a slow decrease. Information on the shower has also been given by Hoffmeister,†† who, whilst agreeing with the general trend of the activity as shown in Fig. 133, places the maximum at $\odot = 130^\circ$ (August 3). In the accompanying diagram,†† however, the

† Newton, H. A., *Amer. J. Sci.* (II), 36 (1863), 145; 37 (1864), 378.

‡ Olivier, C. P., *Meteors*, ch. 5 (1925).

§ Denning, W. F., *Mem. Roy. Astr. Soc.* 53 (1899), 203.

|| McIntosh, R. A., *Mon. Not. Roy. Astr. Soc.* 94 (1934), 583.

†† Hoffmeister, C., *Meteorströme* (Weimar, 1948), ch. 9.

†† Hoffmeister, C., *ibid.*, ch. 9, fig. 29.

FIG. 133. The epoch of maximum of the δ -Aquarid shower.

—●—●— Denning 1869-98. —x—x— McIntosh 1926-33.

maximum is shown at $\odot = 122^\circ$ (July 26); hence it is not possible to attach any significance to this discrepancy. Moreover, the recent radio-echo observations† give data in agreement with the Denning-McIntosh results as follows:

Maximum	\odot	Hourly rate (see note in text)
1949 July 29	$125^\circ.8$	24
1950 July 28	$124^\circ.5$	38
1951 July 27	$123^\circ.4$	41

As regards the hourly rate given by the radio-echo observations, owing to the low declination of the radiant it was not possible to separate the δ -Aquarid stream from the appreciable sporadic background rate. Hence these figures include both the sporadic and δ -Aquarid rates, and are to be compared with the total rates given by McIntosh,‡ at the maximum, of 34 per hour. Lindblad§ has published details of some radio-echo observations of the δ -Aquarid shower made in 1950. He interprets the results as indicating a maximum on July 28-29 in agreement with the visual results, but he also finds evidence that a large number of very faint δ -Aquarids crossed the earth's orbit 3-5 days before the main stream. Lindblad attributes this separation to the Poynting-Robertson effect (see Chap. XX).

† Hawkins, G. S., and Almond, M., *Mon. Not. Roy. Astr. Soc.* **112** (1952), 219.

measurements and the McIntosh radiant. The various results are given in Table 93.

TABLE 93
Orbital Elements for the δ -Aquarid Meteor Stream

	Ω	π	ω	i	e	q	a	Velocity heliocentric
	deg.	deg.	deg.	deg.		a.u.	a.u.	km./sec.
McIntosh (1934 July 28) . . .	304.7	104.3	..	55.8	1.0	0.0393	..	assumed parabolic
Watson . . .	305	56	1.0	0.039	..	assumed parabolic
Hoffmeister (Aug. 3) . .	310.0	97.0	147.0	23.7	0.9264	0.118	1.5995	34.64
Lindblad (July 29) . .	305.6	..	152.2	28.4	0.956	0.080	1.807	35.4
Almond (July 28) . .	304.6 ± 1	101 ± 2	156 ± 2	24 ± 5	0.96 ± 0.2	0.06 ± 0.015	1.5 ± 0.6 -0.3	..
Comet 1948 n	233.0	..	143.8	13.25	0.809	0.558	2.922	..
1566 Icarus	87.777	..	39.875	23.02	0.82697	0.187	1.0784	..

The orbits given by Lindblad and Miss Almond are very similar, and since they are based on actual velocity measurements they must be regarded as significant. The errors given in Table 93 for Miss Almond's orbit indicate the effects of the spread in the measured velocity. The mean orbit, projected on to the plane of the ecliptic, is shown in Fig. 135. This orbit is very similar to that of a prominent day-time stream—the Arietids—and the relationship between the two will be discussed in Chapter XVIII. On account of the very elliptical nature of the orbit, there are few bodies in the solar system with which the stream is likely to be associated. Rigollet† suggested that the shower might be associated with Comet 1948 n which has a markedly elliptical orbit, but the closest approach is 0.22 a.u. and the association does not seem plausible. Rigollet‡ has also suggested that the stream may be associated with the minor planet 1566 Icarus discovered on 1949 June 26 by Baade. The orbital elements for the comet and for Baade's object are tabulated in Table 93 and also shown in Fig. 135 for comparison with the δ -Aquarid orbit.

2. The Perseid shower

(a) History

The Perseid meteor shower is one of the most regular visible meteoric events, yielding hourly rates of about 50 over the period of maximum

† Rigollet, R., *Ann. d'Astrophys.* **14** (1951), no. 2.

‡ Rigollet, R., *Documentation des Obs. Inst. d'Astrophys.* **6** (Paris, 1952).

FIG. 135. The orbit of the δ -Aquarid stream, computed from the radio-echo observations by Miss Almond. The orbits of comet 1948 n and of Baude's object 1596 lepus are shown for comparison. Projection is on the plane of the ecliptic.

from August 10–13 each year. It also extends for a considerable time on either side of the maximum with reduced hourly rates. The history of the shower, which can be traced back for over 1,200 years, has been described by Olivier.[†] The existence of the regular display in August

[†] Olivier, C. P., *Meteors*, ch. 5.

was first recognized in the period 1830-40 by Quételet, Herrick, and others, since when the shower has been observed systematically. The shower is particularly noteworthy because the computation of its orbit by Schiaparelli† between 1864 and 1866 led to the establishment of the connexion between it and Comet 1862 III, this being the first occasion on which any plausible relation was established between meteors and other celestial objects.

FIG. 136. Epoch of maximum of the Perseid meteor shower.
 -●-●- Observations by Denning, 1869-98. -○-○- Observations by Öpik, 1921.
 (The ordinates of Öpik's hourly numbers have been reduced by 3 for ease of comparison, see footnote to Table 94.) -△-△- Radio-echo observations, 1950.
 -□-□- Visual observations, 1944-7.

(b) Activity

One of the most complete investigations of the Perseid shower was made by Denning‡ during the years 1869-98. Between the dates of July 11 and August 19 he observed 6,479 meteors, 2,409 of which he identified as members of the Perseid stream, with hourly rates as shown in Fig. 136. The motion of the radiant point during this period will be referred to in (c). Subsequent observations have confirmed the general shape of the epoch of maximum as given by Denning. For example, Fig. 136 also gives the results of Öpik's§ observations made in Esthonia in

† Schiaparelli, G. V., *Sternschnuppen*.

UNUSUAL SIGHTINGS OVER NORTHERN TERRITORY

1. Attached is a newspaper extract from the Northern Territory News of 10th August, 1963, together sighting reports of unidentified objects seen over the Northern Territory during the night of 8th August, 1963.
2. A similar series of sightings were reported from this area about the same time in 1961. The explanation given to these 1961 sightings is stated in the last two paragraphs of the newspaper extract. It is thought that this explanation is also valid for the sightings this month, but this Department would be pleased to receive any further comments you may be able to offer.

UNUSUAL SIGHTING - DARWIN

1. Enclosed is a report on sightings of unidentified objects seen over the NORTHERN TERRITORY during the night of 8th August 1963.
2. A similar series of sightings were reported about the same time in 1961. The explanation for these was that they were a shower of AQUARIDS known to bombard the earth at particular times.
3. A copy of a paper on this subject is enclosed as is a copy of Darwin's original report which was apparently not forwarded at the time.
4. Your opinion as to the reason for the present phenomenon would be appreciated.

UNUSUAL SIGHTING - DARWIN - 8th AUGUST 1963
Our A015 9th August 1963
Your A1350 13th August 1963

1. Further investigations have been carried out into the numerous reports of an unidentified flying object seen over a wide area of the Northern Territory on the night of 8th August 1963 at approximately 2000 hours.
2. Attached as appendices are a list of persons from Darwin and surrounds who claim to have seen the occurrence, an extract from the Northern Territory News and copies of individual reports and a copy of the DCA Log.
3. It is evident to the writer, who conducted interviews with most of the viewers, that all claim to have witnessed the same phenomenon. All seem to agree on the general shape, brilliance, ~~TRAIL~~ affect and altitude of the object.
4. Neither No 2 CARU or Met radar were working at the time.
5. There was no known civil or military aircraft movement in the area at the time.
6. It is requested that if any explanation of the phenomenon can be offered for release to the public, then this Headquarters be notified accordingly.

EXTRACT FROM THE NORTHERN TERRITORY NEWS DATED 10th AUGUST 1963

"Meteors or Martians? Mysterious Lights Startled Darwin. Mysterious lights and an object in the sky startled dozens of Darwin people on Thursday night.

Sightings were made between 8.15 and 8.45 pm. People told of seeing 'reddish' or 'greenish' lights and a 'silvery object' which went overhead with a swishing noise. The RAAF said the lights were a 'meteor shower'.

But in Hobart convenor of the Unidentified Flying Objects Panel (Dr G.R. BREEKHURST) said 'We are not satisfied with the official explanation. We think there is more to it than a meteorite shower and we are studying reports from our Darwin observers'. "There is more in this than meets the eye. Similar sightings have been made recently in other parts of the world. All refer to the 'swishing noise'.

Reports poured into the News Office, the RAAF and the Meteorological Bureau on Thursday night and yesterday morning of the sightings of the lights in the sky over the lights in the sky afield.

One of the first reports came from a group of six people sitting on the verandah of the Darwin Golf Club. They were Mr and Mrs Eric Ford and Messrs Lionel Dennis, Ron Snowden, Tom Wise and Wally Dalton.

Over Harbour. About 8.15pm they saw a bright light crossing the sky from the general direction of West Point towards Fannie Bay beach. It remained visible for about ten or twelve seconds and was at a height of about twenty degrees from the horizon. Mrs Ford said that it looked like a comet but was reddish in colour, it moved slowly and as it crossed the shoreline it disappeared as if the light had gone out.

At Douglas Street Fannie Bay about the same time, eight year old Rhonda Hann drew the attention of her mother and a friend to the object. They described it as a silvery-black, at first changing to orange red and then to a bright green.

Sausage shape. It was at a height of about 40 degrees from the horizon and as it passed overhead they heard a loud swishing noise and the object disappeared.

These people went to a nearby public telephone to report the sighting and about 20 minutes later a neighbour, Mrs Wise, whose husband has seen the object from the Golf Club saw a similar light but travelling in the opposite direction.

She said that it was like two lights, one behind the other and shaped like a sausage. The lights glowed like oranges and disappeared behind a next door house.

From Noonamah, Mr Snowy Best also reported a sighting and a swishing noise as the object went overhead. Other reports came from nurses at the hospital and from Arafura hostel.

The RAAF received reports from Adelaide River and from Batchelor, some of them told of an explosion. A RAAF spokesman said that similar sightings were reported in Darwin about this time last year and the Air Force had sent details of the reports south. In reply they received a note which referred to 'an annually recurring shower of meteorites'. The shower usually occurred about 29th July or a little later, and was sometimes followed one or two nights later by another.

It appeared as if these showers had been occurring each year since about 1957. The report mentioned that the usual effect of the entry of a meteorite into the earth's atmosphere was an explosion."

APPENDIX B TO
BS/5/6/Air(81)
DATED 15 AUG 63

REPORT RECEIVED FROM MR ERIC BATTERN
DCA METEOROLOGICAL OFFICER DARWIN

On the night of the 8th August 1963 at approximately 2020 hours whilst sitting at my home in Parap I observed a very bright object appear over my house travelling in a North to South direction.

It was about the size and shape of a rugby football, with a tail effect about twice the length of the main cone. The centre glowed brightly and the trail emitted a bluish light.

It did not disappear over the horizon but faded out like a Magnesium flare.

It appeared to me to be at a height of approximately 15-20,000 feet.

APPENDIX C TO
BS/5/6/Air(81)
DATED 15 AUG 63

30 E

REPORT RECEIVED FROM MRS WALLENT
SECRETARY WONSONS ELECTRICS

Time - 2015 hours (approx)
Place - Nightcliffe
Direction of travel - North to South
Length of sighting - About 5 seconds

8 Aug

Description

A round Ball, bright yellow in the centre with the trail having a reddish tinge, the main body having a shape and size roughly like a carving plate. Disappeared behind some trees.

REPORT RECEIVED FROM MR L. DENNIS MANAGER WONSONS ELECTRICS DARWIN

Substantially the same as the report from Mr Batter.

Time 2030 Hours (approx)

Position Golf Club

Direction of travel North to south

Length/sighting 12 to 15 seconds

Description It was very fast and very high, about half the height of a high flying aircraft. Glowed bluish white in the centre with the tail deepening to an orange colour. Fizzled out like a rocket.

Other people present at the time and also saw the object:-

Mr Tom WISE
Mr Ron SNOWDEN
Mr Eric FORD

APPENDIX E TO
BS/5/6/Air(81)
DATED 15 AUG 63

EXTRACTS FROM DCA OPERATIONS CONTROL JOURNAL

081105Z
~~081105Z~~

Report received from Miss Olive ROBERTS/Mrs YANN; five people saw object - orange vivid yellow in colour making swishing noise travelling north to south, 8.10pm in sight for about 30 seconds from Arafura Hostel.

1105Z

Wg Cdr BROWNE received two reports of objects white and blue giving light in Manton Dam area - no noise before a crumbling rumbling explosion. Had been in sight for about 10 seconds before explosion (Mrs BEST Noonamah).

1110Z

Report received by Met. Object from SSW then faded out Adelaide River area.

1125Z

Report from Golf Club - 8 men saw object 12 seconds over Fannie Bay travelling North to South. L. DIENNIS report to police.

1125Z

Police informed of reports and that no aircraft were in area.

1130Z

Golf Club reported object travelling north/south across Fannie Bay bright light in sight 12 to 15 seconds. No noise heard. Approximately angle of elevation 27° decreasing to about 30° until it disappeared from sight.

1135Z

Eric BATTEN of Met Office reported that approximately 1135Z a bright light, impression of an oval centre of light also with a meteor like tail travelling north to south, nil deviation over top. Duration of about 5 seconds. Appeared to be about similar to a Very Fare.

ENCL 2

FEC

30H

UNUSUAL SIGHTINGS - DARWIN AREA

1. The brighter heavenly ~~are~~ bodies ^{are} as follows:-

VENUS	Magnitude	-	3.4
JUPITER	Magnitude	-	1.8
SIRIUS	Magnitude	-	1.6

2. In comparison, numerous sporadic meteors are swept into the earth's path daily.

Approx 10,000 are magnitude - 5 (four times brighter than VENUS)
Approx 1,000 are magnitude - $7\frac{1}{2}$
Approx 100 are magnitude - 10
Approx 10 are magnitude - $12\frac{1}{2}$ (Equal to FULL MOON).

3. Careful investigation of meteors throughout 24 hour periods began only in 1947, and the hourly rates of occurrence have now been found to be surprisingly high. Extensive increases are known to occur regularly in May, June and July, when the count may rise from 2-4 per hour, to 50 plus per hour at an observing station.

3. An annual recurring shower called AQUARIDS occurs on July 28 approx, which has a mean hourly rate of occurrence of 10. An associated shower, AURIGIDS, with a rate of 20 per hour, sometimes occur on July 25 approx.

4. As electrical ionisation, and its complementary incandescence takes place at a height of about 60 miles, and as any particle larger than .006 inches can create ionisation, the 10 billion particles per day are certain to produce ~~the~~ large particles which are known to persist for periods of 20-30 seconds.

5. Although sporadic meteors collide with our atmosphere at all angles, their ionised columns tend to take East-west directions, because of the Earth's direction of travel through space. Also, as ionisation takes place at a height of about 60 miles, visual observation of such occurrences is to be expected within a radius of about 400-600 miles of the point of entry.

6. It would be instructive to check the dates of UFO reports with the dates of these known major meteor showers. Daytime reports of UFO's would be expected to coincide with such visitations as PERSEIDS June 3, 40/hr, ARIETIDS June 8, 60/hr, and PERSEIDS June 25, 50/hr. On July 12 or thereabouts UFO reports may show an increase, as at that period, the ORIONIDS and the GEMINIDS can produce an hourly count of 142. Night time rates of arrival are recorded as QUADRANTIDS Jan 3, 55/hrly; PERSEIDS Aug 10-14, 50/hrly; AND GEMINIDS Dec 13-14, 60/Hrly.

7. The arrival of meteors on earth, is generally accompanied by a loud noise, and sometimes by explosions. Consequently reports of this phenomena are not unduly significant. ✓

UNCLASSIFIED

~~SECRET~~

UNCLASSIFIED

- 2 -

8. It is unfortunate that the present reports are incomplete, and perhaps there should be a debriefing pro-formae available to ensure that proper assessment can be made. Accurate details of time, quadrant, elevation, shape and colour are essential for evaluation. In the absence of these, I consider the present report refers to 2 AQUARIDS, one at Pt Keats, the other near TENNANT CREEK.

PERRITH 1W NSW

UNUSUAL SIGHTING - DARWIN 27TH JULY, 1961
Our A422 28th July, 1961 and A423 29th July, 1961

1. Further investigations has been carried out into the numerous reports of an unidentified flying object seen over a wide area of the Northern Territory on the night of 27th July, 1961 at approximately 2000 hours.
2. Attached as appendices are the copies of individual reports showing, where applicable, diagrammatic representation of the impressions gained by observers.
3. It will be noted that in the main diagrams made by observers are consistent. All observers seem to agree on the general shape, brilliance, size, trail effect, speed and apparent low altitudes of the object. Many of the observers claim to have made previous observations of satellite movements.
3. A satellite has been moving S to NE over Darwin each evening between 1800 and 2200 hours since approximately 25th July, 1961. Many observers when questioned about the comparison between the phenomenon of the 27th and the recurring satellite state categorically that there is no comparison in size, height or brilliance. The recurring satellite is described in Appendix "A" attached.
5. As most observers report the object as moving from West to East it was initially thought that the object must have been a satellite of considerable size and brilliance with an orbit very close to the earth. This would explain the general West-East movement as seen from Wyndham, Darwin and as far South as Alice Springs. However, the obvious speed of the object and the time variation between observations make this answer unlikely. Listed below are the reported times at major areas :-

(a)	Wyndham	2000 Central Standard Time (TD)			
(b)	Port Keats	1950	"	"	"
(c)	Darwin	1953	"	"	"
(d)	Tennant Creek	2005	"	"	"
(e)	Alice Springs	2015	"	"	"
(f)	Wenarah Station	2040	"	"	"

Note: The only time listed above which cannot be confirmed or fixed as reliable is that stated at Wyndham, ie 2000 hours.

6. Co-ordinates of reporting centres are as follows :-

(a)	Top Springs	16 36S 131 53E
(b)	Port Keats	14 14S 129 32E
(c)	Wave Hill	17 26S 130 53E
(d)	Wenarah	19 54S 136 21E

UNCLASSIFIED

Memo

UNCLASSIFIED

(e) Kalumburu	14 18S 126 37E
(f) Yuendumu	22 16S 131 47E
(g) Mainoru	13 09S 134 06E

6. Many observers were closely questioned regarding any possible noise, but all those questioned were quite adamant that they heard no noise at all. The only reference to noise is contained in Appendixes "H" and "P".

7. Attached as Appendix "B" is a newspaper account as appeared in the Northern Territory News on Saturday 29th July, 1961.

8. Neither No. 2 Control and Reporting Unit nor Meteorological radar was working at the time.

9. The only aircraft movement was the arrival of RAAF Hercules at Darwin which was in circuit at the time the object was sighted. Three of the groups of observers were watching the Hercules making its approach when the object appeared. There is therefore no possibility of confusion between aircraft movements. No other civil or military traffic were in areas from which reports were received at the time observations were made.

10. It is significant that several of the observers are very experienced in the aviation field. This applies particularly to Mr Muir a qualified pilot and aircraft engineer who has operated his own air service in the Territory for many years.

11. An intense amount of interest has been aroused as a result of radio and newspaper reports, and it is requested that if any explanation of the phenomenon can be offered for release to the public that this Headquarters be notified accordingly. It is believed that official explanations of unusual sightings helps maintain public confidence in the RAAF and is reassuring evidence that the effort of making reports is worthwhile.

EXTRACTS FROM THE NORTHERN TERRITORY NEWS
DATED SATURDAY, JULY 29, 1961

30L

SPACE SHIP SEEN IN NT SKIES?

Many people are convinced they saw a "flying saucer" or new type of rocket-propelled aircraft over Darwin and other parts of the Territory on Thursday night.

The strange "space ship" glowing bluish and with a flaming white tail hurtled across the sky from the west at terrific speed, then turned south.

RAAF officers here confirmed late last night, that they were still checking reports but were unable to give an explanation.

After questioning a dozen or more people who sighted "the saucer" this is the account of what was seen between 7.55 and 8.40 p.m. on Thursday night.

A saucer-shaped glowing object appeared from a westerly or north-westerly direction over Darwin Harbour at about 7.55.

It glowed with a blueish light. A brilliant white tail flashed from the trailing end.

The saucer appeared to be flying at only about 1000 to 2000 feet.

'BUZZED' TRAIN

It moved in a wide circle across the harbour then moved in southwards.

A few minutes later the "saucer" practically "buzzed" a train travelling north from Larrimah to Darwin at the 285 mile.

Diesel train driver Doug Clarke said he suddenly caught sight of "a big ball of fire" coming in towards the train from behind them.

The train was travelling west at the time and Mr Clarke believes the "saucer" was moving in a northerly direction.

He shouted to his fireman George Fomin.

"It gave us quite a turn" Clarke said.

Fomin estimated the object's height at only about 1000 feet.

"NOT A COMET"

It appeared to be heading straight for the train at one stage.

"I've never seen anything like it, Clarke said. "I don't believe it was a comet. I don't know what it was".

Pretty Emma Parker of the Esplanade, Darwin, was among a group of people who saw the "saucer" when it appeared.

"We were all at the wharf when it appeared", Miss Parker said. "It was a big thing and travelling very fast with a long tail", she added.

Miss Parker's mother said she saw what looked to be windows or "panels" in the object.

~~SECRET~~
UNCLASSIFIED

~~SECRET~~
-2-

UNCLASSIFIED

She thought it was coming in "quite low".

Mr and Mrs Zdenek Hestalek also saw the "saucer" from the wharf.

"We watched it for probably thirty seconds", Mr Hestalak said, "and I believe it was manually controlled by the path it took".

Experienced Territory airman Doug Muir and Mr Lou deCoursey were among others who watched the strange object fly across Darwin.

Only ten minutes later it was seen over Tennant Creek.

INCREDIBLY FAST

Mr and Mrs Lou Pilgrim saw it from their home and Messrs Bruce Burton and Alan Murray spotted it while driving into Tennant Creek along the Peko road.

It is reported to have passed directly over the town at an incredibly fast speed about 8 p/m/ moving from west to east.

Mr Pilgrim who is employed by TAA, estimated the objects height over Tennant Creek as about 12,000 feet.

Then the "saucer" was sighted at Wonarah telegraph station 100 miles east of Tennant Creek on the Barkly Highway.

It then moved in a wide arc and headed towards the north-east.

The mystery deepened when Rev. Cozier of the United Church in Tennant Creek reported that native children at Warrabri Welfare settlement 180 miles south of Tennant had seen a similar object the previous night.

Authorities here are considering an idea the saucer was a new type of manned aircraft that actually circled Darwin at terrific speed and toured the skies around the Territories.

A number of people were on the watch for the object again tonight.

Reports received by the RAAF are being linked and logged. A full report will go to the Department of Air.

A11464 SGT MURPHY

On the night of 27th July, 1961 at approx 1950 hours whilst standing on the tarmac adjacent to the refuelling pipe I observed a very bright object appear from the north-west heading in a Southerly direction, veering slightly south-south east as it progressed past.

It appeared about 2 feet long and slightly oval in shape with the rear portion not completed. It glowed brilliantly being white around the front thence to a light blue - then amber blue then merging to a blue red with a streaking intermittent tail at the top of the rear.

I estimate the height at about 1000-1500 high and a speed of 150 mph. The distance the object appeared from me was about 1000 yards.

Other observers with me were :-

APPENDIX "D" TO
BS/5/6/Air (66A)

UNITED CHURCH IN NORTH AUSTRALIA

REPORT RELATED TO SIGHTING OF BRIGHTLY LIT OBJECT SEEN ON 27TH JULY 1961

To Whom it may Concern

C/- Australian Broadcasting Commission
Darwin.

Dear Sir,

Along with other people in Tennant Creek, I observed the movement of the brightly lit object travelling rapidly across the night sky.

At approximately 7.54 p.m. last night, I left the house to attend a meeting at 8 pm. Almost at the instant of walking outside, I noticed a large brightly shining object rising rapidly over the signal station hill to the west of the town. This was in the vicinity of the Tennant Creek airport. At first I thought it was an aircraft with its landing lights turned on. But then I realised that there was no sound, and the speed too great.

The object moved rapidly towards the east, following what would appear to be the take-off path of the west to East runway at the airport, but the speed was too great and the trajectory did not tally with the normal path of aircraft using the runway described.

As the object approached, it appeared to be much more intense in its light glow, and intermittently, short trails of sparks appeared to follow behind it. Soon after reaching its zenith, its brilliance began to fade rapidly. But dull intermittent spark trails were noted at this point. It faded completely in the vicinity of 10 o'clock high as indicated in attached diagrams.

At the time of viewing, I was standing near the corner of the car shed, and could make position comparisons in relation to that structure as it appeared against the sky line. The rising of the object could also be pinpointed by the rock formations over which it came.

Thus, today, I have taken approximate compass bearings, and estimated degrees of trajectory by use of a protractor. The noted bearings and degrees are as follows :-

1. Approx. rising point was a compass bearing of approx 284-5 degree.
2. Approx zenith of trajectory was 55 - 60 degrees.
3. The object moved west to east
rising at approx 7.55 pm and fading within approx 30 to 40 seconds at the point of fade.

My immediate reaction was to note the times, as I thought that it could be a satellite re-entering the upper atmosphere. I trust that this information will be of help.

Perhaps you may wish some check to be made on my readings etc. If so I would be pleased to assist. My estimates etc. were made on the basis of my position at the time and on the relationship of the object to fixed landmarks within the field of vision.

Yours faithfully,

(R. COSIER)

PS A satellite was seen by native children at Warrabri Reserve on Wednesday Night at approx 7.30 pm while I was speaking to them.

Then again tonight (Fri) my wife and I observed a satellite travelling from south west to north west at about 8.20 pm. It remained in view for about 10-15 minutes. It was obviously very high and appeared as a star of medium brilliance.

Perhaps the phenomena of last night was this same satellite on a much clearer strjectory and nearer course.

REPORT BY A PARTY WHICH SIGHTED OBJECT IN DARWIN AREA

PARTY INCLUDED Mrs and Mrs Parker
Mr and Mrs Hostalick

Party interviewed by Intelligence Officer.

Object described as very bright white object with long trail. Trail colour ranged from yellow near object and orange at the end. The main structure of object appeared to have a bluish tinge. The effect was similar to the flame of oxy-acetylene. The object appeared to come straight toward the party then veered to the right. It appeared to be losing height and the party thought it would attempt to land on the water of Darwin Harbour. The object continued to move off in an arc and began to rise rapidly before disappearing.

Diagram as made by Mr Hostalick and approved by the remainder of the party is shown below.

APPENDIX "P" TO
BS/5/6/ALr (66A)

REPORT FROM PORT KEATS MISSION

At 271020Z object appeared from bearing 300 degree and dissappeared toward bearing 130°. Object sighted by 300 natives and all mission staff including two priests, four brothers, and four nuns. Mission staff initially reported that object sighting was accompanied by loud noise which frightened natives.

Intelligence Officer interviewed mission staff at Port Keats on Saturday 29th July. Priest in charge stated that the object appeared as a bright star on the horizon at first then as it came closer it became larger and brighter and was clearly visible overhead, before fading again as it dissappeared/ The objects was visible for approx one minute from horizon to horizon. Mission staff do not place much reliance in the statement by natives that a loud noise was heard but consider that they were frightened by the strange sight and imaginations did the rest. Some elderly natives were asked if they had seen anything like it before and replied negatively.

The senior nun at Port Keats mission reported that a satellite had moved across the sky from SW to NE some fifteen minutes after the first sighting.

UNIDENTIFIED FLYING OBJECTSSecretary

In answer to Senator CAVANAGH's question on 21st August, 1963, Folio 6 refers, whether the dossier of investigations on reported sightings of unidentified flying objects could be made available to interested organizations or individuals, the following is suggested:-

"All well reported cases of unidentified flying objects are investigated and only about 3 or 4% cannot be explained on the basis of some natural phenomenon. However, such investigations often necessitate reference to classified sources and the conclusions reached often express views which are of a confidential nature. You will realize therefore, that the dossiers must themselves be classified documents and for this reason, I regret that they cannot be made available to the general public."

UN-IDENTIFIED FLYING OBJECT

DAFI.

1. Mr B.W. ASHCROFT of Warragul reported by phone to RAAF Base East Sale that, whilst working on a hill near Warragul on 25th July at approximately 1930 hours, he witnessed a flying object which he was unable to identify.

2. Mr ASHCROFT has been asked to write details of his impressions of the object in the interest of the Air Force, and a completed questionnaire paper is attached.

RECEIVED

COMMONWEALTH OF AUSTRALIA

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer ... B. W. Ashcroft
2. Address of Observer ... 30 Queen St. Wanganui. Vic.
3. Occupation of Observer ... Postal Officer
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
... 25 July approx 9.30 am
5. Period of Observation(s) ... approx 20 seconds
6. Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
.....
.....
.....
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
... hovering overhead
8. What first attracted observer's attention, e.g. light or noise.
... noise, similar to ~~that~~ of jet aircraft
9. Did object appear as a light or as a definite object.
... object
10. If there was more than one object, how many were there, and what was their formation.
... one single object
11. What was the colour of the light or object ... light shade of grey
12. What was its apparent shape ... circular
13. Was any detail of structure observable ... yes
- ... The upper section of object appeared to have a smaller diameter
14. Was any method of propulsion obvious ... no
15. Was there any sound ... yes
16. ~~Alt~~ Height, or angle of elevation ... approx 400 ft
17. ~~Alt~~ Speed, or angular velocity ... disappeared out of sight in approx 10 sec
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
.....

~~Alt~~ Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Contd.)

19. Direction of flight with reference to landmarks or points of the compass.
.....
20. Did the object remain on a straight path, deviate or manoeuvre at all.
.....
21. Was any trail of exhaust, vapour or light seen *no*
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
..... *Mid. air*
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
..... *no*
24. Weather conditions experienced at time(s) or observation(s)
~~cold air~~, cold, light fog ascending
25. Location of any air traffic in the vicinity at the time of sighting. A check by HQ Support Command reveals no air traffic in vicinity at that time. The nearest point of operating aircraft being between East Sale and Eildon Victoria from 0830 to 1000 hours that morning.
.....
26. Location of any meteorological stations in the general area.
..... *MELBOURNE AND SALE*
27. Any additional information *The upper part of the object appeared to be revolving. While the object was in sight, the air was unusually warm.*

Questions 25, 26 and 27 to be answered by interrogator.

MELBOURNE VIC

19 AUG 1963

Dear Madam,

1. I refer to your letter in which you reported sighting some form of celestial phenomenon on, or about 1st July, 1963.

2. The details of your sighting were forwarded to the Director, Mount Stromlo Observatory who has replied to this Department as follows:-

"This observatory has no definite information on the object sighted on or about July 1.

Most objects sighted are meteorites, which may appear to move in any direction in any part of the sky, the visible path being, of course, merely a projection of their true three-dimensional motion against the celestial sphere. Explosion and fragmentation of meteors is a common phenomenon, recent research having shown that most meteors are composed of relatively fragile materials. Many meteors leave luminous trails behind them, consisting largely of ionized atoms of atmospheric origin. A very bright meteor may result from an object having a mass of only a few grams."

3. It would appear, therefore, that your sighting was of the explosion and fragmentation of a meteor.

Yours faithfully,

WJH

SIGHTING OF UNUSUAL AERIAL OBJECTS

1. Attached is a report of the sighting of an unusual aerial object at DELORAINIE TASMANIA on 19th July 1963.
2. The report was received from the Department of Civil Aviation MELBOURNE and is forwarded for information.

NAF

(J.S. GOOCH)
Wing Commander
For Air Officer Commanding

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer..... MT. B. KIRKMAN & MR. D. RICHMOND.
2. Address of Observer..... C/- H.E.C. DELORAINE.
3. Occupation of Observers..... H.E.C. LINESMEN.
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
192100/K.
5. Period of Observation (s) 7-8 seconds approx. Max. 12 secs.
6. Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
REEDY MARSH. 5-6E OF DELORAINE.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
STATIONARY OVER TIMBERED HILL NORTH OF OBSERVER INITIALLY THEN MOVED EASTERLY.
8. What first attracted observer's attention e.g. light or noise.
NO SOUND - LIGHT SEEN.
9. Did object appear as a light or as a definite object.
APPEARED AS RED LIGHT STEADY LIKE OBSTRUCTION - V/BRIGHT.
10. If there was more than one object, how many were there, and what was their formation.
ONE.
11. What was the colour of the light or object..... RED.
12. What was its apparent shape..... BRIGHT STAR.
13. Was any detail of structure observable..... NO.
14. Was any method of propulsion obvious..... NO.
15. Was there any sound..... NO.
16. Height, or angle of elevation..... APPROX. 30°.
17. Speed, or angular velocity..... SLOW AT FIRST THEN V/FAST.
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
CHILD IN ENGLAND DURING AIR RAIDS - USED TO HEAVENLY INSPECTION.

Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Contd.)

19. Direction of flight with reference to landmarks or points of the compass.

APPROX. DIRECTION OF BIRRALEE.

20. Did the object remain on a straight path, deviate or manoeuvre at all.

SLIGHT WEAVING COURSE LIKE SATELITE.

21. Was any trail of exhaust, vapour or light seen.....

22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.

MID AIR.

23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.

NO.

24. Weather conditions experienced at time (s) or observation (s)

VERY CLEAR, STARRY, (CLOUDED OVER ABOUT ONE HOUR AFTER SIGHTING).

25. Location of any air traffic in the vicinity at the time of sighting.

NO AIRCRAFT HEARD BEFORE/DURING/AFTER SIGHTING.

26. Location of any meteorological stations in the general area.

27. Any additional information. OBSERVERS WERE ON SHOOTING EXPEDITION.

Questions 25, 26 and 27 to be answered by interrogator.

~~Att. Encl.~~ Canberra RA
OR (mgs)
22/7

RAAF

Space research Dept.

after reading your article of flying saucers in Melb Herald 17-7-63, I feel you may be able to identify what I saw in the sky on approx July 1st (could be a day either way, but no more) at 8.35 p.m.

I was hanging washing on the line when something made me look upwards, and I witnessed an awe-inspiring sight.

The sky was about 50% cloudless and a long way up there appeared a terrific explosion of stars, thousands scattering over a large area, then a great bright light shot upwards from the center and left a wide trail behind. It lasted no more than three seconds, and my first impression

was a huge falling star and I came in to take a time check.

Then I realised stars do not fall upwards, and I don't know whether comets behave this way.

Next day I rang the "Herald" and they could tell me nothing, then the meteorology dept, who gave me a number to ring which turned out to be the Space Research Society. They invited me to attend their annual meeting but I was unable to go.

I wish you could tell me what it may have been as it was magnificent. The Army told me they never experiment over Melbourne.

yours sincerely

CLOSER LOOK AT SAUCER REPORTS

who
te?

ADELAIDE, Wednesday. — There were too many recent reports of unidentified flying objects to discount them, Mr. Colin Norris said today.

Mr. Norris is vice-president of the Flying Saucer Research Society.

Mr. Norris said that he and other people had been afraid of being called

crackpots for reporting flying saucers.

But at least 12 separate reports of unidentified flying objects had come in this year describing six

different types of object.

"There are far too many sightings on record recently for anyone to dismiss them lightly," he said.

The descriptions include oval shapes glowing with red and green lights, teardrops rising and falling near the ground; round, flashing lights in the sky; cigar-shaped objects hovering and the now frequently reported saucer shape like a flattened bell

CASH PURCHASE OR TAKE OVER

An internationally established group of Companies is interested in acquiring a N.S.W. Manufacturing Organisation.

Preference will be given to an engineering company with some products suitable for export . . . with present turnover in excess of £50,000 . . . in an A class area suitable for general expansion.

Enquiries strictly confidential.

Telephone Mr. Brown — 61.4197
for appointment.

Space balls

There have been many reports in South Australia of unidentified flying objects.

At least three unidentified "balls from space" ranging from 5 oz. to two balls 14in. in diameter, have been found on outback properties in the north.

Mr. Norris said he was expecting a call today from a man in Willaston, S.A., who said yesterday that he had seen a bright red object across a road-way in the small township of Sandy Creek.

Mr. Norris said: "By all accounts this man is a reasonable, responsible citizen."

"For him to be frightened to the extent of trembling and shaking indicates that what he saw was no figment of the imagination."

REPORT ON UNUSUAL AERIAL OBJECT

Attached is a report by Mr R.J. BUSBRIDGE who
observed an unusual aerial object at night on 19th May 1963 near
Mount Gambier.

Fol

W.T. TAYLOR)

Wing Commander

For Air Officer Commanding

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer *Robert John Burbridge*
2. Address of Observer *11 S. Leyford Street, Mt. Gambier*
3. Occupation of Observer *Law Doctor*
4. Date and Time of Observation (Time given in 24 hour clock zonal time) *Sunday 19th May 1963 (Approx 2130 hrs) 9.30*
5. Period of Observation(s) *1-1 1/2 minutes*
6. Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
On the side of the road about 1-1 1/2 miles from Biggins on the Old Grange road.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
On the side of the road.
8. What first attracted observer's attention, e.g. light or noise.
9. Did object appear as a light or as a definite object.
As a light
10. If there was more than one object, how many were there, and what was their formation.
There was one object.
11. What was the colour of the light or object *Bright Red-White*
12. What was its apparent shape *Like a Bull Dog*
13. Was any detail of structure observable *There could have been but I didn't take that much notice*
14. Was any method of propulsion obvious *No*
15. Was there any sound *No*
16. ~~AA~~ Height, or angle of elevation *It came across the road*
17. ~~AA~~ Speed, or angular velocity *It then went straight up*
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.

~~AA~~ Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Chute 0 / 2
5/6/12

Report on Aerial Object Observed (Contd.)

19. Direction of flight with reference to landmarks or points of the compass.

It went straight up.

20. Did the object remain on a straight path, deviate or manoeuvre at all.

No.

21. Was any trail of exhaust, vapour or light seen *It was a bright light.*

22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.

In mid air.

23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.

No.

24. Weather conditions experienced at time(s) or observation(s)

Dull & foggy.

25. Location of any air traffic in the vicinity at the time of sighting.

NIL

.....

.....

26. Location of any meteorological stations in the general area.

ADELAIDE AND MT GAMBIER

27. Any additional information .. This report was raised as a result of a telephone conversation between the observers mother (when in Melb during last week in May 63) and the C Intell O office.

Observer's mother stated that the object followed the route of her son's car for approx three miles, then disappeared when an on-coming car approached.

Questions 25, 26 and 27 to be answered by interrogator.

COMMONWEALTH OF AUSTRALIA

REPORT ON AERIAL OBJECT OBSERVED

Mr. James S. Roxburgh.

1. Name of observer.....
2. Address of Observer..... **Dilston. Tasmania.** 75A
3. Occupation of Observer..... **Car Salesman.**
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
4/4/63 - 0530 E.S.T.
5. Period of Observation (s). **Approximately 30 minutes.**
6. Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
Observed through balcony window of residence at Dilston on the East Tamar. Direction of observation E.N.E.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Sighted when observer first looked out of window.
8. What first attracted observer's attention e.g. light or noise.
Light.
9. Did object appear as a light or as a definite object.
As lights.
10. If there was more than one object, how many were there, and what was their formation.
Two objects estimated to be 8 feet apart in the horizontal plane.
11. What was the colour of the light or object. **Bright almost white light/**
12. What was its apparent shape. **As stars. The observer compared them in size to large telegraph pole insulators which he could see nearby.**
13. Was any detail of structure observable. **No.**
14. Was any method of propulsion obvious. **No.**
15. Was there any sound. **No.**
16. Height, or angle of elevation. **Approximately 20 degrees above the horizon.**
17. Speed, or angular velocity. **None.**
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
Observer considers he is an average intelligent person.

Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

19. Direction of flight with reference to landmarks or points of the compass.
Stationary.
20. Did the object remain on a straight path, deviate or manoeuvre at all.
Stationary.
21. Was any trail of exhaust, vapour or light seen... **No.**
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
Did not move.
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
None.
24. Weather conditions experienced at time (s) or observation (s)
A fine clear calm and frosty morning.
25. Location of any air traffic in the vicinity at the time of sighting.
Nil.
26. Location of any meteorological stations in the general area.
Launceston Airport. (BRG. 158 (T) 13½ NM).
27. Any additional information. **Both Mr. Roxburgh and his wife sighted the objects and described the sensation they had watching them as "eerie". He stated that he had seen similar objects on previous occasions about 12 to 15 months ago and had reported them to Senator Henty. Some correspondence had been received by him regarding these previous sightings.**
Questions 25, 26 and 27 to be answered by interrogator.

G. F. TURNER
INTERROGATOR.

6 LOUIS STREET
TAREE. NSW

Commanding Officer
R.A.A.F. Station
WILLIAMTOWN NSW

Dear Sir,

I would like to report an object seen last Sunday by 6 people, and which is described as accurately as possible below.

Time ; 12.55 p.m. Sunday, 7th April 1963.

Location : Off Black Head beach/Halliday's Point,
which is 9 miles north of Forster.

The object was visible for approx. 10 seconds, and appeared as a long, slender, pencil shaped object, silvery white in colour. It seemed to be about 100 feet long, and the same distance above sea-level. The most remarkable feature was the complete lack of sound, and also that the fact that the object had no apparent wings.

It was $\frac{3}{4}$ to 1 mile away from us and heading in a southerly direction. It was in straight and level flight and we estimate its speed at between 400 and 500 m.p.h.

This object was sighted by 2 adults sitting on the beach, about 15 feet above sea-level and by 2 adults and 2 children who were in the surf approx 100 yards away, thus giving 2 groups of people sighting it from 2 slightly different angles.

We were all very intrigued by this mysterious man-made ? object, but we are all certain it was not an aircraft in the ordinary sense of the word, mainly because of the lack of sound and wings, and also because it appeared so large, and was at such a low altitude.

We would therefore appreciate it if you could advise us what this object might have been. We look forward to hearing your comments in the near future.

Yours faithfully,

P.A. EMMERTON

Dear Madam,

10

1. I refer to your letter dated 8th March, 1963, regarding the investigation of a sighting of an unidentified object by Mr. Charles Brew.
2. Our investigation and enquiries reveal that there are scientific records of certain tornado-like meteorological manifestations which have a similar appearance in many ways to whatever was seen by Mr. Brew.
3. The information available is such however, that while we accept this as a possibility, we are unable to come to any firm conclusion as to the nature of the object or manifestation reported.

Yours faithfully,

(A. B. McFarlane)

UN-IDENTIFIED FLYING OBJECT SIGHTED
NEAR MOE VICTORIA BY MR C. BREW
Our 5/6/Air(24) 8th March, 1963

580-1-1
DAFI
11-3-63.

Forwarded is a joint report by two RAAF officers following an interview with Mr C. BREW concerning the sighting of an un-identified aerial object at a farm property at WILLOW GROVE via MOE on 15th February 1963.

10A

REPORT ON
INVESTIGATION OF UN-IDENTIFIED FLYING
OBJECT AT MOE, VICTORIA

1. Flt Lt N. HUDSON and Sqn Ldr A.F. JAVES were detailed to investigate an un-identified flying object which was reported in daily papers on 16th February 1963.
2. Contact was made with the observer (Mr C. BREW) and he was visited at his property on Monday 4th March 1963. The location of the property is shown on the attached map.

Description of Object Sighted

3. The following is a description of the object by Mr C. BREW:-

- (a) At 0710 hours on Friday 15th February 1963 whilst milking cows, he noticed an object descending from an easterly direction to about 75 ft (estimated against height of adjacent trees), hovered for a brief period of time and then accelerated away at high speed to the West.
- (b) The structure of the object appeared to be man-made. It was about 25 ft in diameter and about 9 ft high (sketch attached). The lower portion, about 3 ft high, was rotating in an anti-clockwise direction and was of blue-ish appearance. The upper portion appeared to be stationary, battleship grey in colour with a transparent dome. Protruding out of this dome was something which resembled a broom handle. No figures were visible in the dome. Then Mr BREW stated "It looked like a flying merry-go-round"! "There was a swishing and burbling-type sound".

Personal Observations of Observer

4. Manages property at WILLOW GROVE for Cr KILPATRICK. Aged about 50-60 years. Has been farmer all his life and has never served in the forces. Doesn't read books or write very much. Did not ascertain whether he reads comics. Watches television and films occasionally. Appears to be genuine because story continues to be repeated without any detectable variations. Property is some 1,500 acres and runs only 150 cows of which he milks 80-85 per day. He also stated that he is teetotal and does not suffer any abnormalities to his health.

Meteorological Conditions

5. Mr BREW stated that it was raining heavily and continuously with very low cloud and poor visibility. He did not observe any thunder or lightning. The wind was fresh and easterly in direction.
6. The Meteorological Department provided the following Yallourn observer's report for 0900 on 15 Feb 63:
 - (a) Wind direction - Westerly at 8 knots.
 - (b) Visibility - 4 miles.

(c) Moderate rain. (19 points recorded in
24 hours 0900 14th to
0900 15th)

(d) Cloud. 6/8 Cloud Fracto-Stratus.

CSIRO - Meteorological Physics Discussions

7. On 6th March, Dr BERSON and Mr CLARK were interviewed to see if clouds could give this type of phenomenon. They agreed that a tornado condition could give this effect. The direction of rotation of BREW's report of the object was consistent with known facts for the Southern Hemisphere. The blue-ish colouring has been reported previously and is probably due to electric discharge and there would be a smell of ozone. The only difference in BREW's report was that the object moved from East to West because all previous reports to the CSIRO Met Section of this nature have been from West to East. Mr BREW stated that the wind was fresh from an easterly direction. However, meteorological report states that wind was westerly at 8 knots.

Aircraft Movements

8. Enquiries have revealed that there were no Service or Civil aircraft authorised to operate in the area at the time.

Conclusion

9. There is little doubt that BREW did witness something, and it is most likely that it was a natural phenomenon. The phenomenon was probably a tornado. There was no reported damage along its path, therefore one could assume that it was weak in nature.

DISC-SHAPED OBJECT A MYSTERY

Many racegoers at Canberra Racecourse on Saturday were mystified to see a large, disc-shaped object rise from behind Mount Ainslie.

The object, which appeared in a direct line with the grandstand and the barrier, was first seen at 2.35 p.m.

It rose at an angle of 45 degrees about the same height as Mt. Ainslie.

The object, which was visible for 30 seconds, dipped and turned several times before returning behind Mount Ainslie.

It appeared again, rising from the same angle, staying visible for about the same length of time before disappearing slowly out of sight.

A racecourse patron who had seen it through his binoculars said the object appeared to be white and disc-shaped.

Treble Title Win

~~CONFIDENTIAL~~ ANNEX (1)

~~UNCLASSIFIED~~

REPORT ON AERIAL OBJECT OBSERVED

1. Name of Observer. **Mr. William Henry Edward BIEMAN**
2. Address of Observer. **115 George street East Maitland NSW**
3. Occupation of Observer. **Carpenter.**
4. Date and Time of observation (Time given in 24 hour clock zonal time)
Am not sure of the date but it was at about 2030 hours.
5. Period of observation (s) **Approximately 3 minutes.**
6. Manner of observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
Visual observation - rough sketch made by observer attached.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
From behind nearby house roof.
8. What first attracted observer's attention, e.g. light or noise.
Reflection of light.
9. Did object appear as a light or as a definite object.
Seen as an object at first, then as a light.
10. If there was more than one object, how many were there, and what was their formation.
One only.
11. What was the colour of the light or object. **White**
12. What was its apparent shape. **Sphere.**
13. Was any detail of structure observable. **No.**
14. Was any method of propulsion obvious. **Not sure.**
15. Was there any sound. **None.**
- * 16. Height, or angle of elevation. **150 feet, on level flight.**
- * 17. Speed, or angular velocity. **Approximately 500 MPH.**
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
Employed as a Carpenter with the Allied Works Council at RAAF Garbutt from 1942 to 1944, and with the Department of Works at RAAF Bankstown from 1944 to 1945.

Since it is normally impossible to estimate the height and speed of a strange object it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

~~CONFIDENTIAL~~

Report on aerial object observed (contd.)

19. Direction of flight with reference to landmarks or points of the compass.

Travelling in a circle, East of the sighters home.

20. Did the object remain on a straight path, deviate or manoeuvre at all. **When in the North East it broke off its normal circular course and proceeded in the direction of RAAF Williamtown.**

21. Was any trail of exhaust, vapour or light seen. **None**

22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon. **Last seen heading towards RAAF Williamtown about 25 miles from the sighters home**

23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence. **None**

24. Weather conditions experienced at time(s) or observation(s). **Very little cloud formation, generally clear night.**

25. Location of any air traffic in the vicinity at the time of **Several Service Aircraft were night flying over sighting. RAAF Williamtown and the surrounding countryside on the night in question.**

26. Location of any meteorological stations in the general area. **Nobbys Head. RAAF Williamtown.**

27. Any additional information.

Questions 25, 26 and 27 to be answered by interrogator.

Jumping cows!

It's a "saucer"

MOE, Fri. — A dairy farmer has reported seeing a "flying saucer or something" which sent a horse and his herd of cows into a panic early today.

The farmer, Mr Charlie Brew, of the Old Sale-rd., Willow Grove, north-west of Moe, said the object was about 25 feet wide and looked like a thick disc.

"It was battleship-grey in color and appeared to have a band of glass or plastic around the circumference and a number of protrusions which looked like scoops," Mr Brew said.

"My son Trevor and I were milking the cows shortly after 7 a.m., and it was raining heavily at the time when I looked out and saw the object coming down fairly slowly and steeply to a height of between 75 and 100 feet.

"I thought it was going to land, but it suddenly shot off in a westerly direction at two or three times the speed of a jet and disappeared into a cloud."

Although Trevor did not see the object, he heard the pulsating, whooshing sound it made as it revolved overhead.

"The cows turned somersaults and the horse reared up in panic," Mr Brew said. "The whole visit lasted only a matter of seconds."

Mr Brew admitted that he had often laughed at people who said they saw such things, but he swears that this was the real thing.

Dear Sir,

We understand that you investigated the sighting report made by Mr Charles Brew of Willow Grove, concerning an unidentified flying object which flew over his dairy farm early on the morning of Friday, 15th ^{Feb} March last.

We would be obliged if you will advise us of your evaluation on this sighting.

Thanking you in anticipation of your early reply,

Yours faithfully, ✓

REPORT ON AERIAL OBJECT OBSERVED

7A

1. Name of observer BENJAMIN ASHTON HILL
2. Address of Observer 29 MYALLA ST BRAYBROOK. W19
3. Occupation of Observer SECURITY OFFICER
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
2.7.2.1963 21.12 HRS
5. Period of Observation(s) 3 TO 5 MINUTES
6. Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
Visual observation from ground level. No equipment used.
Observation made from west side of engine room.
At Australian Carbon Black Mills Rd. Nth Altona
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
Overhead, slightly south west of my observation point
8. What first attracted observer's attention, e.g. light or noise.
My attention was first attracted by two lights which had been observed by two other employees
9. Did object appear as a light or as a definite object.
As a Light
10. If there was more than one object, how many were there, and what was their formation.
There was two lights which appeared to be in line ahead formation pointing in a North Easterly direction. They were very close together
11. What was the colour of the light or object Bluish Green
12. What was its apparent shape The lights were very bright and constant
and appeared to be oval in shape
13. Was any detail of structure observable No
14. Was any method of propulsion obvious Yes, but lights appeared to have similar propulsion to a helicopter in that they could ascend & descend at a very acute angle
15. Was there any sound Yes, the noise of engine room it was impossible to discern any particular noise
16. ~~xx~~ Height, or angle of elevation Approx 2000 to 2500 ft
17. ~~xx~~ Speed, or angular velocity Speed not known but it appeared to be in the fast jet craft range
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
Being an ex service man with approx 16 yrs Army service at home & abroad. I have on many occasions observed aircraft in flight.
But these calculations are only approximate

~~xx~~ Since it is normally impossible to estimate the height and speed of a strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

P.S. I have sighted these lights on three occasions in this area. ¹²
but in the past they have appeared later at night or in the early morning

Report on Aerial Object Observed (Contd.)

19. Direction of Flight with reference to landmarks or points of the compass.

From South west of Altona to North East of observation point.

20. Did the object remain on a straight path, deviate or manoeuvre at all.

When first sighted, lights appeared to lower one above the other. The top object then moved off in a straight course in a North Easterly direction.

21. Was any trail of exhaust, vapour or light seen *No*

22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.

9m. mid-air. North East of observation point

23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.

Lights were sighted by two other employees

24. Weather conditions experienced at time(s) or observation(s)

Fine clear weather no cloud formations visible

25. Location of any air traffic in the vicinity at the time of sighting.

No Air Traffic sighted

26. Location of any meteorological stations in the general area.

27. Any additional information

PREMIER'S DEPARTMENT

BOX 13, G.P.O.

SYDNEY

61-226.

Dear Sir,

Enclosed for information and such action as may be considered necessary copy of a communication addressed to the Premier by Mr. W.H.E. Bieman of 115 George Street, East Maitland, concerning his sighting of an unidentified flying object.

Mr. Bieman has been informed that his letter is being brought to the attention of the Commonwealth Authorities.

Yours faithfully,

Gene Gony
Under Secretary.

The Secretary,
Prime Minister's Department,
CANBERRA....A.C.T.

A circular 'RECEIVED' stamp from the Department of the Interior. The stamp features a clock face with numbers 1 through 12. The word 'RECEIVED' is printed in large, bold, capital letters across the center. Below it, the date 'JAN 1963' is printed. The words 'DEPARTMENT OF THE INTERIOR' are printed in a smaller font around the bottom half of the circle. Handwritten text 'U.S. DEPT. OF THE INTERIOR' is visible around the top edge of the stamp. There are also some handwritten initials or marks inside the stamp.

Henry's Deeds

905-19

23/1/63
115 George Street
East Ham

This too being witnessed such a fall there was also extensive
green blinding illumination.

The manner in which the object was performing and holding
such a accurate course off the N. 0. 0. 0. magnetic pull could lead
to one of two conclusions. The object was either manned or
under some form of remote control.

On this occasion of its second circle so far has I am
convinced between N. and S. it broke the circle at about 50
degrees to fly off about 35 degrees south on further tracking by
my son this would place it heading direct for Williamstown
R.D.R. of airfield on the coast.

Should Williamstown deny any knowledge of the object
then it would probably place some form of control base
in this area. Could there be some form of enemy scientific
experimental station situated there or somewhere along.
that comes far out to sea or could some far off probing of
Williamstown be in progress being by sea. This is as yet
there is something open for thorough scientific or intelligence
combined urgent investigation.

having for many years paid a lot of attention to the
night sky I have never seen anything like it before or
have I heard any previous reports. It would also appear
these mysterious lights have disappeared from the skies of their
original detection about three years back over a wide
area and far apart and then at first began to have last
night become more daring and venturesome.

Yours faithfully

William H. E. Beaman & J. W.

REPORT ON AERIAL OBJECT OBSERVED

1. Name of observer... **John Vallance.** (Shark Pt. Rd.)
2. Address of Observer... **129 Warwick St.** (Penna.)
3. Occupation of Observer... **Camera Store.** (Approx 4 miles N.E. from CAMBRIDGE.)
4. Date and Time of Observation (Time given in 24 hour clock zonal time)
01502
5. Period of Observation (s)... **5 mins. probably.**
6. Manner of Observation: (Give details of own position by map reference if possible, or by known landmarks, and describe any equipment used in the observation).
At Penna.
A30 Binoculars.
7. Where was object first observed, e.g. overhead, coming from behind a hill, over the horizon, etc.
45° alt. facing N.
8. What first attracted observer's attention e.g. light or noise.
Sighting.
9. Did object appear as a light or as a definite object.
No light.
10. If there was more than one object, how many were there, and what was their formation.
One.
11. What was the colour of the light or object... **White vapour.**
12. What was its apparent shape... **Bottom part pherical.**
13. Was any detail of structure observable... **No.**
14. Was any method of propulsion obvious... **No.**
15. Was there any sound... **No.**
16. Height, or angle of elevation... **See above.**
17. Speed, or angular velocity ... **" "**
18. State any experience which enables observer to be reasonably certain about the answers given to 16 and 17.
Nil.

Since it is normally impossible to estimate the height and speed of strange object, it will usually be better to endeavour to determine the angle of elevation of the object, the angle through which it moved, and the time taken to do this.

Report on Aerial Object Observed (Contd.)

19. Direction of flight with reference to landmarks or points of the compass.
NW from Mt. Lord.
20. Did the object remain on a straight path, deviate or manoeuvre at all.
Straight line downwards.
21. Was any trail of exhaust, vapour or light seen.....
22. Where did object disappear, e.g. in mid-air, behind a hill, over the horizon.
Vicinity Richmond.
23. Existence of any physical evidence such as fragments, photographs, or other supporting evidence.
Nil.
24. Weather conditions experienced at time (s) or observation (s)
Fine and clear 1/8 cu. 4500.
25. Location of any air traffic in the vicinity at the time of sighting.
**LSAF B57 @ FL 290 climbing to FL 400 over HBT HeadyNG.
towards DVN @ 0154.**
26. Location of any meteorological stations in the general area.
HBT airport.
27. Any additional information.....**Nil.**
All known and possible acft movements checked.

Questions 25, 26 and 27 to be answered by interrogator.
