HEPLY QUOTE 6650-4 (RRS-S).

February 17, 1972.

Dr. P.M. Millman, Upper Atmosphere Research, National Research Council, Montreal Road, Ottawa, Ontario. KLA OR6.

Dear Sir:

The attached letter and drawing from Mr. C.A.R. Beaulieu of Levis, P.Q., dated January 14, 1972, regarding what appears to be an unidentified flying object, is referred to you for information.

In our letter of acknowledgment to Mr. Beaulieu, a copy of which is also attached, we have indicated that you will take whatever action you deem necessary.

Yours truly,

W.J. Wilson, Director-General,

Telecommunications Regulation Branch.

Ministère du Transport Hôtel du Parlement, Ottawa, Ontario.

Mensieur.

Ci-inclus un dessin illustrant, ce que j'ai vu un scir, dans la seconde semaine de janvier 1972 (Probablement le 11)

Suivant l'ordre numérique, cette lumière changeait de forme en se déplaçant à la vitesse d'un avion, sans aucun bruits sous un ciel très scmbre.

Cette lumière a perdu de l'altitude (voir no. 4) et disparue aux environs de la pointe Sud Ouest de l'Ile d'crleans.

Il se peut que ces informations, peuvent vous êtres utiles

Bien à vous

TRANSLATION

C.A.R. Beaulieu Commercial Artist 55A, Fraser Street, Levis, P.Q.

January 14, 1972.

Ministry of Transport, Government Building, Ottawa, Ont.

Dear Sir:

You will find herewith a drawing illustrating what I saw one night during the second week of January 1972 (probably the 11th).

Following the numerical order, this light changed its form while moving at the speed of an airplane, without any noise, under a very dark sky.

This light lost altitude (see no. 4) and disappeared in the vicinity of the South West foreland of Orléans Island.

This information may be useful to you.

Yours truly,

C.A.R. Beaulieu

Earl Charles GRAHAM (B. 15 OCT 36) - U.F.O. Sighting Calgary, Alberta 11 MAR 72

11 MAR 72

1. At approximately 10:50 PM, Earl Charles GRAHAM of 11111 Braxton Road S.W., Calgary, Alberta - Phone: 252-6154, contacted this office by telephone and advised that he and several other persons had observed what appeared to be a flying object in the sky to the west of his residence. The object was sighted at approximately 10:10 PM and disappeared at approximately 10:45 PM. GRAHAM advised he then contacted the McCall Field Control Tower who in turn advised nothing was evident on their madar for a distance of 30 miles. The following embodied Telex was forwarded immediately to NRC Meteor Centre, Canforcehed, Commissioner R.C.M.P. Ottawa and to Prof. R.E. FOLINSBEE - University of Alberta, Edmonton:

"CDET #284 RE: U.F.O. REPORT (a) 11 MAR 72, 10:10 - 10:45 P.M. MST (b) CLEAR SKY IN WESTERN AREA (c) EARL CHARLES GRAHAM (B. 15 OCT 36) 11111, BRAXTON RD. S.W. CALGARY 14, ALBERTA PH# 252-6154 TRADE: ENGINEER

CONTINUATION - SUITE DE C237 REV. 1-4-66

TWO

RE-OBJET:

RCMP-GRC 6881

Earl Charles GRAHAM - U.F.O. Sighting II MAR 72

(CONT'D FROM PAGE ONE)

- Further investigations were conducted at the various residences of the noted persons at which time, it was learned the object had appeared in the western sky and slightly to the north. As will be noted in the statements, the description of altitude varies, however, all persons were consistent in stating that the object fell from sight. Taking the accumulated information John FINDLAY, Asst. Chief Technician of the Calgary Planetarium was contacted. He studied the available information and came to the solid conclusion that the object was in fact the star VENUS. He advised that this star would appear in the exact location and has many times been mistaken for a U.F.O. The star has a magnitude of minus 3.8 and moves at a speed of approximately 15 degrees per hour, setting four hours after sunset. Sunset on the 11 MAR 72 was 6:36 PM; thus, the object would disappear at approximately between 10:35 and 10:45 PM. Mr. FINDLAY stated that due to the atmospheric conditions the star would appear to change colour and also to vary slightly in its movements. FINDLAY demonstrated to me the exact position of the star VENUS on the 11 MAR 72 at 10:30 PM utilizing the Planetarium Observatory. From . what I learned at the various residences in regard to the sightings, I felt that the object was in fact in identical proximity to the area indicated by the witnesses.
- 4. Further contact has been made with all witnesses who in turn advise that they have since observed the same object in the same position and feel that it is in fact the star VENUS and not a U.F.O.
- 5. In view of the foregoing information, it is felt that there is little doubt that the object is in fact the star VENUS.

CONCLUDED HERE:

(G.J.P.) S/Sgt. i/c Calgary Det. (R.M. LEQUESNE) 23542

OBJET.

STATEMENT OF: Earl Charles GRAHAM (B. 15 OCT 36)
11111 Braxton Road S.W., Calgary, Alberta

920 - 16 Avenue N.E. Calgary, Alberta 15 MARCH 72

"At approximately 10:00 PM on the 11 MARCH 72 I was at my home in Calgary. I came from my front room into the bathroom and upon entering the bathroom, I looked out of the window which falls west. I noticed a bright light that I at first thought was an aircraft with its landing lights on. I looked again when I went to the kitchen and noticed that it was still there. My father-in-law, N.R. KEMPTHORNE of 4907 Kerrydale Road S.W. Calgary and I watched the light for some time. It did not appear to be moving when we were watching it from the kitchen but when I went back into the bathroom, I could not see it from the same spot.

I telephoned Fred BRASNETT of 11127 Braxton Road S.W. to tell him of the light. He looked at the light with his field glasses and told me that it appeared to be a multi-coloured thing and when it moved it moved fast. While Mr. BRASNETT was watching the object I went outside and took two photographs using MANKYA SEKOR 35MM with telescopic lens.

Following this, I contacted the Calgary Airport Control Tower. They advised that there were no objects on the radar scope for a 30 mile radius. After this I called my neighbour, Larry THIELEN, who came over. We talked about it and watched it for approximately 15 minutes. I then contacted the R.C.M.P.

I am employed with REID, CROWTHER & PARTNERS LTD. as project co-ordinator. I am a mechanical engineer.

WIT: (R.M. LEQUESNE) Cat.

SGND: E.C. GRAHAM

RE: OBJET:

STATEMENT OF: Larry J. THIELEN (B. 20 MAY 31) of 11108 Braxton Rd. S.W., Calgary, Alta. Taken at 1:30 P.M. 13 MARCH 72

"At approximately 10:00 PM 11 MAR 72, I was playing bridge at our home. I was with Mr. & Mrs. R.H. ATKINS, and my wife. I received a phone call from my neighbour, Chuck GRAHAM. He asked me to lock out my window and have a lock at a funny locking "Sputnik" out to the west. My house faces west. I locked out my front window and saw an extremely bright object travelling from the south to the north. Its position was approximately west-north-west from the front window. The object was a bright whitish yellow. It was radiant much similar to a star. While I watched it, the object appeared stationary. I then went over to GRAHAM'S residence. We talked about it for swhile and lined it up using the kitchen window which also faces west. I used the center of the window to determine lateral flight and the curtain rod to determine vertical movement. While I watched, it appeared to move approximately one inch. I was unable to detect any vertical movement. I didn't notice any change in intensity or color. I observed the object for approximately ten minutes.

From my front window it is possible to see two distant lights. The object was approximately centered on these and slightly above.

It was approximately 10:15 PM when it was first sighted and was gone at approximately 1:15 PM.

I am employed by Shell Oil Canada Ltd. as a senior Technologist in field facilities for 18 years. I have also been employed as a surveyor by the Dominion Government for five years."

WIT: (R.M. LEQUESNE) Cat.

SCND: Larry J. THIELEN

RE DOJET

STATEMENT OF: Norman Ray KEMPTHORNE (B. 2 SEP 18) of 3607 Kerrydale Rd. S.W. Taken 13 MAR 72 at 2:45 PM

at IIIII Braxton Rd. S.W. I was not sure of the time. We saw an extremely bright light out the kitchen window which faces the west. The light appeared to be coming in from the west at a low altitude, approximately 500' - 1000' feet. It appeared to be a bright blotch of light, green, red and blue in color. The intensity of the light varied, however, was always bright. The object appeared like a star but the colors were different. I watched it for approximately 15 - 20 minutes. During this time, the course of the object moved both to the left and right much similar to weaving. It appeared to be hovering without much forward speed. The altitude was being estimated by using the horizon. The object came in fast and then hovered.

My son-in-law called the Calgary Airport Tower to find out what it was. They advised they had no sightings but were sending out an aircraft.

We saw the aircraft come from the south. As it approached, the object started to lose altitude and then dropped out of sight of the horizon.

I am employed by C.M.P. as a salesman and have been employed here for 23 years."

WIT: (R.M. LEQUESNE) Cst.

SGND: N.R. KEMPTHORNE

OBJET

STATEMENT OF: Fred BRASNETT of 11127 Braxton Rd. S.W., Calgary, Alta. Taken 3:05 PM 16 MAR 72

at approximately 9:25 PM regarding a very brilliant object in the skies directly west of my residence. My family and myself proceeded to watch the object, both visually and with 8x50 binoculars. The object appeared to be a brilliant, yellow and circular with a black define porifery. An aurora of light blue surrounded it. There was interjecting overlay of crimson. The object appeared to move in an upward angular projection to left and right from the horizon. I assumed it was an aircraft on approach with its landing lights on. Having lived in the area, I am aware of the approach of aircraft at approximately 5 - 6 thousand feet. The object, taking a line sight from my house, appeared in the position.

After observing the object sitting in a reasonably static fashion, I called the McCall Field Control Tower to see if they had a radar track or aircraft in the area, but was informed negatively.

Approximately 10 - 12 minutes after my call a light aircraft passed over and the object disappeared from sight.

I have subsequently checked with the Planetarium and was informed that the object was the star VENUS.

I have since observed the same object and have found it to be the same in appearance and location, only it was not as bright."

ROYAL CANADIAN MOUNTED POLICE - GENDARMERIE ROYALE DU CANADA RCAP GRC 6880 OTHER FILE REFERENCES. REF. AUTRES DOSSIERS. 25 Apr 72 SUB DIVISION SOUS DIVISION PCR: 'first' Winnipeg DETACHMENT DÉTACHEMENT Falcon Beach OBJET: Arthur & Virginia LESTER - Report of U.F.O. Sighting, Caddy Lake District, Manitoba - 15 Apr 72 16 Apr 72 Information was received at this office to the effect that Arthur and Virginia LESTER sighted a U.F.O. in the Caddy Lake, Manitoba area on the night of the 15 Apr 72. 17 Apr 72 2. This date, I contacted Arthur & Virginia LESTER at West Hawk Lake, Man. The LESTER'S revealed the following events to me. At approx 9.30 PM (CST) Arthur LESTER was driving his car south on PTH #44 towards West Hawk Lake. His wife, Virginia, was a passenger in the front seat. At a point 10-15 miles north of West Hawk Lake the LESTER'S observed an oval shaped grayish-white light approx two feet in diameter. This object travelled in front of LESTER'S car at tree top height in a spining motion weaving continuously from left to right. The LESTER'S claimed this object was visible for about ten minutes, and then disappeared. A few minutes later Mrs. LESTER glanced out the rear window and observed the same grayish-white object following the car at the same height and in a similiar manner as before. Arthur L ST R stopped his car and both occupants got out and watched the object for a few minutes. It then disappeared. The LESTER'S informed me that the sky was clear at the time. The LESTER'S then proceeded directly to the home of Mr. & Mrs. William BLACKWELL at West Hawk Lake. Mr. & Mrs. William BLACKWELL, a retired couple residing at West Hawk Lake, were also interviewed. These subjects stated that the LESTER'S arrived at their house between 10.30 - 11.00 PM of the 19th Apr. and related the events as described in para #2 to the BLACKWELL'S. The BLACKWELL'S stated that Mrs. LESTER seemed very upset but her husband appeared quite normal. The BLACKWELL'S advised that the LESTER'S were both sober and had not been drinking any alcoholic beverages.

Falcon Beach message #72/4 was forwarded direct to
NRC METECR CENTRE, info CAMPORCEMED and Commissioner.

ROYAL CANADIAN MOUNTED POLICE - GENDARMERIE ROYALE DU CANADA RCMP GRC 6880 OTHER FILE REFERENCES 20 MAY 72 72-J-700-SUB-DIVISION - SOUS DIVISION 72-700-10 Fredericton P.C.R. First Here DETACHMENT - DÉTACHEMENT Fredericton OBJET-Nelma (Mrs. Gordon) GRAHAM - Report of U.F.O. -Maple Ridge, Carleton County, New Brunswick. 1 MAY 72.

It was brought to the attention of this Detachment via a local daily newspaper, The Daily Gleaner, Fredericton, New Brunswick, that Mrs. Nelma GRAHAM had reported observing an Unidentified Flying Object near her home at Maple Ridge, Carleton County, New Brunswick. Mrs. GRAHAM was contacted by thewriter and interviewed at length. She advised that the object was observed by herself and her husband at approximately 12:15 A.M., 1 MAY 72, in the northwest sky. The object appeared to be blinking a distinctive red color and was observed for approximately twenty minutes, the object then disappearing over the horizon. The object was described as being quite large and when first observed, it appeared to have the shape of a cross moving vertically continiously. The altitude of the object could not be determined by Mrs. GRAHAM but she felt that it was flying very high. There was no apparent sound coming from this object.

- The night in question was clear with the moon shining in the eastern sky. The area in which this object was observed is an open area with no onstructions so a very clear view of the object was had by Mrs. GRAHAM and her husband.
- 3. Another sighting was made by the same two, persons the following night, (2-MAY-72) with the same conditions prevailing, with the exception that the sighting began at 12:40 %.M. and ended at approximately 1:00 A.M.
- Radio-gram number 170 was forwarded from this point to NRC Meteor Centre on 4 MAY 72 as per R.C.M.P. Operational Manual - CO-Air 1195, paragraph number 6. There is no reason to believe that this sighting was not exactly as described by Mr. & Mrs. GRAHAM. Both subjects appear to be very upstanding citizens in their community and sources of good reliability. No further action being taken in this regard unless otherwise instructed.

> By STEVE BRIMER (Staff writer)

Specialists at CFB Comox are today attempting to identify an object photographed in the sky over Quadra Island Monday by a Campbell River man.

Is. 22222222222222 bruwer

The military is studying a photograph sent to them Tuesday by The Upper Islander.

The picture was taken by a Willow Point man, who asked this newspaper to develop it and forward it to the military for identification.

"I'd like you to do it because I don't want people to think I'm some sort of kook," the man said Tuesday.

"I know what I saw, and what I photographed, but I don't really expect anyone to believe me."

What the man saw was a circular, discus-shaped object hovering in the sky over Quadra.

"It hung there for maybe 15 minutes, spinning around and

more...

Is. 333333333333333 brower

around like a top," he said.

"It had a kind of dull sheen to it, like dirty chrome.

"Lights flashed on and off around its rim in what seemed to me to be a totally many random sequence.

did wobble a bit, and once tilted over to its side.

"After a bit it sort of shuddered, then tilted and sped almost stringht up for maybe a thousand feet.

"It levelled off, then took off on a sig-sag course torwards the north at fantastic speed.

"I lost sight of it shortly after that, but I did

more...

Is, hithichichich

The man discounted the idea the object could have been a plane or helicopter.

"I've lived here a long time," he said, "and I've seen all kinds of planes and helicopters in the air before.

"It was round, had no markings, no wings and no rotors."

"Besides, no plane I know of could possibly have gone up

like that, at that speed.

"It levelled off abruptly, with almost a 90 degree turn.

"I don't there's a place anywhere that can manouver like that."

Only one of the seven pictures taken by the man was printable. Upper Islander photographer Bob Howse said Tuesday.

ore...

The rest were under-exposed, taken when there wasn't enough light for his camera," Howse said.

The one print that could be made is itself blurry.

Because of the poor quality, it is doubtful it will be identifiable.

"I would rather doubt we could identify it if the picture quality is poor," CFB Comox information officer Capt. Tony Brett said Tuesday morning.

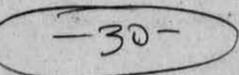

He said there would be no way of knowing if the object had appeared on the base's radar screens, since the base monitors for air traffic control only.

"Even if a target appeared, as they often do, we would have no record of it," he said.

officials at Campbell River municipal airport said they had no equipment with which to track aircraft in the area.

The airport has no electronic tracking equipment, a spokes-

UFO SIGHTING Near High Level, Alberta 26 MAY 72

26 May 72

JUN 1 4 1972

1. Earl ANDERSON came to this office at 5:00 B.m. and stated that he and two companions had observed what they believed to be a UFO. Statements were obtained as follows:

Appendix: 1 - Earl R. ANDERSON

Appendix: 2 - Robert ASHNEAD

Appendix: 3 - Ise MURPHY Cecilia MURPHY

2. In view of the contents of the statements, the following Telex was sent to the National Research Council in Ottawa:

- (A) UFO reported 3:00 a.m. Mountain Standard Time 26 MAY 72 near High Level, Alberta.
- (B) Sky Clean.
- (C) UFO first observed by Andrew DUFRENSE.
- (D) DUFRENSE approx. 5 miles North of Paddle Prairie, Alberta at time of first sighting.
- (E) UFO also observed by Robert ASHMEAD, Earl ANDERSON, Lee MURPHY and Cecilia MURPHY.
- (F) UFO travelling approx. 500 ft. from ground, speed varied according to speed of DUFRENSE vehicle. Main UFO appeared to split into groups of 3 and 6 at random. Main UFO appeared Black with no lights and made no noise. UFO accelerated away from DUFRENSE vehicle travelling 85 m.p.h.

(6) Sighting lasted approx. 1 hour. UFO last seen heading North West toward Footner Lake Airport, 7 miles North of High Level, Alberta.

(H) Check with D.O.T. at Footner Lake Airport. No Incoming traffic. One light aircraft left airport 5:30 a.m. 26 MAY 72.

Afore mentioned people sighting UFO local residents and reliable. Reports to follow.

3. It is believed that all avenues of investigation have been followed and that no further investigation is required.

(R.D. STAIR), #28208.

CONCLUDED HERE:

1/c Fost.

STATEMENT OF: Earl R. ANDERSON 5:00 P.M. 26 MAY 72 High Level, Alberta

Pon 26 MAY 72 Robert ASHMEAD, Andrew DUFRENSE and myself were proceeding North on Highway 35 toward High Level from Paddle Prairie.

At approx. 2:00 a.m. and 5 miles north of Paddle Prairie, Andrew DUFRENSE observed on the right of the Highway, approx. 500 yds. away and approx. 500 ft. high, a black object, round in shape, travelling at approx. 60 m.p.h. which was the same speed as our vehicle was travelling.

after DUFKENSE first observed the object, both ASHMEAD and myself also observed the object. We increased our speed to approx. 85 m.p.h. and the object would move away from us until we ran out of power and then it would seem to come back towards us but never getting behind us. The object seemed to be moving from one side of the road to the other at random.

Approx. 15 miles south of High Level, we used the trunk radio to contact Mr. Lee MURPHY, our boss, to come out and see the object. MURPHY lives approx. one block from the Righ Level Skating Rink towards the North. The object continued to lead us into High Level and then we proceeded to the NURPHY residence where both Mr. and Mrs. NURPHY had observed the object.

We had the object in sight all the way to the MURPHY'S residence. We all observed the object at the MURPHY residence and then it left quickly heading North West in the direction of Footner Lake Airport.

When I arrived home, I went and got my Binoculars and by the time I got out again, it was gone."

WIT: Cat. R.D. STAIR

SGD: Earl R. ANDERSON

STATEMENT OF: Robert ASHMEAD of High Level, Alberta Taken: 9:50 P.M. 28 MAY 72 at High Level, Alberta

"We first observed one UFO at about 2:00 a.m.
26 MAY 72. It was approx. 200 to 500 yds. away to the right
and about 500 to 1000 feet off of the ground. It would move
away from us, but it would keep at approx. the same height all
of the time. The object stayed at approx. the same speed as
the vehicle that we were in, but the object would always be
ahead of us. It disappeared ahead of us a few times but it always
seemed to wait on us.

When we hit the pavement 10 miles south of High Level, we increased the speed of our vehicle to 85 m.p.h. and the object accelerated away from us. It continued to move at different speeds, approx. the same speed as our vehicle all the time.

It began to divide into pieces of 2,3,4, or 5 as we approached town. We then proceeded to Mr. Lee MURPHY'S residence. We had already waken the MURPHYS via the partiable radio in the truck. At the MURPHY residence, all 5 of us observed the objects, which at this time were 5 or 5 in number.

At the time of the sighting, the sky was fairly clear and it was just getting daylight. At times the objects appeared to resemble clouds.

The objects appeared to be oblong in shape. They moved quickly and had no lights and as far as we could determine, had no noise. At times the object appeared to have a tail first on the right and then on the left.

I had consumed approx. 1 dosen beer from noon 25 MAY 72 until the sighting at 2:00 a.m. 26 MAY 72.

WIT: Cat. R.D. STAIR

SUD: Robert ASHMEAD

STATEMENT OF: Lee and Cecilia MURPHY of High Level, Alberta TAKEN AT: 8:30 P.M. 28 MAY 72 at High Level, Alberta

"On 26 MAY 72 at approx. 2:15 a.m., Robert ASHMEAD contacted us on the portable radio in the truck that ASHMEAD, ANDERSON, and DUFRENSE were riding in.

ASHMEAD had exclaimed to Lee MURPHY, "Now I believe in UFOS." He then went on to explain to MURPHY about their sighting the objects. ASHMEAD and the other two occupants of the truck arrived at the MURPHY residence at approx. 2:30 a.m.

When the incident occurred, it was almost dawn and fairly clear out.

We were waiting in the front area of our house when we observed the objects. We saw the objects first in the West. There appeared to be three objects when we first sew them. 2 of them appeared to be close together and one was by itself. They were approx. 500 to 1000 ft. from the ground.

All three of the objects appeared to be oblong in shape. They made a grayish-black outline against the sky. They made no noise and had no lights.

The objects seemed to appear and disappear and move around alot.

We had been in bed for about three hours and had not been drinking on that evening.

WED

Le 17 juillet, 1972.

Rapport d' un objet-volant-non-identifié.

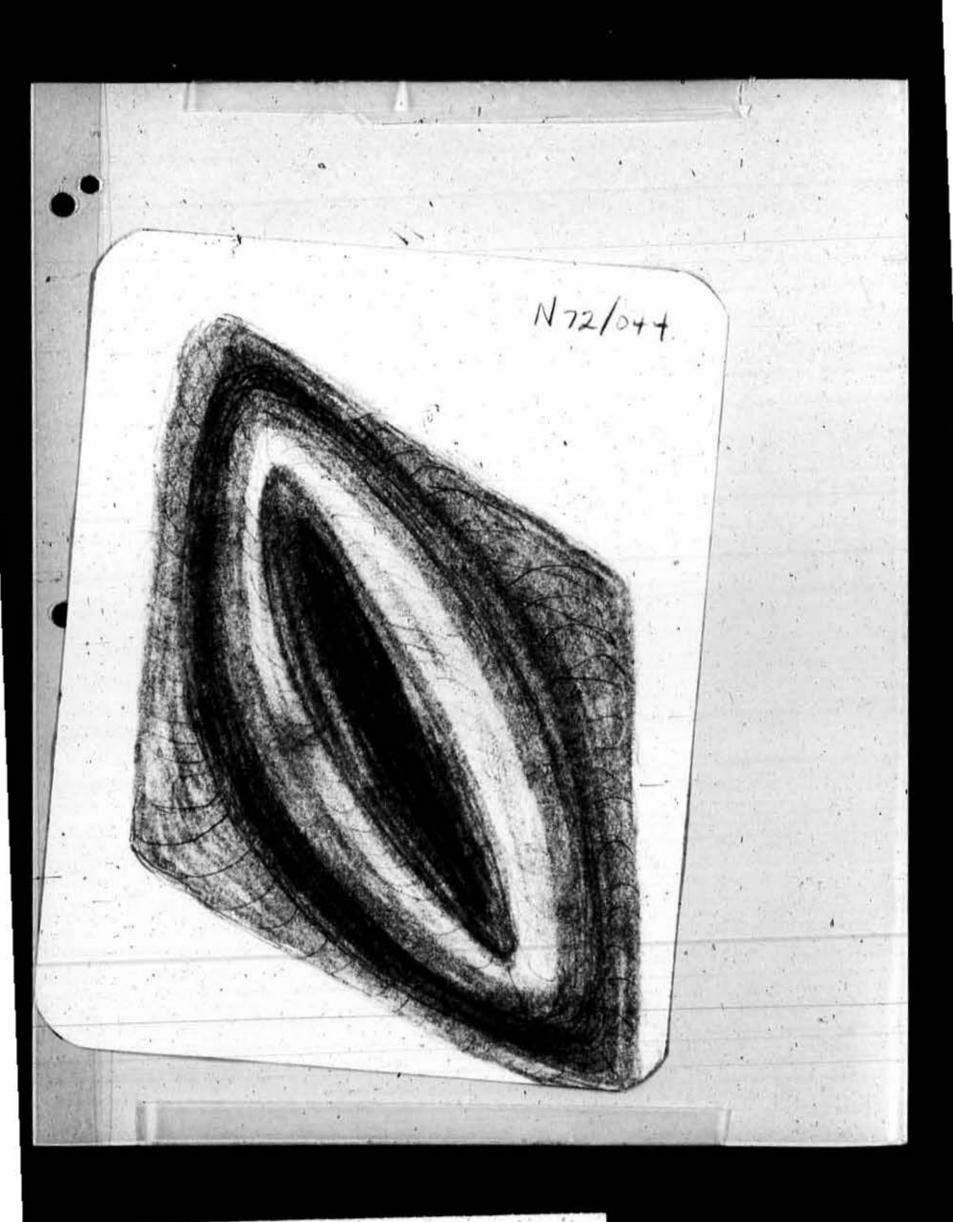

St. Jévite, P.Q.

Elle est venue nous rendre visite au conseil national de recherches aujourd'hui.

Date & laquelle elle a vu l'objet: Août 1970 ou 1969. Heure: Vers 1900 EDT.

L'objet venait du sud, s'avancant vers la maison. Cet objet voyageait à la même altitude que la cime des arbres. Avant d'arriver à la maison, cet objet s'est détourné vers la droite pour retourner sur ses pas pour une certaine distance, pour ensuite descendre à un niveau plus bas.

c' est alors que a pu voir l'objet assez bien pour en faire un dessin qui accompagne ce rapport. Cet objet emmettait un bruit comme celui d'un hélicoptère. Cet objet était fait d'acier, bombé vers les cotés, et plus poli à certain endroit qu'à d' autre.

poted pm he 30, 1970

le 11 septembre, 1970.

St. Jovite, cté Terrebonne, P.Q.

Chère Madames

Votre lettre du 17 août dernier est parvenue au bureau de Dr. Millman hier. Puisqu'il est en Europe jusqu'au 28 septembre, je vais essayer de vous répondre.

Notre bureau maintient la fiche de vision non-météoritique dans laquelle on y trouve les rapports de tout phénomène autre que météorique. Ces fiches sont ouvertes pour inspection à tout citoyen canadien. La seule condition requise est que, avant de voir ces fiches, la personne concernée doit signer un document attestant que le nom des gens qui nous ont confiés ces rapports soit garder confidentiel. Ceci est la seule sauvegarde que nous pouvons donner contre toute publicité.

Si vous désirez nous envoyer le graphique de votre vision, nous serons heureux de le mettre dans nos fiches et de le montrer à Dr. Millman lorsqu'il sera de retour à son bureau.

Bien à vous,

Mr. May McGall,

Cen re Météorique,

Conseil National de Recherches du Canada.

St. Jovite, County Terrebonne,

P.Q.

Dear Madame:

Your letter of 17 August 1970 arrived in Dr. Millman's office yesterday. Since he is in Europe until 28 th of September, I will attempt to reply.

Our office maintains a Non-Meteoritic Sighting file on which reports of phenomena other than meteoritic are filed. This file is open for examination by any citizen of Canada. Our only requirement is that, before examining the file, a witnessed statement must be signed that the personal names of the individuals on the reports will be kept confidential. This is the only safeguard against publicity that we can provide.

If you would care to send us the diagram of your sighting, we will be glad to place it on our files and it will be shown to Dr. Millman when he returns to the office.

Sincerely,

Mrs. N. May McCall, Meteor Centre, N.R.C. Ke to rake style a man and a man and

ENGLISH TRANSLATION OF LETTER FROM

August 17,1970.

Research Council, Ottawa, Ontario.

To whom it may concern:

Many phone calls to the F.B.I. who told me to call St. Jérome, by insisting they do it for me, they came to my place, no satisfaction, I do not want any publicity.

A year ago in August, noise of an aerial motor (rumbling) and very low, I came to the large thermo window, high at 25 feet from the level of the road, I thought of a jet, but after observing it from another window, the sun shining on the thing I noticed the form which went up then down towards the ground. That thing was making jumps like a butterfly but of a longer range, the object being bigger. I had cards of airplanes of the Defence and none looked like it. What I saw has the form of a diamond. I made a diagram and will gladly show it to you.

I have had medical examinations lately, my eyesight is very good, my heart also. Dr. Letendre(Hotel Dieu) - this for your information.

I could have dropped everything but lately, I heard that radars do not pick up airplanes at low altitude. This reminded me of the Maginot line.

Thank you for your attention, I remain

Soucoupes volantes à Fort-Coulonge?

CAMPBELL'S BAY (PC-LE DROIT) — Encore une fois, au cours de la nuit dernière, les yeux des habitants de Campbell's Bay ont vu le "phénomène"...

Que se passe-t-il dans le ciel? Encore des soucoupes volantes?

Mme Donna Mercer a déclaré jeudi qu'elle a observé, quatre nuits de suite, une lumière mystérieuse, vers une heure du matin.

 Pour moi, dit-elle, c'est surement une soucoupe volante.

Lorsqu'eile aperçut la première lueur lundi, elle n'en croyait pas ses yeux. Elle a appelé ses enfants, qui ont vu la même chose. A son appel, trois policiers sont venus.

La nouvelle se répandit. Et chaque soir, depuis, une trentaine de personnes étaient groupées dans la cour de Mme Mercer, pour apercevoir le phénomene: une lueur orangée, que Mme Mercer trouva beaucoup trop brillante pour être celle d'une étoile.

Pour M. John Lunan, principal de l'école. la lueur était rouge au sommet, telle que vue par sa longue-vue. Il a trouve en outre qu'elle se déplaçait beaucoup plus vite qu'un satellite.

Campbell's Bay est à 50 milles au nordbuest d'Ottawa. Dans cette région, il est arrivé assez régulièrement que l'on observe des objets ou des lumières qui se déplacaient.

Même chose à Chapeau, au Québec, ainsi qu'à Westmeath et Petawawa sur la rive ontarienne de la rivière Outaouais, depuis trois ans.

A Chapeau et'à Westmeath, on a trouvé des brillures circulaires au sol, après les observations.

Un journaliste du DROIT a également été témoin du phénomène. The following message was phoned to Meteor Centre by Mrs. Mary Gray of the Observatory Staff 19/07/72. Message taken by Mrs. Chénier.

Name of Observer: Mrs. Leo Mercier

Address:

Campbells Bay,

P.Q.

Phone No.:

.648-2698

Date of Sighting: July 18,1972

Time of Sighting: 12:25 am to 01:45 am EDT

Description: Object in North; star-like; approx. 3' across;it

zigzagged for awhile and then got away, higher and
higher; turned from orange to blue as it disappeared.

Several persons saw this object orange thrust.

More sightings of UFOs reported

Residents of the Glen Cairn- seemed legitimate.

ported she saw an arrow-shaped by residents as undentified flyobject — red and green in color
— in the sky early this morning.

She said she watched it for about half an hour be ore it d's-

30 JUL 72

- At approx. 10:30 P.M. this date Mr. Robert H. ROSS 4905 Hampton Ave., Montreal, P.Q. and Miss Christine HAYWARD, 128 Queens Road, Sackville, N.B. came to this office and report sighting an object which was displaying a very bright white light with a smaller red light directly behind it travelling in a north easterly direction over Sackville.
- The object appeared to be travelling at an altitude of between 800 and 1000 feet and at a speed of approx. 80 M.P.H. Subjects watched object for approx. 2 or 3 minutes until it slowly descended from sight on the north side of Sackville. They stated they heard no noise from the object.
- 3. The Moncton Airport was contacted and they advised that there was no air traffic in the area at that altitude during the time of the sighting.
- Both subjects appeared to be reliable an investigation failed to show that their report was a hoax. No other persons in the Sackville area reported sighting the object.
- 5. Sackville Detachment Message No. 126 was sent to N.R.C. Meteor Centre info Canforcehed and the Commissioner, Ottawa.

RE. OBJET. Sighting of Unidentified Plying Object
R.M. of St. Andrews, Man. 31 JULY 72

609 Strathnaver Ave., Selkirk, Manitoba

"et al" Orville STEFANSON (BD: 26 MAR 55)
River Lot 49 Parish of St. Clements, R.M. of St. Andrews,
Manitoba.

31 JULY 72

1. On the above date at approx. 12:15 A.M. a call was received from a subject who identified himself as Orville STEFANSON who resides at Lot 49 Parish of St. Clements, R.M. of St. Andrews, Man. STEFANSON advised the member taking the call that they had sighted an unidentified flying object and wished members to attend at his farm. An immediate patrol was made to the STEFANSON residence.

Upon arriving at the STEFANSON residence the members were greeted by the two c/n subjects. The extent of their story is as follows: At approx. 12:10 A.M. the lads who were sleeping in a bunk house near the main farm building heard a low toned and throbbing noise. The subjects walked from the bunk house towards the house and were looking up in the sky at that point which was quite clear. It was then that they noticed a bright object, that of a star, multi-coloured, crossing the sky in a southerly direction. The object was taking a sharp sig-sagged pattern, very distinct, and then stopped, 4-5 seconds, then took a distinct 90° course proceeding west and out of sight. When asked as to altitude, the boys could not state definitely other than object was like a bright star, multi-coloured, and had no idea how high it was. The subjects were questioned for a lengthy period of time and during this time, it was suggested that it could have been an aircraft, hellicoper or a jet aircraft. Both subjects state definitely that it was not either as they have both seem hellicopters and jet aircraft within the Selkirk area. Both subjects were quite visibly shaken and at this time there was some doubt in the writer's opinion, as to their reliabilit In all, their assessment of the situation appeared rather vague.

CONTINUED FROM PAGE ONE

Numerous enquiries have been made within the district of any other persons sighting a U.F.O. but all met negative results. It might be noted at this time, the STEFANSON residence is approx. It might be noted at this time, the STEFANSON residence is approx. It might be noted at this time, the STEFANSON residence is approx. It might be noted at this time, the STEFANSON residence were some thunder-clouds to the south of Selkirk, estimated distance of 15 miles. The sky above the STEFANSON residence and surrounding area was considered quite clear.

It is also known in this area that it is a flight lane of commercial aircraft and in view of this it is believed what they reported as a U.F.O. was in fact a low flying aircraft. Some doubt is cast upon this report as no other individuals had reported a sighting of this nature, as approx. 20,000 people reside within Selkirk and district, therefore the report will be shown as noted hereunder. Extra copies of this report being attached for Headquarters Ottawa.

CONCLUDED HERE.

(J.D.G.), Sgt.

(S.D. FARNING) 22126. Selkirk Rural Detachment.

The following report was telephoned to our office on August 15,1972 and more information was called in on August 16,1972.

Name: Marcel Lebrun and his brother, René Address: 313 Savard St., Vanier, Ontario.

Location of Sighting: On the road to his cottage at Lac Ste. Claire,
P.Q.(cottage is approx. 55 mi. from Vanier);
they were about 15 miles on this road from the
main highway.

Description: The two men were driving along in their car when they saw this object in the forest. It was approx.

the car, about 40' off the ground; it was like a giant TV screen, flashing all sorts of colours; it was rectangular in shape; stationary; observed 4 or 5 mins. (they stopped the car and shut off the headlights).

Weather: Very clear, a moonlit night; no planes etc.

Date of sighting: July 1,1972. Time: 10:30 - 10:45 EDT

After Car's Systems Shorted, He 'Saw' UFO

WAUKESHA (AP) - An 18year-old Sussex youth report-ed sighting an unidentified flying object after the electrical system in his car shorted ear-ly Monday and the Waukesha County Sheriff's Department wasn't discounting the report.

nt

d;

nn

ш

st.

"He seemed real sincere, he was really shaken," Sgt. Her-man Sprung said. "We sent officers to check his car and its condition was as he report-

Greg Faltersack told offi-cers he was driving home from visiting his girifriend about 2:30 a.m. on county roads in the northeastern part of Waukesha County when his lights went dead. He said there was a complete elec-trical failure and as he ap-

He told officers when he got out of the car he looked up and saw a large, orange ob-ject, about 20 feet in diame-ter, hovering about 40 feet

above him at tree-top level.s The object went, "Beep, beep" then disappeared from Steak Ke-Bob

sight, Faltersack said.

He said the water in his car had boiled over and the fuse box had been blown out. He managed to drive home where he called officers.

"Everything he described was there - the skid marks, the blown fuse box," Sprung said. "Faltersack hadn't been drinking and we're not dis-counting this as a hoax."

On September 18, 1972, Miss Claire Hupé of Vanier, Ontario was in our office to see the Non-Meteoritic Sightings File. She Also gave the report of the following signting:

Date: September 6, 1972. Time: 7 0730 Z Place: Ottawa, Ontario.

She was driving on to the Interprovincial Bridge between Hull and Ottawa, when she saw this bright, glitterring starlike object in the South-East.

It seemed to be following her at a level parallel to the Peace Tower,; it would stop when she would stop at a traffic light and continue when she did. She heard no sound as she was in her car and she had the radio on.

Reported to Meteor Centre.

Venus was present in the SE at that time.

OBJET

Mrs. Elsie (Harold) DEAN, U.RO. Sightings, Melrose, N.B. (18 SEP 72) &(3 OCT 72)

18 SEP 72

1. At approximately 9:30 pm of the above date, the captioned individual telephoned this detachment to report that a shortwhile ago she and her 18 year old daughter Mary saw what they thought to be a U.F.O. in the sky. She further advised, it appeared to be a very bright whitish star with pulsating white light with bright red flashing light on top at times. She stated it left in the general direction of Port Elgin, N.B.

I left detachment in police transport and upon reaching the intersection of the Moore Road and Highway 16 on the outskirts of the village I could see the object as described by Mrs. DEAN. It was stationary in the sky and stayed so for approximately one hour. I first saw it at 10:10 pm AST. It seemed to be at a high altitude in a somewhat cloudy sky. Cst. Terry STILWELL of the Port Elgin Village Police happened along as I was viewing the object and saw same. It appeared to depart in a westerly direction.

19 SEP 72

- 3. At approximately 1:15 am of the above date, while on patrol to Cape Tormentine, N.B. I again saw the object, which departed in a north easternly direction towards Prince Edward Island. There would be a distance of approximately 12 miles between the 2 sightings.
- 4. Radiogram No. 74 was forwarded in this connection.
- 5. Persons viewing this object are all considered reliable at this point.

3 OCT 72

- 6. At approximately 9:45 pm of the above date Mrs. DEAN telephoned this detachment to report that she had just seen the object again and it had departed in the direction of Port Elgin, N.B. She said it appeared to be quite high in the sky and the weather was somewhat cloudy.
- 7. Cst. ANTHONY made an immediate patrol to the area but could not locate it.
- 8. On the first sighting I caused checks to be made at Summerside C.F.B. and Chatham C.F.B. These were met with negative results.

SEP 2 1 1972

Mr. R. Davis and 3 witnesses saw this object:

Time: O200 Z

Date: September 21, 1972,

Place: Whitelake Ontario, (near Calabogie)

Report: This large, round object with green and red

lights was seen for two hours. It was in the Zenith; it was

stationary for a while the it moved right to left, up and

down. A white light would sometime come on on the bottom

of the object. It the separated in three parts, that is

the main one and two small ones. As it separated, blue,

and amber lights came on. These two objects also moved,

in the same direction as the big one.

This report was phoned by Mr Davis on September 21, 1972 to Meteor Centre.

U.F.O. Report

SouthWest Ottawa

On the 27 SEP 72, information was received at "A" Division Desk from Cst. Ralph THORHAUGE, member of our Force that his wife had sighted a U.F.O. in the western area of Ottawa.

- I interviewed Mrs. THORHAUGE on 28 SEP 72 and the following details were obtained. She was in her residence, 25 Saginaw Crescent, Ottawa and happened to look through the study room window facing the western direction. She sighted a very bright light in an oval shape in the sky. She observed this object for five minutes and then called her neighbour, Mrs. Leigh ANDERSON. Mrs. ANDERSON was accompanied by her husband who also is a member of the Force; both ANDERSONS looked through their residence window and spotted this U.F.O. The same description of the U.F.O. was obtained from the ANDERSONS. The observers were not able to determine an approximate altitude of the U.F.O. but at the time the sky was clear and the approximate time of sighting was between 6:45 p.m. and 7:00 p.m. on 27 SEP 72, Eastern Daylight Time.
- 3. The U.F.O. was sighted in the western direction and from the observers' point of view, the U.F.O. slightly was descending toward the southerly direction. The U.F.O. disappeared from the sight of the observers at approximately 7:00 p.m.
- 4. All observers who reported sighting this U.F.O. are believed to be reliable sources.

CONCLUDED HERE:

Noel STARR came to this office and advised that some of the people on the reserves had sighted a strange object in the 'evening during the last month or so. He stated that Fred STARR had seen it on the 23 SEF 72 and Marion and Jimmy GOFORTH had seen it on the 22 SEP 72. Both persons saw the object from diffrent locations.

STATEMENT OF Marion GOFORTH (B. 11 MAR 34)

"On the 22 SEP 72 at approx. 10:45 PM I was withing husband Jimmy. We were driving south on a road from Junior TUCKANO, 's place. saw what appeared to be a helicopter coming from the east at a high rate of speed. It came closer to us and then dropped down. We got out of the car close to our place but we could not hear anything. It was shaped like and egg. It looked like it had two red lights on it one on each side. It was glowing like a star. I figure we watched it for about 15 minutes. It then turned south and we didn't think anymore about it. I did not see it again."

SGN: Marion GOFORTH

STATEMENT OF Fred STARR (B. 30 AUG 42)

"On the 23 SEP 72 at approx. 3:00 AM I was coming home and I saw what I thought was a morning star in the east. I saw it was bright but I did not pay much attention to it. When I got home Wayne GOFORTH and George SWANSON were watching what appeared to be the sme object. We watched it for about 45 minutes. It came closer and got brighter and appeared to be moving back and forth and up and down all the time. It was bright and round with a red light on each side. We finally went to bed and paid no more attention to it. 'I have not seen it since.

> Fred STARR SGN:

The other stories were identical and statements not obtained. Telex message was released BAL 401 No more sightings have been reported since. It is felt that something was sighted but it is not known what. No further action required from this office:

ROYAL CANADIAN MOUNTED POLICE - GENDARMERIE ROYALE DU CANADA GRC 6880 OTHER FILE REFERENCES: REF. AUTRES DOSSIERS: RCMP FILE REFERENCES; REF. DOSSIERS GRC: "E" 23-11-72 SUB-DIVISION-SOUS-DIVISION Kamloops 72/2682(100 MH) DETACHMENT-DÉTACHEMENT 00 Mile House OBJET: Nelson CRAIGIE (BD: 8 MAY 40) - Report of Unidentified Flying Object Nr. 100 Mile House, B.C. - 29 OCT 72 (UNORG.) 100 MILE HOUSE DETACHMENT

- 1. At approximately 5 A.M. 29 OCT 72, one Nelson CRAIGIE (BD: 8-5-40) of 236 8th Street, New Westminster, B.C. reported the movement of a U.F.O. CRAIGIE, a taxi driver, informed that he and his wife had driven up from New Westminster, B.C. that evening and at approximately 4:00 A.M. this date had been Broceeding east on the Horse Lake Road, 7 miles from 100 Mile House, when he sighted an object in the sky.
- 2. The object was observed for approximately one hour and during this time it was hovering, swaying, and occasionally ascending. CRAIGIE described the object as oval shaped, approximately 20° in length, 5° in depth, very bright with the occasional colour of red and green showing. No sound was heard. At one time the object was approximately 1000 feet from the ground.
- 3. After sometime CRAIGIE reported this matter at this office and pointed out the object to the guard, Otto AUGUSTINE of 100 Mile House, B.C. When questioned AUGUSTINE confirmed that he had seen the same object as CRAIGIE.
- 4. AUGUSTINE called the writer and also pointed same out to me however, by the time it only appeared to be a star of more brillance than the others. This was sighted between the moon and the large dipper approx. 8:00 o'clock position from the moon. This member did not notice any movement or any colour change. And when it was observed through a telescope it was round in shape. This object was still in sight when the remainder of the other stars had disappeared and it appeared to be a considerable distance away.
- 5. Both CRAIGIE and AUGUSTINE were in a normal state of mind and it is this writer's opinion that they definately saw some kind of object at a much lower altitude.
- 6. Due to the foregoing, no further action is being taken at this time. Message was dispatched in accordance with existing instructions. Copy of this report direct to Upper Atmosphere Research Section Astrophysics Branch, National Research Council, Ottawa, Ontario.

Mrs. Condie And her grandson saw this object.

Time: 22 30 Z

Date: October 29, 1972

Place: Outside home at 36 Ashgrove Cres., Ottawa, Ontario

Sky: overcast

Report: Her grandson saw the long narrow object and called her to see it.

It was like a very bright electric light and was heading S-SW.

They watched it for 10- 15 mins. before it slowly dropped below the tree-line.

This report was phoned by Mrs. Condie on 3 November, 1972 to Meteor Centre.

Walter Graham WOLK - UFO Report Regina Dist., Sask.

1 NOV 72

N 72 096.

I attended at the WOLK residence at Estlin, Sask., regarding the reported sighting of a UFO and the following information was learned:

- (a) The sighting was at 10:30 PM CST of 27 OCT 72
- It was a very cloudy night with thick cloud COVEL
- (e) The observers are identified as follows: Walter Graham WOLK (B: 18 MAR 43) Occupation: Real Estate Salesman Judith Elaine WOLK (B: 2 JUN 44) Nee: YOUNG Occupation: Housewife
- (d) The sighting was approx. 10 miles south, 34 miles east and 2 miles north of Regina, Sask.
- (e) There were no other persons witness to the sighting.
- When first observed, the UFO was somewhat of a disk shape and a pale yellow color; however, it changed to a very brilliant orange. When it progressed to the orange color, it began moving at a very acute angle in an easterly direction until it completely disappeared. An altitude could not be determined; however, the illumination produced was bright enough to outline trees in the area. A large orange mist was present for approx. 10 to 15 minutes after the UFO left the area.
- The duration of the observation was approx. four minutes.

 It is my personal opinion after interviewing both subjects that they are well-educated and responsible citizens, and that the information is from a reliable source. dispatched as per instructions.

Dear Siri

This is further to the priority telex forwarded to you by our St. John's Detachment on 15 Dec. 72, concerning the sighting of an unidentified mass near Placentia, Newfoundland.

- 2. On further investigation of this sighting, Constables WATERHOUSE and FRASER now feel the identity of the object to be the moon. Conditions were such at the time of the sighting that the moon was ruled out by our members, however, further observations at the same time on subsequent dates and at the same place has led to this final conclusion.
- 3. I apologize for any inconvenience that may have been caused by this report of an alleged sighting.

Yours truly.

RE: OBJET:

Mr. Zolton PATAKFALVY - Complaint of U.F.O. Sighting Galgary, Alberta 9 JAN 73

CALGARY

9 JAN 73

- 1. On this date, Mr. Zolton PATAKFALVY contacted this office to advise that approximately 7:43 PM, he had bbserved an illuminated canister-type object with a vapour or smoke tail which was also illuminated. The object fell to the ground at approximately a 35 to 40 degrees angle. This object was seen for a time lapse of 2½ to 3 seconds. Mr. PATAKFALVY, at the time of the sighting, was walking his dog approximately four miles northwest of the Calgary International Airport.
- 2. Mr. Dave CARTHEW was contacted at the Calgary International Airport Tower; he advised that they did not have any unusual occurrences during the evening. The weather station, which is located at the Calgary Airport, did not release any weather balloons during the time of the sighting. Calgary Detachment telex message CDET 22 was dispatched to the National Research Council Meteor Centre, Ottawa, Ontario.

10 JAN 73

Jet Was learned that Jet Air, Calgary, Alberta were flying four prop planes at low altitude within the area of the sighting. Jet Air pilot, Captain Glen LONG, was contacted and he stated the crew and himself did not witness any unusual sightings. Captain LONG did, however, give a logical explanation as to how a possible sighting as described by PATAKFALVY could have occurred. At the time of the sighting, Captain LONG and crew were practising firing and flying with one and two engines. He stated that an exercise of this nature carried out during the right atmospheric conditions could produce a vapour or illuminated smoke tail as witnessed by Mr. PATAKFALVY.

12 JAN 73

The following statement was obtained from Mr. PATAKFALVY:

STATEMENT OF: Zolton PATAKFALVY (B: 14 SEP 35). Taken at Calgary, Alta. 12 JAN 73 at 1:45 PM

"While walking my dog on January 9th, 1973 at 7:43 PM, I saw an object in the sky. The location in sky would be, as my judgement, about 5 to 10 miles north of the city limit in conjunction with Travois Place N.W., where I was standing at the moment of this sighting. The object was seen by me for about 2 or 22 second duration and it was traversing the sky in about 35 to 40 degrees angle from east to west. It appeared to me as cylindrical...

OBJET.

CONTINUATION - SUITE DE C237

TWO

Mr. Zolton PATAKFALVY - Complaint of U.F.O. Sighting, Calgary, Alta. 9 JAN 73

(CONT'D FROM PAGE ONE)

...CYLINDRICAL or canister type and was very brightly and definitely illuminated with a vapour or smoke tail closely attached and also illuminated by the object itself. The travelling height of object appeared to be twice the approaching height of an incoming plane. I have seen meteorites before but have not seen such an intensively illuminated as sharply outlined object in the sky which I could not clearly identify".

WIT: (J.W. Radvak) Cst. SGND: Zolton PATAKFALVY

Lieutenant GUSCOTT of the Canadian Forces Base, Calgary, Alberta was contacted to establish whether or not any exercises were being carried out during the evening of the sighting; his reply was negative. During my conversation with PATAKFALVY, he stated that the sighted object appeared to be twice as high as any plane flying within the area of the sighting. There is a possibility that if there were exercises during the evening in question, the sighting could be a B-52 bomber flying at blackout conditions.

and to be well-read. PATAKFALVY stated that he does not read books or writings on unidentified flying objects. As Mr. PATAKFALVY thought this occurrence to be rather odd, he felt it advisable to contact this office in order that we might try to ascertain the reason for the sighting, and its origin.

C 237 REV. 1-4-66

11 FEB 73

- 1. At 12:30 AM, Mrs. PHILLIPS contacted this office via telephone to report the sighting of an unidentified flying object between 10:40 PM and 10:50 PM MST, 10 FEB 73, over the Lake Bonavista Park area in southwest Calgary. She and her husband, Allan Vern PHILLIPS (B:28 JUL 36), including their son Grant PHILLIPS (12 years), were travelling in their vehicle at a slow rate of speed on Lake Bonavista Road when they observed two large lights, one being white and the other red in colour, low in the southern sky. Their view was momentarily obstructed by houses but the object again came into view when they approached Lake Bonavista. The object was observed to be hovering approximately one hundred feet above ground level. The lights were noted as being unusually large, possibly twelve inches in diameter and to emit a constant and brilliant beam. They were estimated to be spaced approximately twelve to fifteen feet apart and between was observed a long silver grey bar or strip. The outer hull of the object could not be distinguished because of the intensity or brightness from the lights, also the atmosphere was illuminated to a certain degree by neighbouring residences but not enough to affect good vision. A rear window was lowered in the vehicle for a little better vision and at this time, it was noted that no noise could be heard coming from the object. In fact, at no time was there any noise heard. After viewing the object for a few minutes, it switched on two more powerful white lights which were placed above and below the first white light. The object they noticed moved slowly in an easterly direction, turned and with a great burst of speed, headed in a northwesterly direction towards the centre of Calgary, staying at the same altitude until it disappeared. The PHILLIPS family remained in their vehicle during the whole sequence which was estimated to be between eight to ten minutes. They did not see anyone else who observed the object.
- 2. Calgary Detachment Telex Message CDET 143 was dispatched as per Operational Instruction CO-NRC to the National Research Council Meteor Centre, Ottawa.
- 3. An enquiry was conducted with the Calgary City Police and they reported that no complaints were received during the evening 10 FEB 73. Checks were made with all the small airline and helicopter companies with negative results. Most companies had no flights in the air during the time in question. All commercial helicopter aircraft are not allowed to fly at night...

TWO

Mrs. Delores PHILLIPS - Complaint of U.F.O. Sighting, 10 FEB 73

(CONT'D FROM PAGE ONE)

...NIGHT in this area except for the Military. Major Myron JOHNSTON, Commanding Officer, #1 Tactical Control Air Control Unit, Canadian Forces Base, Currie Barracks, Calgary, Alberta stated that he had no military aircraft in the area or in fact flying. A check with the major airline companies revealed that two Canadian Pacific Airline Boeing 727 jets and one Pacific Western Airline Boeing 727 jet flew low over the Lake Bonavista area during the times in question. The planes were using runway #34 south approach at McCall Field, Calgary International Airport and therefore, they had to use this area for the approach. Pacific Western Airlines stated that their plane had to come in slow because of heavy air traffic using the runway, as a result slowing down below normal procedures. A Boeing 727 jet has three white landing lights and one red which is on top. This type of plane also has strob lights, red and green, on the wing tips and one small white light of navigation type on the back. There is the possibility these lights were not turned on or were at an angle where they could not be seen. There was an ice crystal condition in the atmosphere and the brightness of the landing lights may have caused a reflection of the light on the ice particles causing a projection, thus giving the stationary or hovering effect. Only when the plane got close would movement be noticed.

- 4. Several checks were made with Air Traffic Control Tower, Calgary International Airport, but they had no know-ledge of any unidentified flying objects. They confirmed several major airline flights coming in around 10:40 PM, 10 FEB 73 and over the Lake Bonavista area.
- 5. At 10:00 AM, 10 FEB 73, the Climatologist report for the Calgary International Airport was middle cloud, partially obscured surface with light snow, visibility three or four miles, wind north at 14 m.p.h., temperature eight degrees above zero, 800 feet scattered and 7,000 feet broken.
- 6. Statements were obtained from Delores PHILLIPS (Appendix "A") and Allan Vern PHILLIPS (Appendix "B") which are attached hereto, original copies held on file. A statement was not obtained from Grant PHILLIPS because of his age and lack of maturity. Also attached is a rough copy of a drawing depacting the general area of occurrence and the U.F.O.
- 7. The PHILLIPS family appeared sincere in the sighting, being awed by the strangeness of the encounter. They appear to be an average family of low income but fairly close-knit. Both parents gave their version of the sighting in almost identical stories. The fact that several commercial jets flew over the area was mentioned but they both declined te...

STATEMENT OF: Delores PHILLIPS (B: 25 APR 37)
1702 - 29 Street S.W., Galgary, Alta. (Phone 249-1000)

11 FEB 73, 2:00 PM Calgary, Alta.

"My husband, Allan PHILLIPS and my son, Grant PHILLIPS (12 years old), were travelling south along Bonavista Drive S.E., Calgary, Alta. in our car. We were approximately one to one and a half blocks northwest of Lake Bonavista, which is also located in the Calgary City Limits. At 10:40 PM, 10 FEB 73, my husband sighted two lights in the sky just above some houses. I was sitting in the right front seat of the car and I looked up through the front window. I observed two large lights—one red and the other white. The lights appeared to be approximately twelve inches in diameter. The lights were constant, not blinking or flashing. We continued driving south on Bonavista Drive as houses were blocking our view. We wanted to see what was causing the light. We drove for approximately one and one-half blocks. Finally, there was a clearing and I saw the object sitting or suspended about one hundred feet above the ground. There was still the bright red and white light.

We continued driving slowly down the road watching this object. I cannot even say what type of an object this was. Between the two lights, there appeared to be a long strip, silver grey in colour. I would estimate the lights as being fifteen feet apart. I could not see the outer shape of the object because of the two penetrating bright lights. The area around Lake Bonavista is fairly well lit-up because of show homes and residences. To the south of Lake Bonavista is bald prairie.

My son, who was sitting in the rear seat of the car, rolled down the left side window to observe it better. There was no sound coming from the object.

We continued driving very slowly watching the object. The object then flicked on two more white lights similar to headlights. They were the same size as the other two and had the same brilliancy. The object then started to move slewly in an easterly direction, turned and then headed in a north-westerly direction. It moved away from us with a tremendous burst of speed, almost like a jet plane. It stayed low to the ground at all times until it disappeared. The object flew over a residential area of Calgary. No noise could be heard. The object was viewed by us for approximately eight to ten minutes, losing sight around 10:50 PM, 10 FEB 73.

The weather conditions and visibility were good. There was only a little frost in the air. The temperature was around seven degrees above zero. After the sighting of the object, we drove around for a short time and came home. At 12:30 AM, 11 FEB 73, I phoned the RCMP Calgary Detachment to find out if there were any reports of this object having been seen WIT: (P.R. Sopow) Cst.

APPENDIX "B"

STATEMENT OF: Allan Vern PHILLIPS (B: 28 JUL 36) 1702 - 29 Street S.W., Calgary, Alta.

11 FEB 73, 3:20 PM Calgary, Alta.

"At approximately 10:40 PM, 10 FEB 73, I was out for a drive with my family and was travelling south on Lake Bonavista Drive S.E., Calgary, Alta. My wife, Delores PHILLIPS, was sitting in the right front seat of my car. My son, Grant PHILLIPS (B: 27 DEC 60) was sitting in the back seat. When approximately one and one-half blocks northwest of Lake Bonavista, through my front windshield I saw two large lights, one being white and the other red. The lights appeared to be coming from over the Lake Bonavista park area which is located in Calgary. I thought it was unusual as the lights were so bright. I mentioned it to my wife. I drove on, so therefore, lost sight of the two lights momentarily because of some show homes blocking my vision. I drove into a clearing and saw an object hovering-or suspended approximately one hundred feet above ground level over the park area.

Lake Bonavista Road arcs to the east so I decided to drive slowly to the direction of the object. My son rolled a rear window down and there was no noise that I could hear coming from the object. We drove a little further down the road and when approximately one city block away, noticed two more white lights come on. I would estimate all the lights to be roughly twelve inches in diameter. All of a sudden, the object started to move very slowly in an easterly direction, turned and headed northwest just like it was shot out of a gun. It appeared to travel towards the centre of Calgary. closest we were to the object was around one city block or fifteen hundred feet. At no time did we ever hear any noise from the object. I could not distinguish what type of an aircraft it was due to the bright lights. Its outer hull could not be properly seen. When first spotted, I felt that the lights were twelve to fifteen feet apart. Between these two lights was what appeared to be a silver grey bar. When the other two lights came on, they were situated up front with the first white light. The object remained above the ground around one hundred feet at all times. The object was viewed by all three of us for approximately eight to ten minutes. It was last seen around 10:50 PM, 10 FEB 73.

The weather and visibility was good but there was a little frost in the air. The temperature was around seven degrees above zero. Lake Bonavista was not totally in darkness as the residences in the area gave some light to assist in visibility.

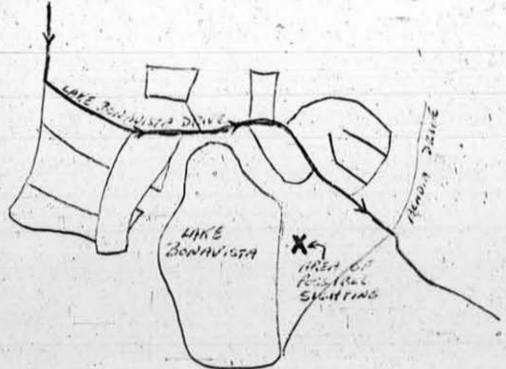

We drove around some more, then home, where my wife phoned the RCMP Calgary Detachment to report the incident".

Dear Sir:

Re: Unidentified Flying Objects, Near Drumheller, Alberta 30 JAN 73.

At 9:30 A.M. 30 JAN 73, Lewis (Bud) HANSEN(B:5-8-19) phoned this office and reported that while he was returning from Calgary at 1:30 A.M. 30 JAN 73, he had sighted a U.F.O. HANSEN was in a motor vehicle operated by Bernard CHIUPPI (B:18-2-37) and passenger Arthur BEREZUK(B:15-10-40). They saw the U.F.O. while they were driving on Highway #9, one-half mile south of Drumheller. The sky was clear at the time and the U.F.O. was reported to be a flourescent orange circle. It appeared to have two fins or jets or light beams extending from this sphere. The U.F.O. travelled west to east in a horizontal path from 5 to 15 miles per hour. The U.F.O. was observed for 10 to 15 seconds at which time sight was lost as a result of passing behind hills between it and the observers.

Statements were obtained from these men and are attached.

During the course of this investigation it was found that John E. HAMM(B:11-6-39) of Drumheller, Alberta, viewed an U.F.O. on 21 JAN 73. He was interviewed and his statement is attached. Mr. HAMM is a retired RCAF member and his statement would have to be considered quite accurate.

At 9:30 A.M. 30 JAN 73, Lewis (Bud) HANSEN(B:5-8-19) phoned this office and reported that while he was returning from Calgary at 1:30 A.M. 30 JAN 73, he had sighted a U.F.O. HANSEN was in a motor vehicle operated by Bernard CHIUFFI (B:18-2-37) and passenger Arthur BEREZUK(B:15-10-40). They saw the U.F.O. while they were driving on Highway #9, one—half mile south of Drumheller. The sky was clear at the time and the U.F.O. was reported to be a flourescent orange circle. It appeared to have two fins or jets or light beams extending from this sphere. The U.F.O. travelled west to east in a horizontal path from 5 to 15 miles per hour. The U.F.O. was observed for 10 to 15 seconds at which time sight was lost as a result of passing behind hills between it and the observers.

Statements were obtained from these men and are attached.

During the course of this investigation it was found that John E. HAMM(B:11-6-39) of Drumheller, Alberta, viewed an U.F.O. on 21 JAN 75. He was interviewed and his statement is attached. Mr. HAMM is a retired RCAF member and his statement would have to be considered quite accurate.

National Research Council of Canada/ Conseil national de recherches du Canada

I have patrolled this route as travelled by the observers. I have noticed a large gas well stack flame across the valley about 3 miles away. The flame illuminates the scene in the surrounding area giving the effect of wings or vapour trails. The motion of the motor vehicle causes the flame to appear to be moving. Visual contact is broken as the highway passes behind the hill beside the roadway into the Drumheller Valley.

Yours truly,

(L.L. Spring/23946. Drummeller City Detachment.

STATEMENT OF Lewis (Bud) HANSEN(B:5-8-19)

At about 1:30 AM Tuesday, 30 JAN 73, I was returning to Drumheller from Calgary on Highway #9. I was with Ben CHIUPPI and Art BEREZUK in Ben's 65 Buick. Ben was driving and I was in the front seat passenger side. While coming down the south hill into Drumheller at the "mattress flats" area, I saw one circular flourescent orange object about 20 feet in diameter in the sky. It was slightly to the left through the windshield. We didn't have to look up; it was straight ahead. There appeared to be a fin or jet on each side that appeared to be shooting out a silvery colour. It flew from west to east and seemed to move about 5 to 10 miles per hour. It flew horizontal and there was no vapour trail. We slowed down to watch. We couldn't hear any noise from the object. As we approached the second downgrade, the object passed behind the hill. I told Ben to step on it so we could get clear of the hill to the bottom and see what it was doing or where it went but we didn't see it again. We stopped at just about the city limits at the south end of the City to look but couldn't see anything further. The sky at this time was clear.

STATEMENT OF Bernard CHIUPPI (B:18-2-37)

At about 1:30 AM Tuesday, the 30 JAN 73, I was driving back to Drumheller from Calgary. Bud HANSON was in the front seat beside me and Art BEREZUK was in the back seat near the passenger side. On the "mattress flats" on the south hill coming into Drumheller, I saw a bright orange circular object in the sky. It was a round ball-like object, on each side there was a straight silver line about 100 feet. The area was lit up by the light but it didn't hurt your eyes to look at it. The orange object appeared to be about 25 feet in diameter. It went from east to west at about 10 to 15 miles per hour in a horizontal line. It didn't make any noise. I saw it-pass for about 10 seconds till it went behind the hill. The object appeared to be over the valley close to the south hill edge. When we entered the city limits at the bottom of the hill we didn't see it go, it was just gone. I thought it was a meteor at first but now that I think about it, it is quite different. The object just appeared ahead of us. I could see it clearly through the windshield. The night was dark but not cloudy.

STATEMENT OF John E. HAMM (B:11-6-39)

At approximately 11:35 PM on Monday the 21 JAN 73, I was driving to work at the Drumheller Renitentiary on Highway #9, approximately 1 mile south of Drumheller, at the top of the south hill; when I noticed a bright white light travelling in a southerly direction. The light appeared to be about 3/4 of a mile up and travelled at about 400 to 500 knots. At first I thought it was an aircraft landing light, however, the light would have been travelling backward. I don't feel it was a meteor; there was no tail on it and it flew very level across the sky. The light appeared round and was difficult to judge the diameter. I watched the object for approximately three to four minutes. The sky was clear at the time of seeing this object.

27 FEB 73

- This date at 6:30 PM, NST, I was driving from my home in Carbonear and had just started to proceed along the new highway towards Harbour Grace. As I travelled up the road I noticed to my left in the sky an object, white in colour, travelling in a north-westerly direction. As this did not appear to me to be an airplane or the like, I pulled my car in to the side of the road and stopped.
- 2. Upon turning off my motor and rolling down my window, I had an excellent view of this object. The condition of the sky was very clear. As mentioned previously, this object appeared white in colour, like the white of a star, to the naked eye. This object appeared two or three times larger than a star and there were no other colours visible. This object was moving in a straight line staying relatively parrellell to the earth. The sighting lasted approximately one minute. The object either got out of sight or just disappeared as it could be seen one second and then vanished the next. There was no sound to be heard coming from this object and there was no trail or other material moving behind or around it. The light coming from this object appeared to pulsate erratically and at no time did it go out completely.
- I immediately checked the airport at St. John's and it was learned from that point that there should not have been any other object in the vicinity of Carbonear at the pertinent time of 6:30 PM. The R.C.M.P. helicopter MPZ was landing at the airport in St. John's at approximately this time, however, their direction of travel was directly opposite to the object which was sighted.
- I was the only known witness to this sighting and at the time I called via our radio system to Cst. G. WEST to have him look in the direction of Carbonear to see if he could sight the object, however, by the time he got outside, the object was apparently gone.

I have been with the R.C.M.P. for thirteen years of which most of my police time was consumed on criminal investigations and one and a half years as court prosecutor.

"CONCLUDED HERE"

Fwa (W.H.G.) S/Sgt.

1/c Det.

D.A. POWER)#21179. Harbour Grace Detachment. On the 8 th March 1973, the following report was given on the telephone:

Date: March 7, 1973

Time: '10:00 EST

Place: at Merivale Arena, Ottawa, Ontario.

Observer: Mr. Connolly,

42 Lindhurst Cr., Ottawa, Ontario.

The observer, with 3 friends, saw 3 flashes across the Northern horizon, 3 seconds appart. The flashes were from the NW to the NE. They looked like a search light moving across the sky. The last of the flashes was a bright white. The total length of the sighting was about 10 sec.

Dated: March 9, 1973. C.C.

PERSONAL U.F.O. SIGHTING

TUESDAY 26 11: P.M. SEPTEMBER 1972

CLARENCE H. WHITE

RR # PLUMMER ROAD PARKSVILLE

VANCOUVER ISLAND B.C.

RELIABILATY: AMATEUR ASTRONOMER N13 012 DURATION OF SIGHTING 5 MINUTES STANDING ON THE SHORE LOOKING ACROSS GEORGIA STRAIT WHEN SPOTTED LARGE ORANGE GLOWING OBJECT OVER EASTERN HORIZEN. OBJECT HAD A WHITISH BLUE HALO OR CORONA AROUND IT. OBVECT GLOWED BRIGHTLY FOR ABOUT TWO MINUTES. THEN QUICKLY DIMED UNTIL BARELY VISABLE WITH THE NAKED EYE (U.F.O. ALSO VIEWED THROUGH HIGH POWERED BONOCULARS) THEN BECAME EQUALY AS BRIGHT AS BEFORE. AFTERA FEW MINUTES OF WATCHING IT THROUGH BONOCULARS IT RAPIDLY DIMED AGAIN AND VANISHED. (U.F.O. REMAINED STATIONARY)

OF ANY DESCRIBTION, ASTRONOMICAL OBJECT OR REFLECTION OR A METEOROLOGICAL PHENOMINIA OF ANY KIND. VISABILITY WAS GOOD, CLEAR CLOUPLESS SKY.

WEATHER CONDITIONS

THE 26 OF SEPTEMBER, THES DAY NIGHT WAS COOL AND CLOUDLESS, STARS SHININING. MOON WAS APROX. 45 DEGRES ABOVE EASTERN HORIZON. TIME 11:00 P.M. SLIGHT BREEZE.

LOCALITY OF SIGHTING

SIGHTING TOOK PLACE ON THE EASTERN SHORE OF VANCOUVER ISLAND LOOKING ACROSS GEORGIA STRAIT TOWARDS THE EASTERN HORIZON. NEAREST TOWN IS PARKSVILLE NORTH WEST UP THE COAST ABOUT A MILE. NEAREST AIRFORCE BASE AO MILES NORTHWEST UP THE COAST (COMOX).

APPEARENCE OF OBJECT

GLOWING UBJECT

BLUEISH WHITE HALO OR CORONA AROUND OBJECT

U.F.O RETURNS

TUESDAY 10 - 8:45 P.M. - OCTOBER 1972 DURATION: 10 MINUTES WEATHER CONDITIONS: CLEAR & COOL ARRIVED AT BEACH SAME LOCATION AS. BEFORE ABOUT A QUARTER TO NINE AND SALU THE SAME BRICLIANT ORANGE CBUEST 1 SAW TWO WEEKS PREVIOUS ON SEPT. 26 ONLY OBJECT MOVED THIS TIME, WILE OBJECT REMAINED STATIONARY BEFORE ON THE 26.4 WHEN I FIRST SAW OBJECT IT WAS ABOUT TWO OR THREE DEGREES TO THE RIGHT OF ITS PREVIOUS POSITION TWO WEEKSEARLIER IN RELATION TO ISLAND ON HORIZON, U.F.O. GLOWED BRIGHTLY FOR A COUPLE OF MINISTES THEN SLOWLY DIMED FOR TWENTY SECONDS AND THEN BECAME BRIGHT AGAIN, THEN-ONCE MORE OBJECT DIMED AND GRADUALY BEGANI TO MOVE TO THE RIGHT IN A WESTERLY OR SOUTHWEST PIRECTION. U.F.O. MOVED THE FULL LENTH-OF ISLAND REVERSED DIRECTION AND SEEM-ED TO MOVE FARTHER AWAY. WHEN IT ARRIVED IN LINE WITH ITS ORRIGINAL POSSITION IT SUDDENLY SHOT RAPIDLY INTO THE AIR AT A 45 ANGLE AT A

N73/018

TREMEMOOUS SPEED AND WAS GONE,

THIRD APPEARANCE OF U.F.O

TWIN U.F.O. SIGHTINE

WEDNESDAY II - 8:50 P.M. OCTOBER 1972.

DURATION: 15 MINUTES WEATHER: CLEAR & COOL

THIS TIME THERE WAS TWO U.F.QS IN STEAD

OF JUST ONE AS WERE THE TWO PREVIOUS

SIGHTINGS: BOTH OBJECTS BEGAN TO MOVE

SOUTH (AS SHOWN ON MAP) ONL AT A SLIGHLY.

HIGHER ALTITUDE. THEN THE LOWER ONE HOUVER
ED AND THEN GRADUALLY DECENDED TOWARDS THE

HORIZON UNTIL IT WAS OUT OF SIGHTIBE
HIND MISTAKEN ISLAND. THE OTHER OBJECT

CONTINUED TOWARDS POINT (B) ON MAP AS SHOWN

AS DID LAST NIGHTS U.F.O. THEN REVERSED COURSE

AND RETURNED TO SPOT WHERE OTHER

OBJECT DECLNOED. OBVECT THEN BEGAN

TO LOSE ALTITUDE AND DISAPPEARED BEHIND ISLAND

ON HORIZON, FIVE MINUTES LATER IT

RETURNED, HOUVERED FOR ABOUT TWO

MINUTES AND DECENDED TOWARDS HURIZON AGAIN AND WAS GOILE.

SAW U.F.O. FOR A BRIEF PERIOD OVER SAME AREA. OBJECT FLEW SOUTH FOR ABOUT 15 SECONDS AND VANISHED.

2

FIFTH SIGHTING

FRIDAY 13 - 8:40 P.M. - OCTOBER.

THIS TIME I SAW FOOR U.F.O.S FLOAT ING ON THE WATER ALL IN A LINE. THEN THEY ALL AT ONCE SEEMEN TO SUBMURGE UNDER THE WATER. ABOUT FIVE MINUTES LATER I SAW A LARGE ORANGE GLOWING LIGHT RISE OUT OF THE WATER AND RAPIDLY MOVE TOWARDS MY DIRECTION AND SEEMED TO BE A FEW FEET ABOVE THE WATER. THEN IT SUPPENI-LY STOPED AND MOVED AWAY FROM ME ATA INCREDIBLE SPEED AND DISAPPEARED BEHIND MISTAKEN ISANO. AGAIN TWO MORE OBJECTS EMERGED OUT OF THE SEA WHICH ALSO SEEMED TO HOVER OVER THE WATER. IN A FEW MINUTES THEY ALSO SUBMERGED. FIFTEEN MINUTES LATER I SAW ONE OF THE OBJECTS. LISE UP FROM THE WATER AND FLY OFF TOWARDS THE SOUTH VANISHED, THEN ANOTHER OBJECT ROSE UP FROM BEHIND THE ISLAND, MANOUVERED AGOUT FOR A FEW MINUTES AND SLOWLY

13/02/

0

SANK DOWN BEHIND THE ISLAND

THE OBJECTS SUGMERGE THE WATER HAD A STRANGE GLOW WHICH LIT UP THE ISLAND. WHEN THE OBJECTS FAILED TO RETURN THESTRANGE GLOW DISAPPEARED.

WRITTEN ON NIGHT OF SIGHTING FRIDAY 13.

SIX SIGHTING

SATURDAY 14 8:40. OCTOBER
WHETHER CONDITIONS: CLEAR, COLD, MOON.
THIS TIME I SAW ONLY ONE OBJECT
WHICH MOVED IN A NORTHERLY DIRRECTION FOR ABOUT A MINUTE AND
A HALF, THE OBJECT FIRST APPEARED OVER THE LAND HOVER ING THERE
FOR A FEW SECONDS, THEN BEGAN
TO MOVE NORTH, WHEN YT WAS ABOUT
TWO MILES (BY ESTAMATE) OUT AT
SEA IT SUDDENLY VANISHED

WRITTEN ON NIGHT OF SIGHTING.

N33/022

SEVENTH SIGHTING

MONDAY 20 8:50 P.M. NOVEMBER

DURATION: 5 MINUTES

THE OBJECT WAS IN THE SAME POSSITION AS THE OTHERS WERE BEFORE. WHEN

I FIRST SAW OBJECT IT WAS HOVERING IN ONE SPOT THEN SLOWLY SANK BE-HIND MISTAKEN BTHEN IT ROSE UPWARD SLIGHTLY HIGHER THEN BEFORE AND BECAME VERY BRIGHT AND HOVERED

FOR A MINUTE OR TWO AND DESENDED

INTO THE SEA AGAIN. I DIDN'T SEE IT ANY MORE THAT NIGHT.

EIGHTH SIGHTING

SATURDAY - DECEMBER 2 - 8:50 .
DURATION: 2 MINUTES

N13/021

NATIONAL RESEARCH COUNSEL Meteor Center Ottawa, Ontario, Canada Klaors

Gentlemens

'I would like to report an unidentified object which appeared in the lower sickle of Leo on the night of April 28, 1973.

I have speculated that this object was receding from the Earth, because as it proceeded in a southerly direction, it slowed down in apparent motion and dimmed in apparent brightness.

Here are some of the statistics I have drawn from this phenom-

- Observed with the unaided eye, apparent diameter determined from short look through binoculars.
 - 1. No sound accompanied trail.
 - 2. Color: blue/white.
 - 3. Apparent diameters 5 seconds of arc, same as nearby Regulus, in Leo.
 - 4. Beginning of trails April 28th, 8:58 EST; April 29th, 1:58 UT
 - 5. End of trails April 28th, 9:06:40 EST; April 29th, 2:06:40 UT
 - 6. Duration of trails 8 minutes, 40 seconds.
 - 7. Rate, average: approx. 10 per minute.
 - 8. Beginning of trail observed immediately after cloud break, may have began before mentionned time and place.
 - 9. Brightest magnitude: + 1.7.
 - 10. Observed beginning of trails Dec. 15° North, RA 9H 45 min..

(over)

11. End of trails Dec. 7º 35 min. North, RA 9h 57 min.

12. Length of trails 80.

This observation was made at latitude 40° 44 min. North, longitude 73° 38 min. West.

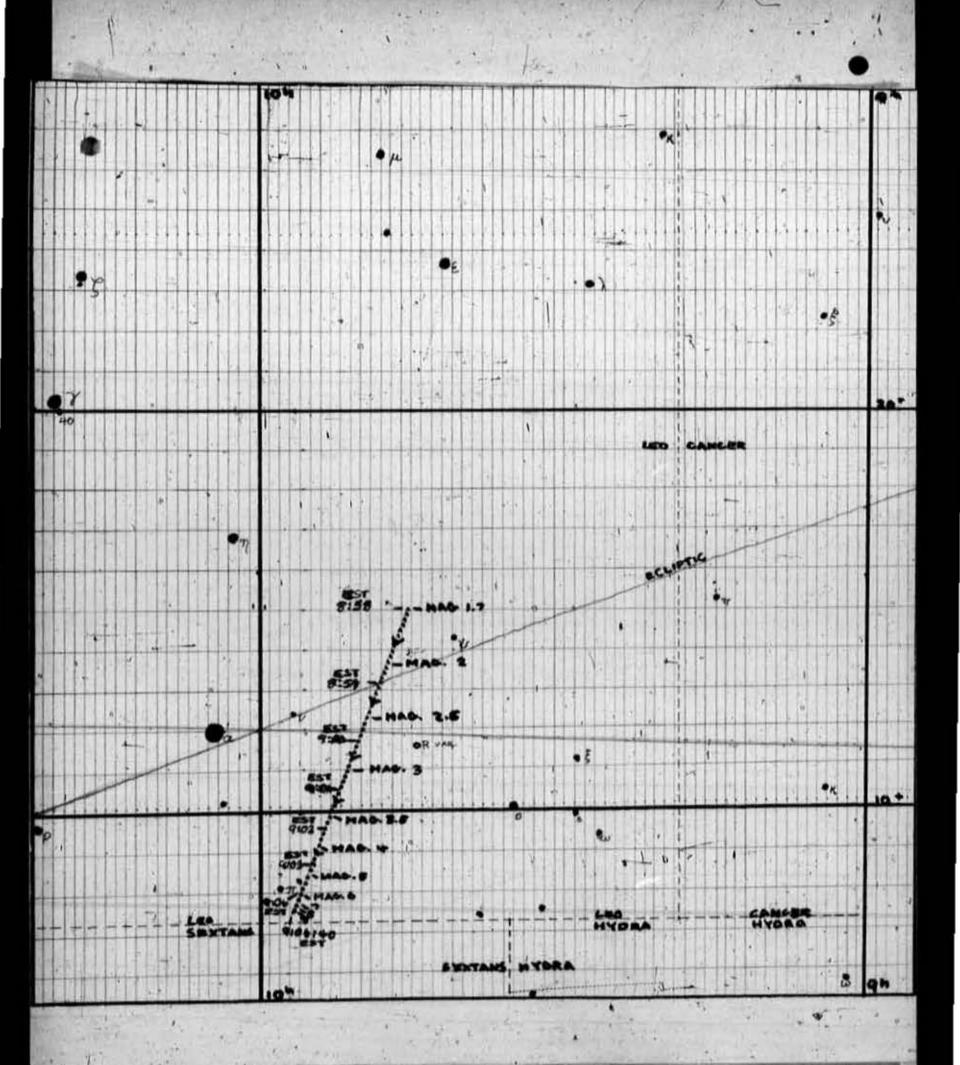

Position above sea level: approx. 30 meters.

I would appreciate your answering this letter to notify me if any other observer has spotted the same object, or if you have identified it.

Sincerely yours,

Mark Pircaro

Mark Pircapo, 1707 Belmont Avenue, New Hyde, N.Y. 11040, U.S.A.

Dear Sirt

Thank you for the report of your observation of April 28, 1973, It has been catalogued and entered in our files.

As of today, your report is the only one we have of this sighting. The apparent magnitude, the duration and the motion of the object suggest a satellite.

Yours truly,

·cc

(Mrs.) C. Chenier, Meteor Centre, National Research Council.

Sir:

Re: Unidentified Flying Objects

Sightings of U.F.O's in an area 14 miles south and 2 miles West of Minburn, Alta. by a number of persons were reported to you on or about the 7 MAR 73. The sightings had taken place a few days before Mannville Detachment was advised. The persons were told to report the next sighting immediately.

At approx. 10:00 P.M. of the 14 APR 73 an Everett GREENWOOD and a Mrs. CROUSE, both living in an area approx. 6 miles north and 6 miles east of Kinsella, Alta. reported seeing strange lights in the sky. Information as follows:

(a) 14 APR 73, approx. 9:30 P.M. (b) sky was clear

(c) Everett GREENWOOD, Lois CROUSE, & Earl McBEATH

(d) 6 miles East and 5-6 miles North of Kinsella, Alta.

(e), as in (c)

- (f) 3 or 4 yellow & reddish lights, in "L" shape, apparently standing still, perhaps moving eastward along # 14 Hwy. in direction of Fabyan or Wainwright, Alta. Lights appear to turn of and then on again - not constant blinking.
- (g) perhaps five minutes.

Patrol made to area. Extreme fog at ground level - clear sky above. Nothing unusual noted. McBEATH contacted driving around area - claimed to have taken photo of lights at about six mile distance. Report delayed pending receipt of processed film. McBEATH claims film returned with negatives completely dark - no lights - not unusual with camera type under such conditions.

No additional reports of sightings to this date.

The following information was called to the Meteor Centre on June 13, 1973.

N73/03/

Date: June 12, 1973

Time: 1000 PM

Place: At home, Gatineau Point, P.Q.

Observer: Don Theriault,

185 St. Antoine Street, Gatineau Point, P.Q.

Observation:

A red and white star was still for 4 minutes, then it seemed to fall east of the house. It was blinking; it also looked like the northern star. It was in the NW but more to the North than the West.

Note: Venus was visible at that time $A\bar{n}$ the area. Its magnitude is -3.3.

Mankota, Sask. 4 JUL 73

National Research Council Upper atmosphere Research Section astrophysics Branch Ottawa, Ontario

Dear. Sir:

Ren U.F.O. Sighting Mankota Dst., Sask. 22 JUN 73

On the above noted date, at 9:00 PM I was informed by Swift Current Telecommunications that Mrs. Lyle BARKER of the Mankota District, Sask. had phoned enquiring about an Unidentified Flying Object which she was observing from her home. I visited the BARKER farm located 4 Miles South-West of Mankota. Mrs. BARKER pointed out the object to me. At this time it was West of Mrs. BARKER s residence and quite high in the sky. It appeared to be round and was giving off a yellow light which I believed to be caused from the rays of the sun hitting this object. Mrs. BARKER went on to state that this object had come into view from the South East at approx. 7:00 PM and had slowly travelled to its present position West. The object was still in view at 9:40 PM and could also be viewed from the Gravelbourg Det. Office as this was requested via police radio of Cst? J. BAKER. The object was not visible when the suns rays set. The sky at this time was clear.

2. It is requested that should this object be identified that this office be advised for the interest of the persons concerned.

Yours truly

ti-c Mankota Detachment.

ONEL

WARDLOW, Ken, Sightings of U.F.O.'s Drayton Valley, Alberta 29 JUN 73

29 JUN 73

1. At approximately 12:55 AM, WARDLOW contacted this office and stated that he had sighted objects in the sky for the past two days. Requested a member come to his residence in Drayton Valley to investigate. A patrol was made to his residence and he pointed out that these objects were coming from the west and travelling across the south part of the sky in an easterly direction. During his explanation, an object went by high in the sky that fit the description given by WARDLOW. He confirmed that this was one of the objects, and that it was the eleventh sighting that he had made this evening. WARDLOW was in the company of his family at the time of these sightings.

Drayton Valley Telex #59 was dispatched to the N.C.R. METEOR CENTER info COMMISSIONER, laying out as instructed the required information.

18 JUL 73

WARDLOW reports sightings for a period of one week after he contacted this office. States that they (objects) started coming from a more northernly direction and travelled south disappearing there. At the end of this week they stopped coming.

WARDLOW is an upstanding citizen in this community, and is a reliable source. His unfounded opinion is that these objects are space litter from past space shots.

I also sighted one object as pointed out to me by WARDLOW, and as indicated in the Telex message, I have no opinion, however, on what it might be.

Professor E.I. Leith, Regional Representative, National Research Council, University of Manitoba, Winnipeg, Manitoba.

Dear Sir:

Re: Suspected Meteorite Landing, Fort Frances, Ontario - 12 JUN 73

The following is the substance of a report dated 15 June 73 submitted by Cst. M.D. LEAMAN of our Fort Frances Detachment, Ontario.

"At approximately 3:30 P.M., 13 June 73, 3. BURGHARDT of the Ministry of Natural Resources, Fort Frances, Ontario called this office to report that a resident of Fort Frances, Mrs. Helen CORAN, had heard what she thought was a meteorite. The location given by BURGHARDT was east of Lloyd's Tug Service, 315 Armit Ave., Fort Frances, Ontario. The suspected landing site was on the bank of the Rainy River in approximately 2' of water.

scene and found two holes, the smaller of the two being approximately 50' east of Lloyd's Tug Service and the larger approximately 25' further east.

The larger hole was approximately 6' wide and 8' long running lengthwise from east to west, the east end being shallower than the west. The ground on the west lip of the hole was pushed up to form a ridge approximately 8" high and 6" through, indicating possible entry from east to west. The smaller hole was approximately 5' in diameter and more uniform in shape and both holes were approximately 2½' deep.

.../2

Re: Suspected Meteorite/Landing, Fort Frances, Ontario - 12 JUN 73

Professor E.I. Leith.

Mrs. CORAN was interviewed by myself and she advised that at approximately 12:00 MN, 12 June 73, while at her residence, a strange noise was heard. She stated that this particular sound was heard only by herself as her family had retired for the night. The following morning her son discovered the above mentioned holes, which are approximately 200' from the CORAN residence. Mrs. CORAN also advised that her son indicated to her that the holes had not been there the previous day.

On the 15 June 73, with the use of skin diving equipment both holes as well as surrounding area were searched by myself. The search proved negative although the possibility exists that the object is embedded in the river bottom. Further investigation proved negative."

Yours truly,

W.B. LUROSS & Supt., Officer 1/c C.I.B.

The University of Manitoba

Department of Earth Sciences Winnipeg, Canada R3T 2N2

June 28,1973

Dr. Peter Millman, National Research Council, Ottawa, Ont.

Dear Dr. Millman,

Though I am no longer the

Regional Rep. for the Assoc. Committee for Meteorites I still receive notices etc. for the R.C.M.P. and the Air Force which I turn over to Dr. Clark who has taken over from me. However Dr. Clark is away on vacation and I am sending you a copy of a letter I received this morning from the R.C.M.P. I thought you might be interested in it as an unusual one.

Sincerely

Ed. Leith

[N.73/060]

July 6, 1973.

Prof. E. Leith, Department of Earth Sciences, The University of Manitoba, Winnipog, Manitoba. R3T 2N2

Dear Ed:

Thank you very much for your communication of June 28.

This is an interesting record. Isn Halliday and I have talked it over and we feel that there is not much more that can be done at present. We have placed it on the file of possible meteoritic incidents and, naturally, we will be interested to hear if anything further turns up.

Sincerely,

Peter M. Millman.

PMMIN

On July 10, 1973, Mrs. Fee give the following information on the telephone to Meteor Centre:

Date: July 09, 1973 Time: 12:00 to 1:00 am

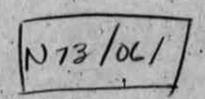

Place: In the house, facing south.

Observer: Mrs. Fee,

712 Echo Dr.,

Ottawa, Ont. Tel: 234-8904

Observation: For the last few nights, she had seen a large very bright diamond shaped light slowly drifting across the sky. It was travelling E. to W. It would take 30 min. for it to cross the sky. It was below the cloud.

RG 77, Vol. 307

145-1-33 PILE WITH M Warnes It cletcalfe avenue, Mondreal 215 July 30, 1973 N73/074/ have been gwen name and address by the Meteorological Dept. of Mcgell Monwersety. My husband and I are in search of someone who might be able to supply us with a reasonable explanation of a certain experience me had last night as me dione along the highway. between OHawa to Montreal. Ladd here that we are two reople with our "feet-on-the ground"

ntional Research Council of Canada/ enseil national de recherches du Canada RG'77, Vol. 307

it appeared spherical & one steady ball of light sadiated out of it. As we appoached it very closely (it was the left of us, own the fields) I finally douded that it was nothing but a lunge metal sphere perched our a very high tower as we came alreast of it was not standed, we could tell it was not stahing. It was moving in the direction of others, we could tell it was not stahionery. It was moving in the direction of others, should be fields. Inddenly, its appearance changed & both my husband (the cautious skeptic.) and I could see quite choice of quite distinct

and ony knowand is a mounted of Mcgillo metallugical Engineering Dept - * a sceptical scientist type!

Crowned 9:00 pm, about half an hour out of Ottoma on the Trans-lander Hylmay Sunday, July 29th) I noticed an enormous star-like object. I commented to my his band it really seemed to large to be a star or a planet, the moreover, it premied too low to the ground. Its size your even larger as we approached it is we began to hypothesize

lit - up windows in its front - but hone behind. The windows had straight sides & were huge - like bay windows. Much bo large a lit-up area for an aeroplane, etc. The best way to describe it would be "a flying restaurant" (Sattempt a small drawing here) I know this sounds abound, but this is how it was. Did augone else report this? What colled this object haire been ? Hoping to hear from man the By no John Jonas

August 8, 1973.

Mrs. J. Jonas, 311 Metcalfe Ave., Montreal 215, Quebec.

Dear Mrs. Jonass

In reply to your letter regarding an unusual sighting on the evening of July 29, I believe I can answer you questions.

A group of scientific and technical staff from NRC, including myself were driving south on highway 31 at the time you mention. This group has been observing and photographing the night sky for many years and we are used to evaluating lights in the night sky. People in two different cars seported seeing a bright light such as you describe and when we reached the Observatory the comment was made that others would surely report seeing this unusual light.

It was observed by at least one person to be a DC 9 aircraft, circling while waiting to land at Ottawa and with all its landing lights turned on. It is not normal for an aircraft to fly so low and with landing lights on so that is why we suggest that it was circling while waiting to land. We all agree that your description of an extremely bright light with rays shining out in one direction, scaetimes appearing to be still and sometimes moving low over the trees, describes very well what we saw too. The human eye often interprets unusual things in terms of more familiar objects and the three bright windows could

Mrs. J. Jonas

August 8, 1973.

have been the three landing lights appearing separately as the aircraft turned towards you.

I hope you find this to be a reasonable explanation.

Yours sincerely,

A.A. Oriffin
