Our Ref: UFO Report

11 May 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 2 May 2009 over Buckhurst Hill, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Buckhurst Hill for 2 May 2009.

I am sorry I could not be more helpful.

Subject: UFO Sighting Ammanford Dyfed 3 May 21:30

Section 40

I have a UFO sighting of 7 orange orbs that suddenly disappeared. They were on a North South trajectory over Ammanford in South Wales (Dyfed?) on 3 May 2009 at 21:30.

The witness only gave a few details, but as he was a helicopter pilot at home with a few fellow pilots, I thought I would check with you if your people had noted anything unusual for 3 May in that part of the world.

He stated that he had contacted Cardiff Airport who had no record of anything on their radar.

Personally, I suspect Chinese lanterns as it was a bank holiday weekend!
Could you let me have something by 25 May so I can close this down?

Dear Section 40

Thank you very much for your e-mail about the UFO that you and your friend saw in Barnet.

At the Ministry of Defence we receive a lot of UFO reports but I want to reassure you that we have never received one that we thought was a threat to people's safety.

We only ever investigate a handful of reports like yours a year because it would be very expensive to investigate them all, but we suspect that if we did, most of them would be caused by aircraft, stars or the light playing tricks with people's eyes. When we do investigate them, it's only to see if the country's airspace might have been affected but we haven't any evidence of this so far.

Although we haven't had any other reports from Barnet, we have had three other reports for London on the same day as yours and I thought you might like to read them.

I hope this is helpful.

Dear sir or madam in the mod

I saw a UFO on the 26/04/09 at about 4-5 PM

It was over north London in friery park in frien barnet north Eastish
I was with my friend and he saw a silver stick object with things sticking out.
It was quite far away in the sky. When you saw it and looked away it took
me a wile to find it again. It was moving slowly and then it disappeared. It
apeard again (or another one) moving quite fast near some clouds. Then it
went away because of some trees. There was 2 other people I told a man
who had a number to the mod and my friend Section 40

Thank you

Yours sincerely Section 40

Section 40

Our Ref:
UFO Report

5 May 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 26 April 2009 over Huddersfield, details of which were passed to us by West Yorkshire Police. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

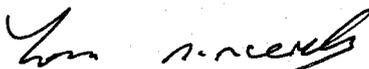

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Huddersfield for 26 April 2009.

I am sorry I could not be more helpful.

UFO Report

27 April 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 19 April 2009 over Snodland, details of which were passed to us by Kent Police. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Snodland for 19 April 2009.

I am sorry I could not be more helpful.

Yours sincerely

I am responsible for UFO matters within the Ministry of Defence.

I received a message from Kent Police on Sunday 19 April 2009 regarding a UFO sighting (CAD Ref 19-1453) and would like to write to the person that reported it to explain the MoD general position on UFOs.

Could you therefore provide me with contact details for the individual concerned and, if possible, written details of the sighting itself.

A am happy to discuss further if you wish.

 Subject: Release-Authorised: 20090427-UFO Report Section 40 esmere 2008-U

Dear Section 40

Thank you for your e-mail of 15 April 2009 concerning a UFO sighting you made on 11 July 2009. You asked whether there were any other sightings reported to the Ministry of Defence (MoD) that matched your sighting in terms of time, location and description.

Firstly, it may be helpful if I explain that the MoD examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

Details of UFO sightings reported to the MoD for the period 1997-2008 can be found on the MoD website www.mod.uk by searching under "UFO Reports" however, we have no record of any sighting similar to yours for 11 July 2008.

I am sorry I can not be more helpful.

Attachments: Planes over Ellesmere, 11th July 2008.xls; 300508 001.jpg; 300508 002.jpg

Dear UFOdesk,

I attach a report which I filed with MUFON in July 2008.

I recently copied this report to Section 40. He suggested that I should also forward it to yourselves, and enquire whether you received any other reports that might tie in with mine, in terms of time, location and description.

Any information would be gratefully received.

Many thanks.

Section 40

16/04/2009

DATA SHEET

11 Planes over Ellesmere, UK on 11th July 2008

OBSERVERS

Date & Time	Friday, 11th July 2008. 1435 hours.
Place	Exiting through outskirts of Ellesmere, Shropshire, UK by car at 30 mph on A528 towards Overton on Dee, driving in a North West direction.
Observers	1) Section 40 (Driving); 2) Section 40 (Passenger)
Weather	Bright daylight; occasional high banks of cloud; no wind; no rain. Visibility Excellent.
Feelings	Amazement at their sudden appearance, at the number of planes, their unfamiliar shapes and how low and slowly they were flying.
Other Witnesses	1) Section 40 working at Ellesmere Marina: "Probably on their way to Shawbury airfield." N.B. RAF Shawbury is about 14 miles to the South East of Ellesmere. No public spectator events are scheduled for this week on the station calendar. Low flying helicopter and fixed wing training is carried out in this area; Air Traffic Controllers are trained here. See http://www.raf.mod.uk/rafshawbury/flyinginfo/lowflying.cfm 2) Section 40 working at Ellesmere Marina: "I saw 5, then 4, then two single planes. Someone said they were Lightning jets, but I don't know how he would know." N.B The planes we saw bore absolutely no resemblance to Lightnings - see http://www.lightningusa.org/index.html

PLANES

Formations	11 off planes, grouped in 2 off arrowheads, followed by 2 singles - 5 + 4 + 1 + 1. Last plane manouvering to join the tail of the formation.
Shape / Appearance	Square, long box-shaped fuselage, open at rear; narrow, swept back wings - more like narrow fins than wings, with little surface area to provide lift; heavy, rugged all-metal construction, resembling worn sheet aluminium; old-looking technology, not aerodynamic nor streamlined; no tail; no external engines; no ailerons; no cockpit; no markings; no armaments; no aerials or external appendages. Section 40 No recollection of shape of nose - can't think why not. Section 40 think the nose was slightly rounded." Neither can remember seeing a cockpit, pilot, escape canopy, probe, radar cone etc on the front.
Colour	Gunmetal grey / black, looking well used and not new. Not painted.
Direction	Heading South East, towards the centre of Ellesmere town, just a few hundred yards away.
Sound	Heard above car's diesel engine - passenger window open. Loud roar, but not sufficiently ear-splitting for 11 jet engines a few hundred feet away.
Smell	No smell of avtur or fumes etc, despite their close proximity and that our journey continued under their approach path.
Exhaust	No flames, vapour or sign of air turbulence from open rear of box fuselage.

Height	Flying say 150 ft to 300 ft above ground level. Very low, and approaching the built-up area of Ellesmere town.
Speed	Flying at say 100mph maximum - probably slower as they were in our sight for a few seconds, despite our view being restricted to a few hundred yards to front and rear because of adjacent trees.
Size	Small. Say less than half the size of a Harrier Jet.
Separation	Very close. Say 20 ft between planes.

UK Major Aeronautical Events near this time

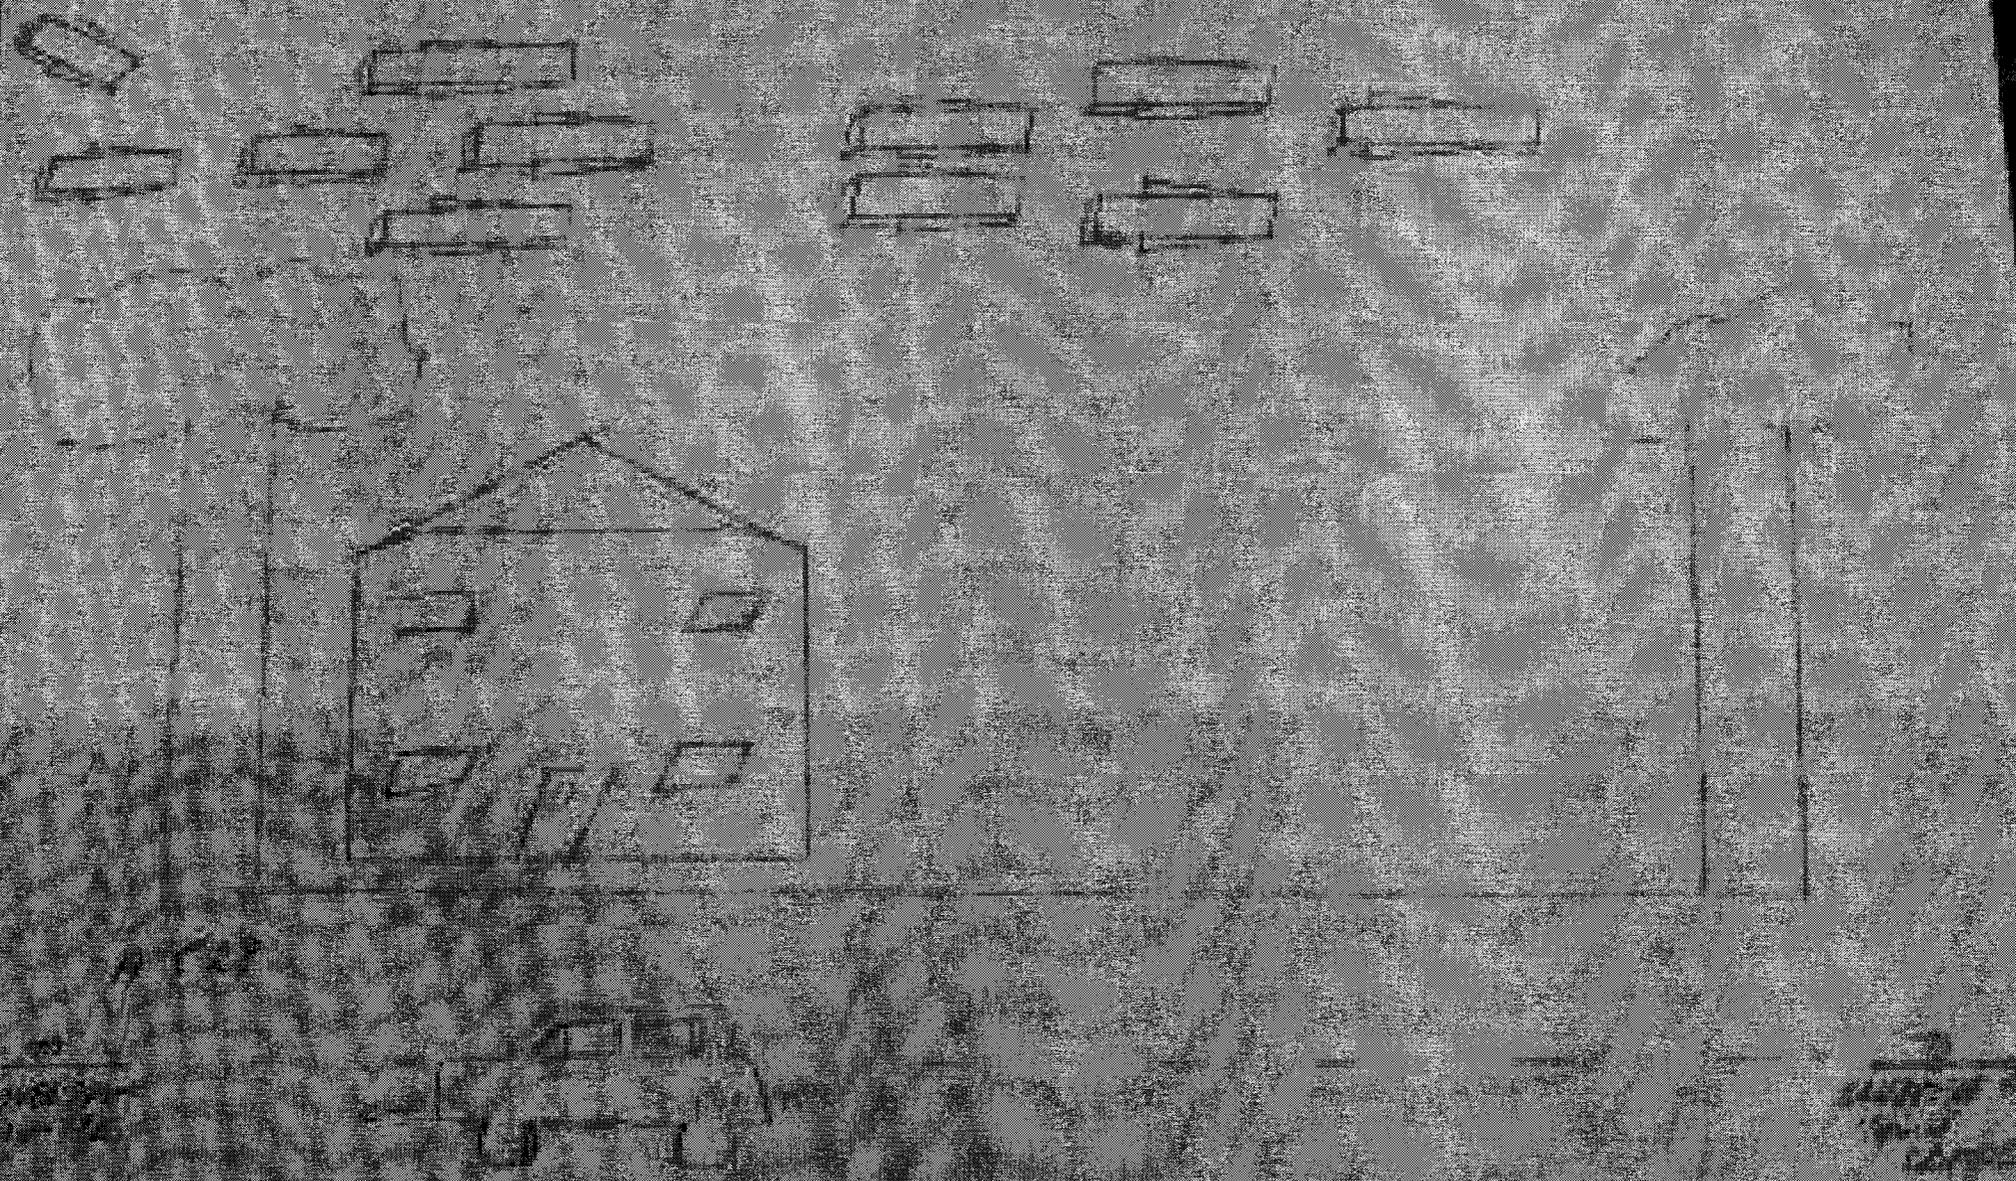

The Royal International Airshow at Fairford - approx 100 miles to the South East of Ellesmere - on 12th and 13th July has been cancelled for the first time in 38 years because of very heavy rain.
<http://www.airtattoo.com/>

The Farnborough International Airshow is being held from 14th to 20th July 2008. Farnborough is approximately 170 miles South East of Ellesmere. See <http://www.farnborough.com/>

The Royal Air Force's Aerobatic Team, The Red Arrows, whose planes look nothing like the ones we saw, are not listed as displaying at any public events on 11th July, but were due to fly at Fairford and Farnborough in the following days - see <http://www.raf.mod.uk/reds/displayinfo/july08.cfm> .

Section 40

From: Section 40

Sent: 27 April 2009 00:33

To: Air CmdSecCS-UFO Desk

Subject: ufo spotted. Includes date spotted. altitude approximate and the direction.

This UFO was spotted at 22:05pm on the 26th April 2009.

Direction of flight: Direction of flight came from the south 190 degrees heading 10 degrees north. It's speed began to slow and then speed up again. A slight S shape flying movement could be seen but was hard to confirm that movement. It's direction began rotating to a 20-30 degree angle heading in that direction for around 60-90 seconds before finally changing direction again to a sharp 90-110 degree angle heading east across the north sea until it was out of eye sight.

Altitude: Very high approximate 15-30 Miles in altitude.

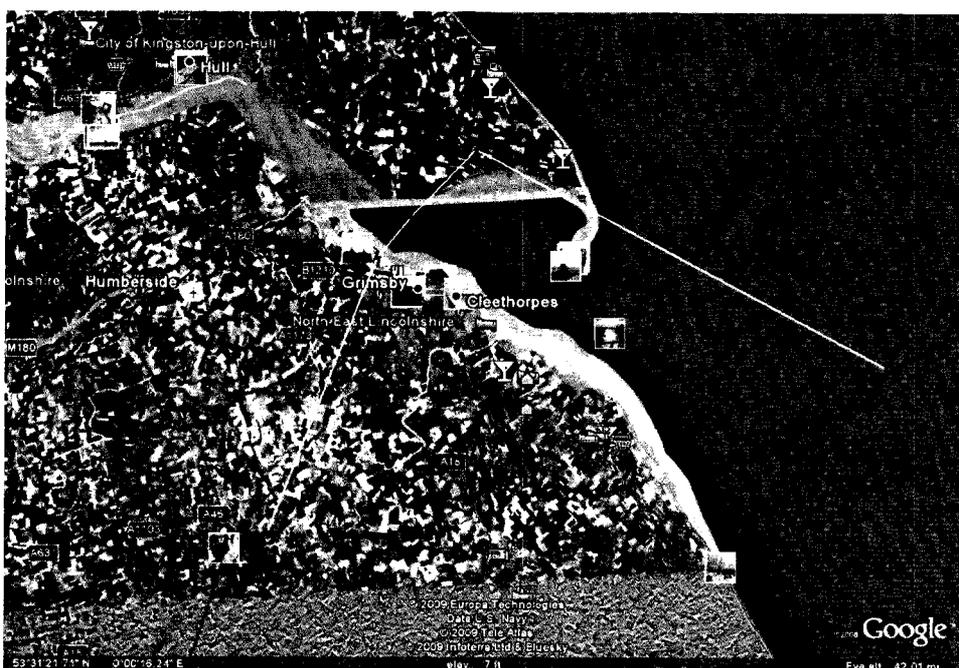

Size: Can not confirm size but it could be seen with the naked eye and appeared slightly smaller than some of the more distant stars in the sky however of course the stars are a lot further away so the UFO will not have been anywhere near the size of a star. The size could have been fairly small but the white glow of light could be seen with the naked eye.

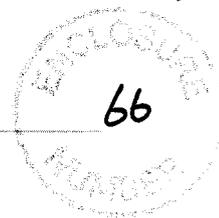

Its appearance: Looked like a star or a satellite. However satellites and stars do not move as radical as this did and do not changed direction during mid flight.

How many were seen: 3 within 20 minuets. Only 1 could be confirmed as a UFO the other 2 did not move as radical as the 1st one.

Speed: I calculate cruising speed may have been around between 1500 MPH and 2500 MPH. The speed of the UFO slowed slightly from the original cruising speed to approx 800 MPH for a few seconds before speeding up again quickly to it's original speed.

I have included a Map below which shows the area in which it was seen and I have carefully drawn an accurate Flight path of the UFO before it could not be seen any longer as it was moving across the north sea.

txtrequest: Hello,

Do you have information on the strange lights over Mickleover, Derby around 9.30pm on monday 13th april?
My girlfriend called me out as she put the rubbish out and we saw that there were two orangy lights quite near to each other and seeming to move towards each other. Not long after, what seemed like a ball of flame, lower in the sky, came from another direction, towards the other two at some speed but made no sound. The other two lights seemed attracted by this. All three lights were stationary for a while before disappearing into the distance. About 5 minutes later an identical 'fireball' came from the same direction, and the same speed before stopping where the other lights had been. It then also sped off into the night. It was almost like the flames from a hot air balloon.

Regards,

7-4-09

Dear Sir,

On 9th July 2008 at about 10-45 PM I spotted a blue flashing light in the sky which I at first thought was an aeroplane. I thought it was strange to be able to see it as I had just returned from walking the dog and it was pouring with rain and there was very low cloud. As I watched, I saw four or five blue lights appear to come down one after the other from the original blue light. I then went upstairs to see if I could get a better view, I had only been at the window for a few seconds when to my surprise a blue light which appeared to look like a torch light flew between the two houses opposite mine at the back. This light was then obscured by a tree. Then, to my astonishment, a long narrow blue object with blue lights which seemed to be about two feet long flew slowly and sideways into the garden opposite mine. I waited for a while, but didn't see anything else.

Could you please let me know if anyone else reported seeing anything or if there is a simple explanation as to what this was.

Yours Sincerely

Our Ref: UFO Report

23 April 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 22 April 2009 over Basingstoke, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Basingstoke for 22 April 2009.

I am sorry I could not be more helpful.

Yours sincerely,

Section 40

Our Ref: UFO Report

23 April 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 19 April 2009 over Liverpool, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Liverpool for 19 April 2009.

I am sorry I could not be more helpful.

Yours sincerely

Section 40**From:** **Section 40****Sent:** 22 April 2009 10:59**To:** **Section 40****Subject:** Release-Authorised: 20090422-UFO report **Section 40** M23/M25Dear **Section 40**

Thank you for your e-mail of 16 April 2009 asking about an object you saw in the M23/M25 area on 1 September 2008.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

You may be interested to know that details of UFO sightings received by the MoD for the period 1997-2008 are available for viewing on the MoD website www.mod.uk by searching under "UFO Reports". With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings from that part of the UK for 1 September 2008.

I am sorry I could not be more helpful.

Subject: 1st Sept. '08 - Sighting of Ariel oval object seen accelerating at colossal speed near Gatwick'
Attachments: UFO Sighting 1st Sept jpeg.jpg

To Whom It May Concern

A copy of an email to Section 40 and forwarded as advised to your department for review and considerations.

Please advise regarding any provable explanations, that may be supported as a known identified Ariel terrestrial vehicle of unusual profile and shape descriptions that accelerated from an expected commercial flight speed to incredible high speeds that is beyond most publicly viewed manoeuvres.

Sincerely,

Section 40

Email Copy:

"Anyway, with reference to what I saw on my trip to Gatwick on Monday 1st September 2008, here is my account of what took place.

I was en route to collect my neighbour's wife and children from her return trip from Toronto. Her time of arrival was 11am, I was advised by my neighbour that I should plan to be there about 11.30am, although I wanted to be a little earlier on arrival for parking and a coffee, but found myself running late after getting to grips with a new Satellite Navigation system and moments of slow motorway traffic.

At about 11.05am I was still travelling south, somewhere from the M25 to the M23. I would have to provide a 'guesstimate' of my rough location after tracing my route and being some 20-25 minutes away from Gatwick Airport itself and on the M23 southbound.

Because I was working with a brand new Sat Nav system I could not immediately identify my spot location from the map view (I had a Navman which was in a planned route mode and gave a limited view of where I was). But I think I was on the M23 not too far from the M25 junction .

It was raining to some degree, I had my windscreen wipers operated and car windscreen was clean and without mist with car air-con functional (I drive a Volvo V70). I was in the central lane paying attention to driving hazards and traffic progression (this being skills learnt from the Institute Advanced Motorists standards and police driving standards), basically scanning from horizon to car bonnet and back to horizon taking into account all traffic and it's local environment.

17/04/2009

●times I would glance in to the sky to try to get view of flights in bound to Gatwick and an idea of my closeness to destination. It was at this point soon after I saw a flash and bright light in the sky and immediately associated it with a plane or helicopter (where I live in Waltham Abbey gives a regular view of commercial type flights and helicopter flights as a Met police helicopter landing site is near my house about 1 mile. I waited to identify either a jet plane or helicopter. The bright light stopped and (I expected to see the plane or helicopter) allowed a side profile to be viewed as the air-borne vehicle travelled from left to right.

At all times I continued to have casual peripheral vision on the motorway traffic which was continuous and regular. I continued to watch the sky not thinking anything unusual and then this oval shaped object (I now realise it could only match a helicopter in it's side profile was missing it's rear tail), accelerated at a colossal speed, faster than any aircraft I have or been aware of accelerating before and base this on attending airshows as a child and even seeing jet fighters fly over my junior school when a child in Loughton, Essex on the 1970's which included the sound boom.

This unusual oval shaped Ariel vehicle, after accelerating, just vanished out of view. It was quite small in size and appeared to be below cloud cover, but I cannot say categorically. Until it disappeared it was constant and visible and perhaps 1 mile away, but this is hard to say. Overall, this incident lasted for about 5 - 10 seconds. Once it had disappeared, I had limited time to re-assess it's location as my road position changed and meant I had to look to my right and through my driver's door window.

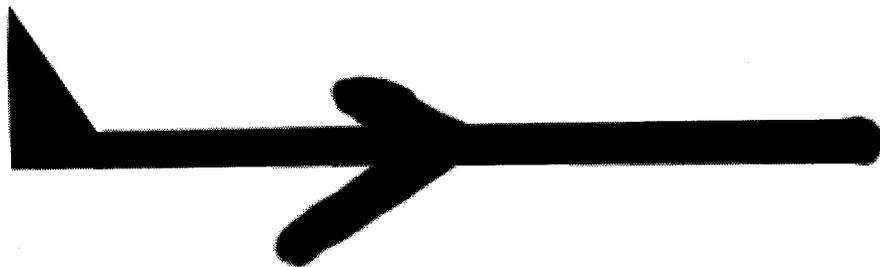

I have not reported this to MOD, for a limited information feedback reason, I have been aware of such matters in the past as I have paid casual attention to this interest since the mid 1990's (during my time in the Met Police) and relevant book releases and programmes.

I would be happy to discuss this further if necessary.

Regards,

Section 40

Hand drawn side-profiles (using photoshop) for comparison against my sighting report 1st September 2008, approximately 11.05am en route to Gatwick Airport on the M23 travelling south some 25 minutes before arrival. Sketches have been compared to other airborne 'known' terrestrial sightings seen locally from Waltham Abbey over the Epping Forest countryside. Section 40

commercial jet

helicopter - (note: its rear stabilizing 'tail' can be seen at distance side on until the helicopter disappears from sight flying at a side angle or or slight side angle - flying directly away from observer reduces view of stabilizing tail)

Unknown/Unidentified Flying Object as described seen at a distance flying from left to right, first observed by a flash, moving horizontally left to right and then accelerating faster than any observed flight vehicle a short distance before disappearing immediately from sight.

Please note these comparisons are a rough guide to size, given distance and height variables from ground observations, but the sketch profiles are as seen and remembered as shown.

To: Air CmdSecCS-UFO Desk
Subject: sighting - 19/4/09

Dear Sir/Madam,

I wish to report a sighting of two red to orange in colour lights in the evening sky of 9 April, 2009. I checked my blackberry clock on coming in and it showed 21.26. The sighting went on for at least three minutes after my mother, who i have been staying with for the weekend, called me outside from reading the paper. The two lights were in parallel at all times but at varying distances and speeds from stationary in position to moving from the south west sky towards the west of Liverpool. I hope for a reasonable explanation but feel I should raise it. My mother and I have separately recorded the information of our experiences to paper without discussion.

Best wishes, Section 40

Our Ref:
UFO Report

16 April 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 8 April 2009 over Leeds, details of which have been passed to us by West Yorkshire Police. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Leeds for 8 April 2009.

I am sorry I could not be more helpful.

Yours sincerely

Hi,

I'm sure you must get so many reports of UFOs, but I thought you might be interested in my experience tonight.

I can't quite believe what I saw tonight, but it made me rush out onto the street camera in hand.

I was very sober when I saw what I am about to describe. Until recently I was a journalist and we used to get similar stories like this from time to time which we would all have a good laugh at (not any more!)

I was sitting on the couch when I saw an orange light in the sky. My initial thoughts were 'that plane is flying low' and I went back to watching TV.

However, five/ten minutes or so later I couldn't believe it when I saw several orange lights - about the same colour and brightness of street lights - about half a dozen in total.

Three of them were closer together than the others and were in a straight, but horizontal line.

I shouted upstairs to my boyfriend, who also witnessed the incident.

I then told him I was getting the camera before running outside - with no shoes on! (the neighbours must think I'm mad).

Unfortunately my camera is not great, but I have attached the pictures anyway in the hope you can enhance them. On the one marked UFO 001 you can see a round shape, which was not visible to the naked eye and only appeared when I blew up the photo. I believe it may show the three lights in a horizontal line I described earlier.

The whole incident could have only happened over a couple of minutes, maybe less.

The lights seemed to fade away, except one which I saw go behind some houses and I followed it a short way down the street on foot before it also disappeared.

The incident happened around 9.20pm today (Saturday 11 April, 2009).

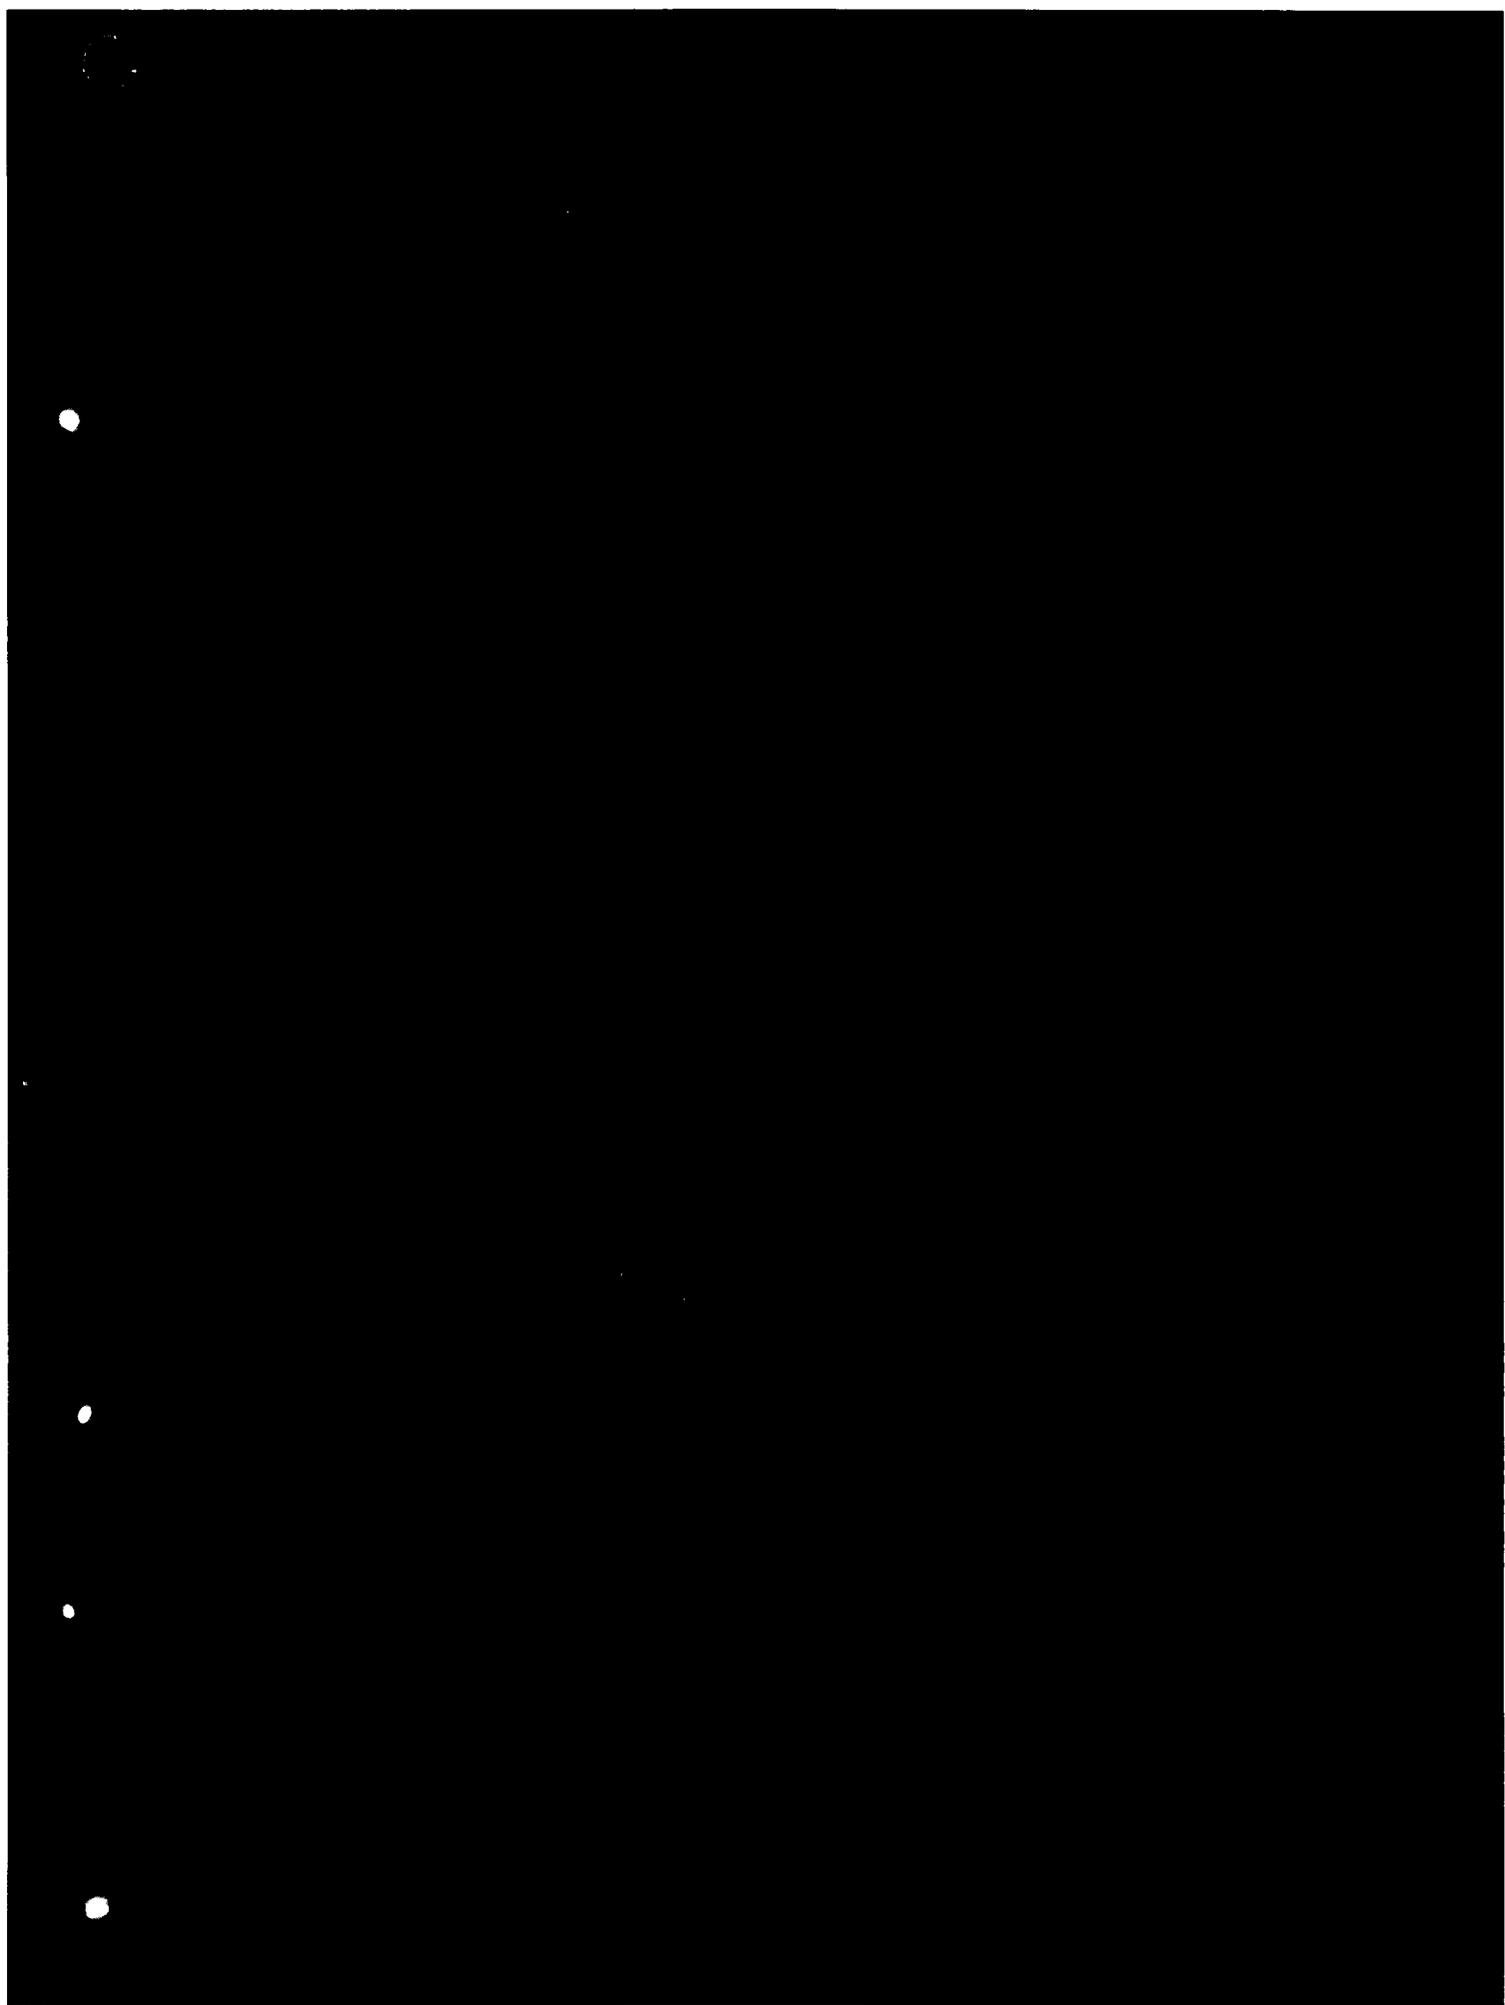

I live in a village called Section 40 which is in Chesterfield, Derbyshire.

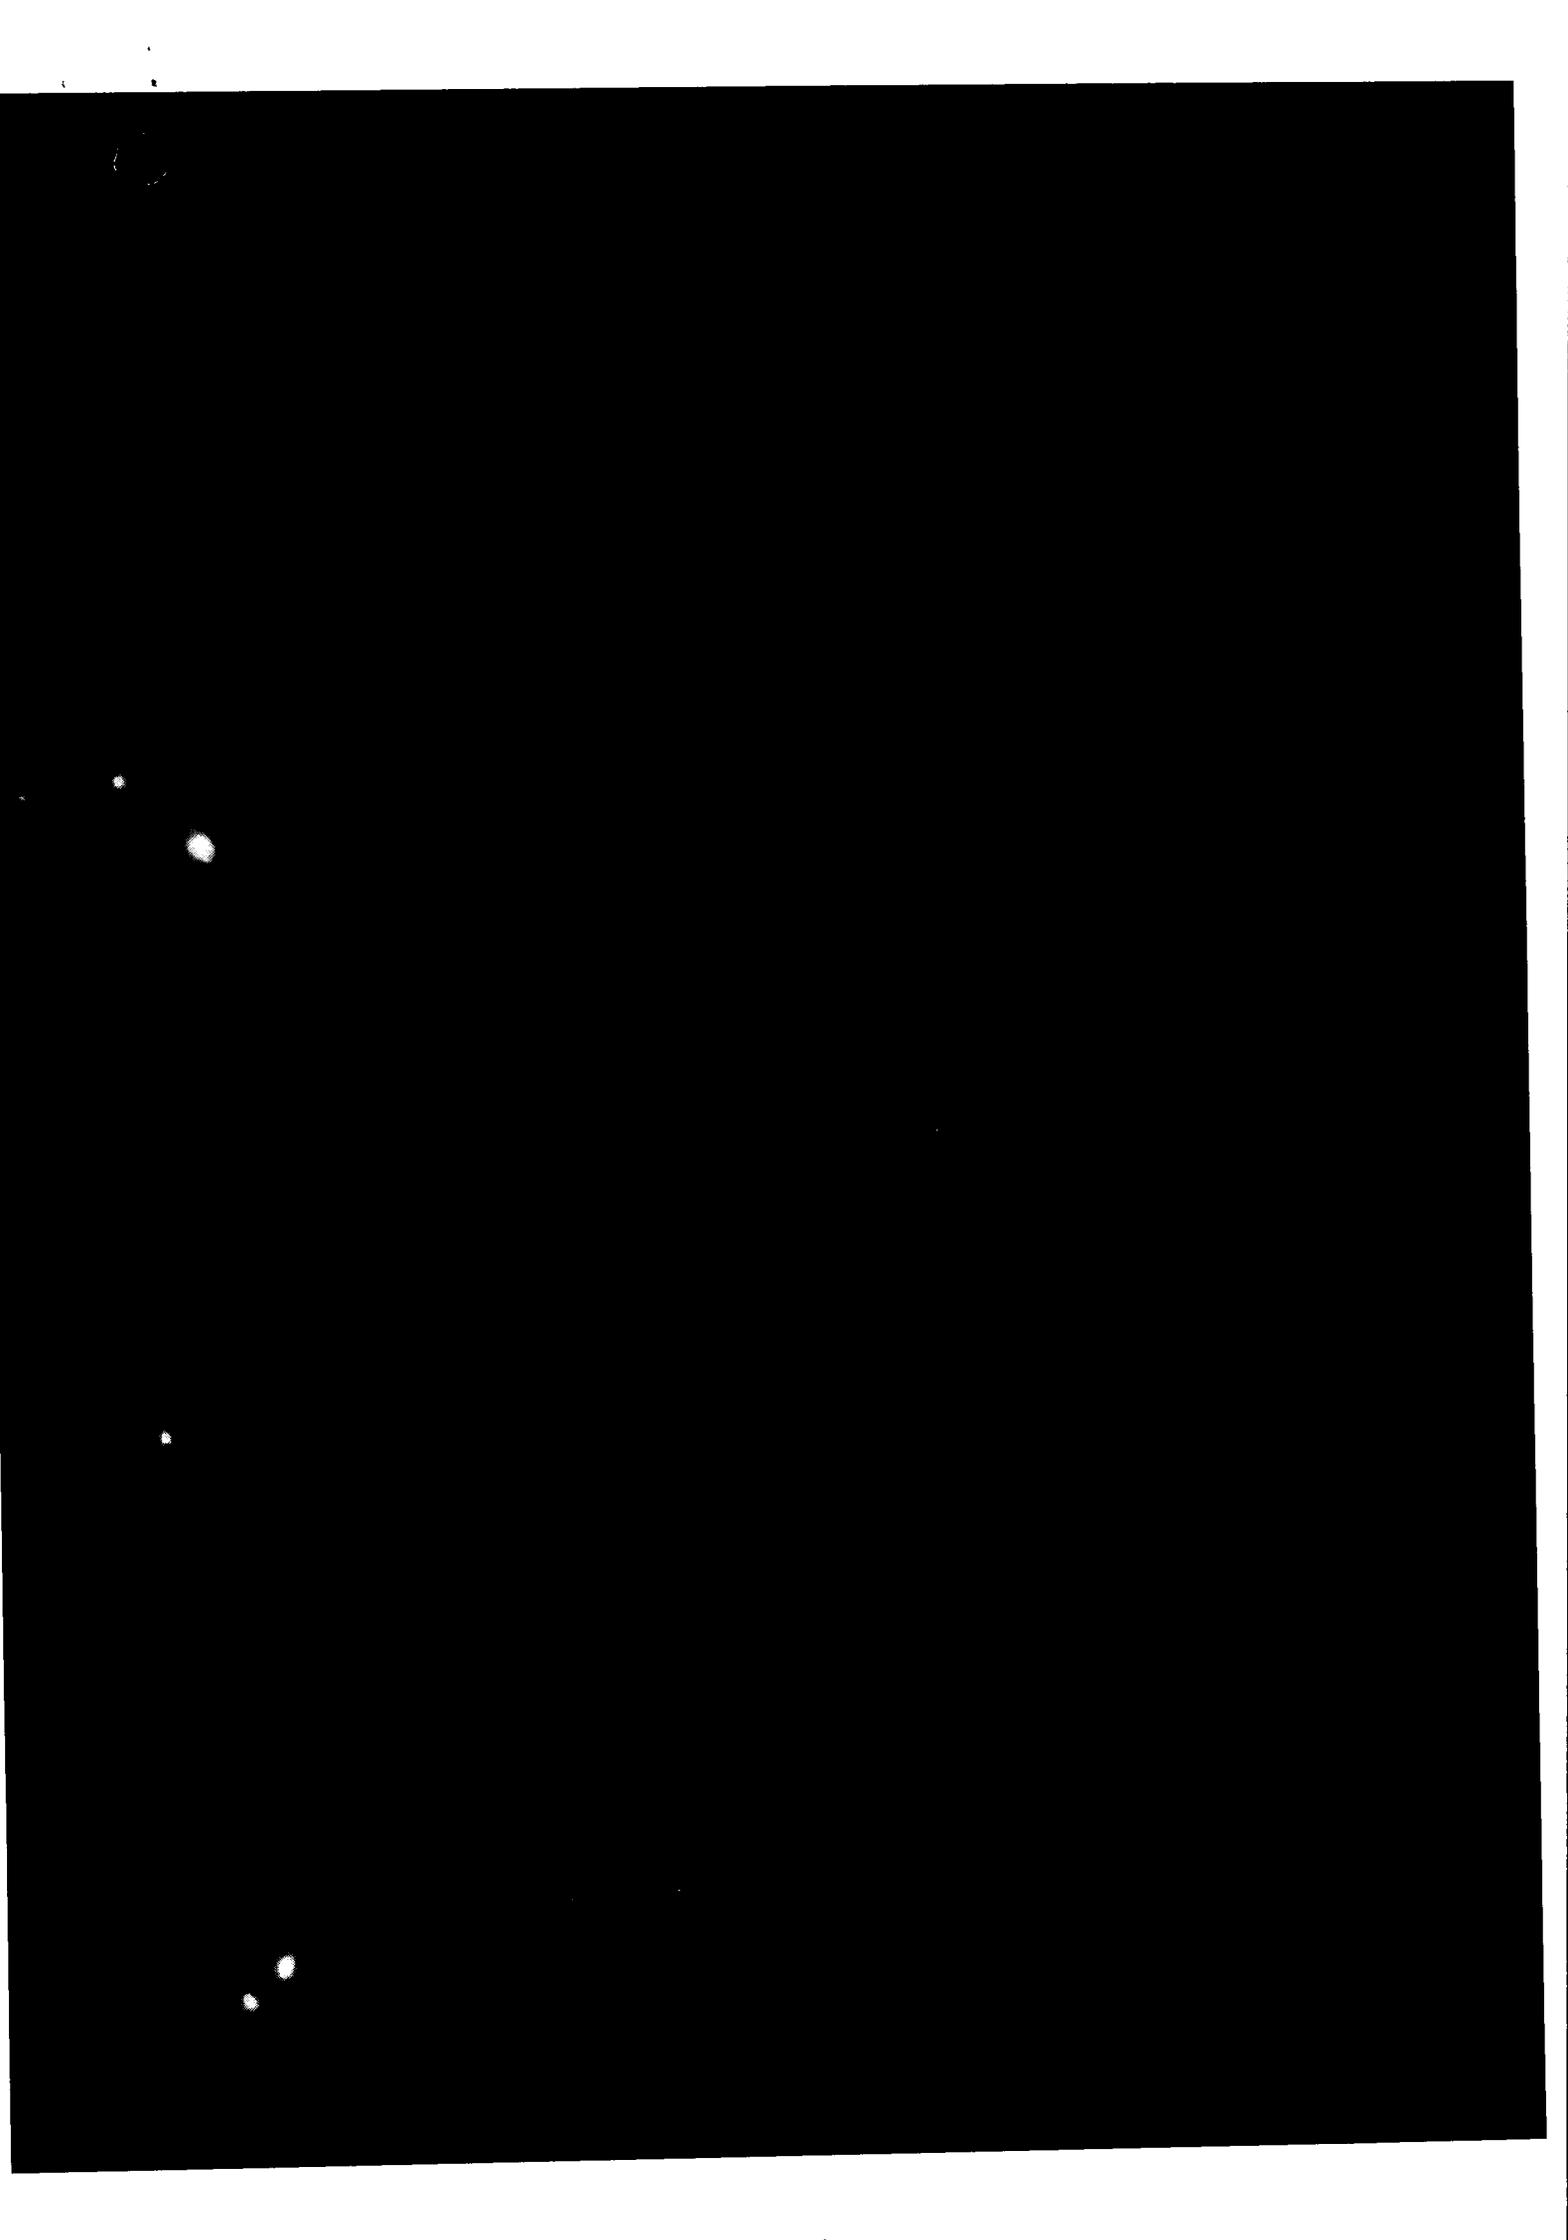

I would be interested in knowing if anyone else saw what I have described and if any explanation can be given.

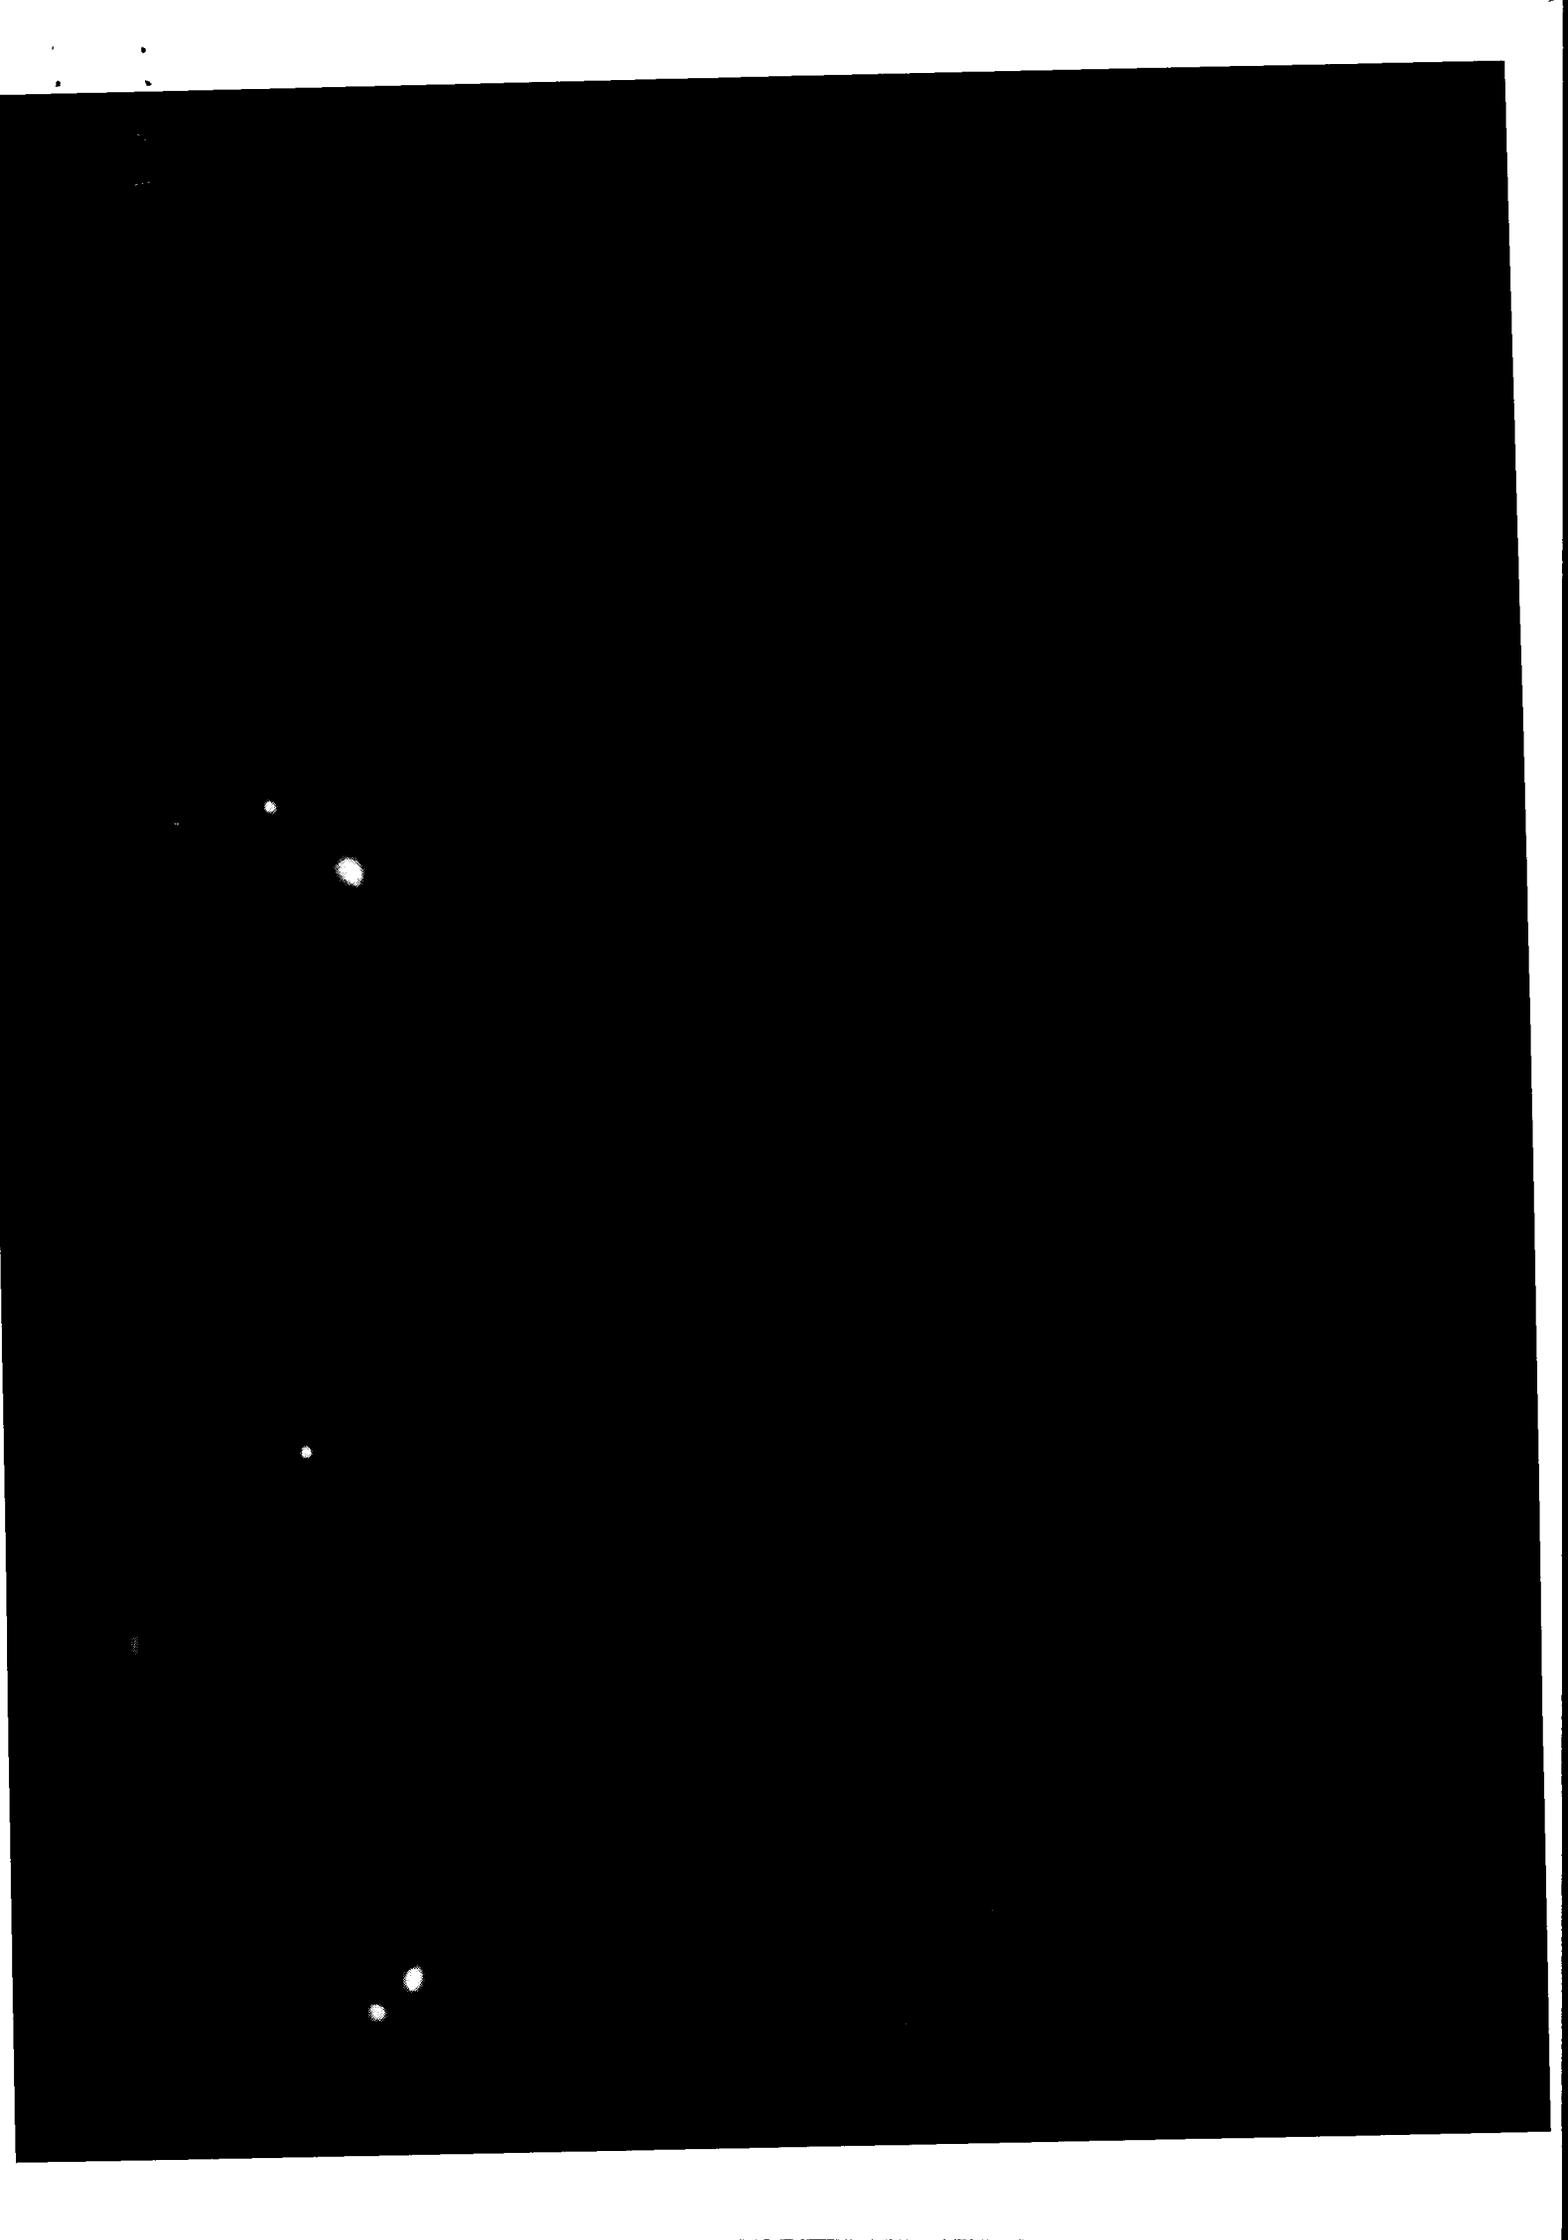

Thank you

This office is the focal point within the Ministry of Defence for correspondence relating to UFOs. Unfortunately, you did not leave your name and therefore I am unable to address this letter to you by name, for which I apologise.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Hessle for 6 April 2009.

I am sorry I could not be more helpful.

UFO Report

7 April 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 17 March 2009 over Portsmouth. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Portsmouth for 17 March 2009, which, given the time of day you saw the light, is perhaps not surprising.

I am sorry I could not be more helpful.

Yours sincerely

Subject: Sighting

Friday 27-03-09 at about 4:10pm in Walthamstow London, Driving home from work I had a sighting. At first I thought I saw three white birds circling in the sky. I soon realised that these were not birds as they were too far away and too large. As they circled they were dipping in and out of the clouds. These objects were too fast to be aeroplanes and continued circling. They could have been a light source or they could have been reflecting light. Cannot remember exact shape as all happened too quickly. Possible small tail of light underneath each one at a slight angle away from the direction of the objects travel.

My sighting was breathless as I turned a corner and drove through a built up area hoping to catch a glimpse later on my journey but this was not to be. I should have stopped the car to get a better look.

Any idea what I might have seen?

Have you received any other reports that might tie in with this sighting in terms of time or location.

Hope to hear from you

Regards

Subject: Sighting in Godalming, Surrey, UK: 25-03-09

To whom it may concern,

I hope that this is the correct place to make such a report, as I have not done so before. I was recently witness to an airborne object that, for the first time in my life, I could not explain via my own knowledge of conventional aircraft. I have been unable to find anyone to corroborate what I saw, but considering the time and location of my sighting, I can't believe I am the only witness.

I have used Google Earth to obtain accurate headings for the object I saw, and a simple triangulation based upon my angle-of-sight to the object to estimate its altitude.

I hope that this account of my sighting is of use to the MoD,

Regards,

Section 40
Godalming, Surrey.

Date: 25-03-09:

Time: 20.25pm

Location: Approximately 2000ft above Godalming.

At 20.25pm on Wed 25th March 2009, whilst walking along the A3100 near Hallam Road (toward Guildford), a very bright spherical object, about the size of a full-moon in sky, passed overhead travelling on a course of approximately 130 degrees (south-east). The object was yellow/orange in colour with just-discernable flashing lights, which I initially took to be the anti-collision beacons and navigation lights of a small aircraft. As it was heading roughly toward Dunsfold Aerodrome, I thought perhaps the pilot had turned on his landing lights, or was maybe flying some kind of aircraft that was highly illuminated for some reason (Top Gear is filmed at Dunsfold, and they get up to all sorts). However, there was no noise from the 'aircraft' whatsoever and it looked strange - the light was very vivid and yet changed as the object moved, as though whatever was within was wrapped in a bright glowing cloud of light. The light also appeared to have quite defined edges, as opposed to aircraft landing lights which would 'diminish' with distance from the aircraft. The object was not a balloon however, as it was far too bright and moving too quickly.

It continued on its heading for roughly 90 seconds, moving toward Hascombe. I kept watching it whilst walking, and saw it suddenly plunge out of the sky. My best estimate is an altitude loss of around 1500 ft in perhaps five seconds. At this point, just above the treeline in the distance and somewhere over Hascombe, the object abruptly arrested its dive and hovered motionless. (It was here that I was finally convinced that the object was not an aircraft, as no aircraft can manoeuvre in this way. A Harrier or helicopter do not have sufficient thrust-to-weight ratios to simple stop dead from such a dive).

Ater hovering for perhaps 30 seconds, the object drifted slowly to the right (west), then climbed before performing a very erratic series of dives, dips and turns, movements completely beyond the capability of any conventional aircraft - almost 'wobbling' along through the sky. It

03/04/2009

turned to around 2000ft after about 30 seconds, before slowly fading from view as though its lights were slowly turned off.

I have never before seen something that could not ultimately be explained to my satisfaction with a bit of thought and analysis. My only regret in having seen something like this is that there were no other witnesses - by the time I managed to get a grip on myself and phone my girlfriend on her mobile to look out of her window (her living room faces out over [Section 40](#) toward Hascombe) the object was already fading from view. I tried to stop a passing jogger, but he just kept on moving. However, given the sheer size and brightness of the object, and its passing over Farncombe, Godalming, Hascombe and most likely Dunsfold Aerodrome, I can't believe that I'm the only person who saw it.

Windows Live just got better. Find out more!

Dear Section 40

Thank you for your e-mail of 12 March 2009 reporting strange orange lights in the Spalding/Deeping area on 10 March 2009 at 22:10pm. You asked whether there was any low flying in the area at the time.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

Turning to the specifics of your report, I can confirm that we have no record of any military aircraft being in the UK Low Flying System at the time of your sighting, and I would therefore very much doubt that the lights were caused by military activity. I should also add that we have received no other reports of UFO sightings so far from the Spalding/Deeping area for 10 March 2009.

I am sorry I could not be more helpful.

Our Ref:
UFO Report

30 March 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 28 March 2009 over Torquay, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Torquay for 28 March 2009.

I am sorry I could not be more helpful.

Yours sincerely

Message 4 of 21

Hi,
I'm not really sure if you are the right person to contact about this,
but my wife and I have just sighted a UFO.

Date: 14/03/09
Time of sighting: 20:40
Location: Grimston, King's Lynn

The object was traveling in a east/southeast direction. It was between 700 -1000 ft elevated. It had a extremely bright red light shining down (I even thought it was a firework to start off with, the light was that bright). The light was constant. There was NO noise coming from the object (such as engines). It was difficult to make out the shape of the object as the light was obstructing it. I also cannot determine the speed, however it was visible to us for about 2 minutes.

Sorry if I sound a bit looney, but I was wondering if you could help?

Many thanks,

[Section 40]

UFO Report

25 March 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 24 March 2009 over Bridgend, details of which were passed to us by the South Wales Police. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Bridgend for 24 March 2009.

I am sorry I could not be more helpful.

Dear Section 40

I am writing with reference to your e-mailed report of an 'unidentified flying object', seen on 14 March 2009 over King's Lynn. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from King's Lynn for 14 March 2009.

I am sorry I could not be more helpful.

UFO sighting
Grimston, King's Lynn, Norfolk
Saturday 14th March 2009
8.40pm

My wife and I witnessed the following on Saturday evening.

An object was travelling in a east/southeast direction. It was between 700 -1000 ft elevated. It had a extremely bright red/orange light shining down (I even thought it was a firework to start off with, the light was that bright). The light was constant. There was NO noise coming from the object (such as engines). It was difficult to make out the shape of the object as the light was obstructing it. I also cannot determine the speed, however it was visible to us for about 2 minutes. It travelled in a constant line and is possible it picked up speed as it vanished from view.

UFO Sighting Report

11 March 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 6 February 2009 near Mealrigg. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Cumbria for 6 February 2009.

I am sorry I could not be more helpful.

FILE COPY - PHOTOCOPIER NOT WORKING

UAP/UFO SIGHTING REPORT.

For Air Sec. 2a.

6/2/2009 : approx. 17.30.

Duration: approx. 5 mins.

Weather: fine; > 15 miles visibility; wind speed < 1 knot; cloudless to horizon; temp. approx. freezing; moon and Jupiter (latter 180 deg. from object) clear/no distortion.

Direction of first sighting approx. ENE of witness, last sighting approx. 90 deg. in WNW direction relative to witness position; speed estimated at less than 15mph.

Distance to object approx. 1 mile at first sighting and approx. 15 deg. above horizon; object appeared to follow vertical contours of land, i.e. gentle undulation; course appeared to be a straight line, i.e. no horizontal deviation apparent.

Object was a clearly defined (no diffuse edges), shiny (reflected light only, no evidence of light emission from the object), silvery, metallic cylinder with rounded ends and, when compared to sizes of trees in approx. vicinity of object, was roughly 50 feet in length. No distinguishing features other than a small area in the lower midsection that appeared slightly darker/matt relative to the rest of the body and a small, solid protrusion on the upper 'rear' body (relative to direction of flight) – stated as not looking like an aircraft tail (wrong shape and too small to be an aerodynamic control surface - witness used to civilian and military aircraft types): no markings of any kind and no lights. No sound from object, nor emissions seen (exhaust, etc.), though high flying aircraft could be faintly heard shortly after the sighting in the opposite part of the sky to said sighting and at far greater distance than the object (the witness lives under the main high altitude civilian north-south air route and the low altitude military corridor, sounds from the latter can be heard for many miles, even in windy weather). At last sight it was seen almost from directly behind, remaining shiny/metallic, clearly defined, having no protruberances (no sign of horizontal tail or wing structures – the 'rear' structure seen from the side was sufficiently small/blunt that it barely appeared above the rim of the body), no rear apertures (exhaust nozzles) and again no signs of exhaust, or atmospheric distortion/turbulence noted: the rear was circular in shape (e.g. rear end of a uniform, closed cylinder).

Location of sighting: first seen in the area between Mealrigg (postcode of which is **Section 40**) and Langrigg and finished by heading in rough direction of Silloth, Cumbria. Witness location was field to SE of **Section 40** (200 yards from house) – interviewer taken to exact site and details pointed out.

Conclusion of witness (aged 25) and interviewer (father): solid craft under control bearing no similarity to any known terrestrial aircraft and exhibiting an ability to maintain a constant height above the ground at a speed which would not allow any normal propulsion system or aerodynamic structure to maintain lift, other than such as VSTOL type aircraft and balloons (both definitely ruled out). Definitely not astronomical or meteorological phenomenon. [Sketch of craft provided by witness –

side view: height/diameter appears from sketch to be approx. 1/5 or 1/6 that of the length.]

Witness: Section 40 [REDACTED].

Interviewer: Section 40 [REDACTED]

Section 40 [REDACTED] Aspatria, Wigton, Cumbria CA7 3LE.

Hello,I would like to report a ufo sighting over bolton. We live in an elevated bungalow in Dunscair Bolton which has a large bay window in one corner with panoramic views over the Bromley Cross area of Bolton. At 1.30am on the 8/3/2009 while sitting in my living room with my parents I noticed something through the window. I saw what at first appeared to be a large airliner in flames crahing to the ground. My parents were terrified. We all went to the front door. Just as we were expecting the object to crash into the ground it stopped and hovered over Bromley Cross. The object then appeared to come towards us,stop suddenly and at high speed shoot off in a south easterly direction towards Bury,Greater Manchester. Before dissapearing from view the object appeared to hover in the distance for approximately 1 minute. The object can be described as a large fireball but with an oblong shape.

Hello, I would like to report a sighting of an object flying across the sky above Barrow-in-Furness, Cumbria, at 18.50hrs 10 March 2009.

The object was travelling from northwest to southeast.

Flying at the speed of a fighter or faster more the speed of a satellite.

the whole object looked to be glowing like hot metal and there was no sound at all.

Looked to be flying quite low, although I could not estimate the height.

This sighting was also observed by my son, we have never seen anything like this before.

Our Ref:
UFO Sighting Report

09 March 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 05 March 2009 over Selby, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Selby for 05 March 2009.

I am sorry I could not be more helpful.

Tom Mincey

Our Ref:
UFO Sighting Report

9 March 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 22 February 2009 near Chepstow, details of which were passed to us by Gwent Police through Cardiff Airport. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Chepstow for 22 February 2009.

I am sorry I could not be more helpful.

Yours sincerely

REPORT OF UNIDENTIFIED FLYING OBJECT

- A** Date, Time and Duration of Sighting - Local times to be quoted.
01.10 22.02.09
- B** Description of Object - Number of objects, size, shape, colours, brightness, sound, smell, etc.
SINGLE OBJECT, SIZE OF A LARGE CAR, SILVER WITH "FLAMES" PUCKERING FROM THE UNDERSIDE
- C** Exact Position of Observer - Geographical location, indoors or outdoors, stationary or moving.
ON THE A466 'LINK ROAD' RANDBOUT, CHEPSTON
- D** How Observed - Naked eye, binoculars, other optical device, still or movie camera.
BY EYE. PHOTOGRAPHS WERE TAKEN
- E** Direction in which Object was First Seen - A landmark may be more useful than a badly estimated bearing.
A466 CHEPSTON, CHEPSTON COMMUNITY HOSPITAL, TOWARDS MANMOUTH/GOULCESTER
- F** Angular Elevation of Object - Estimated heights are unreliable.
LOW
- G** Distance of Object from Observer - By reference to a known landmark wherever possible.
UNKNOWN
- H** Movements of Object - Change in E, F and G may be of more use than estimates of course and speed.
STATIONARY, THEN MOVED UP AND AWAY
- J** Meteorological Conditions During Observations - Moving cloud, haze, mist, etc.
DRY AND CLEAR
- K** Nearby Objects - Telephone or high voltage lines; reservoir, lake or dam; swamp or marsh; river; high buildings, tall chimneys, steeples, spires, TV or radio masts; airfields, generating plant; factories; pits or other sites with floodlights or other lighting.
RIVER SEVEN, CHEPSTON COMMUNITY HOSPITAL
- L** To Whom Reported - Police, military organisation, the press, etc.
POLICE - REF 207/26.2.09
- M** Name and Address of Informant
Section 40 [REDACTED] CHEPSTON Section 40 [REDACTED]
- N** Any Background Information on the Informant that may be Volunteered
—
- O** Other Witnesses
—
- P** Date and Time of Receipt of Report
26.02.09 15.00

The details are to be telephoned immediately to AIS (Military), LATCC on **Section 40** [REDACTED]

The completed form report is to be sent by the originating air traffic service unit to the Ministry of Defence Sec (AS), RAF Main Building, Whitehall, London, SW1A 2HB.

Subject: Release-Authorised: 20090305-UFO report Section 40 Nottingham-U

Dear Section 40

I am writing with reference to your e-mailed report of a swarm of lights, seen on 1 March 2009 over West Bridgford, Nottingham. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have a central record of all military aircraft activity and we could only categorically state whether the lights were caused by military flying at a disproportionate cost as we would need to contact every flying station in the UK individually to find out. Whilst we do have a centralised record of aircraft entering the UK Low Flying System, this system was closed on the day in question. However, given the number of lights you saw, I think we can rule out them being caused by military aircraft. We have received no other similar sightings so far from Nottingham for 1 March 2009.

I am sorry I could not be more helpful.

txtrequest: At 20:15 on Sunday 1st March 2009 I was in my back garden in Section 40 Nottingham, with my 14 year old son looking for Comet Lulin, looking South West towards the constellation of Leo.

Suddenly a swarm of about 100 flashing white lights appeared, high in the sky, moving from the North West very quickly keeping equidistant and of equal speed, and disappearing about 45 degrees above the horizon in the South East. A solitary flashing light appeared behind the swarm and moved faster, apparently trying to catch up. The swarm of lights moved in an arc of about 40 degrees in about ten seconds.

Both myself and my son saw this phenomena. We have no idea what it was. It could be a meteor shower or space debris but the lights appeared to be blinking quite quickly and all at the same frequency. It could be a squadron of planes but there were approximately 100 lights covering a wide path (about 20 degrees) and I have never heard of squadrons of this size flying in peacetime. There were no trails as one would expect with meteors. The lights appeared about the same size and brightness as a bright star.

Do you have any explanation, was there any MoD activity over Nottingham on Sunday night?

regards
